Subject: School streets

Dear David

The following is a summary of what we have experienced as a school.

Impact on School Streets for Greenvale Primary School:

Positive:

- Quieter streets which means safer streets in the morning and at home time
- No morning rush of cars - safer for children
- More children are walking to school impacting their health and well-being
- School has supported residence if they needed help applying - better relationship with Neighbours
- No parents parking over Neighbours drives - so less complaints to school
- No parking over zig-zag lines at any particular time - safer for the families
- Less traffic means better air quality for our children
- No complaints from parents

Negative:

- Contractors/visitors have to be made aware of School street and time they can arrive at school without a fine - all have been perfectly fine with it so far

If you have any further questions, please ask

Kind Regards

Mrs Allnutt
