

Cabinet – Supplementary agenda No. 1

A meeting of the Cabinet will be held on:

Date: 29 March 2011

Time: 3.00pm

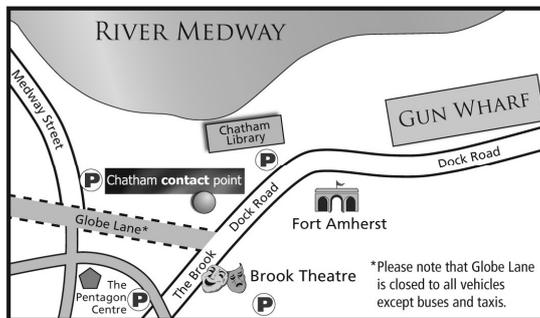

Venue: Meeting Room 2 - Level 3, Gun Wharf, Dock Road, Chatham ME4 4TR

Items

7. **Information Requirements and Validation for Planning Applications – Appendix 1** (Pages 1 - 408)

For further information please contact Wayne Hemingway/Anthony Law, Cabinet Coordinators on Telephone: 01634 332509/332008 or Email: democratic.services@medway.gov.uk

Date: 21 March 2011

This agenda and reports are available on our website
www.medway.gov.uk

A summary of this information can be made available in other formats from **01634 333333**

If you have any questions about this meeting and you want to speak to someone in your own language please ring **01634 335577**

NOTE: All information contained in this document is correct at the date of publication. It is likely that some requirements may change over time. Changes will be incorporated when the document is revised.

**If you require this information in large print, Braille, on
audiotape or in any other format, please contact us on 01634
331700.**

1. Introduction

This advice note sets out general requirements for the submission of planning applications within Medway. It is based on the previous advice note dated January 2008 but has been updated in response to changes in advice and legislation.

It explains the procedure that the council uses for deciding whether applications made under the Town and Country Planning Acts are valid when received by us. It also includes information on the national requirements listed on planning application forms and other general information about the submission of applications.. In addition to this advice note, checklists listing local requirements are designed to help you submit the correct information with your applications.

The note seeks to

- assist you in ensuring that your applications are valid when submitted,
- explain the various validation checklists that should be used when completing an application,
- ensure that all applications can be dealt with effectively and efficiently,
- respond positively to the best practice advice issued by government, and
- ensure that the council can comply with recent changes in legislation.

The checklist for each type of standard application form details the local requirements. For example, if you are submitting an application for a new housing development you will complete an application for planning permission and would need to consider whether an affordable housing statement should be submitted. The checklist does not tell you how much affordable housing your scheme should include. Advice on the amount of affordable housing can be found in the council's policy documents and other advice notes. The checklist will list the relevant policy drivers and links to further assistance. These are not exhaustive lists and the applicant should check and review all policy documents when submitting an application.

With each application you make we will expect you to supply the information required on the standard application form and validation checklist. This is not necessarily every item listed. The detail of the supporting information should be proportionate to the scale of the development. You will need to check each requirement for each application, as every site and application is different. If the information required by the validation checklist is not submitted with the application then the application will not be valid and will not be progressed to a decision.

Please read the document carefully before completing the application form and submitting your application. If you were submitting a complex or large scale application it would be

advisable to discuss and agree the information to be submitted with the application during pre application discussions.

Don't forget that planning, listed building and advertisement consents may not be the only permissions or consents you may need from the council. Other consents include building regulations, licensing, and food safety. More information on these and other consents and services of the council are available on our website www.medway.gov.uk/.

2. Can we require so much information?

Law requires some information and a fee when an application is submitted. In addition, current national regulations give planning authorities the power to require applicants to provide additional information in the interests of good and efficient decision making.¹

Different types of applications will require different levels of information and supporting documentation to be submitted. The Department of Communities and Local Government has published guidance² recommending that local planning authorities specify the scope of information necessary to enable them to determine different types of applications. This is the purpose of this advice note and the validation checklists for each application type.

The validation checklists have been the subjects of public consultation in accordance with the above mentioned guidance.

3. Common reasons why applications are invalid

The most common reasons why applications are not valid when received are

- supporting documents that omitted information specified in the guidance notes accompanying the planning application form and/or set out in national guidance, the statutory development plan or supplementary planning guidance;
- submitted drawings did not show sufficient details as specified in the guidance notes or were inconsistent;
- one or more plans missing;
- description of the development is wrong;
- design and access statement missing;
- different application addresses on the forms and drawings;
- building works encroaching on the neighbouring property;
- incorrectly signed or unsigned certificates;
- insufficient copies of plans and forms submitted;
- inconsistency between elevations and floor plans;
- incorrect fees enclosed or fee cheque not signed; and
- information still inadequate after one or more requests to the applicant for further details.

4. Data protection and the internet

The information you provide on the application form and in the supporting documents will be public information which will be made available on the Council's website. In view of this, if you supply personal information belonging to a third party, please ensure you have their permission to do so.

5. The validation process

The council will only consider applications that are valid.

"Valid" means that all the information specified by the council in order to determine the application is provided in full at the start of the process. If relevant information or the correct fee is missing the council will not be able to start determining the application and the planning process will be delayed.

There are different types of applications. Some types require more detailed information than others. All information needs to be accurate. Some information can be complex and technical. It is required so that council officers (not just in planning), technical consultees and council members can assess what the impacts of the development will be on neighbours, for example, regarding noise from air conditioning units, or the amount of traffic generated by a proposal. The information also helps the general public understand your proposals.

You might need to appoint an architect, surveyor or specialist consultant to prepare the information for you. This might seem like an additional expense. However, it could save time and money in the long run and mean that permission is granted more quickly.

We want to make the process as simple as possible. We have prepared checklists, which confirm what information is required for different types of applications.

You are encouraged to use these checklists to ensure that applications are complete when they are submitted to us. We will cross check the information submitted with your application against the national requirements on the standard application form and the relevant checklist, at the start of the planning process, to make sure that the application is valid.

6. What if further information or a fee is required?

We will notify you within five working days for small scale and minor applications and 10 working days for major applications,³ if the application is incomplete due to missing information or fee. We will specify what needs to be provided and give a timescale for the submission of the missing information or fee. If this is not submitted within the given timescale the application will be returned to you and no further action will be taken on it.

Extra copies of plans may sometimes be requested if the council needs to consult a wider than usual range of neighbours or expert advisers. The council also reserves the right to request any other information considered necessary to make a full planning assessment of your proposal.

Where an application is not accompanied by information required by this advice note and the standard application form, then applicants should provide written justification with the

application as to why it is not appropriate in the particular circumstances. In such cases, we will not declare the application invalid unless we can provide reasons to the applicant.

7. Online and electronic submissions

Medway Council is able to receive all applications electronically via the Planning Portal <http://www.planningportal.gov.uk/>.

The following notes are provided to assist you when submitting your application in this way. If you follow the guidelines it will enable us to process your application and publish it on the web more quickly.

Please structure your electronic submission in the following way:

- No individual file is greater than 5MB
- Large documents are broken down into manageable files e.g. in chapters and sections
- It is important that the naming structure explains the document and chapter in plain English
- All major dimensions must be specified on drawings. This is necessary for the assessment of drawings. Drawings should include a scale and calibration scale
- Drawings should be orientated so they appear correctly when viewed on screen (i.e. North at the top of the screen).

Section 2

GENERAL REQUIREMENTS

Drawings

All drawings **MUST** include the following information:

- The scale of the drawing. This should be a recognised metric scale. See the scale required for each drawing type in the checklist.
- Indicate the direction of north on layout and location plans.
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010).
- Have a unique drawing number that also indicates any revisions (e.g. 1234 Revision B).
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010).
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows.
- A scale bar.
- Where a drawing contains different elements of the proposal they should be clearly grouped under headings.
- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

NATIONAL REQUIREMENTS LISTED ON THE STANDARD APPLICATION FORMS

Site location plan

Such plans should show at least two named roads and surrounding buildings. They should be at an identifiable metric scale, usually of 1:1250 or 1:2500 for developments in rural areas. The properties shown should be numbered to ensure that the exact location of the application site is clear.

The application site must be edged clearly with a **red** line, including all land necessary to carry out the proposed development – for example, land required for access to the site from a public highway, visibility splays, landscaping, car-parking and open areas around buildings.

A **blue** line must be drawn around any other land owned by the applicant, close to or adjoining the application site.

