

Appendix 4: Submission by the lead petitioner to the Business Support and Digital Overview and Scrutiny Committee:

- a) Can the committee reflect on the real possibility that we could end up with no Parking at Baron Close at all.
- b) The few remaining parking spaces available to us now are in serious threat of disappearing altogether. Please consider that this street is a vital element for our lives too.
- c) Why is there no consideration for our available street parking in a shared street; please consider this and bear in mind we have had parking in Baron Close for decades.
- d) The petition residents have no frontage parking available; could the committee reflect on whether the planning process could have been better implemented so that the impact was not so disproportionate.
- e) We do not know at this time how far all this planning will go in baron close , so we could end up with no street parking for our day to day lives , this situation should never have occurred in the way it has , and would very much like to preserve the last remaining parking places we have , we as constituents and residents can only hope that a fair democratic system prevails on this matter.
