|            | <p>Hi</p> <p>I am a resident of St Margaret's Street and so pleased St Margarets is now included in the proposal. Initially in the leaflet put through our door St Margaret's Street was included then this was denied by Alex Patterson who stated it was never going to be included which makes no sense at all .St Margaret's Street is really affected by the parking of parents picking up their children and dropping them off .The road is narrow one lane and it means cars park on the pavement and pedestrians cant get past .Many properties have no front gardens and damaged has been done to buildings. Cars go through St Margaret's Street very fast thankfully no one has been hurt as yet. Parents sit in their cars with the engine on for up to 45 minutes .St Margaret's Street is a conservation area which must be protected.</p> <p>Kings school every day now put out cones and there have been so many complaints I would like to point out this is the first time as residents we have been listened too and they have acted. We feel Kings school are making an effort as they don't want the school street scheme ,We feel Kings school will stop trying if there is no school street scheme. and the parking will go back to being a nightmare. Parents still park on double yellow line and will move the cones or just ignore them or drive over them. When we have asked cars to move, we have been verbally abused by parents.</p> <p>As residents we feels strongly that there should be a 20mph on St Margaret's Street</p> <p>Kind regards,<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures. Regarding the 20mph scheme, although this would help reduce severity of collisions a school street is designed to go further by preventing collisions. Therefore, a school street has been prioritised however it is recognised that 20mph would improve safety in the area.</p> |
|            | <p>Good Afternoon,</p> <p>As a resident on the Maidstone Road, with our driveway entrance on to King Edward Road (shown on your map), I write to enquire as to what arrangements are proposed for us living here? We live in front of the Kings Nursery and Prep School.</p> <p>No where in your proposal have you talked about facilities/permits for residents, using the road during drop off and pickup times. I would be grateful for clarification.</p> <p>We have lived here for over 30 years and support your proposals, which are overdue and most welcome.</p> <p>Thank you.<br/>Yours sincerely, [REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p>Feedback noted.</p> <p>Local residents who live on King Edwards Road will be exempt from restrictions. Arrangements and process for applying for an exemption will be published if the scheme goes ahead.</p>                                                                                                                                                                                                                                                                                         |
|            | <p>To whom it may concern,</p> <p>I am writing to submit a representation regarding the proposed Medway Council (School Street and Prescribed Routes) (No. ) Traffic Order 2026 affecting St Margaret's Street, King Edward Road, Lockington Grove, Roebuck Road and Watts' Avenue in the vicinity of King's School, Rochester.</p> <p>I am a local resident - [REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Feedback noted.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school.</p>                                                                                                                                                                                 |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>While I support the started objectives, I am concerned that the proposed measures will worsen safety, congestion and pollution by creating bottlenecks, rather than reducing traffic overall. The combination of the pedestrian and cycle zone together with the additional one-way restrictions and access prohibitions appears likely to concentrate traffic onto a smaller number of routes, in particular Vines Lane and Maidstone Road, which already have a significant amount of traffic, particularly around rush hour in the morning and evening. Further, restricting through traffic on St Margaret's Street, creates a notable diversion for traffic to Borstal, from central Rochester, which is already restricted northbound - lengthening journey times.</p> <p>I therefore don't believe these measures will achieve your stated aims:</p> <ul style="list-style-type: none"> <li>- Pedestrian safety, will be less safe on those roads not subject to restrictions - Maidstone road is already particularly precarious to cross over</li> <li>- Bottlenecks and longer journeys will lead to more, not less, congestion and pollution</li> </ul> <p>I therefore DO NOT SUPPORT the proposed changes.</p> <p>Yours,</p> <p>[REDACTED]</p> | <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                                                                                                                                                                                                                                                                                                                          |
|  | <p>I have been sent this email in error, can I please request you to review and respond.</p> <p>Thanks</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>Query noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|  | <p>Dear [REDACTED]</p> <p>I am writing with regard to the proposed road/direction changes/limits around the King's School, as suggested by Mark Snoswell.</p> <p>Have you got a map which would be easier to understand? This would make it more inclusive for those who have trouble visualising from text.</p> <p>Are the changes 24 hour and permanent?</p> <p>I would expect them to only be operational during school delivery/pick up times, during the term times, as the intention is to relieve traffic congestion/improve school safety at these times.</p> <p>If not, they would represent very significant changes to traffic flows, resulting in longer routes home for people into and around the area, and therefore, more fuel consumption and pollution. There will be a serious knock on effect on other routes. Such a series of changes should be more widely consulted on.</p> <p>I look forward to hearing from you.</p> <p>Kind regards<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                             | <p>Feedback noted.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Hi,</p> <p>My children go to St Andrews school on Watts' Avenue in Rochester. The school street</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <p>Feedback noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

|  | <p>proposal is going to cause a significant increase in the time it takes to get my children to school and increase pollution as I have no choice but to take a longer route. I usually travel across strood bridge, turn onto boley hill and then across st Margaret's st to access Watts' Avenue. The proposal would force me to take a much longer route, at least 15 minutes, creating additional traffic and pollution.</p> <p>I am against the proposal. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Sir/Madam,</p> <p>I would like to formally raise concerns regarding the proposed traffic arrangements relating to King's School.</p> <p>While the intention may be to manage congestion around the school itself, the proposal appears to shift the problem onto neighbouring roads and areas where other schools and families are already dealing with busy traffic during peak times. Redirecting vehicles away from King's School risks increasing traffic flow on surrounding routes, which could create dangerous situations for pupils, parents, and residents near those schools.</p> <p>Many of these roads are already heavily used during school drop-off and pick-up times. An increase in diverted traffic could significantly raise the risk of accidents, reduce road safety for children walking or cycling to school, and increase congestion in areas that are not designed to accommodate additional vehicles.</p> <p>There are also wider wellbeing concerns. If surrounding roads become more congested due to diverted traffic, families whose children attend nearby schools may have to leave home earlier in order to reach school on time. This could place unnecessary stress on both children and parents and negatively affect daily routines and mental wellbeing.</p> <p>In addition, increased traffic will likely contribute to higher levels of noise and air pollution in residential areas and around other schools. This raises health concerns for children who are walking, cycling, or waiting near these roads.</p> <p>Rather than relocating the traffic problem, it would be more appropriate for King's School to consider solutions that reduce the number of vehicles travelling to and from the school in the first place. Possible alternatives could include providing school bus transport for pupils, encouraging organised car sharing, or implementing staggered arrival and departure times.</p> <p>Without measures that address the root cause of the traffic volume, the current proposal risks simply moving congestion and safety risks from one area to another. I strongly encourage the council to reconsider the proposal and ensure that any traffic management plan protects the safety and wellbeing of all children and residents in the surrounding community.</p> <p>Kind regards<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                                                                                                                                                                               |

|  | <p>Hi,</p> <p>My children go to St Andrews school on Watts' Avenue in Rochester. The school street proposal is going to cause a significant increase in the time it takes to get my children to school and increase pollution as I have no choice but to take a longer route. I usually travel across strood bridge, turn onto boley hill and then across st Margaret's st to access Watts' Avenue. The proposal would force me to take a much longer route, at least 15 minutes, creating additional traffic and pollution.</p> <p>I am against the proposal. I think alternative measures should be considered to increase safety.</p> <p>Thanks<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>Feedback noted.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. |  | <p>To whom it may concern,</p> <p>This is a formal submission to reject the proposals for the school streets scheme around Kings School.</p> <p>It will decrease safety- forcing all traffic into two main entry / exit points (Roebuck and St Margaret's Street) forcing cars to mount pavements to get past each other especially in the case of St Margaret's street!</p> <p>It will increase congestion- two schools worth traffic forced on the same two roads, plus the added issue of people unaware of the "unofficial one way system" causing a blockage by going the opposite way. Again mainly an issue for St Margaret's street which regularly gets blocked with cars unable to pass!</p> <p>Won't encourage walking because this proposal will create such a hostile environment with added congestion and frustration that cars will be forced to mount pavements, parking ways that don't allow people to walk past that it will be too dangerous to walk!!</p> <p>Air quality is fine now for a start and forcing all cars down Roebuck will aggregate that pollution in that road and local area! Also impacting the air quality for St Andrews! Why is it ok to add pollution on a residential road impacting those that are walking or children going to the other school for the sake of a posh school?!!!! Are the wants of the wealthy more important than residents and other children?!!</p> <p>This proposal is dangerous and not thought through! The roads and surrounding infrastructure is not equity for this scheme!</p> <p>You are putting the lives of locals and other school children at risk to satisfy a tick box expertise for the privileged few!!! Outrageous!</p> <p>I whole heartedly object to this ridiculous proposal!</p> | <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school. We also believe this will reduce not worsen pollution in the area over the long term.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>I would like to make a representation in support of the proposed scheme (in addition to my original support as stated in the first round of this process.</p> <p>I live on St Margaret's Street between the Vines and King Edward Street junctions and, along with other residents, made repeated complaints and raised concerns about the illegal and inconsiderate parking and driving behaviour of many of the parents delivering and collecting pupils the school for general classes as well as extra-curriculum and social events.</p> <p>We have detailed incidents, provided photographic evidence which shows the risk to the</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>Support noted.</p> <p>Thank you for your support. We believe the scheme will improve safety by separating school-related pedestrian movements from traffic. Enforcement of illegal parking will also be undertaken to ensure a high level of compliance to ensure safety is guaranteed.</p>                                                                                                                                                                                                                                                           |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

|  | <p>safety to pupils attending the schools in our vicinity, the safety of other pedestrians and motorists.</p> <p>More recently King's School has been placing 'no parking' cones and to some extent had staff present to discourage parents from parking: This has some effect but we still have people moving or ignoring the cones.</p> <p>I am concerned that if the proposal fails, Kings School will cease to continue their efforts to manage the parking issue as their representatives have openly stated that Kings School does not want the scheme to go ahead. This seems to be diametrically opposed to their insistence that pupil safety is a major concern for them.</p> <p>Kind regards.<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|  | <p>Hello</p> <p>Please can you send me details of the proposal for the safer schools' scheme that will affect the area around the Kings pre-preparatory school and nursery in Rochester and any consultation document that I can complete</p> <p>Kind regards<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>Query noted.</p> <p>Request actioned.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|  | <p>Dear Sir/Madam,</p> <p>I have reviewed the proposed School Streets Scheme for St Margaret's Street, King Edward Road, and Lockington Grove. I am writing to formally state that I consider the scheme, in its current form, to be unacceptable.</p> <p>The proposal fails to provide comprehensive 24/7 safety for the community and does little to deter speeding motorists. Consequently, it will have a negligible impact on air quality. Furthermore, it will likely displace traffic congestion onto neighbouring roads that are already operating at maximum capacity.</p> <p>However, I believe the 'Safe Streets Rochester' alternative is far more viable. Specifically:<br/>Comprehensive 20 MPH Zone: A comprehensive 20 MPH speed limit starting from the High Street and extending through Boley Hill and Minor Canon Row. This zone will encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road, and Mitre Road.<br/>King Edward Road Realignment: To streamline flow, King Edward Road will become a one-way system, with vehicle access permitted only via St Margaret's Street.<br/>Install Speed bumps/traffic calming<br/>This alternative provides 24/7 safety, actively reduces speeding, improves air quality, and prevents the congestion displacement inherent in the proposed scheme.</p> <p>I look forward to receiving an acknowledgment of this response.</p> <p>Yours faithfully,<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school. We also believe this will reduce, not worsen pollution in the area over the long term.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> <p>Regarding the 20mph scheme, although this would help reduce severity of collisions a school street is designed to go further by preventing collisions. Therefore, a school street has been prioritised however it is recognised that 20mph would improve safety in the area.</p> |
|  | <p>Hi,</p> <p>I note your website on this issue has the information that you have been allocated £486k from the Government's 'Active Travel Fund'.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>Query noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|  | <p>Is this in addition to £486k allocated in May 2023?</p> <p>If so then presumably the original £486k has been used wholly or partly on the School Streets already in place throughout Medway.<br/>This would mean that you already have records of costs relating to those schemes and a good idea as to how much the Kings School works would be likely to cost.</p> <p>Please therefore supply under the Freedom of Information the detailed expenditure that Kings school works will cost and the remaining balance of the original £486k or how the costs were met for already installed School Streets in Medway.</p> <p>I also seek information as to when the streets around Kings School and surrounding roads will have the many potential holes /craters repaired in order to make them safe enough for children /young students to cycle to school.</p> <p>Has installation of 20mph speed limits and cycle lanes been risk assessed in the area to ascertain whether or not any of the roads in the locale are actually safe enough for cyclists/bike users to use without immediate substantial repairs/improvements.</p> <p>I look forward to receiving your reply by email.</p> <p>(My formal representation on this proposal will follow when I am in full possession of the facts).</p> <p>Thank you [REDACTED]</p>                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|  | <p>Hi Medway Council,</p> <p>My name is [REDACTED]</p> <p>I own and live at [REDACTED]</p> <p>OBJECTION: Based on the proposal that has been reached out from the council, I can see that the bit of Maidstone Road that we live on, which is just around the corner from King's School, will be severely and negatively impacted by the proposed changes. Maidstone Road at no. 38 where we live is already a busy and, in the morning and afternoon, very congested road. We're not happy with this as it generates both chemical and sound pollution that impacts on our family's health and wellbeing in a negative way. The proposed changes will generate EVEN MORE TRAFFIC on Maidstone Road where we live as school drop-off/pick-up traffic is redirected to Maidstone Road. To make our position clear, we only agree with the proposed changes if they are EXPANDED to include the section of Maidstone Road where we live so that we don't have to pay the high price of added pollution and car traffic. If Maidstone Road can't be included in the new scheme, we categorically reject any and all proposed changes.</p> <p>P.S.: You might want to have a look at road safety on Maidstone Road whilst you're at it too. There are no speed bumps, very narrow and unprotected pavements, and people speed all the time. Please consider speed bumps and/or installing a speed camera if you care about safety.</p> <p>Best regards,<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school. We also believe this will reduce, not worsen pollution in the area over the long term.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> <p>We recognise speeding is a problem, however rather than implement speeding controls which will reduce the severity of collisions we are opting to eliminate the risk of collisions by separating school-based pedestrian movements from traffic.</p> |

|  | <p>Dear Medway Council Representative,</p> <p>I am writing to formally object to the proposed School Streets scheme for The King’s Pre-Preparatory School and Nursery. Based on the latest proposal map published for the March 2026 consultation, I must express my strongest opposition to this plan.</p> <p>While I fully support initiatives that genuinely improve child safety, this proposal appears to be a "desktop exercise" that fails to account for the physical reality of the area and the specific demographic of the school. Instead of eliminating risk, it displaces it, all while imposing a severe financial penalty on working families.</p> <p>My formal objection is based on the following critical grounds:</p> <p>1. Failure to Recognize the Geographic Reality of a Private School</p> <p>King’s Rochester serves families from a wide catchment area across Medway and beyond. Unlike a local state school where a significant portion of the student body lives within a short walking distance, driving is an objective, unavoidable necessity for the vast majority of our families. This scheme does not encourage "active travel"; it simply creates an artificial barrier for parents who have no choice but to commute from outside the immediate neighborhood. Penalizing these families via ANPR enforcement cameras without providing viable transport alternatives is highly inequitable.</p> <p>2. Displaced Danger and the "Frogger" Reality</p> <p>The proposed restrictions on King Edward Road and St Margaret’s Street (8:00 am–9:00 am and 3:45 pm–4:45 pm) will force parents to park in distant public car parks. This directly forces young children and toddlers to navigate much busier, faster-moving roads—specifically Maidstone Road and the Vines Lane / E Row junction.</p> <p>There are no adequate, safe pedestrian crossings at these displacement points to handle a sudden influx of small children.</p> <p>During the morning rush hour, attempting to cross these specific junctions with a toddler feels like a real-life game of "Frogger."</p> <p>Furthermore, the proposed introduction of a one-way system on Roebuck Road and a "No Left Turn" from St Margaret’s Street will funnel displaced traffic into narrow residential routes, making the walking paths even more hazardous.</p> <p>I formally challenge the decision-makers of this scheme to walk these specific routes and cross these roads with a toddler during peak hours. You will immediately see that this proposal creates a significantly more dangerous environment than the one it attempts to fix.</p> <p>3. The Unjustifiable "Parking Tax" and Lack of Free Alternatives</p> <p>If the Council were genuinely prioritizing child safety over local resident convenience or fine revenue, it would ensure that all surrounding public car parks are free of charge during school drop-off and pick-up times. Instead, this scheme acts as a mandatory tax on parents.</p> <p>The nearest viable parking (Union Street) costs £1.90 for just 30 minutes.</p> <p>For a parent making the two necessary trips per day, this equals a £3.80 daily penalty, amounting to £722.00 per school year.</p> <p>Crucially, for Nursery and Pre-Prep parents who must physically walk their children into the building and sign them over to staff, a 30-minute turnaround is often impossible. If the stay extends into the 1-hour bracket (£2.90 per trip), this Council-imposed cost soars to £1,102.00 per year. This is a disproportionate and unacceptable financial burden.</p> <p>4. Infrastructure Must Precede Enforcement</p> <p>The Council is attempting to restrict its way out of a localized traffic issue without providing the necessary groundwork. Before any vehicle restrictions are implemented, the Council must:</p> <p>Establish free, designated "Park and Stride" zones for school parents.</p> <p>Install permanent, signalized pedestrian crossings on Maidstone Road and Vines Lane.</p> <p>Work with the school to provide subsidized bus services to genuinely reduce the volume of cars.</p> <p>Conclusion In its current iteration, this scheme prioritizes the convenience of a few local streets over the safety and financial well-being of the children and families who attend the school. Until Medway Council can provide a safe, free, and practical way for parents to reach the school gates, this proposal must be firmly rejected.</p> | <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> <p>The scheme also aims to encourage use of more sustainable forms of travel like walking and cycling, to school to reduce levels of traffic in and around the school gate.</p> <p>Consideration to the decision of the school street is given to the suitability of walking routes and the concerns related to crossing Maidstone Road are noted.</p> |

|  | <p>I request that this objection be formally logged as part of the statutory consultation process. I look forward to your response and would welcome an invitation to meet on-site to demonstrate these severe safety concerns in person.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|  | <p>Dear Medway Council Representative,</p> <p>To truly understand the level of anxiety and hazard you are imposing on families, I invite the decision-makers to experience it firsthand by playing a quick round here:<br/><a href="https://happyhopper.org/">https://happyhopper.org/</a>.</p> <p>Now, imagine playing that game in real life, with a toddler's hand &amp; bags in yours, while real cars speed by during busy hr. That is the reality of your proposal.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Feedback noted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|  | <p>Hi,</p> <p>Please could you send me a layout drawing (any format) to clarify the proposed "extend the existing south-westbound one-way restriction for vehicles in ST MARGARET'S STREET so that it would apply between a point 15.5 metres south of the south-western kerb-line of Vines Lane and the northern kerb-line of Watts' Avenue. As a result, vehicles would no longer be permitted to enter St Margaret's Street from the junction with Watts' Avenue"</p> <p>Would the proposed one-way restriction in St Margaret's Street prevent me (either direction) from my daily commute, please see sketch below?</p> <p>If yes, then I strongly object to item 2 (b) in the proposal, on the ground:<br/>It is unnecessary, I ensure that I am past St Andrews School (on Watts' Avenue) before 7.45am in the mornings and I return after 5pm in the afternoons<br/>It would be moving a problem – the congestion (in the morning) of vehicles accessing Maidstone Road via Priestfields would increase by an estimated 30%<br/>There are no other alternatives<br/>The value of my property would decrease<br/>Background:</p> <p>Both my children attended King's School Rochester – pre-prep, prep &amp; senior schools. They normally travelled via a King's School bus, until I moved to Rochester, see next point<br/>I moved to the Esplanade - one of the main reasons was for my child to avoid the school bus.<br/>After 7 years, I moved (during Covid) from the Esplanade to Bishops Square, where I still reside<br/>Other comments regarding the attached:</p> <p>Item 2(c) – making Roebuck Road one-way sounds like a good idea, and I would also have no objection to the section between of St Margaret's between Roebuck Road and Watts' Avenue being made one-way – but I'm not a resident living in the sections affected<br/>Where are parents supposed to drop off their children, especially the King's School pre-prep?<br/>I'd appreciate it if you could respond before the discussion in the School Hall, 7pm Thursday.</p> <p>Best regards,<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school. We also believe this will reduce, not worsen pollution in the area over the long term.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> <p>The one-way system was part of the overall wider measure for the school street to facilitate the flow of traffic within the area</p> |
|  | <p>Hi,</p> <p>Many thanks for the clarification &amp; prompt response. My previous objection is withdrawn.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Feedback noted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