Ownership certificates

You must complete an ownership certificate for all applications except

- an application for reserved matters,
- works to trees protected by tree preservation orders,
- notification of works to trees in a conservation area or
- applications for express consent to display an advertisement.
- lawful development certificates
- prior notification
- hedgerow removal
- condition compliance

If the applicant is the only person who owns the application site fill in **certificate A**. The completed certificate A confirms this.

If the applicant does not own the application site or if the applicant owns the site but there are other people who also own it or have an interest in it (for example shared freeholders, leaseholders) fill in **certificate B**. You will need to list the names and addresses of any other people and confirm the date when you “served notice” (that is formally told them) that you were making the application. This is what the completed certificate B confirms.

If you know some owners but not all owners fill in **certificate C**. In this case you must also explain what reasonable steps you have taken to identify other owners. You will need to list the names and addresses of any other people and confirm the date when you “served notice” (that is formally told them) that you were making the application. You will also have to place a public notice in a newspaper circulating in area where the land lies.

If you do not know any of the owners fill in **certificate D**. In this case you must also explain what reasonable steps you have taken to identify the owners. You will also have to place a public notice in a newspaper circulating in area where the land lies.

For these purposes an 'owner' is anyone with a freehold interest, or leasehold interest the unexpired term of which is not less than 7 years.

Agricultural holdings certificate

This certificate is required where there is an agricultural holding. An agricultural holding is where there is an **agricultural tenant(s)**, who must be notified prior to the submission of the application. If the application site does not include an agricultural holding then you should complete the statement to that effect on the Certificate, from the list above, which you issue with the application.

Part 1 notice

A notice to the owners of the application site must be used if Certificate B has been completed and may be required if Certificate C has been completed and some owners other than the applicant are known. A copy should be served on each of the individuals identified in the relevant Certificate.

It will be very helpful if a copy of each Notice served were to accompany the application.

The correct fee for your application may be found in the note Scale of Fees for Planning Applications <http://www.medway.gov.uk/>.

Design and access statements

All planning applications require a design and access statement but there are some exceptions and examples of these are listed below.

Is a design and access statement required? A list of exceptions	Within a conservation area	Outside a conservation area
Development Type		
Works or extension(s) to a dwelling including flats	✓	×
Extension to an existing building used for non-domestic purposes where the floor space created does not exceed 100 square metres	✓	×
Listed building consent	✓	✓
Alteration or construction of a means of enclosure up to 2 metres high or the height of the existing means of enclosure, whichever is the higher including within the cartilage of a listed building	✓	×
Construction of a building on operational land up to 100 cubic metres in volume and 15m in height	✓	×
Plant or machinery – the height would not exceed the greater of 15 metres above ground level or the height of the original plant or machinery	✓	×
Alterations to an existing building where no floor space is created	✓	×
Change of use – without building works	×	×
Development of land pursuant to section 73 (determination of applications to develop land without conditions previously attached) of the Town and Country Planning Act 1990 – variation of condition	×	×
Reserved matters	×	×
Advertisement consent	×	×
Tree preservation order and conservation area tree works	×	×
Conservation area consent	×	×
Storage of hazardous substances	×	×
Prior notification – agriculture and forestry	×	×
Prior notification - telecoms	×	×
Non-material amendments	×	×
Engineering and mining operations	×	×
Application to replace an extant permission	×	×
Lawful Development Certificates	×	×
Variation/removal of condition(s)	×	×

Information required in a design and access statement

'Guidance on information and validation requirements'² gives details on the level of information to be included in a design and access statement (DAS). The statement does not need to be long but it is important to cover all the design and access issues. The following summary gives details of the areas to be covered and is broken down into three main sections, although if a Building For Life (or equivalent) assessment will need to be undertaken for the development it is recommended that the design and access statement includes a fourth element.

- The design component;
- The access component;
- Heritage Statement where required (additional information to be included with a DAS for listed building consent);

If your development is likely to be subject to a Building For Life (or equivalent) assessment please include;

- Sustainable Design and Construction Assessment.

The information supplied in this section of the advice note is based upon the 'Guidance on information and validation requirements' and you should refer to this for full details.

The design component

It should cover:

- the design principles and concepts that have been applied to the proposed development;
- how issues relating to access to the development have been dealt with;
- explain the design principles and concepts that have been applied to particular aspects of the proposal – amount, layout, scale, landscaping and appearance;
- demonstrate the steps taken to appraise the context of the development and how the design of the development takes that context into account in relation to its proposed use.
- demonstrate how crime prevention measures have been considered in the design of the proposal and how the design reflects the attributes of safe, sustainable places set out in Safer Places, The Planning System and Crime Prevention.

Amount
How much development is proposed? <ul style="list-style-type: none">• Number of proposed residential units.• All other forms of development, the proposed floor space for each proposed use forming part of the development.• What consideration is being given to ensure accessibility for users.

Layout
<p>Layout is the way in which buildings, routes and open spaces (both private and public) are provided, placed and orientated in relation to each other and buildings and spaces surrounding the development.</p> <p>Layout reserved at outline stage</p> <ul style="list-style-type: none">• Provide information on the approximate location of buildings, routes and open spaces proposed.• The use of illustrative diagrams is encouraged to assist in explaining this. <p>All other applications</p> <ul style="list-style-type: none">• Explain the proposed layout in terms of the relationship between buildings and public and private spaces within and around the site.• How these relationships will create safe, vibrant and successful places.• An indication of factors important to accessibility.
Scale
<p>Scale is height, width and length of a building or buildings in relation to its surroundings.</p> <p>Scale reserved at outline stage</p> <ul style="list-style-type: none">• Indication of parameters for the upper and lower limits of the height, width and length of each building. <p>All other applications</p> <ul style="list-style-type: none">• Explain the scale of proposed buildings and building parts.• Explain how these relate to the site's surroundings.
Landscaping
<p>Landscape Design considers the hard and soft landscape detailing of public and private spaces. It seeks to enhance and protect the amenities of the site and the area within which it is situated.</p> <p>Landscaping reserved at outline stage</p> <ul style="list-style-type: none">• In this case the principles that will inform any future landscape proposals should be fully explained. <p>All other applications</p> <ul style="list-style-type: none">• The proposed landscape treatment of public and private spaces within the site and its relationship with the area surrounding the site should be fully explained. <p>If the development contains no landscape component, the statement would simply need to say why landscaping is not relevant.</p>
Appearance
<p>Appearance is the aspect of a place or building that determines the visual impression it makes, including the external built form of the development, its architecture, materials, decoration, lighting, colour and texture.</p> <p>Appearance reserved at outline stage</p> <ul style="list-style-type: none">• Explain the principles behind the intended appearance and how these will inform the final design of the development. <p>All other applications</p> <ul style="list-style-type: none">• Explain the appearance of the place or buildings proposed.• How this will relate to the appearance and character of the development's surroundings.• How decisions on appearance have considered accessibility.

Appraising context
<ul style="list-style-type: none">• Context should be discussed in relation to the scheme as a whole.• An explanation of how local context has influenced the design.• Demonstrate the steps taken to appraise the context of the proposed development.
Use
<p>The use is the use or mix of uses proposed for land and buildings.</p> <ul style="list-style-type: none">• Explain how this understanding or the context has been considered in relation to its proposed use.• Explain the proposed use(s), their distribution, appropriateness of accessibility and relationship to surrounding area.

The access component

Requirements for the access component of the statement relates only to “access to the development”⁴ and does not include internal aspects of individual buildings.

It should:

- Explain how users will have equal and convenient access to buildings and spaces and the public transport network.
- Address the need for flexibility of the development and how it may adapt to changing needs.
- Explain the policy adopted in relation to access and any consultation undertaken in relation to issues of access.
- Explain access for emergency services.
- **Access reserved at outline stage**, the application should still indicate the location of points of access to the site and explain the principles that will be used to inform the access arrangements for the final development.

Heritage Statements (additional information to be included with a DAS for listed building consent)

It is important to note that these are required for all applications involving a heritage asset or its setting – see relevant validation checklist. Where the application requires a Design and Access Statement, the Heritage Statement should be included in this. Where no Design and Access Statement is required, then it should be a stand-alone document.

