# Introduction

The Medway Annual Schools' Performance report summarises the outcomes for learners in Medway's schools over the previous academic year.

## **Local authority comparisons**

Where data is available through census or external tests then comparisons to national are made. Where comparisons are made to positions in the rank order with other local authorities then it should be noted that, the Local Authority (LA) rankings are out of 151 local authorities; there are 153 LAs in total however the City of London and Isles of Scilly have been redacted due to small cohort sizes. This may make rank movements of 1 or 2 negligible. Rankings do not include the national figure or regions such as south-east.

## **Percentages and percentage points**

When stated that a measure is x% above or below national this is the proportionate lead or proportionately below, not the percentage points gap. Where characteristic comparisons are made, this is against the respective national characteristic e.g. Medway SEND Support (K) against national SEND support (K). A glossary of terms and acronyms is given at the end of the document.

Term	Definition
Index of Multiple Deprivation (IMD) / Income Deprivation Affecting Children Index (IDACI)	<p>The Index of Multiple Deprivation (IMD) is an overall relative measure of deprivation constructed by combining seven domains of deprivation according to their respective weights, as described below.</p> <p>The seven domains of deprivation are as follows:</p> <ul style="list-style-type: none"> <li>• The Income Deprivation Domain measures the proportion of the population experiencing deprivation relating to low income. The definition of low income used includes both those people that are out-of-work, and those that are in work but who have low earnings (and who satisfy the respective means tests).</li> <li>• The Employment Deprivation Domain measures the proportion of the working-age population in an area involuntarily excluded from the labour market. This includes people who would like to work but are unable to do so due to unemployment, sickness or disability, or caring responsibilities.</li> <li>• The Education, Skills and Training Deprivation Domain measures the lack of attainment and skills in the local population. The indicators fall into two sub-domains:             <ul style="list-style-type: none"> <li>one relating to children and young people and one relating to adult skills.</li> </ul> </li> <li>• The Health Deprivation and Disability Domain measures the risk of premature death and the impairment of quality of life through poor physical or mental health. The domain measures morbidity, disability and premature mortality but not aspects of behaviour or environment that may be predictive of future health deprivation.</li> <li>• The Crime Domain measures the risk of personal and material victimisation at local level.</li> <li>• The Barriers to Housing and Services Domain measures the physical and financial accessibility of housing and local services. The indicators fall into two sub-domains: 'geographical barriers', which relate to the physical proximity of local services, and 'wider barriers' which includes issues relating to access to housing such as affordability.</li> </ul>
LSOA	Lower Super Output Area
Minimum Standards- Internal use only, officially discontinued	Minimum Standards For KS5 Are Separate For Academic, General And Technical. If A School Is Below These Thresholds They Are Seen As Underperforming. A Provider Will Be Seen As Underperforming If; 1) Its Academic Or Applied General Value Added Score Is Below Threshold (-0.52 For Academic, -0.65 General); And 2) Its Value Added Score Is Statistically Significantly Below The National Average (I.E. Both The Upper And Lower Confidence Intervals Are Below 0).
NEET	Not In Education, Employment Or Training. Local Authorities (Las) Were Previously Responsible For Tracking From Ages 15 To 19, And To 20- 25 Year Olds With A Statement Of Educational Need Or Disability (Send). From September 2016 The Department Of Education (Dfe) Relaxed The Requirement On Authorities To Track Academic Age 18 Year Olds. Las Are Now Only Required To Track And Submit Information About Young People Up To The End Of The Academic Year In Which They Have Their 18Th Birthday I.E. Academic Age 16 And 17-Year-Olds. Young People With An Ehcp Should Still Be Tracked And Reported On Until Their Ehcp Ceases. This May Be Up Until The Age Of 25. The Responsible Authority Is Based On Locality Of Residence.
Persistent Absence	An individual is considered persistently absent if they are absent for 10% or more sessions. This percentage equates to 38 sessions for terms 1-6. The criteria prior to 2011 was set at 20% in 2015 it was set at 15%.
Phonic Decoding Phonic Outcomes	A way of learning to read that breaks words down into sounds. Decoding is the understanding of sounds. Phonics is the way sounds are used to make words. The phonic check or test is at the end of year 1 (6 year olds). Children who do not pass the test retake it in year 2.
Progress (KS2 measure)	These scores show how much progress pupils at this school made in reading, writing and maths between the end of key stage 1 and the end of key stage 2, compared to pupils across England who achieved similar results at the end of key stage 1. The scores are calculated by comparing the key stage 2 test and assessment results of pupils at this school with the results of pupils in schools across England who started with similar assessment results at the end of key stage 1.
Progress 8	Confidence intervals are included to indicate how confident we can be that we are statistically significant above or below national with low levels of overlap. A measure of expected progress against results at KS2. The progress a pupil makes from the end of primary school to the end of key stage 4. It is a type of value added measure, which means that pupils' results are compared to the actual achievements of other pupils with the same prior attainment. Most schools score between -1 and +1. If a school scores +1 and above, it shows that pupils made exceptionally good progress. A negative progress score does not mean pupils made no progress, but the pupils in the school made less progress than expected compared to other pupils across England with similar results at the end of key stage 2.
Progress Key Stage 5 measure	Confidence intervals are included to indicate how confident we can be that we are statistically significant above or below national with low levels of overlap. The progress a pupil makes from the end of key stage 4 to the end of key stage 5. It is a type of value added measure, which means that pupils' results are compared to the actual achievements of other pupils with the same prior attainment. Most schools score between -2 and +2. If a school scores above 0, it shows that pupils made good progress. A negative progress score does not mean pupils made no progress, but the pupils in the school made less progress than expected compared to other pupils across England with similar results at the end of key stage 4. Confidence intervals are included to indicate how confident we can be that we are statistically significant above or below national with low levels of overlap.
RSC	Regional Schools Commissioner: the Department for Education's official overseeing standards in academies.

Suspension Pupil Rate	The Rate Of Excluded Pupils, As Apose To The Rate Of Exclusions, As A Proportion Of The Cohort Total.
Technical Level	KS5 qualifications which "are rigorous advanced (level 3) technical qualifications, on a par with A levels and recognised by employers. They are for post-16 students wishing to specialise in a specific industry, occupation or technical role. They equip a student with specialist knowledge and skills, enabling entry to an apprenticeship or other employment, or progression to a related higher education course. In some cases, these qualifications provide a 'licence to practise' or exemption from professional exams."