|  | <p>Note that the changes will effect my daily commute, in the evenings – see attached.</p> <p>I object to item 3 in the proposal: "FURTHER NOTICE IS GIVEN that the Council, under sections 90A-F of the Highways Act 1980 and in accordance with the Highways (Road Humps) Regulations 1999, propose to construct two road humps in Roebuck Road, outside No. 21 and outside No. 2A ("Brunner"). The road humps would be constructed over the full width of the carriageway and will be approximately 3.7 metres in length with a maximum height of 75mm."</p> <p>The grounds to my objection:</p> <p>Medical reasons – I suffer from lower back pain<br/> Roebuck road will be congested when parents drop off or pick up their children from King's School, the speed bumps will only slow traffic when not needed. During peak times, they will be a distraction<br/> Human nature – once installed, no-one has the courage (/common sense) to remove a speed bump<br/> Instead I recommend that the changes (if agreed by the schools &amp; the community) be made without the speed bumps. Speed bumps can be installed at a later date, if deemed necessary based on a professional assessment.</p> <p>As mentioned previously, where are parents supposed to drop off their children, especially the King's School pre-prep?</p> <p>Best regards,<br/> [REDACTED]</p> | <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school.<br/> While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> <p>Consideration to the decision of the school street is given to the suitability of walking routes and the concerns related to crossing Maidstone Road are noted.</p> <p>Your feedback regarding a drop off location has been noted.</p> |
|  | <p>Good morning,</p> <p>My main concern is where does the traffic all go?</p> <p>You don't just have Kings school to consider there is St Andrews and St Margaret's At Troy Town CofE schools within 1 mile radius and by closing the roads around Kings you force more traffic into those spaces.</p> <p>What is the alternative for parents or would there be an ask for the school to be open earlier to allow for drop off and then later for pick up.</p> <p>This is ill thought out with no alternative for parents and children's wellbeing putting further stress on getting ready for a school day. The school have set up a smooth drop off on Lockington Grove to allow for traffic to flow.</p> <p>Alternatives could be one way only on King Edward Street to allow for Lockington Grove to feed into.</p> <p>This is damaging and a poor use of where change can be usefully and proactively used. There needs to be investment into buses and supporting children getting to school rather than restricting them to reaching school.</p> <p>Kind regards<br/> [REDACTED]</p>                                                                                                                                                                                                                                                                                   | <p>Feedback noted.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school. We also believe this will reduce, not worsen pollution in the area over the long term.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                  |
|  | <p>Dear Medway council,</p> <p>Here we are again. The same issues are relevant from the previous consultation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>Feedback noted.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|  | <p>The current proposal is based on three prevalent factors</p> <p>1: reduce congestion - this is very ambiguous and doesn't state where the congestion is and totally ignores congestion on the vines moved closer to the entrance of kings junior school infant entrance on Lockington grove.</p> <p>2: make the roads outside schools safer at pick-up and drop-off times<br/>Lockington grove is already very safe, the main issue is the road crossing at the vines. The council has provided a road crossing officer but this is clearly a stressful position with the officer absent numerous times a month over the past year. Given the stress from the amount of traffic the crossing causes it's not a surprise the officer is off sick often. The junction between Maidstone road and the vines isn't fit for purpose with cars travelling much to fast around a corner into a crossing daily.</p> <p>3: encourage families to walk, wheel or cycle to school: this point isn't valid for this type of educational establishment. Kings school Rochester is an independent school so doesn't have a catchment area therefore the number of families able to walk wheel or cycle will be lower than a school with a catchment area.<br/>Additionally as mentioned above the main crossing at the vines junction simply isn't fit for purpose with the council crossing officer off numerous times due to stress cause by having to operate a school crossing point.</p> <p>In summery, the proposals aren't appropriate the submitted form. The road layout needs to change substantially before such traffic restrictions with the stated goals become in any way valid.</p> <p>Please don't make this a central government funded local government income stream. This will penalise individuals and won't meet the scheme's stated goals.</p> <p>I look forward to the council seeing sense again.</p> <p>Kind regards,<br/>[REDACTED]<br/>Sent from my iPhone</p> | <p>However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school. We also believe this will reduce, not worsen pollution in the area over the long term.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                                                                                                                                    |
|  | <p>I am not sure why this is been considered. The parents at kings who in most cases drive 20-40 mins to bring their kids to school obviously dont want this.</p> <p>What is the alternative? We should walk 1 hour to bring our children to school?</p> <p>It seems this is now an authoritarian council which must have its way regardless of how the majority of citizens feel.</p> <p>This will end up making drop off and pick of our children more difficult (already difficult with tight spaces all around) which will eventually lead to reduced numbers at the school. Is the goal for kings school to eventually close down as families who cant walk, have to withdraw?</p> <p>This is unfortunately a symptom of the UK at the moment - sticking its own hand into its eyes on the premise of loving our children more than we love them and the environment whilst council services suffer - take a look at the bad roads around Rochester for example. If the goal is to find actual work to do to improve lives, fix them!!!</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>Feedback noted.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school. We also believe this will reduce, not worsen pollution in the area over the long term.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>Good morning</p> <p>We would be grateful to receive copies of the proposed Order, plans and other documents giving more detailed particulars of the proposals please.</p> <p>We are conscious that the proposed scheme will affect our residence (Bishop of Rochester and family), staff and visitors to the office.</p> <p>With best wishes and thanks.</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <p>Query noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|  | <p>Good Morning</p> <p>As a resident of Roebuck Road, I would like to register my objections as to the new "Local School Street Proposal". Yesterday, I attended the meeting at Kings School Hall and I fully support the group decision to object the council plan and favour a "20 mph" speed restriction in the area. It must be noted that it was very unsatisfactory that no one from the council was there to discuss the plan and answer the local public numerous concerns. Furthermore, I object to have my free movement restricted by the proposed plans, I am concerned that taxis and ambulances will not have access to the area as well as my family. I am an elderly woman who is increasingly relying on help from my daughter and family who live in a different area and will require use of a car. Also, will we have to pay for a new permit? We already have to pay for a parking permit in the area and further financial cost are not required in the present economic climate.</p> <p>I look forward to hearing from you and to receiving an acknowledgment and reply to my query.</p> <p>Regards[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p>Feedback noted.</p> <p>Residents who live in the scheme area and emergency services will retain local access. Regarding the 20mph scheme, although this would help reduce severity of collisions a school street is designed to go further by preventing collisions. Therefore, a school street has been prioritised however it is recognised that 20mph would improve safety in the area.</p>                                                                                                                                                                                                                                                                              |
|  | <p>Dear Sir/Madam,</p> <p>I write to object to the proposed traffic measures in the Medway Council (School Street and Prescribed Routes) (No. *) Traffic Order 2026, insofar as they affect Watts' Avenue, St Margaret's Street and the surrounding roads.</p> <p>I live at [REDACTED] and these proposals would directly affect my access and the traffic conditions outside my home.</p> <p>My main concern is that the scheme is likely to displace traffic onto Watts' Avenue rather than reduce it. Watts' Avenue is already heavily congested during school drop-off and pick-up times, and often becomes gridlocked. Restricting movements on the surrounding roads appears likely to force more vehicles onto Watts' Avenue and nearby residential roads.</p> <p>That creates a serious safety concern because St Andrew's School is on Watts' Avenue. Increasing traffic, queuing, turning movements and driver frustration on this road would increase the risk to children, parents and pedestrians. A scheme presented as a school safety measure should not simply move danger from one school area to another.</p> <p>I also have three young children, and there have already been several near misses on Watts' Avenue involving school traffic and my children. Vehicles regularly stop inappropriately, block driveways, and create congestion and conflict between drivers. In my experience, school-related traffic on Watts' Avenue already creates an unsafe environment for residents and children, and any increase in traffic would make that worse.</p> <p>A more sensible approach would be either to include Watts' Avenue within the pedestrian restriction as well, or to allow a more logical traffic flow along St Margaret's Street towards</p> | <p>Feedback noted.</p> <p>Residents who live in the scheme area and emergency services will retain local access.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school. We also believe this will reduce, not worsen pollution in the area over the long term.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>Borstal Road, rather than diverting vehicles into already congested residential streets.</p> <p>I ask that this objection be formally recorded and fully considered before any decision is made. If the Council decides to proceed, I request a clear explanation of how it has assessed the impact on traffic displacement, residential access and child safety on Watts' Avenue, particularly in the vicinity of St Andrew's School.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|  | <p>To Whom it may concern,</p> <p>I am very worried about this proposal as it will be very dangerous to the many pedestrians that use these roads and their pavements currently.</p> <p>It will clog up surrounding streets and bring traffic to a halt with heavy congestion ensuing. Currently the traffic flows freely and safely - especially after the implementation of a lolly pop person and the drop off point at the top of Lockington Grove added by Kings school. Both have helped free up congestion, ease illegal parking and safeguards the children. There are many pupils, parents and siblings that the traffic congestion will effect - Rochester Girls Grammar walk through this area, St Andrews, Troy Town Primary and Kings Rochester.</p> <p>There is not enough public parking on roads and not enough car park spaces available. Many lives will be threatened as visibility will be impaired by vehicles parking illegally on adjacent roads.</p> <p>I simply cannot see any benefit to implementing this ill conceived scheme.</p> <p>Best Regards[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Feedback noted.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school. We also believe this will reduce, not worsen pollution in the area over the long term.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Streets traffic measures surrounding King's School, Rochester.</p> <p>Kings school Rochester is the second oldest school in the world, students attend from around the county. Walking from our address in Meopham is simply not viable. We currently car share with another family to help reduce traffic and emissions.</p> <p>First and foremost, the proposed closures of Lockington Grove, King Edward Road, and St. Margaret's Street, along with making Roebuck Road one-way, will simply displace traffic rather than reduce it. Preventing vehicles from accessing these streets during peak times will inevitably force traffic into neighbouring residential roads. This will increase congestion, pollution, and safety risks for the many children and families who live on those surrounding streets but do not benefit from the proposed restrictions.</p> <p>It is particularly concerning that the proposal appears to prioritise the convenience of school drop-off traffic over the wellbeing of long-standing residents. King's School has existed in this location for centuries, and people who chose to buy property nearby did so fully aware that it is situated within a historic and busy city centre environment. The presence of the school is not new, and the surrounding road network has functioned in this context for many years. It is therefore unreasonable for the burden of new restrictions to fall disproportionately on neighbouring streets and residents.</p> <p>Furthermore, the proposal may paradoxically create greater safety risks. Traffic being diverted</p> | <p>Feedback noted.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school. We also believe this will reduce, not worsen pollution in the area over the long term.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>into fewer available routes will likely lead to increased congestion, driver frustration, and unsafe manoeuvres in nearby roads that are narrower and less suitable for higher traffic volumes. This could expose more children and pedestrians to danger, rather than less.</p> <p>There are also concerns regarding emergency access, access for residents, deliveries, carers, and essential services. Restricting key routes at predictable times of day may make it significantly more difficult for residents to go about their daily lives, including those with mobility issues or caring responsibilities.</p> <p>Any traffic management scheme should aim to balance the needs of schools, residents, businesses, and the wider community. Unfortunately, this proposal does not appear to have achieved that balance. Instead, it risks transferring problems from one set of streets to another without providing a genuine solution.</p> <p>If these roads are closed during school drop off and pick up times children will be forced to cross several roads increasing the risk of injury and death.</p> <p>I therefore strongly urge Medway Council to reconsider this proposal and engage meaningfully with residents and parents to explore more practical alternatives. These could include better managed drop-off arrangements, staggered school times, improved enforcement of existing parking restrictions, or designated drop-off zones that do not disrupt the wider residential community.</p> <p>In its current form, the proposed closures will create more problems than they solve. For these reasons, I respectfully request that the proposal be withdrawn and reconsidered.</p> <p>Yours faithfully,<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|  | <p>Dear Medway Council Highways Team,</p> <p>Having just reviewed the proposed pedestrian and cycle traffic order for the surrounding roads to Kings School Rochester, I write to formally object.</p> <p>The proposed changes are so poorly considered and planned that it raises considerable concern as to both the inevitable traffic issues and safety impact to children which will certainly arise.</p> <p>On a basic town and highways planning level what do these measures actually seek to achieve?! More signage? More Cameras? More Fines?</p> <p>Obviously, the same amount of children and cars will be limited and bottlenecked into a smaller available road network, meaning the cars will simply stop and create traffic on roads that are further from the school. Small children will then be at further risk having to take the last part of their journey without proper supervision as their parents will be stuck negotiating traffic in the revised traffic bottlenecks.</p> <p>Furthermore, apart from parents' cars, there are all the other local residents and commuters who regularly pass down these roads as part of their daily commute. Traffic will be worse for all.</p> <p>Ironically, those who live within the restrictions themselves, will be worse affected having to manage the additional congestion and limitations as they, together with their deliveries and guests, try to come and go each day. I look forward to seeing the parked cars by the restriction camera positions waiting for the clocks to click over each day. The detrimental knock on</p>                                                                                                                                                  | <p>Feedback noted.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school. We also believe this will reduce, not worsen pollution in the area over the long term.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings.</p> |

|  | <p>effects to the conservation area will be a lengthy list.</p> <p>Anyone with any knowledge and background in town planning will know that historic towns develop organically over history to react to local needs. Simply shutting wide sections of the town down at peak times of travel pushes the same traffic pressure into smaller areas, with a guaranteed negative impact.</p> <p>Please dont waste everyone's time and money on this. I would remind the Council of the cost and time on previous local traffic solutions such as the millions spent on the Sir John Hawkins Flyover in Chatham. Since demolished.</p> <p>Kind regards<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|  | <p>Sent from my iPad</p> <p>Having attended the meeting last night, I would like to register my opposition to these proposal changes.I am still not sure why we even need to change at all.<br/>Having lived in Roebuck Road for over forty years I have never heard of any accidents in the areas that these new proposals effect.<br/>However it would seem that the problem could be solved easily by making the roads affected into a twenty mile an hour zone which would save money by not having to install cameras and new signage. I do think it's about time the residents are listened to and it would have been nice to have spoken to someone from council as they are there to represent us not dictate to us.<br/>[REDACTED]</p>                                                                                                                                                                                              | <p>Feedback noted.</p> <p>Although a 20mph scheme would help reduce severity of collisions a school street is designed to go further by preventing collisions. Therefore, a school street has been prioritised however it is recognised that 20mph would improve safety in the area.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|  | <p>Dear Sir/Madam,</p> <p>I would like to raise an objection to the above school street proposal. As a parent of a child who attends the neighbouring St. Andrew's School, I find it difficult to understand why this proposal does not appear to take in to account over 250 pupils and by extension, the parents of my daughter's school.</p> <p>If indeed your wish is to create a safer environment for the children at King's School, why has no thought been given to the children of St. Andrew's? Are their lives not worth as much in your eyes? Please explain the thought process in driving more traffic along Watts' Avenue, directly in front of the school., down a road which is already congested at peak times?</p> <p>Having read through your proposal, there is no mention of our school. What is Medway Council's proposal to improve safety for the children of St. Andrew's?</p> <p>Kind regards,<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The council acknowledges there may be some traffic displacement if the scheme goes ahead in the short term. However, it is also important that the overriding objectives of improving safety and delivering an environment suitable for pedestrians and cyclists in and around the school. We also believe this will reduce, not worsen pollution in the area over the long term.</p> <p>Furthermore, if any plans were to go ahead, implementation will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Morning,</p> <p>I would like to formally object to the proposed Kings School Rochester Street Scheme.</p> <p>Parking in this area is already extremely limited, with many surrounding roads already subject to restrictions. Introducing additional parking restrictions will place further pressure on the limited available spaces and will inevitably displace vehicles into neighbouring residential streets.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term.</p> <p>However, while this potential for displacement is acknowledged, it is pertinent to emphasises that the intention of a school street is to reduce the immediate risk of vehicle collision with more</p>                                                                                                                                                                                                                                                                                                                                                             |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|  | <p>This will have a direct impact on local residents, who already struggle to find parking near their homes. Further restrictions will likely make this situation worse and increase congestion on nearby roads as drivers circulate looking for available spaces.</p> <p>In addition, the proposal does not appear to fully consider the practicalities of school drop-off and pick-up times. Parents and carers need safe and reasonable access to the school, particularly for younger children. Restricting parking further without providing suitable alternative arrangements may result in parents stopping or parking in less appropriate locations, which could unintentionally increase safety risks rather than reduce them.</p> <p>There also appears to be a lack of suitable alternative parking nearby that could realistically accommodate the number of vehicles associated with school drop-off and pick-up. Without viable alternatives, the restrictions may simply shift the problem elsewhere rather than resolve it.</p> <p>For these reasons, I respectfully ask the council to reconsider the proposal and to take into account the existing lack of parking, the needs of local residents, and the practical realities of school access.</p> <p>[REDACTED]</p> | <p>vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>The scheme will also be subject to a monitoring period following implementation.</p>                                                                                                                                                                                                                                                                                                                                                                                        |
|  | <p>To whom it may concern,</p> <p>This is a formal submission to reject the proposals for the school streets scheme around Kings School</p> <p>Regards</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>Feedback noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|  | <p>[REDACTED]</p> <p>I object to the ill thought through scheme, many of the children at Kings come from various different towns and villages which are only accessible by car, not walkable as many catchment schools are !</p> <p>If you want to create a safe drop off / collection zone then good, make a dedicated area to house around 100 cars between 15:00 -17:00. The scheme as proposed is just going to move the issue of drop off / pick up to out laying streets which means you will be having the same consultation in a few years time for the surrounding streets.</p> <p>An idea which may help the area would be to reduce the 2 hour free parking rule down to 30minutes, thus creating more temporary parking at this peak time.</p> <p>[REDACTED]</p> <p>Sent from my iPhone</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Feedback noted.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safely walk to school.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> <p>Consideration to the decision of the school street is given to the suitability of walking routes and the concerns related to crossing Maidstone Road are noted.</p> <p>Your feedback regarding a drop off location has been noted.</p> |
|  | <p>Hi there</p> <p>Ref: King's Pre Prep School and Nursery School Street Proposal</p> <p>I am writing to you regarding the above proposal.</p> <p>BACK HISTORY</p> <p>As a resident of Roebuck Road, I walk down Lockington Grove almost everyday - and back again - and am well aware of the traffic issues that the King's Pre Prep School and Nursery School have caused. By insisting on using the gate at the bottom of Lockington Grove, the school caused untold misery for drivers and pedestrians by causing jams on the Maidstone</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term.</p> <p>However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collision with more vulnerable road users, like pedestrians, outside of the school</p>                                                                                                                           |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                 |

|  | <p>Road and The Vines due to parents queuing in their cars. Back in 2024, the situation became very bad with arguments and physicality and that is when you stepped in to do your survey.</p> <p>KING'S SCHOOL INTRODUCE NEW DROP OFF SYSTEM</p> <p>Towards the end of 2024 King's School finally did something about it and moved the drop off point to the top of Lockington Grove. This allowed the parents in cars to drop their children off safely and waiting parents to queue in turn without upsetting the traffic flow on the Maidstone Road and The Vines. And as a local resident, I can honestly say that the traffic situation has never been better. Before KIng's School changed the drop off point, many parents would park in Roebuck Road and walk their children through the cut to the school. This caused many problems with blocked driveways and rude behaviour from parents - fortunately, due to the new system, this no longer happens.</p> <p>YOUR REVISED PROPOSAL</p> <p>The fundamental issue I have with your new proposal is density of traffic and consequential driver frustration. If you impose your proposal the Roebuck Road / Watts' Avenue loop will become a nightmare and here's why:</p> <ol style="list-style-type: none"><li>1. Roebuck Road is currently used by St Andrews parents to access their school. Circa 60 cars in the morning and the same number again in the afternoon park / drop-off / pick- up here.</li><li>2. Add another 80 cars (minimum) from King's School and we have increased pressure for parking and a loop jam twice a day. The reason for the jam will be the junction at the bottom of Watts' Avenue. It's the one real weakness in the current situation and - should your proposal be implemented - will become a very dangerous situation. Drivers under pressure from potentially 100 frustrated drivers queued behind will take risks pulling out of the junction. Serious accidents will not be isolated events.</li></ol> <p>CONCLUSION</p> <p>At this moment in time only three things need addressing:</p> <ol style="list-style-type: none"><li>1. St Margaret's Street between Roebuck Road junction and Watts' Avenue junction would benefit from being made one way. As cars are parked on one side of the road, two cars passing is impossible and so cars often mount the pavement to get around this. This happens daily and a one way mandate would stop this. Your suggestion would solve this.</li><li>2. Speeding in Roebuck Road - the two traffic humps you suggest would help a great deal.</li><li>3. Make King Edward Road a one way system to help make the KIng's School drop off system even more efficient.</li></ol> <p>Otherwise, I think the current traffic situation in the area is better than it has been in a long while. Please don't spoil a good thing.</p> <p>Kind regards<br/>[REDACTED]</p> | <p>gate. By doing this, we can improve safety outcomes for our children.</p> <p>Your feedback regarding a drop off location has been noted.</p> |
|  | <p>Hi</p> <p>Our son goes to KSR.</p> <p>I am absolutely certain your plan is a good idea and I fully support it.</p> <p>That parents in their 4x4s sit outside the school idling their disgusting petrol engines and emitting noxious fumes for their own kids to breath is a bit pathetic.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>Support noted.</p>                                                                                                                           |