Designated heritage assets are:

- Listed buildings (including buildings within the curtilage of listed buildings)
- Conservation Areas [and the buildings within them]
- Scheduled Ancient Monuments
- Registered Parks and Gardens
- Registered Battlefield
- World Heritage Sites
- Protected wreck sites

In addition to these there are undesignated heritage assets. These are buildings, monuments, sites, places, areas and landscapes positively identified as having a degree of significance meriting consideration in planning decisions. Undesignated heritage assets may be identified during pre-application stages or while the application is under consideration. Areas of archaeological importance will also need to be considered as potential heritage assets and applicants should consult with the Kent Historic Environment Record (<http://www.kent.gov.uk/ExploringKentsPast/>) to establish whether their site has any significance in this respect.

The Heritage Statement should provide:

- a description of the significance of the heritage assets affected by the development
- a description of the contribution of their setting to that significance.

- an assessment of the impact of the proposals on that significance
- an explanation of how the works have been designed in a way that will minimise any negative impacts and to preserve and enhance the significance
- an explanation of how requirements relating to other legislations such as the building regulations or the Discrimination Act have been balanced against the need to respect the significance of the heritage asset.

Where an application site includes or is considered to have potential to include heritage assets with archaeological interest, the heritage statement should include:

- a desk-based assessment and,
- where necessary, the results of a field evaluation.

Where sites or buildings are in conservation areas, the Heritage Statement should assess the impact of the proposals on the character of the conservation area.

The level of detail should be proportionate to the importance of the heritage asset and no more than is sufficient to understand the potential impact of the proposal on the significance of the assets themselves. Descriptions should be focussed on those areas of the heritage assets affected and covered those in sufficient detail. E.g., in an application for one room of a house for example, as well as a brief description of the significance of the building as a whole, the room where work is to be carried out should be looked at in sufficient detail to understand the impact of that work. What is not wanted are statements containing large amounts of irrelevant information on the history of the heritage asset that ignore the parts of the asset that are being affected.

While preparing the Heritage Statement, as a minimum, applicants should consult with the Historic Environment Record (<http://www.kent.gov.uk/ExploringKentsPast/>). Also, where necessary, appropriate expertise should be used to make these assessments. It should detail the sources that have been considered and the expertise that has been consulted.

Sustainable Design and Construction Assessment

If the proposed development will be the subject of a Building For Life (or equivalent) assessment. A Sustainable Design and Construction Assessment should be included as part of the DAS, this will be required for most major developments.

All major planning applications that include 20+ dwellings will be assessed against the Building for Life criteria. Building for Life is the national standard for well-designed homes and neighbourhoods. Applicants may choose to demonstrate how the proposed development addresses the the Building for Life criteria in the DAS. In such cases, the Sustainable Design and Construction Assessment will provide the evidence within the DAS that will allow the assessment of several Building for Life criteria and applicants should ensure that appropriate cross-referencing of this material is made clear within the DAS.

Where applicable, reference should also be made within the DAS to the Code for Sustainable Homes design stage assessment results and in most cases, this should be an integral part of the Sustainable Design and Construction Assessment. Where available, the full Code for Sustainable Homes design stage assessment results should be included as an appendix to the DAS.

All housing applications, regardless of number of units, will need to provide information to demonstrate that they comply with the Medway Housing Design Standards. The Medway Housing Design Standards will include a checklist of required material and an explanation of how Medway Council will use these and the Building for Life criteria in assessing planning applications for housing development in Medway.

LIST OF CHECKLISTS

These are available via the Medway Council website

- V1 Householder application for planning permission for works or extension to a dwelling.
- V2 Householder application for planning permission for works or extension to a dwelling and consent for demolition in a Conservation Area.
- V3 Householder application for planning permission for works or extension to a dwelling and Listed Building Consent.
- V4 Application for planning permission.
- V5 Application for outline planning permission with some matters reserved.
- V6 Application for outline planning permission with all matters reserved.
- V7 Application for planning permission and Conservation Area Consent for demolition.
- V8 Application for planning permission and Listed Building Consent,
- V9 Application for planning permission and Advertisement Consent.
- V10 Conservation Area consent for demolition in a Conservation Area
- V11 Listed Building consent for alterations, extension or demolition of a listed building.
- V12 Application for Advertisement consent.
- V13 Listed Building consent for alterations, extension or demolition of a listed building and Conservation Consent
- V14 Listed Building consent for alterations, extension or demolition of a listed building and advertisement consent
- V15 Application for a Lawful Development Certificate for an existing use or operation or activity including those in breach of planning control.
- V16 Application for a Lawful Development Certificate for a proposed use or development.
- V17 Application for Prior Notification of proposed agricultural development – proposed building, road, fish tank or excavation/deposit of waste material from the farm
- V18 Application for Prior Notification of proposed development in respect of permitted development by electronic communications code operators
- V19 Application for Hedgerow Removal Notice
- V20 Application for Prior Notification – proposed demolition.
- V21 Application for Approval of Reserved Matters following outline approval.
- V22 Application for removal or variation of a condition following grant of planning permission.
- V23 Application for tree works: works to trees subject to a Tree Preservation Order (TPO) or Notification of Proposed Works to Trees in a Conservation Area (CA).
- V24 Application for approval of details reserved by condition.
- V25 Application for a new planning permission to replace an extant planning permission associated listed building and/or conservation area consents, in order to extend the time limit for implementation.
- V26 Application for a non-material amendment following a grant of planning permission.

¹ National legislation and regulations in relation to the registration and validation of applications currently includes:

- Town and Country Planning (Applications) Regulations 1988
- Town and Country Planning (Development Management Procedure)(England) Order 2010
- Town and Country Planning (General Permitted Development)(Amendment)(no2)(England) Order 2008
- The Town and Country Planning Act 1990
- The Planning and Compulsory Purchase Act 2004
- The Planning Act 2008
- Electronic Communications Order

Authorities have powers under regulation 4 of the Town and Country Planning (Applications) Regulations to direct applicants to:

(a) supply any further information, and except in the case of outline applications, plans and drawings necessary to enable them to determine the application or

(b) provide one of their officers with any evidence in respect of the application as is reasonable for them to call for to verify any particulars of information given to them.

² The following is guidance relating the validation of planning applications:

- 1) Guidance on information requirements, Department for Communities and Local Government, March 2010
- 2) Development Management Policy Annex Information requirements and validation for planning applications, Department for Communities and Local Government, March 2010

³ The Town and Country Planning (Development Management Procedure)(England) Order 2010 defines 'major' development as any one or more of the following:

- a) the winning and working of minerals or the use of land for mineral-working deposits;
- b) waste development;
- c) the provision of dwellinghouses where –
 - i) the number of dwellinghouses to be provided is 10 or more; or
 - ii) the development is to be carried out on a site having an area of 0.5 hectares or more and it is not known whether the development falls within sub-paragraph (c)(i);
- d) the provision of a building or buildings where the floor space to be created by the development is 1,000 square metres or more; or
- e) development carried out on a site having an area of 1 hectare or more.

⁴ Section 62(5) of the Town and Country Planning Act 1990 as inserted by section 42(1) of the Planning and Compulsory Purchase Act 2004

Local validation checklist V1 – Householder Development Proposals requiring Planning Permission

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has its own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings MUST include the following information:

- The scale of the drawing. This should be a recognised metric scale. See the scale required for each drawing type in the checklist.
- Indicate the direction of north on layout and location plans.
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010).
- Have a unique drawing number that also indicates any revisions (e.g. 1234 Revision B).
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010).
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows.
- A scale bar.
- Where a drawing contains different elements of the proposal they should be clearly grouped under headings.

