Defensible space to ground floor apartments

Biodiverse roof

Roof garden

Natural play features

Native wildflower and grass areas

Columnar tree planting

Pepys Way

Play/amenity space with seating, equipment and natural play features within an attractive landscape setting

Tree, hedge and shrub planting to soften built form and parking areas, and create attractive building entrances. Planting to include fruit and nectar producing species to enhance site biodiversity

Peripheral areas to be sown with a native species wildflower and grass seed mix to enhance site biodiversity

Hedge and shrub planting to provide defensible space and privacy for ground floor residents

Tree planting to provide privacy for garden of No 18

18 Broom Hill Road

Feature tree planting at entrance

Columnar tree planting for restricted spaces to soften built form

Climber planting to soften retaining wall

Native species hedge planting to fill gap at existing entrance

Attractive roof gardens provide communal amenity space, with seating and varied planting with year-round interest

Existing cliff face vegetation

Existing cliff face vegetation

Tree, hedge and shrub planting to soften parking areas. Planting to include fruit and nectar producing species to enhance site biodiversity

Communal amenity space for residents with seating in an attractive landscape setting

Bat mitigation area / dark zone around cave entrances. Sown with native species wildflower and grass seed mix, with closeboard fence and hedge planting to prevent unauthorised access, gated access

Hedge and shrub planting to provide defensible space and privacy for ground floor residents

54A Broom Hill Road

Existing cliff face vegetation

Biodiverse green roof with areas of native wildflower, sand beds, piles of stone and brick and log piles to provide foraging, shelter and habitat for birds, bats and insects. Variation in substrate depth will create structural diversity in the vegetation.

## Key landscape design principles:

- Create a safe, attractive, high quality environment for residents and visitors.
- Provide well-designed, integrated and accessible amenity spaces.
- Minimise impact on amenities of neighbouring residential properties.
- Use planting to help to integrate the proposed development into the local streetscape.
- Enhance site biodiversity.

PLANNING JUSTIFICATION - SHEET 1

# Privacy Justification

Block Plan 1:200

Existing view from bedroom 2

Existing view from annexe bed 2

## As Proposed

East - side elevation  
@ scale 1:50

The proposed development seeks to improve privacy between View Bungalow and Rainbows End.

Currently there exists direct overlooking between properties, from both Rainbows end balconies into the side facing bedroom windows of View Bungalow and from the side facing bedroom windows of View Bungalow into the amenity and pool area of Rainbows End.

The new design will remove the clear glazed side facing windows of View Bungalow. The rooms which are currently bedroom 2 and annexe bed 2 will become en-suite and utility room. The now smaller windows to these rooms will include obscure glass and fixed shut panels below 1.7m from finished floor level. There will be top opening lights for ventilation above 1.7m from finished floor.

The proposed first floor side facing Velux windows will have cills above 1.7m from finished floor level and will therefore cause no overlooking issues.

The proposed balconies to View Bungalow will include a 1.8m high obscure glass panel to ensure no overlooking occurs between properties.