|  | <p>Introducing these new rules will stop cars getting so close and surely improve air quality around the school.<br/>So well done for coming up with the plan, it's a great idea.</p> <p>[REDACTED]<br/>(When we drive to Rochester we do so in an EV. Yes it causes congestion but at least no local pollution(.<br/><br/>Sent from Outlook for iOS</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|  | <p>To whom it may concern,</p> <p>My name is [REDACTED], and I am writing to you as a concerned parent of two young children, aged [REDACTED]who attend King’s School Rochester. My home address is [REDACTED]</p> <p>I am writing to formally submit my strong objection to the proposed King’s School Street scheme. While I understand the intent behind such initiatives, I believe the current proposals are short-sighted and will ultimately prove detrimental to the wellbeing of our children, local residents, and the wider community.</p> <p>My objections are based on the following critical points:</p> <p>Traffic Displacement &amp; Increased Congestion: Closing the streets immediately surrounding the school does not remove traffic; it merely shunts it onto adjacent residential roads that are ill-equipped to handle the sudden surge in volume. This creates bottlenecks and gridlock in areas that were previously manageable.</p> <p>Environmental Impact: Displaced traffic leads to idling vehicles and longer, more circuitous routes for parents and residents. This will inevitably lead to increased pollution levels in the surrounding area, directly contradicting any environmental goals the scheme may claim to support.</p> <p>Serious Safety Risks: By pushing school-run traffic onto busier surrounding roads, you are increasing the risk of accidents. Of particular concern is the complete lack of safe zebra crossings on these high-traffic secondary routes. Forcing young children to navigate busier, unprotected junctions is a significant safeguarding failure.</p> <p>Impact on Wellbeing: The added stress for families and the increased danger to pedestrians on displaced routes will have a negative impact on the daily wellbeing of the school community and local neighbors.</p> <p>A scheme that protects a few specific street at the direct expense of the safety and air quality of the surrounding neighborhood is not a solution—it is a relocation of the problem.</p> <p>I request that these objections are formally recorded and that the council/planning committee re-evaluates the safety of the surrounding infrastructure before proceeding with any closures. I look forward to receiving a formal acknowledgment of this email and a response to the safety concerns raised.</p> <p>Yours sincerely,<br/><br/>[REDACTED]<br/><br/>Sent from my iPhone</p> | <p>Feedback noted.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term.</p> <p>However, while this potential for displacement is acknowledged, it is pertinent to emphasises that the intention of a school street is to reduce the immediate risk of vehicle collision with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|  | <p>I am writing to submit a formal objection to the proposed School Street scheme affecting St Margaret's Street, King Edward Road and Lockington Grove.</p> <p>The consultation documentation outlines a proposal to introduce timed vehicle restrictions between 8:00–9:00am and 3:45–4:45pm, alongside changes including an extended School Street zone, a one-way system on Roebuck Road, extension of the existing one-way system on St Margaret's Street and a new no-entry restriction at King Edward Road at the junction with Maidstone Road and Watts' Avenue.</p> <p>While the aims of improving pedestrian safety, reducing congestion and encouraging active travel are understandable, the proposal appears to have been developed with a very narrow focus on a single school frontage, without adequate consideration of the wider network of schools, residential streets, public amenities and critical junctions that support movement across this part of Rochester.</p> <p>This lack of holistic assessment raises concerns regarding traffic displacement, pedestrian safety, operational resilience of the road network, access to surrounding schools and public facilities, environmental impact and infrastructure stress.</p> <p>---</p> <p>1. Disproportionate Focus on a Single School</p> <p>The consultation materials appear to focus primarily on conditions outside King's School, yet the surrounding road network supports a cluster of educational establishments and community facilities.</p> <p>Within a relatively small area there are several schools and educational facilities that depend on the same road infrastructure, including:</p> <ul style="list-style-type: none"> <li>- St Andrew's Primary School</li> <li>- St Andrew's Nursery School</li> <li>- St Margaret's at Troy Town Primary School</li> <li>- Rochester Independent College</li> <li>- Rochester Grammar School</li> <li>- Sir Joseph Williamson's Mathematical School</li> </ul> <p>These schools collectively generate substantial movement across the local road network during the same morning and afternoon periods.</p> <p>By concentrating heavily on the operational environment of one school frontage, the proposal risks redistributing traffic pressures onto streets used by other schools, rather than resolving wider congestion and safety issues.</p> <p>Any traffic management intervention in this area should therefore be designed with regard to the entire educational corridor, rather than prioritising the operational needs of a single institution.</p> <p>---</p> <p>2. Lack of Consideration for Wider Public Amenities and Community Facilities</p> <p>The streets affected by the proposal also serve numerous public amenities and community facilities, including residential neighbourhoods, local businesses and public spaces such as The</p> | <p>Feedback noted.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal.</p> <p>The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>Vines.</p> <p>The Vines in particular acts as an important pedestrian route and meeting point for families and visitors within Rochester.</p> <p>Increased traffic displacement around this area could have unintended consequences for pedestrian comfort and safety, especially where increased parking or drop-off activity occurs near crossing points.</p> <p>The consultation materials do not appear to assess how the scheme will affect access to these wider community facilities.</p> <p>---</p> <p>3. Traffic Displacement onto Maidstone Road and Surrounding Streets</p> <p>A key concern relates to the likely redistribution of traffic onto nearby roads, particularly:</p> <ul style="list-style-type: none"><li>- Maidstone Road</li><li>- the streets surrounding The Vines</li><li>- adjacent residential roads.</li></ul> <p>Maidstone Road already serves as a major access route for Rochester Grammar School and Sir Joseph Williamson's Mathematical School, both of which generate significant traffic during the same morning and afternoon periods.</p> <p>Diverting additional circulation traffic onto this corridor risks creating overlapping congestion generated by several schools simultaneously, potentially worsening conditions for pedestrians and residents.</p> <p>---</p> <p>4. Increased Pressure on Key Junctions</p> <p>The restrictions are also likely to increase traffic circulation around surrounding junctions, particularly those linking Corporation Street with Northgate and Victoria Street.</p> <p>These junctions already operate as important distribution points for traffic travelling between Rochester, Strood and Chatham.</p> <p>Additional turning movements, circulation traffic and parking manoeuvres could lead to:</p> <ul style="list-style-type: none"><li>- increased queue lengths</li><li>- reduced junction efficiency</li><li>- congestion spreading across connecting streets.</li></ul> <p>No evidence has been presented to demonstrate that these junctions have sufficient capacity to accommodate additional traffic movements.</p> <p>---</p> <p>5. Existing Operational Challenges in the Area</p> <p>The surrounding road network already experiences frequent operational pressures caused by</p> |  |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>routine and occasional events.</p> <p>These include:</p> <ul style="list-style-type: none"><li>- scheduled roadworks and temporary road closures</li><li>- bin and recycling collections</li><li>- school coach movements and educational trips</li><li>- bus movements and transport services</li><li>- planned events in Rochester town centre</li><li>- emergency service activity</li><li>- unplanned road traffic incidents or vehicle breakdowns.</li></ul> <p>When such situations occur, the surrounding streets must already accommodate temporary diversions and altered traffic patterns.</p> <p>Introducing additional restrictions and directional controls risks reducing the flexibility of the network to respond to these everyday disruptions.</p> <p>For example:</p> <ul style="list-style-type: none"><li>- a temporary road closure on one street may force traffic into already restricted areas</li><li>- refuse collection vehicles or service vehicles may struggle to manoeuvre within one-way arrangements</li><li>- coach access for school trips may become significantly more difficult</li><li>- emergency vehicles may face additional delays when navigating restricted routes.</li></ul> <p>A resilient road network requires a degree of operational flexibility to respond to both planned and unplanned events. The proposed scheme may inadvertently reduce this flexibility.</p> <p>---</p> <p>6. Pedestrian Safety Across the Wider Area</p> <p>Although the proposal seeks to improve safety outside the school gate, safety must be considered across the entire network of streets used by children travelling to nearby schools.</p> <p>Traffic displacement may lead to:</p> <ul style="list-style-type: none"><li>- increased informal drop-off activity on adjacent streets</li><li>- higher volumes of roadside parking</li><li>- reduced visibility at crossing points</li><li>- additional turning manoeuvres near junctions.</li></ul> <p>Children travelling to other nearby schools or nurseries may therefore encounter greater pedestrian–vehicle interaction on surrounding streets, potentially undermining the safety improvements achieved at the restricted frontage.</p> <p>---</p> <p>7. Air Quality Considerations</p> <p>The consultation materials state that the scheme will improve air quality.</p> <p>While reductions in vehicle traffic may improve conditions immediately outside the restricted</p> |  |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <ul style="list-style-type: none"> <li>- the wider cluster of schools in the area</li> <li>- public amenities and spaces such as The Vines</li> <li>- key routes such as Maidstone Road serving multiple schools</li> <li>- surrounding junction capacity</li> <li>- the resilience of the road network during everyday disruptions such as roadworks, bin collections, school trips, coaches and unplanned incidents.</li> </ul> <p>There is a significant risk that the scheme will shift traffic pressures onto other streets used by children, residents and commuters, rather than resolving congestion in a balanced and sustainable manner.</p> <p>For these reasons, I strongly object to the proposal in its current form and request that the council undertake a comprehensive area-wide transport assessment before proceeding.</p> <p>This assessment should include:</p> <ul style="list-style-type: none"> <li>- traffic modelling across the wider Rochester network</li> <li>- analysis of school travel patterns involving multiple schools</li> <li>- parking and drop-off surveys</li> <li>- junction capacity modelling</li> <li>- environmental and air quality analysis</li> <li>- evaluation of network resilience during planned and unplanned disruptions.</li> </ul> <p>Until such work is undertaken and shared transparently with the community, it would be premature to introduce traffic orders that significantly alter the circulation of the surrounding neighbourhood.</p> <p>Yours faithfully,</p> <p>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to object to the proposed extension of the school street restrictions around The King's Pre-Preparatory School and Nursery in Rochester.</p> <p>As a long-standing member of the school community and a parent who has had five children attend King's School over many years, I fully understand the importance of ensuring children's safety during drop-off and pick-up times. However, I do not believe the current proposals strike a fair or proportionate balance between improving safety and maintaining reasonable access for residents and road users in the surrounding area.</p> <p>I am also a local business owner in Rochester and therefore have a strong interest in the overall accessibility and movement within the entire town.</p> <p>Extending the restricted area further along St Margaret's Street, together with the introduction and extension of additional one-way systems, risks displacing traffic onto neighbouring streets and creating additional congestion rather than resolving the issue. It may also make access more difficult for residents, deliveries, visitors and essential services during the restricted periods.</p> <p>I would also expect proposals of this nature to be supported by clear traffic impact evidence demonstrating that the measures will improve safety without simply displacing congestion onto neighbouring streets.</p>                                                                                                                    | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> |

|  | <p>For proposals of this scale, it is important that there is clear evidence that the measures will deliver meaningful safety improvements without causing disproportionate disruption to the wider community. Based on the information currently provided, it is not clear that sufficient consideration has been given to the potential impact on surrounding roads or to alternative, less disruptive options.</p> <p>I would also welcome the publication of any traffic assessments, modelling or evidence used to support these proposals so that residents can better understand how the expected benefits have been evaluated.</p> <p>Given my long association with the school and the local area, I would urge the council to reconsider the scope of these proposals and engage further with residents and parents to identify more proportionate solutions that improve safety while minimising unintended consequences.</p> <p>Thank you for the opportunity to respond to the consultation.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|  | <p>Dear Parking Design Team,</p> <p>I am writing in reference to the proposed Pedestrian and Cycle Zone for King's School, Rochester.</p> <p>I fully support efforts to improve the safety of children arriving at and leaving school. However, based on daily lived experience in the area, I have concerns that the proposals in their current form may unintentionally worsen traffic and parking issues on the surrounding residential streets.</p> <p>At present, temporary measures such as traffic cones, walking buses, and hi-vis support staff have already displaced significant volumes of parent traffic to neighbouring roads including Watts' Avenue, Ridley Road (Mitre, Horsley, Langdon), Bishop's Square, Gun Tower Mews, Gordon Terrace, Backfields, The Close, and St Margaret's Street. Illegal and unsafe parking is commonplace, including vehicles mounting kerbs and obstructing pavements. I myself was nearly struck by a parent's car mounting the kerb. Staff parking further adds pressure to streets that were not designed for modern traffic volumes or large SUVs.</p> <p>Given these issues, I respectfully request further consideration of the following points, supported where relevant by successful examples from similar schemes elsewhere:</p> <ol style="list-style-type: none"> <li>1. Re-evaluating the range of roads included<br/>Lockington Grove could serve as a controlled pick-up/drop-off area during restricted times. Only a single residence is located there, meaning minimal disruption. It would reduce displacement into the surrounding Victorian streets. It is easy to monitor and enforce. It aligns well with the one-way system proposed in section 2(e).<br/>Comparable example:<br/>Several London boroughs (e.g., Camden &amp; Hackney) have integrated "micro drop-off zones" near school entrances—short, controlled access points that reduce street-parking pressure while still supporting families who must drive.</li> <li>2. Reconsidering the impact of restrictions around Watts' Avenue<br/>With the proposed one-way alterations, Watts' Avenue becomes the only viable exit route for residents of St Margaret's Street and its connecting roads. This will push traffic further up Maidstone Road toward Priestfields/Borstal Road and increase congestion near the grammar schools.<br/>A potential modification would be limiting restrictions only as far as Minor Canon Row / Lower</li> </ol> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The Council acknowledges the suggestion that enforcement of helps to improve safety. The overriding objective is to ensure high level of compliance of all restrictions in order to improve the safety, however with all types of regulatory measures there is often indiscriminate driving which creates the need for enforcement.</p> <p>Your suggestion regarding a pickup / drop-off location has been noted.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>St Margaret’s Street, maintaining access while preserving the intention of safer pedestrian environments.</p> <p>Comparable example:<br/>Brighton &amp; Hove City Council adjusted boundaries of its school streets scheme after resident feedback showed certain pinch points were causing wider neighbourhood congestion. Boundary refinement is now routine in school street designs.</p> <p>3. Reviewing the effectiveness of road humps on Roebuck Road<br/>Roebuck Road is wide enough for vehicles to manoeuvre around speed humps, which undermines their purpose and may encourage unsafe driving behaviour. This mirrors issues already observed outside Queen Mother Court.</p> <p>Comparable example:<br/>Edinburgh’s school safety programme replaced ineffective humps with continuous footways and narrowed carriageways, which reduced both speed and unsafe overtaking.</p> <p>4. Exploring on-site or school-funded drop-off solutions<br/>Reducing car volume at the school gate is the most direct way to protect surrounding streets. A practical option would be:<br/>Creating a drop-off/pick-up area within King’s School grounds (using part of the playing field), or<br/>Establishing a dedicated lay-by on Vines Lane.<br/>These could be funded by the school, reducing impact on public finances.</p> <p>Comparable examples:</p> <ul style="list-style-type: none"><li>• Many independent schools in Oxford and Cambridge have created on-site turning circles or lay-bys to remove parent traffic from residential roads.</li><li>• The “School Streets Plus” model used in Birmingham pairs restrictions with school-funded access points to avoid burdening the local community.</li></ul> <p>5. Adjusting the restriction times<br/>The morning restriction (8–9am) is appropriate.<br/>However, the afternoon window (3:45–4:45pm) does not reflect typical pick-up patterns: School finishing begins around 3pm.<br/>Parental parking often begins from 2:30pm.<br/>Without alignment to real behaviour, displacement onto side streets will continue.</p> <p>Comparable example:<br/>Glasgow’s School Car-Free Zones adjusted their PM times after initial rollout because parent parking began too far in advance of the restriction. Once adjusted, compliance and safety improved significantly.</p> <p>6. Encouraging alternatives to driving for school families<br/>Long-term traffic reduction is best achieved through behaviour change. The following could be explored:<br/>Train fare incentives for students.<br/>Reductions at local car parks or multistorey facilities.<br/>Car-pooling rewards.<br/>Traffic wardens employed by the school to deter illegal parking.</p> <p>Comparable examples:</p> <ul style="list-style-type: none"><li>• Bristol’s “Better By Bus/Train for Schools” programme successfully reduced parent car trips by offering public transport discounts.</li><li>• Manchester’s “School Car Club” project saw uptake when incentives for shared journeys were provided.</li></ul> <p>7. Addressing safety issues on St Margaret’s Street<br/>In the last three months, I have witnessed cars, bicycles, and e-scooters travelling the wrong way along St Margaret’s Street. I experienced this personally last year while in my car. The</p> |  |

|  | <p>location would clearly benefit from camera enforcement to ensure compliance with the one-way system.</p> <p>Comparable example:</p> <ul style="list-style-type: none"> <li>• Islington uses camera enforcement at strategic points around school streets, which substantially reduced one-way violations within months.</li> </ul> <p>Thank you for taking the time to consider these points. As a resident who experiences the daily realities of the area, I hope these suggestions help refine a scheme that enhances safety while protecting the liveability of our neighbourhood.</p> <p>Regards,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|  | <p>Dear Parking Design Team,</p> <p>I am writing to submit a formal representation regarding the proposed School Street and associated traffic regulation measures in the vicinity of King's School, Rochester.</p> <p>While the stated objective of improving road safety and encouraging active travel for pupils is commendable, I have significant concerns that the proposal, as currently drafted, risks prioritising the safety of one school while potentially creating new safety risks for children attending other nearby schools and nurseries, particularly those located around Watts' Avenue and the surrounding streets.</p> <p>The proposed measures including the extension of one-way restrictions on St Margaret's Street, the introduction of a one-way system on Roebuck Road, and the prohibition of entry to Watts' Avenue from Roebuck Road are likely to displace traffic from the immediate King's School area onto neighbouring residential roads. These roads are also used by families travelling to other educational settings in the area and may therefore experience increased congestion, parking pressure, and vehicle manoeuvres during peak school travel times.</p> <p>I am concerned that the proposal appears to address safety issues around a single school while transferring traffic and associated risks to nearby streets without clear evidence that the impact on other schools has been properly assessed.</p> <p>In particular, I would ask the Council to clarify whether the following statutory and policy considerations have been adequately addressed:</p> <ul style="list-style-type: none"> <li>• Traffic displacement and network impact – Under the Road Traffic Regulation Act 1984, the authority must consider the wider impact of traffic orders on the safe and expeditious movement of traffic. It is unclear whether a full traffic displacement assessment has been undertaken to understand how vehicles will reroute once access is restricted.</li> <li>• Road safety duties – Under Section 39 of the Road Traffic Act 1988, the Council has a duty to take steps to reduce road danger for all road users. Any scheme that potentially shifts traffic risk to streets used by other children travelling to school requires careful safety assessment.</li> <li>• Equality and accessibility considerations – Public authorities must have due regard to the Public Sector Equality Duty under the Equality Act 2010. The potential impact on families accessing other schools, including those with mobility needs, should be assessed.</li> <li>• Proportionality and fairness – Traffic management measures should be proportionate and should not disproportionately benefit one location while creating unintended negative impacts elsewhere in the local network.</li> </ul> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>Given these issues, I would strongly urge the Council to confirm:</p> <p>.Whether a traffic modelling or displacement assessment has been undertaken covering surrounding streets including Watts' Avenue and Maidstone Road.</p> <p>.Whether the impact on other nearby schools and nurseries has been considered as part of the safety assessment.</p> <p>.Whether mitigation measures or monitoring arrangements are planned should traffic pressures increase on neighbouring roads.</p> <p>Ensuring safe travel to school is an important objective for all children in the area. However, this should be approached holistically so that improvements around one school do not inadvertently increase risk for pupils attending others nearby.</p> <p>I would therefore request that these concerns are fully considered before any Traffic Regulation Order is finalised.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|  | <p>To whom this my concern,</p> <p>Hope you're well.</p> <p>After reviewing your proposal to extend the School Street further along St Margaret's Street, I would like to raise some serious concerns.</p> <p>This proposal does not appear to fairly consider the impact it will have on the other schools in the surrounding area. Restricting access along St Margaret's Street is likely to displace traffic onto neighbouring roads, particularly Watts' Avenue and other nearby streets, significantly worsening congestion.</p> <p>Traffic in this area is already extremely busy during drop-off and pick-up times. Extending the School Street will only intensify the situation, creating gridlock and making it more difficult for parents, residents, and local businesses to access the area.</p> <p>Parking is also very limited. Any further restrictions will leave very few options for families attending the other nearby schools, placing additional pressure on surrounding streets. This cumulative impact does not seem to have been fully or sympathetically considered.</p> <p>I urge you to reconsider this proposal and carry out a more thorough assessment of how it will affect all schools and residents in the area, not just one. A balanced approach is needed to ensure the wider community is treated fairly.</p> <p>Kind regards<br/>[REDACTED]</p> <p>Sent from Outlook for iOS</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>While the potential for parking displacement is acknowledged, it is pertinent to emphasises that the intention of a school street is to reduce the immediate risk of vehicle collision with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> |
|  | To the parking team,                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Feedback noted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|  | <p>As per my previous objection - your design is flawed!<br/>By restricting these particular routes you have completely ignored the fact that there is a school on Watts' Avenue. St Andrews school which is very much not mentioned anywhere in your plans.<br/>So whilst restricting the cars around Kings School, you are therefore pushing the traffic and cars directly to St Andrews school.<br/>Putting our children at risk and there appears to be no provision or traffic calming solutions or even a crossing, speed bumps or in fact any safety measures being put in place for the amount of traffic that will be pushed inevitably to St Andrews on Watts' Avenue.</p> <p>Are our children not important in this school street scheme?</p> <p>If this ludicrous scheme goes ahead you will be endangering hundreds of children who attend this school not protecting them.</p> <p>The only benefit of this scheme is I can tell, is fining and making money for the council.<br/>If it wasn't a moneymaking scheme you would have thought about the other school that is next door and going to be hugely impacted by your plans.</p> <p>Speeding, traffic jams and congestion are already a daily occurrence on Watts' Avenue - these restrictions will only increase these issues and not be safe for anyone residents, children and staff alike that work and live nearby St Andrews.<br/>[REDACTED]<br/>Sent from my iPhone</p>                                                                                                                                                                                                                        | <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|  | <p>Dear Medway Council Colleagues,</p> <p>I am sending this email to formally object to the proposed expansion of the Safer Schools traffic restriction scheme affecting the area surrounding The King's School Rochester (and St Andrew's School).</p> <p>I previously responded to the earlier consultation and expressed significant concerns regarding the proposals. It is therefore extremely concerning that the revised scheme appears not only to disregard many of the issues raised by residents but also proposes to extend the affected area further.</p> <p>My primary concerns are as follows:</p> <p>Failure to adequately reflect consultation feedback</p> <p>The revised proposal appears to expand the scope of restrictions despite widespread concern from local residents in the original consultation. This raises questions about whether consultation responses have been properly considered and whether the revised scheme represents a materially different proposal requiring a fresh consultation.</p> <p>Traffic displacement into surrounding residential streets</p> <p>Restricting vehicle access around the schools will not remove traffic but simply displace it into neighbouring roads. This risks increasing congestion, reducing road safety, and worsening environmental conditions for residents in adjacent areas. In particular it is likely to lead to increased child pedestrian crossing of Maidstone Road, increasing the risk of harm to children</p> <p>Lack of clear evidence demonstrating a safety benefit</p> <p>The proposal references improved safety for pupils; however, it is unclear what evidence or</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider area and over a longer period that the school street restrictions.</p> <p>The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> |