If you require this information in large print, Braille, on audiotape or in any other format, please contact 1 us on 01634 331700

- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

N2

Information item	Types of application that require this information	What information is required?	Policy driver	Where to look for further assistance?
Block plan/site plan	All applications for works or extension(s) within the curtilage of a dwelling	<p>Site plans should be at an identifiable metric scale, usually 1:500 or 1:200, should be on or based on an up to date Ordnance Survey map and should accurately show:</p> <ul style="list-style-type: none"> • The proposed development in relation to the site boundaries and other existing buildings on the site, with written dimensions including those to the boundaries. <p>And the following, unless these would NOT influence or be affected by the proposed development:</p> <ul style="list-style-type: none"> • All the buildings, roads and footpaths on land adjoining the site including access arrangements. • All public rights of way crossing or adjoining the site. • The species, position and spread of all trees within 5 metres of any proposed building works. • The extent and type of any hard surfacing. • Boundary treatments including walls or fencing where this is proposed. • The location, number and form of any vehicle or cycle parking. • Visibility splays. • The location and shape of any vehicle turning area. Protected Species Survey	<p>Possibility the site may contain protected species, e.g. bats, badgers or great crested newts.</p> <p>Any site where the proposed buildings to be demolished may contain protected species</p>	<p>A Protected Species Survey will establish the presence or absence of protected species and, if present, the population level, the likely impact on the species and a scheme of mitigation.</p> <p>Most householder applications will not have adverse impacts on biodiversity but many older properties and properties in rural areas have features that are attractive to bats for roosting.</p>	<p>PPS9</p> <p>Circular 06/05</p> <p>Local Plan BNE39,</p>	<p>Kent Wildlife Trust</p> <p>Natural England</p> <p>Kent and Medway Biological Records Centre</p>
Tree Survey/Arboricultural assessment	<p>Where the proposed works are within 5 metres of the crown speed of any tree.</p>	<p>See 'block plan/site plan' above. Layout plans should identify trees and other vegetation that is to be retained or lost to the development as well as trees that may be affected on adjoining land. Where trees are affected a tree condition survey will be required. It should cover a range of information about trees at the site and on adjoining land and their contribution to the street scene, visual amenity and ecological importance.</p> <p>Trees with Tree Preservation Orders are often older trees that have features that are used by bats, i.e., cavities, ivy clad. In these cases the works to be carried out should be assessed for the impact on bats.</p>	<p>PPS9</p> <p>Local Plan BNE41, BNE32, BEN43, BNE44</p>	<p>Medway Council Tree management</p> <p>APN1 – Driveways Close to Trees AAIS, 1996</p> <p>Natural England - Standing advice for protected species</p>

Local validation checklist V2– Householder Development Proposals requiring Planning Permission and Conservation Area Consent for Demolition

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has its own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings MUST include the following information:

- The scale of the drawing. This should be a recognised metric scale. See the scale required for each drawing type in the checklist.
- Indicate the direction of north on layout and location plans.
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010).
- Have a unique drawing number that also indicates any revisions (e.g. 1234 Revision B).
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010).
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows.
- A scale bar.

If you require this information in large print, Braille, on audiotape or in any other format, please contact 1 us on 01634 331700

- Where a drawing contains different elements of the proposal they should be clearly grouped under headings.
- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

Local validation checklist V3– Householder Development Proposals requiring Planning Permission and Listed Building Consent

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has its own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings MUST include the following information:

- The scale of the drawing. This should be a recognised metric scale. See the scale required for each drawing type in the checklist.
- Indicate the direction of north on layout and location plans.
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010).
- Have a unique drawing number that also indicates any revisions (e.g. 1234 Revision B).
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010).
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows.

If you require this information in large print, Braille, on audiotape or in any other format, please contact 1 us on 01634 331700

- A scale bar.
- Where a drawing contains different elements of the proposal they should be clearly grouped under headings.
- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

Local validation checklist V4 – Proposals for Planning Permission

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has it's own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings MUST include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;
- A scale bar;

If you require this information in large print, Braille, on audiotape or in any other format, please contact us on 01634 331700

- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;
- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

Tree Survey/Arboric ultural assessment	Where the proposed works are within 5 metres of the crown speed of any tree.	All areas of the borough	<p>See 'block plan/site plan' above. Layout plans should identify trees and other vegetation that is to be retained or lost to the development as well as trees that may be affected on adjoining land. Where trees are affected a tree condition survey will be required. It should cover a range of information about trees at the site and on adjoining land and their contribution to the street scene, visual amenity and ecological importance.</p> <p>In many cases there is likely to be a close correlation between retained trees and vegetation and proposals for new planting as covered within Landscape section. It is important therefore that applicant cross-references all information submitted that relates to tree and landscape components.</p> <p>Trees with Tree Preservation Orders are often older trees that have features that are used by bats, i.e., cavities, ivy clad. In these cases the works to be carried out should be assessed for the impact on bats.</p>	PPS9 Local Plan BNE41, BNE32, BEN43, BNE44	<p>Medway Council Tree management</p> <p>APN1 – Driveways Close to Trees AAIS, 1996</p> <p>Natural England - Standing advice for protected species</p>

Local validation checklist V5 – Application for outline planning permission with some matters reserved

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has it's own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings **MUST** include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;
- A scale bar;

If you require this information in large print, Braille, on audiotape or in any other format, please contact us on 01634 331700

- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;
- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

If you require this information in large print, Braille, on audiotape or in any other format, please contact us on 01634 331700

Information item	Types of application that require this information	Geographic location where information is required	What information is required?	Policy driver	Where to look for further assistance?
Details of layout – Block plan/site plan	Layout – reserved	All areas of the borough	<p>Site plans should be at an identifiable metric scale, usually 1:500 or 1:200, should be on or based on an up to date Ordnance Survey map showing an indicative layout with the separate development zones proposed within the site boundary where appropriate together with gross floorspace for each proposed use.</p>	Guidance on information requirements and validation	Communities and Local Government Guidance on information requirements and validation
	Layout – under consideration		<p>Site plans should be at a scale of 1:500 or 1:200, should be on or based on an up to date Ordnance Survey map and should accurately show:</p> <ul style="list-style-type: none"> • the position of all new buildings on the site; • routes and open spaces within the development; • the relationship of buildings, routes and open spaces to buildings and spaces outside the development; • provision for the parking of vehicles and cycles and the turning of vehicles. 		
Details of access	Access – reserved	All areas of the borough	<p>Indicative access points The applicant shall state the area or areas where access points to the proposed development will be situated.</p>		

Information item	Types of application that require this information	Geographic location where information is required	What information is required?	Policy driver	Where to look for further assistance?
Details of access	Access – under consideration	All areas of the borough	<p>Site plans should be at a scale of 1:200 or 1:500 showing:</p> <ul style="list-style-type: none"> • accessibility to and within the site for vehicles, pedestrians and cyclists; • the position and treatment of the proposed/new accesses, and/or; • the position and treatment of circulation routes within the site, including facilities for cyclists and pedestrians; • the position and details of any accessed to be closed; • how access and circulation routes fit into the surrounding area. 		
	Scale - reserved	All areas of the borough	<p>Details of scale parameters</p> <p>The applicant shall state, either in writing or on the submitted plans, the upper and lower limit for the height, width and length of each building included in the proposed development.</p> <ul style="list-style-type: none"> • Drawing showing the height, width and length of each building proposed in relation to its surroundings at a scale of 1:100 or 1:200. • Street scene drawing showing the relationship between buildings both within and adjacent to the development. 		
Details of scale	Scale – under consideration				

Information item	Types of application that require this information	Geographic location where information is required	What information is required?	Policy driver	Where to look for further assistance?
Existing and proposed elevations	Appearance under consideration	All areas of the borough	At a scale of 1:50 or 1:100, showing clearly the proposed works in relation to what is already there, for any elevations that would be created or altered by the development proposal. Where a proposed elevation adjoins another building or is in close proximity to it, the drawings should show the relationship between the two buildings and detail the positions of the openings on each property.		
Existing and proposed floor plans			At a scale of 1:50 or 1:100, highlighting any existing walls or buildings that are to be demolished, where applicable.		
Existing and proposed roof plans			At a scale of 1:50 or 1:100, showing the shape of the roof, its location, and specifying the roofing material to be used.		
External finishes			The types of external finishes to be used including colour, texture and profile.		
Amount of development	All applications	All areas of the borough	Details of the amount of development proposed for each use		
Proposed uses	All applications	All areas of the borough	Details of the use or uses proposed for the development and any distinct development zones within the site to be identified.	Guidance on information requirements and validation	Communities and Local Government Guidance on information requirements and validation

Surface Water Drainage Assessment	For operational developments of less than 1 hectare site size falling within Flood Zone 1. If a known drainage problem exists	All areas of the borough	<p>A surface water drainage assessment will be required for those developments that are likely to generate significant increase in the flow of water across and from the site. Surface water run-off should be controlled as near to its source as possible through a sustainable drainage approach to surface water management (SUDS). SUDS are an approach to managing surface water run-off which seeks to mimic natural drainage systems and retain water on or near the site as opposed to traditional drainage approaches which involve piping water off site as quickly as possible. SUDS involve a range of techniques including soakaways, infiltration trenches, permeable pavements, grassed swales, ponds and wetlands. SUDS offer significant advantages over conventional piped drainage systems in reducing flood risk by attenuating the rate and quantity of surface water run-off from a site, promoting groundwater recharge, and improving water quality and amenity. Please note requirement identified within Landscape section to cross-reference SUDs details with Landscape drawings, particularly on major schemes.</p> <p>If a known drainage problem exists and the Local Planning Authority would like assurance from the</p>	<p>PPS1 Annex to PPS1 PPS25 Local plan paragraphs 9.5.34 – 9.5.37</p>	<p>STG Building Control Development and Flood Risk: A Practice Guide Companion to PPS25 'Living Draft' CIRIA C522 document Sustainable Urban Drainage Systems-Design Manual for England and Wales and the Interim Code of Practice for Sustainable</p>

Local validation checklist V6 – Application for outline planning permission with all matters reserved

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has it's own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings **MUST** include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;
- A scale bar;

If you require this information in large print, Braille, on audiotape or in any other format, please contact us on 01634 331700

- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;
- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

Development Contributions Viability Statement	Any development that generates a need for developer contributions where the applicant is of the view that the economics of the development cannot support the likely requirements for contributions by the Local Planning Authority or other stakeholders.	All areas of the borough	<p>A development viability statement will set out in detail the costs of carrying out a development and the anticipated return on that investment. The purpose of the statement should be to allow the Local Planning Authority to have a clear understanding of the economics of developing a particular site. Such an assessment will be used to assess whether or not a development is able to meet the full requirements for development contributions normally required by the Local Planning Authority.</p> <p>The viability statement should be in the form of a fully details land appraisal including the full costs of carrying out the development including for example land cost, construction costs, fees and the costs of the various contributions thought likely to be required by the Local Planning Authority.</p>	<p>PPS1</p> <p>Local Plan S6, H3, L4, CF2, CF3, CF6</p> <p>Medway Council Guide to Developer Contributions</p>	<p>Medway Council Guide to Developer Contributions</p> <p>Communities and Local Government PPS1</p>

<i>Structural Survey continued</i>	integrity of the building				
Surface Water Drainage Assessment	For operational developments of less than 1 hectare site size falling within Flood Zone 1. If a known drainage problem exists	All areas of the borough	A surface water drainage assessment will be required for those developments that are likely to generate significant increase in the flow of water across and from the site. Surface water run-off should be controlled as near to its source as possible through a sustainable drainage approach to surface water management (SUDS). SUDS are an approach to managing surface water run-off which seeks to mimic natural drainage systems and retain water on or near the site as opposed to traditional drainage approaches which involve piping water off site as quickly as possible. SUDS involve a range of techniques including soakaways, infiltration trenches, permeable pavements, grassed swales, ponds and wetlands. SUDS offer significant advantages over conventional piped drainage systems in reducing flood risk by attenuating the rate and quantity of surface water run-off from a site, promoting groundwater recharge, and improving water quality and amenity. Please note requirement identified within Landscape section to cross-reference SUDs details with Landscape drawings, particularly on major schemes.	PPS1 Annex to PPS1 PPS25 Local plan paragraphs 9.5.34 – 9.5.37	STG Building Control Development and Flood Risk: A Practice Guide Companion to PPS25 'Living Draft' CIRIA C522 document Sustainable Urban Drainage Systems-Design Manual for England and Wales and the Interim

Local validation checklist V7 – Proposals for Planning Permission and Conservation Area Consent for Demolition

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has its own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings MUST include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);

If you require this information in large print, Braille, on audiotape or in any other format, please contact us on 01634 331700

- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;
- A scale bar;
- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;
- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

<i>Structural Survey continued</i> Surface Water Drainage Assessment	integrity of the building For operational developments of less than 1 hectare site size falling within Flood Zone 1. If a known drainage problem exists	All areas of the borough	A surface water drainage assessment will be required for those developments that are likely to generate significant increase in the flow of water across and from the site. Surface water run-off should be controlled as near to its source as possible through a sustainable drainage approach to surface water management (SUDS). SUDS are an approach to managing surface water run-off which seeks to mimic natural drainage systems and retain water on or near the site as opposed to traditional drainage approaches which involve piping water off site as quickly as possible. SUDS involve a range of techniques including soakaways, infiltration trenches, permeable pavements, grassed swales, ponds and wetlands. SUDS offer significant advantages over conventional piped drainage systems in reducing flood risk by attenuating the rate and quantity of surface water run-off from a site, promoting groundwater recharge, and improving water quality and amenity. Please note requirement identified within Landscape section to cross-reference SUDS details with Landscape drawings, particularly on major schemes. Local validation checklist V8– Proposals for Planning Permission and Listed Building Consent

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has it's own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings MUST include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;
- A scale bar;

If you require this information in large print, Braille, on audiotape or in any other format, please contact us on 01634 331700

- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;
- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

If you require this information in large print, Braille, on audiotape or in any other format, please contact us on 01634 331700

<i>Structural Survey continued</i>	integrity of the building				
Surface Water Drainage Assessment	For operational developments of less than 1 hectare site size falling within Flood Zone 1. If a known drainage problem exists	All areas of the borough	A surface water drainage assessment will be required for those developments that are likely to generate significant increase in the flow of water across and from the site. Surface water run-off should be controlled as near to its source as possible through a sustainable drainage approach to surface water management (SUDS). SUDS are an approach to managing surface water run-off which seeks to mimic natural drainage systems and retain water on or near the site as opposed to traditional drainage approaches which involve piping water off site as quickly as possible. SUDS involve a range of techniques including soakaways, infiltration trenches, permeable pavements, grassed swales, ponds and wetlands. SUDS offer significant advantages over conventional piped drainage systems in reducing flood risk by attenuating the rate and quantity of surface water run-off from a site, promoting groundwater recharge, and improving water quality and amenity. Please note requirement identified within Landscape section to cross-reference SUDS details with Landscape drawings, particularly on major schemes.	PPS1 Annex to PPS1 PPS25 Local plan paragraphs 9.5.34 – 9.5.37	STG Building Control Development and Flood Risk: A Practice Guide Companion to PPS25 'Living Draft' CIRIA C522 document Sustainable Urban Drainage Systems-Design Manual for England and Wales and the Interim

Local validation checklist V9 – Proposals for Planning Permission and Advertisement Consent

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has it's own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings **MUST** include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;
- A scale bar;

If you require this information in large print, Braille, on audiotape or in any other format, please contact us on 01634 331700

- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;
- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

VISUAL IMPACT AND OTHER ASSESSMENTS RELATING TO TALL BUILDINGS					
Accurate visual representations	Tall building proposals (6 storeys or over 20m in height, whichever is lower)	All areas of the borough	Showing the proposals in all significant views affected, near, middle and distant, including public realm and streets at the base of the building. They should be accurately rendered. It may be included in an Environmental Statement, if required. A daylight, sunlight and wind indicator test	CABE English Heritage Guidance on tall buildings Medway Building Heights Policy 2006	Contact Design and Conservation team Medway Building Heights Policy 2006
Microclimate assessment					
Landscape / Townscape Character Assessment	Developments that are within or would be visible from the countryside, such as on the edge of settlements, and are likely to affect the natural beauty or character of the rural landscape.	Within or visible from the countryside. Within or close to designated sites including conservation areas, World Heritage sites, Listed buildings, Historic Parks or Gardens	To demonstrate the possible effect of medium and larger scale developments on the character, appearance and local distinctiveness of the landscape and/or townscape. The assessment should consider the characteristics of the landscape/townscape that forms the context for the site. Reference should be made to any landscape or conservation area assessments or any landscape designations, as well as relevant local character areas. Key public viewpoints of the site from the surrounding area should be identified. The assessment should include illustrative material in the form of photomontages, sketches or perspectives that would assist with understanding the likely impact of the proposal and any requirements for mitigation	PPS1 PPS5 PPS7 Local Plan SD4, BNE1, BNE6, BNE12, BNE18, BNE32, BNE33, BNE34, BNE47 Medway Council	Guidelines for Landscape and Visual Impact Assessment – The Landscape Institute and The Institute of Environmental Management and Assessment