|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>collision data demonstrates that the current road layout presents a significant safety risk requiring these measures. Without clear evidence, the scale of the proposed intervention appears disproportionate.</p> <p>The scheme is opposed by the school it is supposed to assist. The majority of children at the school do not live within walking distance of the school.</p> <p>Impact on residents and accessibility</p> <p>The restrictions significantly restrict access for residents, deliveries, carers, and visitors. Particular consideration must be given to disabled residents, blue badge holders, and families with children who may require vehicular access. It is unclear whether a full equality impact assessment has been completed - if it has been, it should be published.</p> <p>Impact on Conservation Area</p> <p>Nearly all the area affected is in the Rochester conservation area. The scheme will involve considerable signage and include cameras, all of which detract from the visual amenities of this historic area and is not in keeping with the principles of a conservation area.</p> <p>Practical impacts on parents and pupils</p> <p>The scheme will simply move congestion and drop-off activity to nearby streets, potentially creating more hazardous conditions elsewhere rather than improving safety overall, especially with regards to children and parents having to cross Maidstone Road. It will increase further traffic in Watts' Avenue, and thus negatively impact on safety for children attending St Andrews School on Watts' Avenue.</p> <p>Alternative Suggestion</p> <p>In keeping with other residents, I strongly support the following:</p> <p>Comprehensive 20 MPH Zone: A comprehensive 20 MPH speed limit starting from the High Street and extending through Boley Hill and Minor Canon Row. This zone will encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road, and Mitre Road.</p> <p>Additionally consideration could be given to a 20MPH restriction on the adjoining section of Maidstone Road</p> <p>This will increase safety, decrease pollution and truly meet the stated aims of the Safer Schools suggestion, which is in contrast to the council proposals which would not achieve any of these aims.</p> <p>Thank you for taking my views into account<br/>[REDACTED]</p> | <p>The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p>                                                                                                                                                                                                                                                                                       |
|  | <p>Dear Medway Council,</p> <p>I am sending this email to formally object to the proposed expansion of the Safer Schools traffic restriction scheme affecting the area surrounding The King's School Rochester (and St Andrew's School).</p> <p>I previously responded to the earlier consultation and expressed significant concerns regarding the proposals. It is therefore extremely concerning that the revised scheme appears</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>not only to disregard many of the issues raised by residents but also proposes to extend the affected area further.</p> <p>My primary concerns are as follows:</p> <p>Failure to adequately reflect consultation feedback</p> <p>The revised proposal appears to expand the scope of restrictions despite widespread concern from local residents in the original consultation. This raises questions about whether consultation responses have been properly considered and whether the revised scheme represents a materially different proposal requiring a fresh consultation.</p> <p>Traffic displacement into surrounding residential streets</p> <p>Restricting vehicle access around the schools will not remove traffic but simply displace it into neighbouring roads. This risks increasing congestion, reducing road safety, and worsening environmental conditions for residents in adjacent areas. In particular it is likely to lead to increased child pedestrian crossing of Maidstone Road, increasing the risk of harm to children</p> <p>Lack of clear evidence demonstrating a safety benefit</p> <p>The proposal references improved safety for pupils; however, it is unclear what evidence or collision data demonstrates that the current road layout presents a significant safety risk requiring these measures. Without clear evidence, the scale of the proposed intervention appears disproportionate.</p> <p>The scheme is opposed by the school it is supposed to assist. The majority of children at the school do not live within walking distance of the school.</p> <p>Impact on residents and accessibility</p> <p>The restrictions significantly restrict access for residents, deliveries, carers, and visitors. Particular consideration must be given to disabled residents, blue badge holders, and families with children who may require vehicular access. It is unclear whether a full equality impact assessment has been completed - if it has been, it should be published.</p> <p>Impact on Conservation Area</p> <p>Nearly all the area affected is in the Rochester conservation area. The scheme will involve considerable signage and include cameras, all of which detract from the visual amenities of this historic area and is not in keeping with the principles of a conservation area.</p> <p>Practical impacts on parents and pupils</p> <p>The scheme will simply move congestion and drop-off activity to nearby streets, potentially creating more hazardous conditions elsewhere rather than improving safety overall, especially with regards to children and parents having to cross Maidstone Road. It will increase further traffic in Watts' Avenue, and thus negatively impact on safety for children attending St Andrews School on Watts' Avenue.</p> <p>Alternative Suggestion</p> <p>In keeping with other residents, I strongly support the following:</p> <p>Comprehensive 20 MPH Zone: A comprehensive 20 MPH speed limit starting from the High</p> | <p>gate. By doing this, we can improve safety outcomes for our children. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider area and over a longer period that the school street restrictions.</p> <p>The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings.</p> |

|  | <p>Street and extending through Boley Hill and Minor Canon Row. This zone will encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road, and Mitre Road.</p> <p>Additionally consideration could be given to a 20MPH restriction on the adjoining section of Maidstone Road</p> <p>This will increase safety, decrease pollution and truly meet the stated aims of the Safer Schools suggestion, which is in contrast to the council proposals which would not achieve any of these aims.</p> <p>Thank you for taking my views into account<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|  | <p>Dear Sir/Madam,</p> <p>I would like to formally raise concerns regarding the proposed traffic arrangements relating to King's School.</p> <p>While the intention may be to manage congestion around the school itself, the proposal appears to shift the problem onto neighbouring roads and areas where other schools and families are already dealing with busy traffic during peak times. Redirecting vehicles away from King's School risks increasing traffic flow on surrounding routes, which could create dangerous situations for pupils, parents, and residents near those schools.</p> <p>Many of these roads are already heavily used during school drop-off and pick-up times. An increase in diverted traffic could significantly raise the risk of accidents, reduce road safety for children walking or cycling to school, and increase congestion in areas that are not designed to accommodate additional vehicles.</p> <p>There are also wider wellbeing concerns. If surrounding roads become more congested due to diverted traffic, families whose children attend nearby schools may have to leave home earlier in order to reach school on time. This could place unnecessary stress on both children and parents and negatively affect daily routines and mental wellbeing.</p> <p>In addition, increased traffic will likely contribute to higher levels of noise and air pollution in residential areas and around other schools. This raises health concerns for children who are walking, cycling, or waiting near these roads.</p> <p>Rather than relocating the traffic problem, it would be more appropriate for King's School to consider solutions that reduce the number of vehicles travelling to and from the school in the first place. Possible alternatives could include providing school bus transport for pupils, encouraging organised car sharing, or implementing staggered arrival and departure times.</p> <p>Without measures that address the root cause of the traffic volume, the current proposal risks simply moving congestion and safety risks from one area to another. I strongly encourage the council to reconsider the proposal and ensure that any traffic management plan protects the safety and wellbeing of all children and residents in the surrounding community.</p> <p>Kind regards<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> |
|  | <p>I would like to formally raise concerns regarding the proposed traffic arrangements relating to King's School.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>Feedback noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>While the intention may be to manage congestion around the school itself, the proposal appears to shift the problem onto neighbouring roads and areas where other schools and families are already dealing with busy traffic during peak times. Redirecting vehicles away from King's School risks increasing traffic flow on surrounding routes, which could create dangerous situations for pupils, parents, and residents near those schools.</p> <p>Many of these roads are already heavily used during school drop-off and pick-up times. An increase in diverted traffic could significantly raise the risk of accidents, reduce road safety for children walking or cycling to school, and increase congestion in areas that are not designed to accommodate additional vehicles.</p> <p>There are also wider wellbeing concerns. If surrounding roads become more congested due to diverted traffic, families whose children attend nearby schools may have to leave home earlier in order to reach school on time. This could place unnecessary stress on both children and parents and negatively affect daily routines and mental wellbeing.</p> <p>In addition, increased traffic will likely contribute to higher levels of noise and air pollution in residential areas and around other schools. This raises health concerns for children who are walking, cycling, or waiting near these roads.</p> <p>Rather than relocating the traffic problem, it would be more appropriate for King's School to consider solutions that reduce the number of vehicles travelling to and from the school in the first place. Possible alternatives could include providing school bus transport for pupils, encouraging organised car sharing, or implementing staggered arrival and departure times.</p> <p>Without measures that address the root cause of the traffic volume, the current proposal risks simply moving congestion and safety risks from one area to another. I strongly encourage the council to reconsider the proposal and ensure that any traffic management plan protects the safety and wellbeing of all children and residents in the surrounding community.</p> <p>Kind regards<br/>[REDACTED]</p> | <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> |
|  | <p>Hi,<br/>As per your information on line &amp; that received at our property please supplyelectronic copies of all relevant documents relating to the proposed TRO.</p> <p>Please advise if the Council has consulted with local services i.e Police &amp; Emergency Services in the making of this proposal &amp; if so also supply full details of their reports/opinions regarding the proposal.</p> <p>I did contact you at the time of the original proposal made by the Council in 2024 to seek the outcome of the Consultation with the public but no reply was forthcoming.</p> <p>I therefore request copy of the detailed rationale for not moving forward on that proposal and yet now introducing a more comprehensive scheme.</p> <p>I look forward to receiving your reply.</p> <p>Thank you, [REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <p>Query noted.</p> <p>The police and other emergency stakeholders were contacted for comment. Responses included within this report.</p> <p>Outcome of consutlation public avalible via the Council Website.</p>                                                                                                                                                                                                                                                                                                                         |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

|  | <p>Dear Medway Council,</p> <p>I have seen the proposals to extend the School Streets scheme to King Edward Street and Lockington Grove. As a resident living on Maidstone Road, we are affected daily by the traffic around Kings School.</p> <p>We object to the proposed scheme which, though it will reduce traffic on King Edward Street and Lockington Grove, it will push more traffic onto Maidstone Road and other surrounding streets, which are already dangerous during school drop off and collection times due to the volume of traffic. We already experience daily issues with illegal and double parking and traffic jams, making it challenging to take our own children to school safely. The proposed changes would add to this pressure and cause issues for residents of Maidstone Road and other nearby streets.</p> <p>I'd like to propose an alternative, that would reduce traffic in the area entirely and keep the traffic flowing in an area that is not designed for the volume of vehicles that are part of contemporary life. Instead, myself and a number of other residents suggest a 30 minute parking pass for parents of children at Kings and St. Andrews, allowing them to park in the car parks on Rochester High Street and/ or Rochester Station, walk their children the 5 minutes from car parks to the school and return to their cars. This would keep all the streets safe and free from excess traffic, and not cause additional problems on surrounding streets.</p> <p>We have previously made complaints to Kings School about drivers parking illegally and dangerously, as well as a general lack of consideration for local residents.</p> <p>Please consider this alternative proposal or investigate other options - the current proposal simply shifts the problem to other sites in Rochester and does not solve the ongoing issue.</p> <p>With best regards,<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>Your suggestion regarding a pickup / drop-off location has been noted.</p> |
|  | <p>Good morning</p> <p>I would like to express concern over the proposed school street plan regarding The King's Pre-Preparatory School and Nursery, Rochester.</p> <p>This plan is utterly ridiculous. It will cause chaos on surrounding roads due to the volume of traffic having to be diverted onto an already busy route.</p> <p>St andrews independent school will suffer massively due to having to try to cope with all of the King's school traffic now being diverted on to an already dangerous street during pick up and drop off hours.</p> <p>As a resident within the affected area and a father of a child at St Andrews independent school, I beg you to reconsider this proposal.</p> <p>Thank you<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. |  | <p>Dear Consultants,</p> <p>What wonderful news this is still going ahead and you, Counsel Officers and Cllr Alex Patterson haven't been deterred by the small minority of residents that fail to see the benefit. I speak on behalf of myself and a number of residents from St Margaret's Street who may not make contact with you to also express their support and gratitude that things will finally improve for the place in which we live. It will also be of such benefit to the environment as historical buildings will be protected from reduced vibrations from the increased volume of school traffic.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>Support noted.</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions.</p> <p>It is noted that a 20 mph speed limit would help to improve safety in the wider area and over a longer period that the school street restrictions.</p>                                                                                                                                                                                                                                                                                |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|  | <p>I am not sure that speed humps would be necessary on Robuck Road and would rather a 20mph speed restriction be introduced to all surrounding roads.</p> <p>Local residents have offered to support with volunteering to support the school with walking bus's to help to get children to school, which is a positive joint community venture should it fruition.</p> <p>Our only concern for this process to be successful is the detrimental impact Craig Mackinley is whipping up with creating negative local opposition. They have arranged a public meeting on th12th March 7.00pm @ kings school, (which if I'm honest sounds more like a public flogging event)! Hence I will not be attending, and am sure neither will many people in favour however I guess the oppositions assumption will be that as they are present and theirs is the only view, so they must be right!</p> <p>From myself and neighbours in favour of this scheme, thank you for finally giving us hope to resolve the illegal, dangerous driving and parking and the abuse we have been subjected to from parents of the school for far too many years.</p> <p>Kindest regards<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|  | <p>Dear Parking Design Team,</p> <p>I am writing in response to the Notice of Proposals dated 5 March 2026 regarding the proposed Pedestrian &amp; Cycle Zone (School Street) in the vicinity of King's School, Rochester (The Medway Council (School Street and Prescribed Routes) (No. *) Traffic Order 2026).</p> <p>I am a parent with children attending St Andrews School, located on Watts' Avenue, and I have serious concerns that the impact of these proposals on St Andrews School and its surrounding roads has not been adequately considered.</p> <p>My specific concern is that the proposed restrictions - in particular the prohibition on vehicles entering St Margaret's Street, the one-way restriction on Roebuck Road, and the no-entry restriction at King Edward Road - will displace a significant volume of traffic onto Watts' Avenue during the school run hours of 8:00am–9:00am and 3:45pm–4:45pm. These are the very same times that children and families are arriving at and departing from St Andrews School.</p> <p>I would therefore like to formally request the following:</p> <ol style="list-style-type: none"> <li>1. Please provide details of any traffic impact assessment carried out in relation to Watts' Avenue and the St Andrews School catchment area as part of this proposal.</li> <li>2. If no such assessment was conducted, I would ask that this be rectified before the Order is progressed, as the proposals in their current form risk creating a serious and foreseeable safety hazard for children attending St Andrews School.</li> </ol> <p>I am concerned that in seeking to improve road safety for pupils at King's School, the Council may inadvertently be transferring risk onto children at a neighbouring school. This would be contrary to the stated aims of the scheme.</p> <p>I would be grateful for your response prior to the objection deadline of Friday, 27 March 2026.</p> <p>Yours faithfully,</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>If the School Street is to be progressed it would be subject to a monitoring period, which includes conducting before and after surveys to assess the impact once a scheme has been implemented.</p> |

|  | [REDACTED]                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|  | <p>Dear Sir</p> <p>I have reviewed the proposed School Streets Scheme for St Margaret's Street, King Edward Road, and Lockington Grove. I am writing to formally state that I consider the scheme, in its current form, to be unacceptable.</p> <p>The proposal fails to provide comprehensive 24/7 safety for the community and does little to deter speeding motorists. Consequently, it will have a negligible impact on air quality. Furthermore, it will likely displace traffic congestion onto neighbouring roads that are already operating at maximum capacity.</p> <p>However, I believe the 'Safe Streets Rochester' alternative is far more viable. Specifically:</p> <p>Comprehensive 20 MPH Zone: A comprehensive 20 MPH speed limit starting from the High Street and extending through Boley Hill and Minor Canon Row. This zone will encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road, and Mitre Road.</p> <p>King Edward Road Realignment: To streamline flow, King Edward Road will become a one-way system, with vehicle access permitted only via St Margaret's Street.</p> <p>This alternative provides 24/7 safety, actively reduces speeding, improves air quality, and prevents the congestion displacement inherent in the proposed scheme.</p> <p>I look forward to receiving an acknowledgment of this response.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                       | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions.</p> <p>It is noted that a 20 mph speed limit would help to improve safety in the wider area and over a longer period that the school street restrictions.</p>    |
|  | <p>Dear Sir or Madam,</p> <p>We are [REDACTED], we live in Chatham and are parents to a child who goes to St Andrew's, a school that will be heavily affected by the proposed school street scheme for King's school.</p> <p>We would like to express our objection to the proposal from the perspective of St Andrew's. It is a private school and thus has many children commuting bigger distances than they would in a public school. We live in Brompton, approximately 2 miles away from the school with several hills to scale along the way. We are both working parents, so in order to minimise disruption to work hours we have to commute by car (we have tried public transport in the past and it was too unreliable; walking this distance with a little child each day is not feasible either).</p> <p>Finding a parking spot around St Andrew's is difficult enough without the changes and requires parking away from the school and a little bit of walking already anyway. Banning parking around King's will only bring more traffic to St. Andrew's. We were disappointed to see that our school was not even mentioned in the proposal, despite being heavily affected. Our main concern is making Roebuck Road one-way - this means that everyone entering it would have to go through St Margaret's and Watts' Avenue, which are already congested at school-run times, rather than being able to U-turn to lessen the load. This will make the dropoff system that St Andrew's run even less efficient. A different option to make the traffic flow better would be to make Watts' Avenue one-way after the junction with Roebuck Road as currently there is often congestion caused by meeting traffic in a narrow passage. This is something that is already being done informally by most parents.</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>While the potential for parking displacement is acknowledged, it is pertinent to emphasises that the intention of a school street is to reduce the immediate risk of vehicle collision with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> |

|  | <p>The proposal would further complicate balancing school and work commitments, while achieving little in terms of benefits to the children's safety or environment. It seems that the proposal only considers the effects on King's where in fact the negative effects on St Andrew's have not been considered at all. Inevitably, more traffic will be pushed towards St Andrew's, which is already very congested. We are therefore against the proposal.</p> <p>Yours faithfully,</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|  | <p>Dear Sirs</p> <p>I am writing to object to the proposed School Street scheme around King's School.</p> <p>While I understand the intention to improve safety, I am concerned that the proposal does not adequately consider the displacement of traffic onto neighbouring streets, particularly Roebuck Road and Watts' Avenue.</p> <p>Both King's School and St Andrew's School on Watts' Avenue are independent schools with pupils travelling from a wide geographic area, meaning many families will still need to drive. Restricting access around King's School is therefore unlikely to reduce traffic, but instead push it onto surrounding residential roads.</p> <p>Watts' Avenue already experiences significant congestion due to traffic associated with St Andrew's School. Additional displaced traffic risks creating a more serious bottleneck on roads that are already under pressure and serving another school community.</p> <p>I would welcome clarification on whether any traffic modelling has been undertaken to assess the likely impact on these neighbouring streets.</p> <p>For these reasons, I urge the Council to reconsider the proposal or undertake a fuller assessment of its wider traffic impacts.</p> <p>Kind regards<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p>                                                                                                                                                                                                                                                                       |
|  | <p>Dear Parking Design Team,</p> <p>I am writing in response to the Notice of Proposals dated 5 March 2026 regarding the proposed Pedestrian &amp; Cycle Zone (School Street) in the vicinity of King's School, Rochester (The Medway Council (School Street and Prescribed Routes) (No. *) Traffic Order 2026).</p> <p>I am a parent with children attending St Andrews School, located on Watts' Avenue and a resident of Churchfields Terrace, St Margaret's Street - right by St Andrew's. I have serious concerns that the impact of these proposals on St Andrews School and its surrounding roads has not been adequately considered.</p> <p>My first concern is that the proposed restrictions - in particular the prohibition on vehicles entering St Margaret's Street, the one-way restriction on Roebuck Road, and the no-entry restriction at King Edward Road - will displace a significant volume of traffic onto Watts' Avenue during the school run hours of 8:00am–9:00am and 3:45pm–4:45pm. These are the very same times that children and families are arriving at and departing from St Andrews School.</p>                                                                                                                                                    | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>While the potential for parking displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collision with more vulnerable road users, like pedestrians, outside of the school</p> |

|  | <p>Secondly, as a local resident, I am concerned about the volume of cars and improper parking that already exists in the area. Now Watts' Avenue and surroundings will also be descended upon by Kings School parents and only exacerbate an already crowded and dangerous situation that we have to deal with every day.</p> <p>I would therefore like to formally request the following:</p> <ol style="list-style-type: none"> <li>1. Please provide details of any traffic impact assessment carried out in relation to Watts' Avenue and the St Andrews School catchment area as part of this proposal.</li> <li>2. If no such assessment was conducted, I would ask that this be rectified before the Order is progressed, as the proposals in their current form risk creating a serious and foreseeable safety hazard for children attending St Andrews School.</li> </ol> <p>I am concerned that in seeking to improve road safety for pupils at King's School, the Council may inadvertently be transferring risk onto children at a neighbouring school. This would be contrary to the stated aims of the scheme.</p> <p>I would be grateful for your response prior to the objection deadline of Friday, 27 March 2026.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>gate. By doing this, we can improve safety outcomes for our children.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Streets scheme around King's School.</p> <p>My son attends King's School and we live in Chatham, which means we have to travel to school by car every day. If these road closures are implemented, it will create a significant problem for our family and many others who rely on driving to school.</p> <p>Currently, parking in the area is already extremely limited. Even under the current conditions, it is often very difficult to find a parking space near the school. If the surrounding streets are closed and drop-off access is removed, parents will be forced to drive around neighbouring streets searching for parking. This will likely increase congestion and simply displace traffic into nearby residential streets rather than solve the problem.</p> <p>The proposal also does not appear to consider families who live further away and have no realistic alternative but to drive. For parents with young children, removing the ability to safely drop off near the school will make the school run unnecessarily difficult and stressful.</p> <p>In addition, increased traffic circulating in surrounding streets while drivers search for parking may create further safety concerns for residents and pedestrians. Instead of reducing traffic, the scheme may unintentionally worsen the situation in nearby roads.</p> <p>While I support initiatives that aim to improve safety around schools, I believe this proposal will create significant practical problems for families and residents. I respectfully ask the council to reconsider the current plan and explore alternative solutions that improve safety without creating serious parking and access issues.</p> <p>Thank you for taking the time to consider my objection.</p> <p>Yours faithfully,<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>While this potential for displacement is acknowledged, it is pertinent to emphasises that the intention of a school street is to reduce the immediate risk of vehicle collision with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safely walk to school.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> |

|  | <p>Hello, my name is [REDACTED], I live on The Close in Rochester, but my rd isn't mentioned in the leaflet I have received today. I have enough of my rd being used as a car park, for people parking when going to the restaurants, expecially Shozna on the Maidstone Road, why pay to park in designnated car parks, when You can park for free on the local roads, preventing residents to get a space to park on Your own rd.</p> <p>Also decpite speaking to Labour councillor last year, of having school kids parents parking on auer road, The Close, I believe it's from the school on the Watts Av.just above us,it's still happening and we are being blocked by cars parking on the Watts' Avenue, when trying to get out and in The Close, so no I don't approve expansion of car parking on Watts' Avenue, as local residents are already being blocket by cars parked on the Watts' Avenue from primary school or nursery, that's located on that road, certainly not going to ease the congestion, as local has enough school traffic to deal with from other school. Regards Kristina</p>                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|  | <p>Dear Sirs</p> <p>I live in the vicinity of this proposal but not on a street directly affected by the it and have received the proposal notice.</p> <p>My concern relates to the provision of parking for parents who will be unable to drive directly to school with their children. There appears to be no provision for them to park outside the perimeter of the area affected by the proposal and given the catchment area of those attending Kings School and St Andrews, it's highly likely that many parents have no option but to drive their children to school.</p> <p>We already suffer with St Andrews school parents parking without consent on private land off Love Lane and I can only envisage this situation worsening if the proposal proceeds.</p> <p>It appears that The Vines and Roebuck Road will be jammed with cars stopped to drop off children or worse still, partially parked on the pavements. Without safe drop off zones outside of the affected area I cannot see that the proposal is workable.</p> <p>The principle of creating the safe zone is to be applauded but at present the plans appear to not be viable.</p> <p>Yours faithfully<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasises that the intention of a school street is to reduce the immediate risk of vehicle collision with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>The scheme also aims to encourage use of more sustainable forms of travel like walking and cycling, to school to reduce levels of traffic in and around the school gate.</p>                      |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street scheme and associated traffic measures around King's School in Rochester.</p> <p>While I understand the intention behind School Street initiatives, I believe this proposal fails to properly consider the local context and the likely displacement of traffic onto neighbouring streets, particularly Roebuck Road and Watts' Avenue.</p> <p>Both King's School and St Andrew's School on Watts Road are independent schools. Unlike many state schools, their pupil populations are drawn from a wide geographic area and extend well beyond a reasonable walking distance. As a result, a significant proportion of parents will continue to need to drive children to school regardless of the introduction of a School Street.</p> <p>Restricting vehicle access around King's School during drop-off and pick-up times will not remove this traffic from the area. Instead, it is highly likely to divert it onto surrounding residential roads that remain accessible, particularly Roebuck Road and Watts' Avenue.</p>                                                                               | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>These roads already serve St Andrew's School and experience considerable congestion during school drop-off and pick-up times. Parents have effectively had to adopt an informal one-direction flow along Watts' Avenue simply to keep traffic moving safely due to the volume of vehicles using the road.</p> <p>By pushing additional school traffic into this area, the proposal risks creating a new and potentially more severe bottleneck on roads that are already under pressure. In effect, the scheme may simply relocate the traffic problem from the immediate vicinity of King's School to neighbouring streets that also serve another school community.</p> <p>I understand that St Andrew's School has been consulted as part of this process. However, given the significant potential impact on the roads used by its pupils and families, I would welcome clarification on the following points:</p> <ul style="list-style-type: none"> <li>• What traffic modelling or displacement analysis has been undertaken to assess the likely impact on Watts' Avenue and Roebuck Road.</li> <li>• How the Council intends to mitigate the risk of increased congestion and safety risks on streets already serving another school.</li> <li>• Whether consideration has been given to the cumulative impact of two nearby independent schools whose catchments extend well beyond walking distance.</li> </ul> <p>School Street schemes can be effective where the majority of pupils live locally and can reasonably walk or cycle to school. In this case, however, the presence of two independent schools with wide catchment areas means that a large proportion of parents will inevitably continue to drive. Without appropriate consideration of this factor, the proposal risks simply shifting congestion rather than reducing it.</p> <p>For these reasons, I strongly oppose the current proposal and urge the Council to reconsider the scheme or undertake a more detailed assessment of its wider traffic impacts on neighbouring streets and schools.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|  | <p>Dear Sir/Madam,</p> <p>I have reviewed the proposed School Streets Scheme for St Margaret's Street, King Edward Road, and Lockington Grove. I am writing to formally state that I consider the scheme, in its current form, to be unacceptable.</p> <p>The proposal fails to provide comprehensive 24/7 safety for the community and does little to deter speeding motorists. Consequently, it will have a negligible impact on air quality. Furthermore, it will likely displace traffic congestion onto neighbouring roads that are already operating at maximum capacity.</p> <p>However, I believe the 'Safe Streets Rochester' alternative is far more viable. Specifically:</p> <p>Comprehensive 20 MPH Zone: A comprehensive 20 MPH speed limit starting from the High Street and extending through Boley Hill and Minor Canon Row. This zone will encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road, and Mitre Road.</p> <p>King Edward Road Realignment: To streamline flow, King Edward Road will become a one-way system, with vehicle access permitted only via St Margaret's Street.</p> <p>Install Speed bumps/traffic calming or red line no stopping zones during the school drop off</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safely walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions.</p> <p>It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |

|  | <p>and pick up time<br/>This alternative provides 24/7 safety, actively reduces speeding, improves air quality, and prevents the congestion displacement inherent in the proposed scheme.</p> <p>I look forward to receiving an acknowledgment of this response.</p> <p>Yours faithfully,</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|  | <p>4Regarding the street closures in Rochester:</p> <p>1. Parents have been taking their children to school in this area for years and have done this perfectly safely and there is no good reason for the council to intervene. The possibility that this is a fund raising initiative has been voiced by some people though I doubt this.</p> <p>2. The residents, and I believe heads of schools, have not been listened to. There is no explanation as to how the residents of these roads will be affected. Will the residents be exempted or are we to become twice daily prisoners in our homes? I would like a full explanation on this point.</p> <p>I strongly feel this scheme will cause much more upset than the usual school traffic. Certainly in Watts' Avenue the traffic is not a big problem, everyone who lives here is obviously aware of the schools and copes with this.</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                          | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> |
|  | <p>Dear Sirs,</p> <p>As a resident of Watts' Avenue, I am writing to express my vehement objection to the traffic restrictions as detailed on the medway.gov.uk website, and detailed on the map at this link: <a href="https://www.medway.gov.uk/download/downloads/id/9590/kings_school_rochester_-_map_of_proposed_area.pdf">https://www.medway.gov.uk/download/downloads/id/9590/kings_school_rochester_-_map_of_proposed_area.pdf</a></p> <p>It is inevitable that the proposal will result in a significant volume of displaced traffic, resulting in increases in traffic through roads which are already heavily congested. It seems nonsensical that the scheme should impact Roebuck which has no school, and yet divert yet more traffic through Watts' Avenue which does have a school, and yet is not part of the proposed scheme. Watts' Avenue is usually impassable in two directions with traffic usually parked on both sides. And at drop-off and collection time at St Andrews school is already congested to the point that aggressive incidents are all too frequent. The proposed scheme will make a bad situation far worse, since traffic will now be funnelled through a couple of critically constricted roads.</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it is the reason for a change of design with a formal one-way street being proposed and additional traffic calming measures.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|  | <p>And in particular, the additional traffic through the Vines will lead to an increase of traffic on a road crossed by numerous children, particularly at the intersection with Maidstone road as well as at the crossing at the entrance to the vines. I have witnessed several near misses there myself, and the increase in traffic.</p> <p>Most pupils who attend the King’s school travel a considerable distance to school, the vast majority being well beyond walking distance, so the number of children crossing these roads would increase dramatically, and coupled with the increase in traffic would, at various key crossing points, lead to a much more dangerous environment for children.</p> <p>I have also noticed that the draft RTA orders attached to lampposts in the area have been cable-tied so that the back of the notice is inaccessible. But I have recently discovered that the email address is on the back. So any passing resident would not know where to send an email unless they sever the cable ties, which is presumably not your intention. Whether intentional or not, that would seem to be completely contrary to the requirements of such a notice.</p> <p>It seems to me that the area under consideration would be eminently suited to the imposition of a 20 MPH speed limit. In such a heavily populated residential area much of which is double-parked, this measure would be entirely sensible, and would certainly remove much of the danger which I assume the “School Street” scheme is designed to address, but will, in my opinion simply exacerbate.</p> <p>Please rethink this ill-conceived scheme. Enforcing a 20 MPH speed limit would bring a much needed reduction in safety. And whilst I am not averse to considering further one-way restrictions, restricting vehicular traffic is the wrong thing to do - it would make matters far worse.</p> <p>Regards,<br/>[REDACTED]</p> | <p>safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions.</p> <p>It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street scheme near King’s School Rochester. While I recognise the intention to improve safety and air quality, I believe the proposal is fundamentally flawed in both its assumptions and its likely real-world impact.</p> <p>A key issue that appears to have been overlooked is the nature of the school’s intake. King’s School serves a wide regional area, and most families travel considerable distances each day. With the majority of younger pupils living well beyond the statutory walking distance, and a similarly high proportion of older pupils also residing too far away to walk, the premise that journeys can reasonably shift to walking is unrealistic. This is not a local neighbourhood school with a compact catchment; it relies heavily on vehicular access, making a School Street restriction impractical.</p> <p>The redirection of traffic is another serious concern. By limiting access around the school, vehicles will inevitably be forced onto Vines Lane, a route that is neither designed nor suitable for increased traffic volumes. This road is already used by pupils crossing at peak times, and additional congestion will heighten risks rather than reduce them. The nearby junction connecting Vines Lane with Maidstone Road and surrounding routes is already difficult to navigate due to restricted visibility and layout complexity; adding further pressure here could significantly compromise safety.</p> <p>There are also environmental considerations that seem contradictory to the stated aims of the scheme. Diverting traffic toward Vines Lane would concentrate emissions along the edge of The Vines, an important green space that contributes to local air quality and community</p>                                                                                                          | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council’s website and feedback</p> |

|  | <p>wellbeing. Rather than dispersing pollution, the proposal risks intensifying it in an area used by children, residents, and visitors, which undermines the environmental justification for the scheme.</p> <p>In addition, the consultation and planning process raises concerns. There is insufficient clarity about the exact boundaries of the scheme and whether certain roads are included. It is also unclear how the restrictions would operate during school holidays, and which academic calendar would apply. Furthermore, the way consultation materials have been displayed locally has made it unnecessarily difficult for residents to access key information and submit feedback. A proposal of this significance should be communicated clearly and transparently to allow meaningful public engagement.</p> <p>Given these issues, I would urge the Council to reconsider this approach and instead explore alternative measures that improve safety without displacing traffic in a harmful way. A reduced speed limit across the wider area, for example, would offer a more balanced solution—enhancing safety for pedestrians and residents while avoiding the unintended consequences of traffic concentration.</p> <p>I respectfully ask that these concerns be taken into account before any decision is made.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                | <p>received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safely walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|  | <p>19th March 2026<br/>Dear Medway Council,</p> <p>I live at [REDACTED]<br/>I am writing to formally object to the proposed school streets scheme for King's Pre-Preparatory &amp; Nursery school.<br/>MY FORMAL OBJECTION: KING'S PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. I write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>I am deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals,</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King’s School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme’s stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King’s School Rochester and borders The Vines, one of our city’s most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>I must express my gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King’s School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in my view, an act of negligence. It will create a "perfect storm" of congestion and risk. I cannot support a plan that prioritises a theoretical traffic "scheme"</p> | <p>with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester’s historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils’ ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>over the demonstrated physical safety of children &amp; others navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March 2026, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. I believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>I further propose parking attendants to be put in place at the school pick up times. This would reduce congestion in the area which would lead to improved safety for pedestrians and improve air quality.</p> <p>In light of the evidence presented, I urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>I therefore formally request that these proposals be withdrawn immediately. I invite the council instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>yours sincerely<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|  | <p>Dear<br/>Parking Design Team,</p> <p>Formal<br/>Objection to the King's Pre Prep School and Nursery School Street Proposal</p> <p>I<br/>attended a public meeting on 12 March 2026, where over 100 local residents and stakeholders were also present. It is clear that there is a universal rejection of your proposals and so with additional information gleaned at that meeting I want to outline the following fundamental grounds for objection:</p> <p>1.<br/>Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>I am deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2.<br/>Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3.<br/>Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4.<br/>Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5.<br/>Environmental Impact: School Air Quality for Students Andrews and Kings School</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane and into Roebuck Road and Watts' Avenue. This proposal will generate increased exhaust emissions in these vicinities. It is a perverse outcome</p> | <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>that a scheme designed to reduce emissions at school gates will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils of St Andrews and Kings School not to mention the health of residents in Roebuck Road and Watts' Avenue.</p> <p>6.<br/>Severe Safety Risks:</p> <p>I have serious concerns regarding the real physical dangers this scheme poses:<br/>Roebuck Road and Watts' Avenue One Way System</p> <p>Roebuck Road is currently used by St Andrews parents to access their school. Circa 60 cars in the morning and the same number again in the afternoon park / drop-off / pick- up here. Add another 100 cars (minimum) from King's School, twice a day, and we will have increased pressure for parking leading to double parking, drive obstructions, altercations and a loop jam twice a day plus a substantial increase in exhaust fume emissions. The junction at the bottom of Watts' Avenue will become the one and only feed road onto the Maidstone Road at that time in the morning and afternoon. Drivers under pressure from potentially 100 frustrated drivers queued behind will take risks pulling out of the junction. Serious accidents to pedestrians, school children and motorists are inevitable. It will create a "perfect storm" of congestion and risk at the exact moment children attending both St Andrews and King's School are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating their way to school.</p> <p>The Vines Lane Bottleneck</p> <p>Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites. By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7.<br/>The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the</p> |  |

|  | <p>dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, I strongly urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, and will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from KIng's School, St Andrews School and St Margarets of Troy Town CP School, the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>I therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its citizens.</p> <p>Yours sincerely<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|  | <p>18.3.26</p> <p>Dear Sir/madam,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p>                                                                                                                                                                                                                                                      | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate,</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|  | <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King’s School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme’s stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King’s School Rochester and borders The Vines, one of our city’s most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King’s School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot</p> | <p>informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester’s historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils’ ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|  | <p>22 March 2026</p> <p>To the Parking Design team</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|  | <p>processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high</p> | <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |
|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
|  | <p>volumes of through-traffic. It serves as the primary artery for King’s School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret’s Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                        |
|  | <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Feedback noted.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|  | <p>stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome</p> | <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |

|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King’s School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret’s Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,</p> | <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>[REDACTED]<br/>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> |  |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> |  |

|  | <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|  | <p>Dear Parking Design Team,</p> <p>Formal Objection to the King's Pre Prep School and Nursery School Street Proposal</p> <p>Following on from my previous email, I attended a public meeting on 12 March 2026, where over 100 local residents and stakeholders were also present. It is clear that there is a universal rejection of your proposals and so with additional information gleaned at that meeting I want to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results<br/>I am deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)<br/>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances<br/>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)<br/>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: School Air Quality for Students Andrews and Kings School<br/>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane and into Roebuck Road and Watts' Avenue. This proposal will generate increased exhaust emissions in these vicinities. It is a perverse outcome that a scheme designed to reduce emissions at school gates will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils of St Andrews and Kings School not to mention the health of residents in Roebuck Road and Watts' Avenue.</p> <p>6. Severe Safety Risks:<br/>I have serious concerns regarding the real physical dangers this scheme poses:<br/>Roebuck Road and Watts' Avenue One Way System</p> <p>Roebuck Road is currently used by St Andrews parents to access their school. Circa 60 cars in the morning and the same number again in the afternoon park / drop-off / pick- up from here. Add another 100 cars (minimum) from King's School, twice a day, and we will have increased pressure for parking leading to double parking, drive obstructions, altercations and a loop jam twice a day plus a substantial increase in exhaust fume emissions. The junction at the bottom of Watts' Avenue will become the one and only feed road onto the Maidstone Road at that time in the morning and afternoon. Drivers under pressure from potentially 100 frustrated drivers queued behind will take risks pulling out of the junction. Serious accidents to pedestrians, school children and motorists are inevitable. It will create a "perfect storm" of congestion and risk at the exact moment children attending both St Andrews and King's School are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating their way to school.</p> <p>The Vines Lane Bottleneck<br/>Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites. By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan<br/>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass</p> | <p>safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>the entirety of St Margaret’s Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, I strongly urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, and will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from King’s School, St Andrews School and St Margarets of Troy Town CP School, the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>I therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its citizens.</p> <p>Kind regards</p> <p>[REDACTED]</p>                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|  | <p>To whom it may concern,</p> <p>I am writing to formally lodge my opposition to the proposed School Street Scheme affecting the area surrounding King’s School Rochester. While I am fully supportive of measures to enhance child safety and air quality, the current proposal is fundamentally flawed in its application to this specific geographic and educational context.</p> <p>My objections are based on the following critical points:</p> <p>1. Misalignment with Pupil Demographics and Catchment Reality</p> <p>The proposal appears to be based on an idealized "local" school model that does not reflect the reality of King’s School. With an average student commute of nearly nine miles, the vast majority of families live far beyond any reasonable walking distance. Specifically, over 70% of pupils—including those under the age of eight—reside outside the statutory walking limits of two to three miles. For these families, vehicle transit is a necessity, not a choice. A scheme that penalizes these parents for the geographical reality of their commute is both impractical and discriminatory.</p> <p>2. Risks of Traffic Displacement on Historic Infrastructure</p> <p>By closing certain access points, the Council will inevitably funnel a high volume of traffic onto Vines Lane. This is a narrow, historic thoroughfare that was never designed for modern traffic density. Increasing the burden on this road creates a significant safety hazard, particularly at the junction where Vines Lane meets Maidstone Road and Crow Lane. This intersection is already a known "black spot" for poor sightlines; forcing more vehicles through this bottleneck while students are crossing to reach classrooms is a recipe for disaster.</p> <p>3. Protection of Rochester’s "Urban Lung"</p> <p>The environmental justification for this scheme is contradictory. Redirecting idling traffic and heavy congestion onto routes that border The Vines—one of our city's most vital green spaces—is a direct threat to a heritage asset. Under Policy DM10, the Council has a duty to</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils’ ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with</p> |

|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>protect such spaces. Instead, this plan risks concentrating pollutants directly adjacent to school playing fields and public parkland, effectively moving the "problem" to a more sensitive area rather than solving it.</p> <p>4. Procedural Failings and Operational Ambiguity</p> <p>The consultation process has been marred by a lack of transparency. Key details remain unknown, such as whether Crow Lane is included in the restricted zone or which specific academic calendar will dictate "term time" restrictions. Furthermore, the physical posting of the Draft RTA orders has been handled poorly, with essential contact information for objections being obscured on local signage. This undermines the community's right to a fair and accessible democratic process.</p> <p>A Viable Alternative: The Rochester Residents Plan</p> <p>I urge the Council to instead consider the 'Rochester Residents Alternative Plan'. This proposal for a wider 20mph zone—extending from the High Street through to the surrounding residential grid including St Margaret's Street, Watts' Avenue, and Ridley Road—offers a holistic solution. It would naturally calm traffic and improve pedestrian safety across the entire neighborhood without creating the artificial and dangerous traffic "sinks" that the current School Street proposal would cause.</p> <p>I trust that these concerns will be given serious weight during the deliberation process.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|  | <p>[REDACTED]</p> <p>22nd November 2026<br/>Dear Medway Council<br/>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the</p> |

|  | <p>average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass</p> | <p>schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>the entirety of St Margaret’s Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|  | <p>Dear Medway Council,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12th March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council’s decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p>                                                                                                     | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council’s website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King’s School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct (particularly Watts' Avenue, Roebuck Road and Kings Edward Road) directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Severe Operational Impact (Residents, Trades &amp; Visitors): The proposed restrictions effectively trap residents in their homes during peak hours, creating an untenable situation for those with professional commitments. Roebuck Road will still be accessible, as such these measures will inevitably lead to total gridlock during school hours, making it impossible for residents to access their own properties. These restrictions coincide with key working hours, and by obstructing our ability to commute, the council is placing residents' livelihoods at risk. Furthermore, the lack of exemptions for essential services, such as tradespeople and deliveries, will cause significant and unnecessary disruption to the basic maintenance of our homes and daily lives.</p> <p>6. Environmental Impact: The Vines, Roebuck Road and School Air Quality</p> <p>The scheme’s stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane and Roebuck Road. Vines, a historic route sits immediately adjacent to King’s School Rochester and borders The Vines, one of our city’s most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>7. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King’s School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times</p> | <p>actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester’s historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils’ ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>8. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|  | <p>Hello,</p> <p>I am writing to express my formal objection to the proposed school streets scheme at King's School Rochester. Further detail is below but in short this is a fundamentally flawed scheme - it puts children at risk, there is no merit or evidence whatsoever to support any claims of environmental benefits, and it is nothing short of a vanity project designed to raise revenue.</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

|  | <p>outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable</p> | <p>gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King’s School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret’s Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |  |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|  | <p>22/3/26</p> <p>I include the text we developed in the meeting of 12th as I agree wholeheartedly with the content. I however I one further point I would like addressed and responded to:</p> <p>How can one of the key objectives of this proposal, which is to make the streets safer for schools in Medway, be possibly met when this proposal will substantially increase traffic around St Andrew's school on Watts' Avenue and St Margaret's of Troy Town School on King Street?</p> <p>Regards,<br/>[REDACTED]</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results<br/>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)<br/>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances<br/>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)<br/>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                         |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality<br/>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck<br/>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan<br/>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed</p> | <p>in the wider area and over a longer period than the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|  | <p>scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|  | <p>FAO Parking design team:</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> | <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safely walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|  | <p>Dear Sir/Madam,</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for</p> |

|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a</p> | <p>supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|  | <p>Dear Sir/ Madam,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results<br/>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)<br/>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances<br/>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

|  | <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality<br/>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck<br/>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan<br/>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it</p> | <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|  | <p>To whom it may concern,</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results<br/>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)<br/>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances<br/>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)<br/>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