<i>Structural Survey continued</i> Surface Water Drainage Assessment	integrity of the building For operational developments of less than 1 hectare site size falling within Flood Zone 1. If a known drainage problem exists	All areas of the borough	A surface water drainage assessment will be required for those developments that are likely to generate significant increase in the flow of water across and from the site. Surface water run-off should be controlled as near to its source as possible through a sustainable drainage approach to surface water management (SUDS). SUDS are an approach to managing surface water run-off which seeks to mimic natural drainage systems and retain water on or near the site as opposed to traditional drainage approaches which involve piping water off site as quickly as possible. SUDS involve a range of techniques including soakaways, infiltration trenches, permeable pavements, grassed swales, ponds and wetlands. SUDS offer significant advantages over conventional piped drainage systems in reducing flood risk by attenuating the rate and quantity of surface water run-off from a site, promoting groundwater recharge, and improving water quality and amenity. Please note requirement identified within Landscape section to cross-reference SUDS details with Landscape drawings, particularly on major schemes. Local validation checklist V10 – Conservation Area consent for demolition in a Conservation Area

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has its own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings MUST include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;
- A scale bar;
- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;

If you require this information in large print, Braille, on audiotape or in any other format, please contact 1
us on 01634 331700

- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

Tree survey/arboricultural assessment	relating to a listed building where works are proposed that involve demolition or affect the structural integrity of the building	All areas of the borough	See 'block plan/site plan' above. Layout plans should identify trees and other vegetation that is to be retained or lost to the development as well as trees that may be affected on adjoining land. Where trees are affected a tree condition survey will be required. It should cover a range of information about trees at the site and on adjoining land and their contributory to the street scene, visual amenity and ecological importance. An assessment of the implications for the work on the trees. Trees with Tree Preservation Orders are often older trees that have features that are used by bats, i.e., cavities, ivy clad. In these cases the works to be carried out should be assessed for the impact on bats. Local validation checklist V14 – Listed Building Consent for Alterations, Extension or Demolition of a Listed Building and Advertisement Consent

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has it's own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings **MUST** include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;
- A scale bar;
- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;

If you require this information in large print, Braille, on audiotape or in any other format, please contact 1 us on 01634 331700

- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

Local validation checklist V15 – Application for a Lawful Development Certificate for an existing use or operation or activity including those in breach of planning control

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has its own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

The burden of proof in a Lawful Development Certificate is firmly with the applicant and therefore sufficient and precise information should be provided.

DRAWINGS

All drawings MUST include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;

If you require this information in large print, Braille, on audiotape or in any other format, please contact 1

us on 01634 331700

- A scale bar;
- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;
- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

Information item	Types of application that require this information	What information is required?	Policy driver	Where to look for further assistance?
Block plan/site plan – existing	All applications within the borough	<p>Site plans should be at an identifiable metric scale, usually 1:500 or 1:200, should be on or based on an up to date Ordnance Survey map and should accurately show:</p> <ul style="list-style-type: none"> • For an existing building or structure, the development in relation to the site boundaries and other existing buildings on the site, with written dimensions including those to the boundaries. • If the application is for a proposed use then you will need to include a plan that indicates the current uses. • If there are to be other uses on the site then you will need to provide a full list and identify these on the plan. 		
Existing and proposed elevations	All applications for an existing development that is a building or structure	<p>At a scale of 1:50 or 1:100, showing clearly the works in relation to what is already there, for any elevations that would be created or altered by the development. Where an elevation adjoins another building or is in close proximity to it, the drawings should show the relationship between the two buildings and detail the positions of the openings on each property and whether there will be any encroachment onto neighbouring land.</p>		

Information item	Types of application that require this information	What information is required?	Policy driver	Where to look for further assistance?
Existing floor plans	All applications for an existing development that is a building or structure and all applications for an existing use of a building	At a scale of 1:50 or 1:100, showing the use/s of each floor.		
Existing and proposed roof plans	All applications for an existing development that is a building or structure which involved works to a roof or creation of a roof	At a scale of 1:50 or 1:100, showing the shape of the roof, its location, and specifying the roofing material to be used.		
Evidence	All applications within the borough	Such evidence, as you consider sufficient to verify the information included in the application. This may include sworn affidavit(s) from people with personal knowledge of the existing use or operation, dated photography, invoices etc.		
Supporting information	All applications within the borough	Other information as you consider to be relevant to the application to support your submission.		
Other operations	All applications All applications within the borough	Provide full details of the operations that are taking place at the site. You may need to indicate the different operations and uses on the land on a site layout plan, see above.		

Local validation checklist V16 – Application for a Lawful Development Certificate for a proposed use or development

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has it's own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

The burden of proof in a Lawful Development Certificate is firmly with the applicant and therefore sufficient and precise information should be provided.

DRAWINGS

All drawings MUST include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);

If you require this information in large print, Braille, on audiotape or in any other format, please contact 1 us on 01634 331700

- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;
- A scale bar;
- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;
- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

Developer's notice	All applications within the borough	<p>Evidence that you have given notice of the proposed development in accordance with A.3 (1) of Part 24 of Schedule 2 of the Town and Country Planning (General Permitted Development) Order 1995 (as amended).</p>		
Statement of Community Involvement	All applications within the borough	<p>Details of all consultation carried out and copies of all written comments. The consultation should be carried out as detailed in the Code of Best Practice.</p>		

Information item	Types of application that require this information	What information is required?	Policy driver	Where to look for further assistance?
ICNIRP requirements	All applications within the borough	Signed declaration that the equipment and installation fully complies with ICNIRP requirements.		
Supplementary information	All applications within the borough	<p>The supporting information should include:</p> <ul style="list-style-type: none"> • a written description of the proposed works; • site details – name, reference and location of proposal with reference to address and National Grid Reference; • site type (macro or micro); • details of the height, frequency and the modulation characteristics, and details of power output; • details of the proposed structure including the type of structure and its dimensions, height of existing building and details of the size of the equipment housing and materials; • information detailing the need and purpose of the particular development; • a statement explaining the reason for the choice of design; • evidence that the Council's mast register and /or the industry site database has been checked for suitable sites and the reasons for their rejection. If no alternative sites have been considered, please state the reasons for this; 		

Information item	Types of application that require this information	What information is required?	Policy driver	Where to look for further assistance?
Supplementary information - <i>continued</i>	All applications within the borough	<ul style="list-style-type: none"> • details of alternative sites rejected with a justification for rejecting them including existing masts, structures and other buildings within the search area; • an explanation if no alternatives considered; • details of annual-rollout and pre-application discussions with Medway Council; • rating of site under Traffic Light Model (Green, Amber or Red); • details of consultation carried out under the Ten Commitments (if relevant); • details of consultation carried out with the particular school or further education college (if relevant); • details of consultation carried out with CAA/Secretary of State for Defence/Aerodrome operator (if relevant); • area of Search; • existing and proposed coverage maps; • map showing the relationship of the application site to schools and other telecommunications equipment in the area; • completed Supplementary Information Template (Annex F of the Code of Best Practice on Mobile Phone Network Development.) 		

Information item	Types of application that require this information	What information is required?	Policy driver	Where to look for further assistance?
Visual Impact Assessment	Proposals affecting the setting of a listed building, conservation area, area of outstanding natural beauty or green belt. Other sites may be sensitive and therefore check each site with Medway Council	This should consist of a before or after photomontage of the radio base station, fencing, landscaping and access.		
Acoustic report	Where proposed installation involves equipment that may generate noise, e.g. air conditioning equipment, and is situated close to residential buildings	The report should assess the likely noise and disturbance to nearby occupiers and any mitigation measures that will be put in place, where necessary. A specification report from the equipment manufacturers may be sufficient.		

Local validation checklist V19 – Application for Hedgerow Removal

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has its own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings MUST include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;
- A scale bar;
- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;

If you require this information in large print, Braille, on audiotape or in any other format, please contact 1 us on 01634 331700

- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

Information item	Types of application that require this information	What information is required?	Policy driver	Where to look for further assistance?
Block plan/site plan – existing and proposed	All applications within the borough	<p>Site plans should be at an identifiable metric scale, usually 1:500 or 1:200, should be on or based on an up to date Ordnance Survey map and should accurately show:</p> <ul style="list-style-type: none"> • clearly showing the location and length of the hedgerows to be removed. <p>And the following, unless these would NOT influence or be affected by the proposed development:</p> <ul style="list-style-type: none"> • All the buildings, roads and footpaths on land adjoining the site including access arrangements. • All public rights of way crossing or adjoining the site. • The species, position and spread of all trees within 5 metres of any proposed building works. • The extent and type of any hard surfacing. • Boundary treatments including walls or fencing where this is proposed. • The location, number and form of any vehicle or cycle parking. • Visibility splays. • The location and shape of any vehicle turning area. 		