----------------------------------------------------------------------------------------------------------------|
|  | <p>specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality<br/>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck<br/>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan<br/>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily</p> | <p>safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|  | <p>Dear Sirs,</p> <p>I am a resident of Roebuck Road, Rochester. I have never attended a public meeting where views and conclusions were universally held and made. Accordingly, I do not apologise for joining others in adopting a group response have no hesitation in adopting a group response to your proposals and communicating with you as part of that group. It seems to me that you have identified a perceived problem, and have made proposals that will inevitably make that perceived problem worse to the detriment of directly involved and concerned.</p> <p>Following the public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would</p> | <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|  | <p>Dear Parking Design Team</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>Demographic Misalignment and Statutory Distances</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King’s School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>Environmental Impact: The Vines and School Air Quality</p> <p>The scheme’s stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King’s School Rochester and borders The Vines, one of our city’s most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King’s School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites. By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would</p> | <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester’s historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils’ ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret’s Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|  | <p>Dear Sir or Madam,</p> <p>I write to formally object to the proposed scheme and associated traffic orders in the vicinity of King's Pre-Preparatory School and Nursery in Rochester. I do so having followed this matter closely since its earlier iterations and having reviewed the revised March 2026 notice carefully. My concerns are substantial, and I believe they are borne out by evidence that the Council itself has gathered.</p> <p>1. THE COMMUNITY HAS ALREADY SPOKEN — AND BEEN LARGELY IGNORED</p> <p>It is important to put this consultation in its proper context. This is not the first time residents have been asked. When Medway ran its December 2025 consultation across three schools, King's generated 135 representations — of which 125 were objections and just five expressed support. That is a rejection rate of over 92%. The Council's response was not to reconsider the scheme in any fundamental way, but to amend its design and reissue it. I am aware that planning authorities are not legally obliged to follow majority opinion, but the scale of local opposition here — and the manner in which it has been handled — is striking. Residents are entitled to ask what meaningful weight their views carry when a near-unanimous rejection produces only cosmetic changes.</p> <p>2. THIS HAS GROWN FAR BEYOND A SCHOOL GATE CLOSURE</p> <p>The revised March 2026 notice — which, by its own terms, supersedes those issued in March and April 2025 — is a substantially different proposition from what the community was originally consulted on. It now encompasses not just a peak-hours closure of St Margaret's Street between Vines Lane and Roebuck Road, King Edward Road, and Lockington Grove, but</p>                                                                                                                                                                          | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council’s website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals,</p> |

|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>also: a lengthened one-way section on St Margaret's Street; a one-way restriction on Roebuck Road; a no-entry into Watts' Avenue from Roebuck Road; a no-entry into King Edward Road from Maidstone Road; and two new road humps. This is no longer a measure to calm one road at drop-off time. It is a wholesale reordering of how traffic moves through that part of Rochester. It should be evaluated — and consulted on — on those terms.</p> <p>3. THE COUNCIL'S OWN EVIDENCE SHOWS DISPLACEMENT IS REAL AND SERIOUS</p> <p>Medway's internal monitoring report on its first tranche of School Streets, presented to councillors this month, openly concedes that traffic displacement has occurred at multiple sites. At St Thomas More Primary in Walderslade, officers describe displacement as significant, particularly along Walderslade Road. At Miers Court Primary in Rainham, they describe a vast amount of displaced traffic onto nearby residential streets, including pavement parking, double yellow line violations and blocked driveways. At Phoenix Junior Academy and Greenvale Primary, traffic was pushed towards a crossroads that then became a safety concern. These are not hypothetical risks raised by opponents — they are documented outcomes from the Council's own review, set out in papers prepared by its own officers.</p> <p>Given this evidence, the Council must explain — with specificity — why the same displacement effect will not occur around King's, when the local geography offers far fewer alternative routes and the neighbouring roads are already under pressure. The junction where Vines Lane meets Maidstone Road, Crow Lane and Lockington Grove is well known locally for its poor sightlines and complexity. Roebuck Road, meanwhile, is already congested, partly because it sits between King's nursery in Lockington Grove and St Andrew's in Watts' Avenue. There is no buffer here — there is simply the next road.</p> <p>4. MAIDSTONE ROAD IS NOT A SAFE PLACE TO DROP CHILDREN</p> <p>The logical consequence of closing the roads immediately adjacent to King's is that parents will stop on Maidstone Road instead. Mark Snoswell, the development director at King's School, made this point publicly when the scheme was previously debated. He noted that Maidstone Road is a major arterial road with raised pavements and stepped approaches on both sides, making it hazardous for children and parents trying to cross, and said directly that he worried accidents would result. I share that concern. A school safety scheme that transfers risk from a quieter side street to a busy main road has not improved safety — it has relocated danger to a more dangerous setting.</p> <p>5. THE SCHEME DOES NOT REFLECT HOW KING'S FAMILIES ACTUALLY TRAVEL</p> <p>School Streets are a tool designed principally for schools whose surrounding community can, in principle, walk or cycle. King's is not that kind of school. It is an independent all-through school with a regional catchment, drawing pupils from a very wide area with an average commute significantly beyond typical statutory walking distances. The Council has presented no evidence that it has accounted for this in its design, nor any realistic analysis of how families who cannot reach the school on foot are expected to manage. The practical effect of the scheme is not to encourage walking — it is to displace car journeys to more hazardous locations.</p> <p>6. COMMUNITY ENGAGEMENT HAS FALLEN SHORT</p> <p>Over 100 people attended a recent public meeting on this proposal, reflecting the depth of feeling locally. Councillor Paterson, the portfolio holder responsible for the scheme, did not attend, citing the impropriety of participating in a public forum during a statutory consultation period. I respect that there is a principle at stake, but the effect — whatever the intention — is</p> | <p>with discussions and design iterations informed by feedback received at each stage.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions.</p> <p>It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |

|  | <p>that the lead decision-maker has not been directly available to residents during a period when many of them have serious questions about a scheme that has materially changed since they last engaged with it.</p> <p>7. THERE IS A BETTER ALTERNATIVE</p> <p>I wish to record my support for the proposal advanced by local residents for a 20 mph zone beginning at the High Street and extending through Boley Hill and Minor Canon Row, covering St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. This approach addresses the legitimate safety concerns in this area without manufacturing the displacement problem that the Council's current proposal will cause. A reduced speed limit across the network is coherent, proportionate, and does not require traffic to be funnelled through roads that cannot absorb it. I urge the Council to engage seriously with this alternative before pressing ahead.</p> <p>I ask that this letter be included in the formal record of representations received during this consultation, and I respectfully request that the Council take it into account before any decision is made.</p> <p>Regards,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|  | <p>Dear Medway Council,</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|  | <p>beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester</p> | <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |

|  | <p>Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|  | <p>I live in Watts' Avenue, I have been here for 30 plus years.</p> <p>I wish for my strong objection to the latest school streets consultation to be noted.</p> <p>This is no longer about 'School streets ', rather it appears to be a wholesale reorganisation of the traffic in this part of Rochester. It is likely that it will cause disruption and accumulation to the traffic in St Margaret's Street, Roebuck Road, Watts' Avenue, Borstal Road, Priestfields , The Vines and the Rochester Maidstone Road.</p> <p>I object for the following reasons, which I have linked to the bullet points that you consider to be the benefits of this proposal.</p> <p>Improves safety for pedestrians - the proposed scheme, appears to ignore the fact that the resulting traffic increase in the surrounding and outlying streets will increase the danger at school times, to the children attending St Andrews School in Watts' Avenue and the children attending St Margarets at Troy Town. The traffic will be pushed out to the surrounding local streets, which are already at capacity. It would appear that no plan has been considered to protect these other pedestrians.</p> <p>How is it beneficial or morally right to improve the safety of some children, whilst manifestly increasing the danger for other children. At no point in these consultations has this important</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> |

|  | <p>issue been addressed by the council..</p> <p>Reduce congestion in the area- Of course this scheme will reduce congestion in the designated school streets. But it will by its nature to increase congestion in all the surrounding streets, which due to other schools in the area is already at capacity, and extremely congested at school times.</p> <p>Encourage walking, wheeling and cycling - This will not be the case as the catchment area of Kings School is predominantly out of the local area. I believe Kings School has advised the council of the data around this, and that the average distance to the school for the majority of children is 8 miles plus. This cannot be walked or cycled safely by the pupils, they will still have to travel to school by car.</p> <p>Improve air quality- The air quality is going to significantly worse in the immediate local area due to the traffic congestion which will result from this ill considered scheme, as you force more traffic into fewer streets.</p> <p>Further to the above, I stand with the representations made in the Rochester Residents Alternative Plan, and their reasons for urging the council to reconsider the scheme as it is currently presented.<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|  | <p>Dear Sir,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|  | <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> | <p>noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|  | <p>Good morning,</p> <p>I am writing to express my concerns following the proposed school street plans for King School Rochester in March 2026. The changes are designed to help the pre-prep and nursery age ranges to be able to walk to school safely. However this will have a knock on effect to the rest of the school as we have year groups all the way from nursery to sixth form attending the school of which the overwhelming majority (73% those under eight years of age and 70% of those over the age of eight) live more than the statutory maximum walking distance away from the school. With the average commute for pupils being 8.9 miles and staff having to travel from all across Kent often from areas with poor public transport links.</p> <p>The planned school street will cause traffic from Maidstone Road to be diverted along Vines Lane and force them to turn right into St. Margarets road to either go past the Cathedral or down Boley Hill by the castle which are not designed for high volumes of traffic. If people are travelling up from the High street to drop pupils off they will most likely have to exit the school site via Vines Lane as they will no longer be able to make use of the one way section of St Margaret's Lane. This will put extra pressure on the road which is quite narrow in places to</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> |

|  | <p>allow for pedestrian crossing. There are also concerns with drivers having trouble seeing other vehicles at the intersection between Vines Lane, Maidstone Road, Crow Lane and Lockington Grove and how this will impact the safety of pedestrians including Prep school students who cross with the aid of the Lollipop person.</p> <p>The closure of the High Street during significant events in the calendar such as Remembrance Sunday weekend and the Christmas markets would put even further pressure on the road network travelling past the Senior school with these proposed changes, which has a zebra crossing rather than a pelican crossing due to its proximity to residents.</p> <p>An intended benefit of school streets is to reduce traffic and reduce air pollution, however the planned changes will create the opposite effect by increasing congestion of the already strained road network this will increase air pollution and may damage the air quality of Vines park, a protected public space and part of the heritage of Rochester that it is the council's responsibility to protect.</p> <p>Since the proposed changes affect multiple school sites that don't all share the same school calendar this means that the days of the school year this will be active for is ambiguous and could cause parents and unsuspecting road users to incur fines for unintentional breach of the school street zone.</p> <p>The 'Rochester Residents Alternative Plan' to introduce a 20mph limit beginning at the High Street and extending through Boley Hill and Minor Canon Row appears to me to be more workable. Since this would encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road it would help with improving the safety of pedestrians and residents without causing additional traffic congestion.</p> <p>Kind regards, [REDACTED]</p> | <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>The scheme has been developed in consideration to both St Andrew and King schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p>                                                                                                                                                                                                                                                                               |
|  | <p>Good afternoon,</p> <p>As a resident of St Margaret's Street I would like to state that I agree with the proposed changes for a school street as set out by the local council. I object to being told by others locally that I disagree with the plan. Daily, there is inconsiderate parking by a few rather than the majority but it causes blockages, distress and unsafe roads. Something needs to happen to change the behaviour of those inconsiderate drivers, many of whom can't even park a car properly. In addition, I do think that speed bumps on St Margaret's Street would be helpful generally as cars during school times and at other times do go too fast. I do not see how a 20mph limit would stop illegal parking. That is what it is as people ignore double yellow lines and move cones placed there by the school. I think Kings school should be looking to provide alternative parking away from the local area and I do think the Council should have parking attendants out regularly. I understand that there are many schools to cover but I haven't seen any wardens since last summer.</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasises that the intention of a school street is to reduce the immediate risk of vehicle collision with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. Further to this, the area will be subject to a monitoring period after implementation.</p> <p>The scheme also aims to encourage use of more sustainable forms of travel like walking and cycling, to school to reduce levels of traffic in and around the school gate.</p> |
|  | <p>19th March 2026</p> <p>Dear Sir/Madam,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>It is very frustrating that I find myself having to write to you in order to object to the proposal you have made to change the road system in the heart of Rochester. However, thank you for providing the opportunity to give my point of view through this democratic process and</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|  | <p>consultation.</p> <p>If you truly believe that safety should be at the heart of this and you listen to and care about Medway residents then I cannot see how this proposal has even got to this point.</p> <p>I attended the public meeting on 12 March 2026, along with over 100 local residents and stakeholders, including the Headteachers and Principals of local schools. It was clear that there is a universal rejection of these proposals. I write to outline the following fundamental grounds and add my voice to the objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> | <p>both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. Roebuck Road and Watts' Avenue - One Way System</p> <p>The current issues within this area include parking on double yellow lines and across driveways. Parking is limited for residents due to the number of 'business' parking permits issued and therefore there are very few spaces available for parents when picking up. Consequently, they arrive early and often sit with their cars running. There is a self imposed one way system in St Margaret's Street between Roebuck Road and Watts' Avenue during drop off and pick up times but during the rest of the day there is the freedom to travel in either direction, it works. The proposed changes will force all traffic from Maidstone Road, including the 70+ cars that currently drop off in Lockington Grove, to funnel along Roebuck Road, traffic flow is likely to be vastly increased as the path linking Roebuck Road and King Edward Road will be the only place for parents to drop children who attend King's school. There will be cars stopping and parking which will make the safety of the children far worse than it already is. Please can you supply me with the data and research that you have in respect of the benefits of the proposals in these roads. Traffic enforcement officers have not been in evidence at these peak times for several months, their attendance would certainly help with enforcement and will be even more important if you follow through with these proposals. I really think you could be making the lives of residents in these roads miserable at these peak times.</p> <p>8. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road,</p> |  |

|  | <p>Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|  | <p>Name: [REDACTED]</p> <p>Address: [REDACTED]</p> <p>I object to the local street proposal to the surrounding roads of Kings School.</p> <p>I feel it's not necessary, and will greatly congest the surrounding roads around this area at this time and it would actually make the surrounding roads not just more congested, but also more dangerous so I do not support this proposal.</p> <p>Thanks</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Streets scheme affecting the King's School area.</p> <p>As a parent of a [REDACTED] attending the school, I have serious concerns that the scheme will have unintended negative consequences, particularly in terms of safety, congestion, and environmental impact.</p> <p>Firstly, I believe the proposal will not reduce traffic overall, but instead displace it onto surrounding roads. These roads are already heavily congested, especially as there are two other schools in close proximity. Increasing traffic in these areas will likely worsen congestion,</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p>                                                                                                                                                                  |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|  | <p>extend journey times, and lead to higher levels of pollution rather than reducing them.</p> <p>More importantly, I am deeply concerned about child safety. The scheme would require many families to park further away and walk to the school. However, the existing parking areas are already over capacity and do not provide safe pedestrian routes for children. This creates a greater risk, particularly for younger children who would need to navigate busy roads without adequate infrastructure.</p> <p>In addition, the school has already worked exceptionally hard to create a safe and low-stress drop-off and pick-up system. This includes staggered start and finish times across different age groups, as well as the use of multiple entrances to spread traffic. Lockington Grove, in particular, is used effectively for school access and has minimal residential impact, with only one house and very little non-school traffic. The current system is well-managed and helps to minimise congestion and risk.</p> <p>Public transport is not a viable alternative in my case. From where I live, the journey would take over two hours each way, which is simply not practical for a primary school child. Like many other families, I live a considerable distance away (over 9 miles), and driving is the only realistic option. I understand that a large proportion of pupils are in a similar situation.</p> <p>I would strongly suggest that a more proportionate and effective way to further improve safety would be the introduction of a 20mph zone around the school, supported by ANPR enforcement. This would directly address vehicle speeds and driver behaviour without displacing traffic into already congested surrounding roads, and would enhance safety for all children travelling to and from the school.</p> <p>Given these factors, I strongly believe that the proposed scheme will increase danger to children, worsen congestion, and fail to achieve its intended environmental benefits.</p> <p>Yours sincerely<br/>[REDACTED]</p> | <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safely walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation.</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions.</p> <p>It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p>                                                                                   |
|  | <p>Hi,</p> <p>I object to the current proposal.</p> <p>If Watt's Avenue were to remain a two way road, it would create havoc on Watt's Avenue if (point C) Roebuck Road was made a one way road, along with (point b) St. Margaret's Street one way section being extended to the junction with Watt's Avenue. It would force all traffic to go down Watt's Avenue towards the Maidstone Road, whilst still allowing traffice to go up Watt's Avenue from the Maidstone Road.</p> <p>I would suggest that along with the one-way proposals for Roebuck Road and the additional section of St Margaret's Street, you also INCLUDE making Watt's Avenue one-way from St. Margaret's Street but ONLY AS FAR AS just after the left turning on to The Close. Therefore the small part of Watt's Avenue from the Maidstone Road would be two-way allowing access into Roebuck Road and The Close and with the remaining stretch of Watt's Avenue being one-way down towards Maidstone Road, it would in effect form a one-way loop. This would alieviate Watt's Avenue bottle neck with cars trying to get both up and down it with the added issue of parked cars on both sides of the road.</p> <p>Regards,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Feedback noted.</p> <p>The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> |

|  | <p>Dear Sir/ Madam,</p> <p>We have reviewed your complex School Street Scheme for St Margaret's Street, King Edward Road, Lockington Grove, including neighbouring streets and roads to include Roebuck Road and Watts' Avenue.</p> <p>We (my wife and I) understand that consultation meetings with the affected residents had been previously organised but we had never been invited or informed of such an event, regarding this important subject. We do feel strongly that something needs doing about this overdue chaotic current traffic situation.</p> <p>We write to formally state that we consider the plans to date, in it's present form are confusing and to be unacceptable for the reasons below, as concerned residents.</p> <p>There has been no evidence as to the costing of your proposals. As the plans stand with all the restrictions shown on your diagram (with all the cameras, road works etc., etc.), this will be an enormous expenditure on an already stretched Medway Council budget!</p> <p>The proposals fail to provide comprehensive 24/7 safety for the community and does little to deter speeding motorists and other forms of traffic to include HGVs, motorbike etc. In addition, it will displace traffic congestion onto neighbouring roads that are operating at maximum capacity already, namely at the junction of Vines Lane, Crow Lane and Maidstone Road.</p> <p>On undertaking this exercise, no evidence has been provided as to how the impact and reduction on air quality was assessed?</p> <p>However, we believe our "Safe School Streets, Rochester" alternative is a far more viable and realistic proposition, namely:</p> <p>A Comprehensive 20mph Zone: This speed limit area would start from the High Street, extending through Boley Hill and Minor Canon Row. This zone will encompass the entirety of St Margaret's Street, Vines Lane, Crow Lane, King Edward Road, Lockington Grove and could include Roebuck Road and Watts' Avenue.</p> <p>King Edward Road: To streamline traffic flow, King Edward Road will become a one way system, with vehicle access permitted only via St Margaret's Street. A No Entry sign should be placed at the junction of Maidstone and King Edward Road. Also a Left turn sign at the top of Lockington Grove onto King Edward Road for local residents with vehicle access, to their properties.</p> <p>This alternative provides a 24/7 and 365 day safety net for traffic, safety, reducing speed, improving air quality, prevents congestion and would be far more cost effective.</p> <p>We look forward to receiving an acknowledgement to our proposals above and your comments would be welcome.</p> <p>Yours sincerely,</p> <p>[REDACTED] (Our [REDACTED], is on King Edward Road, which is in regular daily use)</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation.</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions.</p> <p>It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |
|  | <p>Reference: TRO Proposal for King's School Rochester.</p> <p>Objection to proposal on the grounds that the TRO will endanger the lives of young children by forcing them to cross busy main road(s) in order to gain access to their place of education.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|  | <p>Detail:</p> <p>MAJOR CONCERN Increased danger for Children: As a direct result of your proposed road restrictions more traffic will be funneled into Vines Lane - a major crossing point at both ends for children on a daily basis. Of particular concern is the likely increased congestion that will be induced at the junction of Vines Lane, the Maidstone Road, Crow Lane and Lockington Grove. I ask you to urgently review this aspect of your proposal and provide evidence of the safety measures / mitigations you have considered. In addition, I formally ask for sight of the risk assessment that is driving these proposed changes and your analysis of the associated risks.</p> <p>Statutory Consultation: It is unclear to me from the detail given the exact geographic scope of the scheme or the enforcement period. Also from inspection of the notices served through Draft RTA orders their fixing deliberately obscures the address required for residents to participate in the consultation. At a minimum these errors should be addressed and the process restated to ensure fairness and transparency. I consider this current process to be fundamentally flawed as it does not meet basic consultation standards - notably geographic boundaries, exact times of operation (for example school time only?) or proper public display.</p> <p>Environmental impact: This proposed measure will negatively impact the quality of life around the Vines which is used throughout the school day by young people. Furthermore, there will be a negative effect on the environment by increasing the traffic flow through the Vines lane which already has traffic calming measures in place to protect the environment and reduce danger to pedestrians. The resultant increase in volume through a lane that has two one-way crossing places means your proposed TRO will have a further detrimental impact on the air quality and historic green space in Rochester, as well as inducing an increase in danger to pedestrians including pupils of King's School Rochester. I consider this measure to be in contravention of the Council's own DM10 regulation which is designed to protect heritage sites and I ask you to review your TRO proposal to take account of this unintended consequence.</p> <p>Nature of the School: King's School Rochester is a charitable foundation with a long history in Rochester for supporting education of children of the Medway area - your scheme is totally incompatible with our catchment area where for the vast majority of our pupils walking to school is not an option. Plus for those who do use public transport, you are deliberately placing, by design, a hazard between the pupils' established hubs of bus and train and their place of education.</p> <p>I trust you will take account of my objection</p> <p>Yours [REDACTED]</p> | <p>However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> |
|  | <p>Dear Sir or Madam,</p> <p>I hope you are well. I am writing to share my concerns regarding the proposed School Street scheme near King's School, Rochester. I fully support the aim of improving safety and air quality for children and residents, but I feel the current proposal may unintentionally create new challenges rather than resolve existing ones.</p> <p>In particular, I would like to highlight the following points:</p> <p>Travel distances for families<br/>King's School draws pupils from a wide area, and many families travel several miles each day. For a large number of younger children especially, walking is simply not practical. A scheme that assumes most pupils can walk or cycle does not reflect the reality for this school community.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|  | <p>Displacement of traffic<br/>Restricting access in one area is likely to push vehicles onto surrounding roads, especially Vines Lane. This is a relatively narrow route that is already busy at peak times and is frequently used by pupils crossing to and from school. Increasing traffic here could raise safety concerns rather than reduce them.</p> <p>Impact on the local environment<br/>While the intention is to improve air quality, concentrating traffic along Vines Lane may have the opposite effect. This road runs alongside The Vines, an important green space for Rochester, and increased congestion here could negatively affect both the environment and those using the park and nearby school facilities.</p> <p>With these concerns in mind, I would encourage the Council to consider a more flexible alternative. For example, introducing a 20mph speed limit across the surrounding roads could improve safety for everyone without diverting traffic into already constrained areas.</p> <p>Thank you for taking the time to consider these comments.</p> <p>Kind regards<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <p>Consideration to the decision of the school street is given to the suitability of walking routes and the concerns related to crossing Maidstone Road are noted.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. |  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street scheme in the vicinity of King's School Rochester. While I recognise the intention to improve safety and environmental conditions, I believe the proposal is fundamentally flawed in its assumptions and likely consequences.</p> <p>A key issue is the nature of the school's intake. Unlike a typical neighbourhood primary, King's draws pupils from a wide geographical area. For many families, the journey to school involves distances well beyond what could reasonably be walked, particularly for younger children. A substantial proportion of pupils live far outside the statutory walking thresholds, meaning that reliance on cars is not optional but necessary. Introducing restrictions that assume localised access fails to reflect this reality and risks creating disproportionate disruption for families who have no viable alternative.</p> <p>I am also deeply concerned about where displaced traffic will go. The scheme appears to funnel vehicles onto Vines Lane, a route that is already constrained and heavily used. This road is not designed to absorb additional traffic volumes, and doing so would introduce heightened risks, particularly given that it is a key crossing point for pupils travelling to and from school. The nearby junction with Maidstone Road and surrounding residential streets is already challenging, with limited visibility and complex vehicle movements. Increasing pressure in this area would inevitably worsen safety rather than improve it.</p> <p>From an environmental perspective, the proposal seems counterproductive. Rather than reducing emissions, it risks relocating them to areas where they may cause greater harm. Vines Lane runs alongside The Vines, a valued public green space that serves as an important environmental asset for the city. Concentrating traffic and associated pollution in this area undermines the stated objective of improving air quality and conflicts with the responsibility to protect such spaces.</p> <p>There are also unanswered questions about how the scheme would operate in practice. Important details—such as the precise boundaries of the restrictions and whether they would apply during school holidays—remain unclear. Additionally, the way consultation information</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> <p>Consideration to the decision of the school street is given to the suitability of walking routes and the concerns related to crossing Maidstone Road are noted.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> |

|   | <p>has been presented locally has made it unnecessarily difficult for residents to engage fully with the process. A proposal of this significance should be supported by clear, transparent communication so that all stakeholders can provide informed feedback.</p> <p>In contrast, I would urge consideration of a more balanced approach, such as the introduction of a 20mph limit across the wider area surrounding the school. Extending reduced speeds through key residential roads and access routes would improve safety for pedestrians and pupils without forcing traffic into unsuitable corridors. This type of measure would address concerns about road safety while avoiding the unintended consequences associated with the current proposal.</p> <p>For these reasons, I strongly object to the School Street scheme as proposed and ask that it be reconsidered in favour of solutions that better reflect the needs of the school community and the surrounding area.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions.</p> <p>It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Y | <p>Dear Sirs,</p> <p>As a Rochester resident I strongly object to your proposal for the streets around King's School, Rochester. In my opinion, the best thing would be a 20 mph zone to be enforced as set out in the attached document.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>Feedback noted.</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions.</p> <p>It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|   | <p>Dear Sir/Madam,</p> <p>I am emailing my objection to the proposed School Street Scheme around St Margaret's Street and the King's School, Rochester, given the very serious and obvious flaws the plan contains.</p> <ol style="list-style-type: none"> <li>1. The scheme proposes to reroute all traffic via Vines Lane, which is logistically severely flawed. Not only is this road already under major strain in the mornings and evenings, and inappropriate as a diversion, it is the main artery for pedestrians and particularly schoolchildren crossing at the top and bottom, plus it has two one-lane sections. The lollipop lady is not always here; crossing the bottom of Vines Lane is already difficult enough, but the road is simply not large enough to cope with the suggested displacement without causing real risk to pedestrians.</li> <li>2. The environmental impact on the Vines park, not just from fumes but also noise from the extra traffic, will be significant. The park is a hugely important, historic green space that should be protected.</li> <li>3. The King's School has a vast majority of pupils who live too far away to walk in, with working parents who need to drop them closer to the school to reach their own commitments. This scheme has not taken into account that King's is not a local primary school for many of the children, but spans right across Medway and into London.</li> <li>4. The Council has not been clear on how far this scheme will reach, if it runs in the holidays, and if so, which school holidays it will follow (given King's School and Medway Council run different dates. I also note that the email address on the RTA orders is impossible to read when they are posted on the lampposts, making it difficult for residents to object. This is not acceptable; the Council needs to ensure transparency in its proposals.</li> </ol> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street scheme in the vicinity of King's School Rochester.</p> <p>While I recognise and support the broader objective of improving safety and air quality for pupils, I do not believe the current proposal is appropriate or proportionate given the specific characteristics of the school community and surrounding infrastructure.</p> <p>A central issue is the nature of the school's catchment. King's School serves a wide geographic area, with many families travelling considerable distances each day. A significant proportion of pupils live well beyond the statutory walking thresholds, making active travel impractical for the majority. Any scheme predicated on reducing vehicular access must take these realities into account. Without doing so, the proposal risks placing undue strain on families for whom driving is not a preference, but a necessity.</p> <p>Equally concerning is the likely redistribution of traffic. The proposal appears to divert vehicles onto Vines Lane, a route that is neither designed nor suitable for increased traffic volumes. This road is already heavily used during peak school times and serves as a key crossing point for pupils. The junction connecting Vines Lane with Maidstone Road, Crow Lane and Lockington Grove is particularly problematic, with constrained visibility and a layout that can be challenging even under current conditions. Intensifying traffic here would, in my view, introduce additional risk rather than mitigate it.</p> <p>There are also environmental implications that warrant closer scrutiny. Diverting traffic towards Vines Lane would concentrate emissions alongside The Vines, an important green space and valued community asset. It is difficult to reconcile this outcome with the stated aim of improving local air quality, particularly when the effect may be to shift pollution closer to areas where children learn, play and congregate.</p> <p>From a procedural standpoint, there are notable gaps in clarity.</p> <p>Key details regarding the precise boundaries of the scheme remain uncertain, including whether Crow Lane falls within its scope. It is also unclear how the restrictions would operate during school holidays and which academic calendar would apply.</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> |

|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>Additionally, the way consultation materials have been displayed locally has hindered engagement, with essential contact information not clearly visible. For a proposal of this significance, the process should be transparent, accessible, and unambiguous.</p> <p>In contrast, I consider the Rochester Residents Alternative Plan to be a more balanced and effective approach. The introduction of a consistent 20mph speed limit across the surrounding road network would enhance safety for pedestrians and residents alike, without forcing traffic into unsuitable routes or creating unintended hazards. This approach addresses safety concerns in a holistic way, rather than concentrating risk in specific locations.</p> <p>For these reasons, I urge the Council to reconsider the current proposal and to engage more fully with the practical realities faced by local families and residents. A revised approach, grounded in evidence and community input, would be far more likely to achieve the shared objective of a safer environment for all.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions.</p> <p>It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|  | <p>Dear Sir/Madam,</p> <p>I am writing in my capacity as Head of Boarding to express serious concerns regarding the proposed School Street scheme in the vicinity of King’s School Rochester, particularly in relation to its implications for the boarding community and the wider functioning of the School.</p> <p>Unlike many local day schools, King’s serves a geographically diverse population, including a significant number of boarders whose routines do not align neatly with standard day-school drop-off and collection patterns. Boarding pupils require regular transport access throughout the day and evening - for exeats, medical appointments, co-curricular commitments, and travel to and from transport hubs. Restricting vehicular access at key times risks creating logistical difficulties that extend well beyond the typical school run, potentially compromising both safeguarding and the smooth operation of boarding provision.</p> <p>Furthermore, many of our families travel considerable distances to access the School, making reliance on walking impractical. Any measure that assumes a predominantly local, pedestrian-based intake does not reflect the reality of our community. For boarding pupils in particular, there is an essential need for flexible and reliable access for taxis, minibuses, and parental vehicles at varied times of day, often outside the narrow windows typically considered in such schemes.</p> <p>There is also a significant concern regarding the likely redistribution of traffic. The diversion of vehicles onto already constrained surrounding roads introduces new risks, particularly for pupils who move between boarding houses, academic buildings, and co-curricular venues across the site. Increased congestion and reduced visibility on these routes would undermine, rather than enhance, pupil safety - especially during transitional periods in the school day when movement is highest.</p> <p>From a pastoral perspective, the boarding environment relies on a sense of stability, accessibility, and calm. Introducing additional congestion, uncertainty around access, and potential delays to transport arrangements risks eroding this environment. Boarding houses are not isolated units; they are integrated into the daily life of the School and the city, and any disruption to access has a direct impact on pupils’ wellbeing and the effectiveness of pastoral care.</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> |

|  | <p>I am also concerned by the lack of clear operational detail surrounding the proposal. It remains unclear how the scheme would function outside of term time, how exemptions (if any) would be managed for boarding-related transport, and how communication with affected stakeholders has been ensured. For a proposal of this scale, greater clarity and transparency are essential.</p> <p>While I fully support initiatives aimed at improving road safety and environmental quality, I would urge the Council to consider alternative approaches that achieve these aims without creating unintended consequences for schools with complex operational needs. Measures that promote reduced speeds and safer shared road use across the wider area would, in my view, offer a more balanced and sustainable solution. I am in support of the 'Rochester Residents Alternative Plan' to introduce a 20mph limit beginning at the High Street and extending through Boley Hill and Minor Canon Row. This would encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. I believe this measure would significantly enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that the Council's current proposal would inevitably cause.</p> <p>I respectfully request that the Council reconsider the current proposal in light of these concerns, particularly the unique requirements of a boarding school environment, and engage more fully with the School to develop a workable and inclusive alternative.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                            | <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions.</p> <p>It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|  | <p>Dear Sir or Madam,</p> <p>I am writing to object to the proposed School Street Scheme adjacent to King's School Rochester.</p> <p>My principal concern is that the proposal appears to have been designed around assumptions that do not reflect the reality of King's pupil population. King's serves a wide regional catchment, not a narrowly local one. Families do not predominantly live within easy walking distance of the school, and for many there is no realistic alternative to travelling by car. The school's average home-to-school journey is 8.9 miles. More importantly, a substantial majority of pupils fall outside the statutory walking distance: 73% of children under eight live beyond two miles from school, and 70% of those aged over eight live beyond three miles. In those circumstances, restricting vehicular access in this way does not encourage a feasible switch to walking; it simply penalises families whose journeys are already dictated by geography.</p> <p>I am also deeply concerned that the scheme does not remove traffic so much as force it into locations that are less suitable and potentially more dangerous. The likely consequence is a concentration of vehicles along Vines Lane, a narrow and historically sensitive route that is already heavily used by pupils and families crossing at peak times. That road is plainly unsuited to absorbing displaced school traffic. The greatest concern is the junction formed by Vines Lane, Maidstone Road, Crow Lane and Lockington Grove, which is already difficult to negotiate and suffers from poor visibility. Diverting additional vehicles through this point risks worsening an existing hazard rather than improving safety.</p> <p>The environmental rationale is similarly unconvincing. A scheme presented as a means of improving air quality should not result in emissions being shifted to the edge of The Vines and the surrounding school environment. The Vines is one of Rochester's most important green spaces and makes a significant contribution to the character and environmental quality of the area. Concentrating traffic and pollution beside this open space, and in close proximity to</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation.</p> |

|  | <p>classrooms and playing fields, would undermine the very benefits the proposal claims to deliver. It would also sit uneasily with the Council's duty under Policy DM10 to safeguard important heritage assets and their setting.</p> <p>There are also troubling issues with the consultation itself. Key practical details remain unclear, including the precise extent of the proposed restrictions and whether Crow Lane is intended to fall within them. It is also not apparent how the scheme would operate during school holiday periods, or which school calendar would determine those dates. In addition, the traffic order notices displayed locally have in some instances obscured the email address needed for residents to respond. That is not a minor administrative issue; it directly affects the ability of residents to participate properly in the consultation and calls into question whether the process has been sufficiently clear and accessible.</p> <p>For these reasons, I do not believe the proposed School Street Scheme is appropriate for this location.</p> <p>Instead, I support the Rochester Residents Alternative Plan, which proposes a 20mph speed limit from the High Street through Boley Hill and Minor Canon Row, extending across St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. This approach would provide a more balanced and credible way to improve safety for pedestrians, pupils and residents, while avoiding the artificial funneling of traffic onto Vines Lane and Maidstone Road that the current proposal would create.</p> <p>I urge the Council to reconsider the present scheme and to give proper weight to a solution that improves safety without producing avoidable displacement, confusion and harm elsewhere.</p> <p>Yours faithfully,<br/>[REDACTED]</p> | <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|  | <p>Dear Consultation committee,</p> <p>I am writing to formally object to the proposed School Street scheme in the vicinity of King's School, Rochester. While I appreciate the intention to improve safety and air quality, I do not believe the current proposal reflects the realities of how this school community operates, nor the constraints of the surrounding road network.</p> <p>A central issue is the school's unusually wide catchment. Many families travel considerable distances, with an average journey approaching nine miles. For younger pupils in particular, a very large proportion live well beyond what could reasonably be considered a walkable distance. This is not a neighbourhood school serving a compact local population; it draws from across the region. Any scheme that assumes walking as a primary mode of access risks overlooking this fundamental characteristic and, in doing so, creates practical difficulties for the majority of families.</p> <p>The likely redistribution of traffic is also a serious concern. Diverting vehicles away from the immediate school frontage will not remove them from the area; instead, it will funnel them onto nearby roads that are far less suitable. Vines Lane is a clear example. This is a narrow, constrained road and already used by pupils crossing at both ends during busy periods. There is no zebra crossing here and I frequently see cars getting frustrated with each other as they block the raised area where pedestrians cross and they queue, or they do not respect the priority traffic sign. I have witness loud blaring of horns and shouting of drivers on a regular basis. To increase the traffic here would cause more congestion and irritation for drivers as they all use the same road. This will likely endanger children as they use this crossing and the</p>                                                                                                         | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to</p> |

|  | <p>zebra crossing on Crow Lane if the sight line of drivers is obscured by queuing traffic. Increasing traffic here would introduce new risks rather than resolving existing ones. The nearby junction linking Vines Lane with Maidstone Road, Crow Lane, Lockington Grove and adjoining routes is already challenging to navigate, with limited visibility and complex movements. Adding further pressure to this point feels inherently unsafe.</p> <p>There is also an environmental contradiction at the heart of the proposal. While the scheme aims to improve air quality, it risks concentrating emissions along a corridor that directly borders The Vines, an important green space that plays a valuable role in the local environment. Shifting traffic to this edge of the area may simply relocate pollution rather than reduce it, placing it closer to both recreational space and parts of the school environment where people go to get a wellbeing break, walk their dogs and appreciate nature. This does not appear to align with the broader objective of protecting and enhancing local environmental assets.</p> <p>There is also uncertainty about how the restrictions would operate outside of term time, and which school calendar would be used to determine this. On a more basic level, the way consultation information has been presented, with key contact details being obscured on posted notices, makes it unnecessarily difficult for residents to engage properly with the process. This undermines confidence that the consultation is as accessible and transparent as it should be.</p> <p>I also have concerns about how I would get to my place of work during the restricted hours.</p> <p>For these reasons, I cannot support the scheme as it currently stands. I would, however, support a more balanced approach that focuses on reducing vehicle speeds across the wider area rather than restricting access in a way that displaces traffic. A consistent 20mph limit extending from the High Street through the surrounding residential roads would, in my view, provide meaningful safety improvements without introducing the unintended consequences associated with the current proposal.</p> <p>I urge the Council to reconsider the scheme in light of these concerns and to work with residents and the school community to develop a solution that is both practical and genuinely beneficial for all.</p> <p>Yours faithfully,<br/>[REDACTED]</p> | <p>safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |
|  | <p>To whom it may concern,</p> <p>I wish to formally register my objection to the proposed School Street scheme in the vicinity of King's School, Rochester. While I appreciate the intention to improve safety and air quality around schools, the current proposal does not appear to reflect the specific circumstances of King's, its pupils, or the surrounding road network, and in its present form is likely to create new risks rather than resolve existing ones. I am a teacher at Kings School and therefore have a detailed knowledge of the area and people.</p> <p>A key concern is the travel pattern of families attending King's. Unlike many local authority schools, King's serves a wide regional catchment and a large proportion of pupils travel considerable distances each day. A substantial number of younger pupils (3/4 of our pupils aged under 8) live well beyond the statutory walking distance, and for many families walking is simply not a realistic option. Restricting vehicle access in the immediate vicinity of the school would therefore not reduce traffic overall, but instead force parents to stop further away,</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p>                                                                           |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|  | <p>increasing congestion on surrounding streets and creating additional hazards for children completing the remainder of their journey on foot. As a disabled member of staff coming in from some distance, I have no alternative but to use a car to get to work and parking is already a real issue. This scheme would make it impossible for me to park safely and get into work.</p> <p>The likely diversion of traffic onto Vines Lane is particularly troubling. This road is narrow, constrained, and already busy at peak times, yet it is also used heavily by pupils who must cross it on their way to and from school. Increasing the volume of vehicles along this route risks making an already difficult crossing environment more dangerous. The junction linking Vines Lane with Maidstone Road, Crow Lane and Lockington Grove is especially problematic, with limited visibility and a layout that many residents already regard as confusing and unsafe. Concentrating additional traffic at this point would seem contrary to the stated objective of improving safety for children.</p> <p>There are also environmental implications that do not appear to have been fully considered. Diverted traffic would run directly alongside The Vines, an important open space that serves both as a recreational area and as one of the few green buffers within the city. Moving queues of idling vehicles closer to this area, and nearer to classrooms and playing fields, risks worsening local air quality rather than improving it. Any scheme intended to reduce emissions should avoid simply relocating them to places where children and residents spend significant amounts of time outdoors.</p> <p>In addition, the consultation material leaves several practical points unclear. It is not obvious how far the restriction zone will extend, or whether roads such as Crow Lane will fall within its limits. There is also uncertainty about when the restrictions would apply, particularly during school holidays, and which school calendar would determine those dates.</p> <p>A particular concern of mine is the devious manner in which the draft orders have been displayed locally, with the information required to submit responses being very hard to find. For a proposal with such wide-ranging effects, the process should be as clear and accessible as possible and the failure of the council to put this in place makes me feel that money is the reason for this scheme and not the safety of our children or residents.</p> <p>For these reasons, I believe the Council should reconsider the current approach and look instead at measures that improve safety without forcing traffic into unsuitable residential routes. The alternative proposal put forward by local residents, involving a reduced speed limit across the wider area surrounding the High Street, Boley Hill and the adjoining roads, appears to offer a more balanced solution. A consistent lower speed limit across the network would calm traffic, improve conditions for pedestrians, and benefit all nearby schools and residents without creating the unintended concentration of vehicles that the present scheme risks causing.</p> <p>I therefore respectfully ask that the Council pause the current proposal and give proper consideration to alternatives that better reflect the unique character of Rochester, the historic nature of its streets, and the unusually wide catchment served by King's School. Councillors are elected to serve the people and improve their lives, not simply to make money.</p> <p>Yours Faithfully,<br/>[REDACTED]</p> | <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |
|  | <p>Dear Sir/Madam,</p> <p>I object in the strongest possible terms to the proposed School Street scheme near King's School Rochester. This proposal is fundamentally flawed and appears to have been developed</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>Feedback noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