If you require this information in large print, Braille, on audiotape or in any other format, please contact us on 01634 331700 2

Information item	Types of application that require this information	What information is required?	Policy driver	Where to look for further assistance?
Evidence	All applications within the borough	Evidence of the date of planting		
Arboricultural assessment	All applications within the borough	An assessment of the affect of the hedgerow removal and any mitigation measures. If the hedge is within a SSSI the applicant should seek Natural England's advice.		
Assessment on local biodiversity	All applications within the borough	Hedgerows are valuable habitat corridors for many protected species i.e. Dormice, Reptiles. Consideration should be given on the effect of removal on biodiversity. This can be mitigated by restoring/creating hedges elsewhere.		Kent Wildlife Trust Natural England Kent and Medway Biological Records Centre

Local validation checklist V20 – Application for prior notification of proposed demolition

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has its own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings MUST include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;
- A scale bar;
- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;

If you require this information in large print, Braille, on audiotape or in any other format, please contact 1 us on 01634 331700

- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

Information item	Types of application that require this information	What information is required?	Policy driver	Where to look for further assistance?
Block plan/site plan – existing and proposed	All applications within the borough	<p>Site plans should be at an identifiable metric scale, usually 1:500 or 1:200, should be on or based on an up to date Ordnance Survey map and should accurately show:</p> <ul style="list-style-type: none"> • The proposed development in relation to the site boundaries and other existing buildings on the site, with written dimensions including those to the boundaries. <p>And the following, unless these would NOT influence or be affected by the proposed development:</p> <ul style="list-style-type: none"> • All the buildings, roads and footpaths on land adjoining the site including access arrangements. • All public rights of way crossing or adjoining the site. • The species, position and spread of all trees within 5 metres of any proposed building works. • The extent and type of any hard surfacing. • Boundary treatments including walls or fencing where this is proposed. • The location, number and form of any vehicle or cycle parking. • Visibility splays. • The location and shape of any vehicle turning area. 		

Information item	Types of application that require this information	What information is required?	Policy driver	Where to look for further assistance?
Details of site notice	All applications within the borough	A statement that a site notice has been displayed at the appropriate location and for the appropriate length of time in accordance with A.2(b)(iii) of Part 31 of Schedule 2 to the Town and Country Planning (General Permitted Development) Order 1995 (as amended).		
Structural Survey	Part demolition of a building and/or the area to be demolished is attached to any other building	The report should be prepared by an expert about the condition of a building and whether it is capable of accommodating the proposed works.	PPG15 Local Plan BNE16, BNE17	STG Building Control Communities and Local Government policy statements
Protected Species Survey	Possibility the site may contain protected species, such as bats, badgers or great crested newts.	A Protected Species Survey will establish the presence or absence of protected species and, if present, the population level, the likely impact on the species and a scheme of mitigation.	PPS9 Circular 06/05 Local Plan BNE39,	Kent Wildlife Trust Natural England Kent and Medway Biological Records Centre Communities and Local Government policy statements
Photographs/photomontages	All applications within the borough	Photographs and/or photomontages of the buildings to be demolished.		

Information item	Types of application that require this information	What information is required?	Policy driver	Where to look for further assistance?
Planning Statement	All applications	<p>Planning statements should include;</p> <ul style="list-style-type: none"> • A description of the site, its location and its surroundings; • A description of the development proposals; • An explanation of the circumstances surrounding the proposals; • Identification and assessment of the relevant planning policies and guidance; • Identification and assessment of any other material considerations; • Summarise the findings of any other material submitted with the application and show how those findings have been taken into account in designing the proposals; • Details of any consultations with Medway Council as the Local Planning Authority and wider community/statutory consultees undertaken prior to submission of the application. <p>Where proposals are not in principle in accordance with the Development Plan, the main emphasis of the planning statement should be to indicate why the Council nonetheless considers that the application should be approved.</p>	Local and national planning policy	<p>Contact Development Plans on 01634 331629 or Medway Council Guide to Developer Contributions</p> <p>Communities and Local Government can provide information on national planning policy</p> <p>Communities and Local Government policy statements</p>

Information item	Types of application that require this information	What information is required?	Policy driver	Where to look for further assistance?
Tree Survey/Arboricultural assessment	Where the proposed works are within 5 metres of the crown speed of any tree.	<p>See 'block plan/site plan' above. Layout plans should identify trees and other vegetation that is to be retained or lost to the development as well as trees that may be affected on adjoining land. Where trees are affected a tree condition survey will be required. It should cover a range of information about trees at the site and on adjoining land and their contribution to the street scene, visual amenity and ecological importance. An assessment of the implications for the work on the trees.</p> <p>Trees with Tree Preservation Orders are often older trees that have features that are used by bats, i.e., cavities, ivy clad. In these cases the works to be carried out should be assessed for the impact on bats.</p>	<p>PPS9</p> <p>Local Plan</p> <p>BNE41, BNE32, BEN43, BNE44</p>	<p>Medway Council Tree management</p> <p>APN1 – Driveways Close to Trees AAIS, 1996</p> <p>Natural England - Standing advice for protected species</p> <p>Communities and Local Government policy statements</p>

Information item	Types of application that require this information	What information is required?	Policy driver	Where to look for further assistance?
Waste Management Plans	All applications involving the demolition of buildings or structures and/or excavation.	Proposed new development should be supported by site waste management plans of the type encouraged by the code of practice published by the DTI in 2004. These do not require formal approval by planning authorities, but are intended to encourage the identification of the volume and type of material to be demolished and/or excavated, opportunities for the reuse and recovery of materials and to demonstrate how off-site disposal will be minimised and managed.	PPS10 Kent Waste Local Plan	Department of Trade and Industry (2004) Site Waste Management Plans: guidance for construction contractors and clients, voluntary code of practice. Medway Councils Waste Management Strategy Communities and Local Government policy statements

Local validation checklist V21 – Application for approval of reserved matters

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has its own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings **MUST** include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;
- A scale bar;

If you require this information in large print, Braille, on audiotape or in any other format, please contact us on 01634 331700

- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;
- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

Information item	Types of application that require this information	Geographic location where information is required	What information is required?	Policy driver	Where to look for further assistance?
Details of layout – Block plan/site plan	Layout – reserved	All areas of the borough	<p>Site plans should be at an identifiable metric scale, usually 1:500 or 1:200, should be on or based on an up to date Ordnance Survey map showing an indicative layout with the separate development zones proposed within the site boundary where appropriate together with gross floorspace for each proposed use.</p>	Guidance on information requirements and validation	Communities and Local Government Guidance on information requirements and validation
	Layout – under consideration		<p>Site plans should be at a scale of 1:500 or 1:200, should be on or based on an up to date Ordnance Survey map and should accurately show:</p> <ul style="list-style-type: none"> • the position of all new buildings on the site; • routes and open spaces within the development; • the relationship of buildings, routes and open spaces to buildings and spaces outside the development; • provision for the parking of vehicles and cycles and the turning of vehicles. 		
Details of access	Access – reserved	All areas of the borough	<p>Indicative access points The applicant shall state the area or areas where access points to the proposed development will be situated.</p>		

Information item	Types of application that require this information	Geographic location where information is required	What information is required?	Policy driver	Where to look for further assistance?
Details of access	Access – under consideration	All areas of the borough	<p>Site plans should be at a scale of 1:200 or 1:500 showing:</p> <ul style="list-style-type: none"> accessibility to and within the site for vehicles, pedestrians and cyclists; the position and treatment of the proposed/new accesses, and/or; the position and treatment of circulation routes within the site, including facilities for cyclists and pedestrians; the position and details of any accessed to be closed; how access and circulation routes fit into the surrounding area. 		
	Scale - reserved	All areas of the borough	<p>Details of scale parameters</p> <p>The applicant shall state, either in writing or on the submitted plans, the upper and lower limit for the height, width and length of each building included in the proposed development.</p> <ul style="list-style-type: none"> Drawing showing the height, width and length of each building proposed in relation to its surroundings at a scale of 1:100 or 1:200. Street scene drawing showing the relationship between buildings both within and adjacent to the development. 		
Details of scale	Scale – under consideration				

Information item	Types of application that require this information	Geographic location where information is required	What information is required?	Policy driver	Where to look for further assistance?
Existing and proposed elevations	Appearance under consideration	All areas of the borough	At a scale of 1:50 or 1:100, showing clearly the proposed works in relation to what is already there, for any elevations that would be created or altered by the development proposal. Where a proposed elevation adjoins another building or is in close proximity to it, the drawings should show the relationship between the two buildings and detail the positions of the openings on each property.		
Existing and proposed floor plans			At a scale of 1:50 or 1:100, highlighting any existing walls or buildings that are to be demolished, where applicable.		
Existing and proposed roof plans			At a scale of 1:50 or 1:100, showing the shape of the roof, its location, and specifying the roofing material to be used.		
External finishes			The types of external finishes to be used including colour, texture and profile.		
Amount of development	All applications	All areas of the borough	Details of the amount of development proposed for each use		
Proposed uses	All applications	All areas of the borough	Details of the use or uses proposed for the development and any distinct development zones within the site to be identified.	Guidance on information requirements and validation	Communities and Local Government Guidance on information requirements and validation

Surface Water Drainage Assessment	For operational developments of less than 1 hectare site size falling within Flood Zone 1.	All areas of the borough	A surface water drainage assessment will be required for those developments that are likely to generate significant increase in the flow of water across and from the site. Surface water run-off should be controlled as near to its source as possible through a sustainable drainage approach to surface water management (SUDS). SUDS are an approach to managing surface water run-off which seeks to	<p>PPS1</p> <p>Annex to PPS1</p> <p>PPS25</p> <p>Local plan</p>	<p>STG Building Control</p> <p>Development and Flood Risk: A Practice Guide</p>

Information item	Types of application that require this information	Geographic location where information is required	What information is required?	Policy driver	Where to look for further assistance?
Surface Water Drainage Assessment continued	If a known drainage problem exists		mimic natural drainage systems and retain water on or near the site as opposed to traditional drainage approaches which involve piping water off site as quickly as possible. SUDS involve a range of techniques including soakaways, infiltration trenches, permeable pavements, grassed swales, ponds and wetlands. SUDS offer significant advantages over conventional piped drainage systems in reducing flood risk by attenuating the rate and quantity of surface water run-off from a site, promoting groundwater recharge, and improving water quality and amenity. Please note requirement identified within Landscape section to cross-reference SUDS details with Landscape drawings, particularly on major schemes. If a known drainage problem exists and the Local Planning Authority would like assurance from the developer that flood risk has been addressed.	paragraphs 9.5.34 – 9.5.37	Companion to PPS25 'Living Draft' CIRIA C522 document Sustainable Urban Drainage Systems-Design Manual for England and Wales and the Interim Code of Practice for Sustainable Drainage Systems.

Local validation checklist V22 – Application for removal or variation of condition following grant of planning permission

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has its own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings MUST include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);

If you require this information in large print, Braille, on audiotape or in any other format, please contact us on 01634 331700

- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;
- A scale bar;
- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;
- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

VISUAL IMPACT AND OTHER ASSESSMENTS RELATING TO TALL BUILDINGS					
Accurate visual representations	Tall building proposals (6 storeys or over 20m in height, whichever is lower)	All areas of the borough	Showing the proposals in all significant views affected, near, middle and distant, including public realm and streets at the base of the building. They should be accurately rendered. It may be included in an Environmental Statement, if required. A daylight, sunlight and wind indicator test	CABE English Heritage Guidance on tall buildings Medway Building Heights Policy 2006	Contact Design and Conservation team Medway Building Heights Policy 2006
Microclimate assessment					
Landscape / Townscape Character Assessment	Developments that are within or would be visible from the countryside, such as on the edge of settlements, and are likely to affect the natural beauty or character of the rural landscape.	Within or visible from the countryside. Within or close to designated sites including conservation areas, World Heritage sites, Listed buildings, Historic Parks or Gardens	To demonstrate the possible effect of medium and larger scale developments on the character, appearance and local distinctiveness of the landscape and/or townscape. The assessment should consider the characteristics of the landscape/townscape that forms the context for the site. Reference should be made to any landscape or conservation area assessments or any landscape designations, as well as relevant local character areas. Key public viewpoints of the site from the surrounding area should be identified. The assessment should include illustrative material in the form of photomontages, sketches or perspectives that would assist with understanding the likely impact of the proposal and any requirements for mitigation	PPS1 PPS5 PPS7 Local Plan SD4, BNE1, BNE6, BNE12, BNE18, BNE32, BNE33, BNE34, BNE47 Medway Council	Guidelines for Landscape and Visual Impact Assessment – The Landscape Institute and The Institute of Environmental Management and Assessment

Surface Water Drainage Assessment	For operational developments of less than 1 hectare site size falling within Flood Zone 1. If a known drainage problem exists	All areas of the borough	A surface water drainage assessment will be required for those developments that are likely to generate significant increase in the flow of water across and from the site. Surface water run-off should be controlled as near to its source as possible through a sustainable drainage approach to surface water management (SUDS). SUDS are an approach to managing surface water run-off which seeks to mimic natural drainage systems and retain water on or near the site as opposed to traditional drainage approaches which involve piping water off site as quickly as possible. SUDS involve a range of techniques including soakaways, infiltration trenches, permeable pavements, grassed swales, ponds and wetlands. SUDS offer significant advantages over conventional piped drainage systems in reducing flood risk by attenuating the rate and quantity of surface water run-off from a site, promoting groundwater recharge, and improving water quality and amenity. Please note requirement identified within Landscape section to cross-reference SUDS details with Landscape drawings, particularly on major schemes.	PPS1 Annex to PPS1 PPS25 Local plan paragraphs 9.5.34 – 9.5.37	STG Building Control Development and Flood Risk: A Practice Guide Companion to PPS25 'Living Draft' CIRIA C522 document Sustainable Urban Drainage Systems-Design Manual for England and Wales and the Interim

Local validation checklist V23 – Application for tree works – works to trees subject to a tree preservation order (TPO) and/or notification of proposed works to trees in a conservation area

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has its own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings MUST include the following information:

- The scale of the drawing. This should be a recognised metric scale. See information required for each drawing type in the checklist;
- Indicate the direction of North on layout and location plans;
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010);
- Have a unique drawing number which also indicates any revisions (e.g. 1234 Revision B);
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010);
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows;
- A scale bar;

If you require this information in large print, Braille, on audiotape or in any other format, please contact 1 us on 01634 331700

- Where a drawing contains different elements of the proposal they should be clearly grouped under headings;
- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.

Information item	Types of application that require this information	What information is required?	Policy driver	Where to look for further assistance?
Sketch plan	All applications within the borough	Showing the location of the trees		
Photographs	All applications within the borough	Photographs of the trees that are the subject of the application.		
Arboricultural assessment	Applications for works that relate to the health and/or safety of the tree/s	A report, written by a tree professional, detailing the reasons for the proposed works. If the works relate to subsidence an engineer or surveyor may write your report.		
Details of advice from Medway Council	All application within the borough	Provide details of any assistance sought from an officer of Medway Council prior to submitting this application.		

Local validation checklist V24 – Application for Approval of Details Reserved by Condition

This is a checklist of local requirements only. In addition, mandatory requirements are listed on the accompanying application form. You will be required to provide all the information on the application form and some of the information on this checklist. Each application has its own requirements and some proposals may need more information than others. Please read the accompanying [Validation Advice Note](#) for more information on the national requirements and links to further information.

GENERAL REQUIREMENTS

The original and 3 copies of all documentation relating to the application should be submitted, except if the application is submitted electronically.

DRAWINGS

All drawings MUST include the following information:

- The scale of the drawing. This should be a recognised metric scale. See the scale required for each drawing type in the checklist.
- Indicate the direction of north on layout and location plans.
- Have a title, to identify the specific development, subject of the drawing and date drawn (e.g. Residential development at Netherfield Park, Merryton – Site Layout – 1 October 2010).
- Have a unique drawing number that also indicates any revisions (e.g. 1234 Revision B).
- All revisions should be described to identify any changes and date revisions made (e.g. Revision A – Layout changed – 1 November 2010).
- Annotation against the drawing to indicate all key external dimensions and floor to cill height measured internally for proposed windows.
- A scale bar.
- Where a drawing contains different elements of the proposal they should be clearly grouped under headings.

If you require this information in large print, Braille, on audiotape or in any other format, please contact 1 us on 01634 331700

- Where a proposal contains works that do not require planning permission, Development Management will assess that element of the application, with the rest of the proposal, if it is shown on the drawings. If the applicant does not want that element assessed then it must be removed from the drawings.