|  | <p>with little regard for the reality on the ground.</p> <p>King’s School is not a local catchment school. Families travel significant distances because they have no alternative. Restricting access on the assumption that most pupils can walk is simply detached from reality and places an unreasonable burden on the majority.</p> <p>The plan to divert traffic onto Vines Lane is particularly alarming. It is a narrow, constrained road already under pressure and widely used by pupils crossing at peak times. Increasing traffic here does not improve safety, it actively makes the situation more dangerous. The nearby junctions are already problematic; adding further congestion is reckless.</p> <p>The environmental argument is equally unconvincing. This scheme does not reduce traffic; it relocates it. Concentrating emissions alongside The Vines, an important green space used by children and families, is a deeply counterproductive outcome.</p> <p>This scheme risks creating greater danger, congestion, and environmental harm. It should be withdrawn. A more balanced approach, such as a 20mph limit across the wider area, would deliver safety improvements without these damaging consequences.</p> <p>Yours faithfully</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|  | <p>To the Strategic Planning and Infrastructure Department,</p> <p>I am writing to formally lodge my objection to the proposed School Street Scheme adjacent to King’s School Rochester. While I support the overarching goal of improving pedestrian safety and air quality, the current proposal is structurally flawed and will inadvertently create more hazardous conditions than it seeks to resolve.</p> <p>1. Misalignment with Catchment Reality<br/>The Council’s proposal appears to be based on an idealized "neighborhood school" model that does not exist here. Data indicates that the average commute for King’s families is 8.9 miles—a distance that makes vehicular transport a necessity, not a choice. Specifically:</p> <p>73% of pupils under eight live beyond the two-mile statutory walking limit.</p> <p>70% of pupils over eight live beyond the three-mile limit. By ignoring these geographic realities, the scheme does not "encourage" walking; it simply penalizes families who live outside the immediate Rochester hub and necessitates complex drop-off maneuvers elsewhere.</p> <p>2. Hazard Displacement and the "Vines Lane Bottle-Neck"<br/>The primary flaw of this scheme is that it does not eliminate traffic; it merely reroutes it onto Vines Lane. This narrow, historic artery is entirely unsuitable for increased volume.</p> <p>Safety Risks: Vines Lane is a primary crossing point for pupils moving between school sites. Forcing the bulk of school-run traffic into this space creates a direct conflict between vehicles and children.</p> <p>Junction Complexity: The intersection of Vines Lane, Maidstone Road, Crow Lane, and Lockington Grove is already a high-stress point with poor sightlines.funneling more traffic into this specific "blind" junction is a recipe for accidents.</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council’s website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> |

|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>3. Environmental and Heritage Contradiction<br/>It is paradoxical to claim this scheme protects the environment while it concentrates idling traffic and emissions alongside The Vines. As an "urban lung" and a protected heritage asset under Policy DM10, The Vines should be shielded from increased pollution. Instead, the proposal shifts the environmental burden directly onto the school's playing fields and public green spaces, undermining the very air quality objectives the Council claims to champion.</p> <p>4. Procedural Failures and Lack of Transparency<br/>The consultation process has been marred by significant ambiguity:</p> <p>Geographic Vagueness: There is no clear confirmation on whether Crow Lane is included.</p> <p>Operational Confusion: It is unclear if restrictions apply during holidays, and if so, which school's calendar serves as the benchmark.</p> <p>Accessibility Issues: The physical posting of RTA orders on lampposts has, in many cases, obscured the contact email for submissions, effectively disenfranchising residents from the democratic process.</p> <p>5. A Viable Solution: The Rochester Residents Alternative Plan<br/>I urge the Council to instead adopt the Rochester Residents Alternative Plan. A comprehensive 20mph limit—extending from the High Street through to the wider residential network (including St Margaret's Street, Vines Lane, and Watts' Avenue)—would provide a holistic safety improvement for the entire community. This approach manages speed and safety without the dangerous and artificial traffic concentrations caused by the current School Street proposal.</p> <p>6. This proposed scheme will have a huge impact on me personally. It will make my daily commute to and from King's School, Rochester more stressful than it already is. I have a very busy day and travelling to and parking around the school is already difficult enough.</p> <p>I trust that these concerns will be given serious weight in your final assessment.</p> <p>Kind regards<br/>[REDACTED]</p> | <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Medway Council,</p> <p>I have seen the proposed plans for both Cannon Close and King Edward Road in reference to SWOP and King's respectively.</p> <p>I strongly object to these ideas as they will cause nothing but fourthed danger to children and parents trying to cross the Maidstone Road to then access their respective schools.</p> <p>I am just pleased my children are no longer involved in primary education and will not be affected by these unnecessary preposterous ideas that someone has made up without thought for the consequences.</p> <p>Rehgards<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <p>Feedback noted.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street scheme in the vicinity of King's</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>Feedback noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|  | <p>School Rochester.</p> <p>A central concern is that the proposal does not reflect the reality of how families access the school. King's serves a wide geographical area, and for many pupils, travelling on foot is simply not practical. A substantial proportion of younger children live well beyond what would be considered a reasonable walking distance, and the same applies to older pupils. This is not a neighbourhood school with a predominantly local intake; it draws from across the region. As such, restricting vehicle access fails to account for the genuine transport needs of the majority of families.</p> <p>The redirection of traffic is also deeply problematic. The current plan appears to funnel vehicles along Vines Lane, a narrow and historically constrained route that is already under pressure. This road is heavily used by pupils who cross at multiple points, particularly during busy periods at the start and end of the school day. Increasing traffic along this stretch would heighten risk rather than reduce it. The nearby junction connecting Vines Lane with Maidstone Road, Crow Lane and Lockington Grove is already difficult to navigate, with limited visibility and a confusing layout. Adding further congestion here would exacerbate an already challenging situation.</p> <p>There are also environmental considerations that have not been convincingly addressed. While the scheme is presented as a measure to improve air quality, relocating traffic to Vines Lane would simply shift emissions rather than reduce them. This is especially concerning given the proximity of The Vines, an important public green space that contributes to the wellbeing of residents and the local environment. Concentrating vehicle pollution in this area, close to both recreational land and school facilities, risks undermining the very objectives the scheme seeks to achieve.</p> <p>In addition, the consultation process and supporting information lack sufficient clarity. It is not clear which surrounding roads fall within the scheme's boundary, nor how it would operate outside of term time or across differing school holiday schedules. There have also been practical issues with accessing consultation details locally, which raises concerns about whether residents have been given a fair opportunity to engage.</p> <p>Given these issues, I believe the current proposal is not the right solution for this area. A more balanced approach would be to introduce traffic calming measures, such as a consistent 20mph speed limit across the surrounding road network. This would improve safety for pedestrians and residents alike, without forcing traffic into unsuitable routes or creating new hazards.</p> <p>I respectfully urge the Council to reconsider the scheme in its current form and to explore alternatives that better reflect the character of the area and the needs of those who use it daily.</p> <p>Yours faithfully,</p> <p>[REDACTED]</p> | <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Sirs</p> <p>It is my opinion that this ill-conceived proposal is completely out of touch with the realities on the ground.<br/>Rather than solving any problems, it will simply displace traffic into surrounding streets,</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>making congestion worse for residents who live just outside the restricted zone. Pushing vehicles further out does not reduce traffic—it redistributes it, often into areas that are even less suitable to handle increased volume.</p> <p>Worse still, this will inevitably lead to increased pollution. Vehicles forced to take longer, more congested routes will spend more time idling and emitting fumes, directly undermining any claims about improving air quality.</p> <p>Most concerning is the risk to children’s safety. By diverting traffic, this scheme will force families to cross one of the busiest junctions, in Rochester, that of Vines Lane, Crow Lane, Maidstone Road and East Row—an area known for its exceptional high traffic levels. This creates a far more dangerous situation than the one the proposal claims to address.</p> <p>A far more practical and balanced alternative would be to introduce a 20mph speed limit across the whole area, suggested by the scheme, backed by proper enforcement cameras to ensure compliance. This would directly improve safety without displacing traffic into neighbouring streets.</p> <p>In addition, implementing “Red Route” style no-stopping restrictions around the busiest sections, outside of the parking bays,—particularly along King Edward’s Road would help keep traffic flowing while preventing dangerous stopping and congestion during peak school times. With ANPR camera enforcement, this approach could be effectively monitored and fines issued where necessary, ensuring the rules are followed.</p> <p>This kind of targeted, enforceable solution would improve safety, reduce congestion, and maintain access for residents—without creating the unintended consequences that this proposal is likely to cause.</p> <p>I do hope that you will reconsider this scheme<br/>[REDACTED]</p> | <p>However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Medway Council,</p> <p>I am writing to formally submit my objection to the proposed School Street scheme for St Margaret’s Street, King Edward Road, and Lockington Grove (Ref: King’s School Rochester Consultation).</p> <p>While I support the goal of child safety, I believe the current proposal fails to resolve traffic issues and instead introduces significant safeguarding and operational risks. My objections are as follows:</p> <p>My objections are centred on the following critical points:</p> <p>1. Displacement Rather than Resolution</p> <p>The current plan does not solve the issue of traffic volume; it simply pushes the problem into neighbouring streets. By closing or restricting access to specific roads, the scheme will inevitably cause bottlenecks elsewhere, increasing congestion and idling vehicles in areas that are not equipped to handle the overflow.</p> <p>2. Safeguarding and Student Welfare</p> <p>The proposal forces students—many of whom are at a very young age—to walk significantly further to reach their destination. Most alarmingly, this diverted route directs children through The Vines.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition,</p>               |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>Existing Anti-Social Behavior: As the Council is aware, The Vines already struggles with documented incidents of unsociable behaviour.</p> <p>Safeguarding Risks: Forcing pupils to navigate this area, particularly during darker winter months or in smaller groups, presents a major safeguarding issue. It is irresponsible to move children away from the "eyes on the street" provided by main roads and into more secluded, high-risk areas.</p> <p>3. Impact on Parents and Accessibility</p> <p>The increased walking distances place an unfair burden on parents with multiple children or those with mobility issues. By removing direct access, the Council is creating a logistical hurdle that may inadvertently make the school run more dangerous and chaotic as parents scramble to find alternative drop-off points.</p> <p>4. Impact on Staff and Operational Frustration</p> <p>The scheme places an untenable burden on school staff, many of whom are also parents at the school.</p> <p>Reduced Parking Capacity: The restrictions significantly reduce available parking spaces in the immediate vicinity.</p> <p>Morning Frustration: For staff arriving to start their workday, the search for dwindling parking spaces causes immense frustration and stress.</p> <p>Impact on Recruitment/Retention: When staff who are also parents cannot easily drop their children and park at their place of work, it creates a "double hurdle" that impacts the smooth running of the school. A school cannot operate safely if its staff are delayed or stressed by poorly planned traffic restrictions.</p> <p>Using Alternative Routes: Such as the Esplanade and the Vines causing bottleneck traffic on already busy routes.</p> <p>Proposed Alternatives</p> <p>I believe there are much more effective, "common-sense" solutions that would improve safety without the negative externalities of the current plan. I urge the Council to consider:</p> <p>Reduced Speed Limits: Implementing a strictly enforced 20mph zone.</p> <p>Physical Traffic Calming: Installing speed bumps or "tables" to naturally slow vehicle flow.</p> <p>Strict Parking Enforcement: Using double yellow lines and increased warden patrols to prevent dangerous parking during peak hours.</p> <p>Make King Edward Road a one way system from St Margarets to the Maidstone Road: This allows a seamless flow of traffic rather than the bottlenecks created at present during drop off and pick up times.</p> <p>These measures would address the safety of the immediate school environment while maintaining the necessary flow of traffic and, most importantly, keeping our children on well-lit, populated routes.</p> <p>I look forward to hearing how the Council intends to address these safeguarding concerns before any further steps are taken.</p> <p>Yours sincerely,</p> <p>[REDACTED]</p> | <p>information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally lodge my objection to the proposed School Street Scheme adjacent to King’s School Rochester. While I support the council’s overarching goal of improving air quality and pedestrian safety, the current proposal is flawed in its application to this specific site and risks creating more hazardous conditions than it seeks to resolve.</p> <p>My objections are based on the following grounds:</p> <p>1. Catchment Incompatibility and Distance Realities<br/>The proposed scheme relies on the assumption that pupils can transition to active travel (walking or cycling). However, this ignores the unique regional nature of King’s School. With an average commute of 8.9 miles, the vast majority of the student body lives well beyond a walkable radius. Specifically, over 70% of the pupil population—including those under the age of eight—reside outside the statutory two-and-three-mile walking distances. For these families, a School Street does not encourage a change in behavior; it simply creates a logistical barrier for a demographic that has no viable alternative to vehicular transport.</p> <p>2. Hazard Displacement to Historic Infrastructure<br/>The scheme does not remove traffic; it merely redirects it onto Vines Lane, a narrow, historic artery that is structurally and safely ill-equipped for increased volume. This creates a "bottleneck effect" at the complex junction of Maidstone Road, Crow Lane, and Lockington Grove—an area already burdened by restricted sightlines. By funneling school traffic into this specific corridor, the Council is effectively moving the risk away from one gate and placing it directly into a high-density pupil crossing point, increasing the likelihood of accidents.</p> <p>3. Contradiction of Environmental and Heritage Policy (DM10)<br/>It is paradoxical to justify this scheme on environmental grounds while simultaneously displacing idling traffic and emissions toward The Vines. As a vital "urban lung" and a protected heritage asset under Policy DM10, The Vines should be shielded from concentrated pollution. Redirecting traffic alongside these classrooms and public parklands undermines the Council’s duty to protect Rochester’s green spaces and historic character.</p> <p>4. Procedural Failings and Lack of Clarity<br/>The consultation process has been marred by significant ambiguity:</p> <p>Geographic Scope: It remains unclear if Crow Lane is included in the restrictions.</p> <p>Operational Calendar: There is no clarity on whether the scheme applies during school holidays, nor which specific academic calendar will be utilized as the benchmark.</p> <p>Access to Justice: The physical posting of RTA orders on local lampposts has, in several instances, obscured the contact email address, preventing residents from engaging in a transparent and fair consultation.</p> <p>5. A More Viable Alternative<br/>I wish to register my strong support for the 'Rochester Residents Alternative Plan.' A comprehensive 20mph zone—stretching from the High Street through to the residential arteries of Watts' Avenue and Ridley Road—would offer a holistic safety improvement. This would protect pedestrians across the entire neighborhood without the dangerous artificial concentration of vehicles on Vines Lane and Maidstone Road.</p> <p>I urge the Council to withdraw the current proposal and instead collaborate with our community on the 20mph alternative, which offers a safer, fairer, and more environmentally</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council’s website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester’s historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils’ ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety</p> |

|  | <p>sound solution for all. Personally, it will hugely impact my ability to travel at the beginning and end of the day by car to and from work, as it will for many other teachers and individuals who work within this area. Please consider this soundly, so that our school and children are not affected negatively and put at further risk.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|  | <p>I am aware this is currently under consultation and wish to add my views.<br/>As a local resident of many decades, who has lived both in [REDACTED]I am bemused by the spotlight on one school when there are three in close proximity, all whose school traffic impacts on each other and local residents and services and deliveries to them. Without the inclusion of St Andrew's Junior School and Troy Town School this cannot be s solution to the complex coming and goings in the area at the beginning and ending of the school day.<br/>This suggestion just pushes the problem further out. We are already suffering parents / carers bringing large vehicles into Love Lane at these times who can't navigate their way in and out of our narrow street without assistance.<br/>My suggestion would be to rethink this for the actual circumstances in the area. Navigating the roads here is already challenging and further partial closures is not the solution. Maybe all should slow down to 20/mph as is current in other areas in Kent, thus improving everyone's safety and the flow of traffic.<br/>Regards<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Sir/Madam</p> <p>I am writing to object to the proposed changes under the school street scheme.</p> <p>I feel that the traffic and all the issues this scheme says that it creates will simply be moved further up the road. I am disappointed that the council are prioritising one school over another and over local residents.</p> <p>I am also not in favour of more complex road restrictions and access in Medway.</p> <p>Kind Regards<br/>[REDACTED]</p> <p>Sent from my iPhone</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street scheme in the vicinity of King's School Rochester. While I recognise the intention to improve safety and air quality, I do not</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>Feedback noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>believe the current proposal is appropriate for this location and community.</p> <p>A key concern is the reality of how families access the school. King’s draws pupils from a wide geographical area, and many families travel considerable distances each day. For a large proportion of pupils, walking is simply not feasible due to distance, age, and time constraints. Any scheme that assumes a high level of pedestrian access risks overlooking the practical needs of the majority and may unintentionally create additional pressures elsewhere on the road network.</p> <p>The redirection of vehicles is another serious issue. The plan appears to channel traffic onto Vines Lane, which is neither designed nor suitable for increased volumes. It is already heavily used by pupils and families, particularly at peak school times. The surrounding junctions are constrained, with limited visibility and complex traffic movements. Increasing congestion in this area would, in my view, heighten the risk to pedestrians rather than reduce it.</p> <p>I am also troubled by the potential environmental consequences. Redirecting traffic into a more confined route risks concentrating emissions rather than reducing them overall. This is particularly concerning given the proximity of green space and areas used by children. A scheme intended to improve air quality should not result in a localised deterioration in conditions for those using nearby public and recreational spaces.</p> <p>There are further issues regarding the clarity and communication of the proposal. Important details about the scheme’s boundaries and operation remain unclear, including whether certain roads are included and how the restrictions would apply during school holiday periods. Additionally, the way consultation information has been presented locally has made it unnecessarily difficult for residents to engage and respond effectively.</p> <p>In contrast, I believe there are more balanced and inclusive ways to improve safety in the area. Measures such as a reduced speed limit across a wider network of surrounding roads would encourage safer driving behaviour without forcing traffic into unsuitable routes or creating new hazards.</p> <p>For these reasons, I respectfully urge the Council to reconsider the current proposal and to engage more fully with the community to develop a solution that reflects the realities of how this area functions.</p> <p>Yours faithfully,</p> <p>[REDACTED]</p> | <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street scheme in the vicinity of King’s School Rochester. While I appreciate the intention to improve safety and environmental conditions, I believe the current proposal is fundamentally misaligned with the realities of this school community and the surrounding area.</p> <p>A central concern is the travel profile of families attending King’s. This is not a typical local catchment school; rather, it serves a wide geographic area. A significant proportion of pupils travel considerable distances each day, well beyond what could reasonably be considered walkable. For many families, driving is not a matter of convenience but necessity. Implementing restrictions that assume a predominantly local, pedestrian-based school population fails to reflect this reality and risks placing an undue burden on a large number of families.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. |--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>In addition, the proposal appears likely to divert traffic onto surrounding routes that are already constrained. Vines Lane, in particular, is wholly unsuitable to accommodate additional traffic volumes. It is narrow, heavily used, and forms part of key pedestrian crossing routes for pupils. The junction connecting Vines Lane with Maidstone Road, Crow Lane, and Lockington Grove is already challenging due to limited visibility and complex traffic movements. Increasing pressure on this area raises legitimate safety concerns, especially during peak school hours when children are most vulnerable.</p> <p>The environmental rationale for the scheme also warrants closer scrutiny. While reducing emissions is an important objective, it is difficult to see how this will be achieved if traffic is merely displaced rather than reduced. Concentrating vehicles along Vines Lane risks increasing pollution in close proximity to The Vines, an important green space that contributes significantly to local air quality and community wellbeing. It would be counterproductive for a scheme intended to improve environmental conditions to instead intensify emissions in such a sensitive area.</p> <p>There are also notable uncertainties in how the scheme would operate. It is unclear which roads are definitively included, particularly in relation to Crow Lane, and how restrictions would apply during school holidays. The absence of clear, accessible information makes it difficult for residents to fully understand and respond to the proposal. Furthermore, the way consultation materials have been displayed locally has not facilitated easy engagement, which raises concerns about the transparency and effectiveness of the process.</p> <p>In light of these issues, I would urge the Council to reconsider this approach and instead explore more balanced measures. A reduced speed limit across the wider area, for example, would offer meaningful safety improvements without forcing traffic into unsuitable routes or creating unintended consequences for residents and school families.</p> <p>For these reasons, I respectfully request that the current proposal be withdrawn or substantially revised following a more thorough assessment of its likely impacts.</p> <p>Kind regards<br/>[REDACTED]</p> | <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>I am writing to formally register my opposition to the proposed School Street mandate currently under consideration. While I support the overarching goal of improving safety and air quality near educational sites, the current framework is fundamentally flawed for this specific location and fails to account for the unique geographical and logistical realities of the King's School community.</p> <p>My objections are based on the following critical points:</p> <ol style="list-style-type: none"> <li>1. Disregard for Regional Catchment Realities<br/>The proposal appears to be based on a "local walk-to-school" model that simply does not exist for this institution. Data indicates that the vast majority of families live well beyond the statutory walking distances (two miles for under-eights and three miles for older pupils), with an average commute of nearly nine miles. By ignoring the fact that 70-73% of the student body lives too far away to walk, the Council is implementing a scheme that penalises families for whom driving is a necessity, not a choice.</li> <li>2. Creation of High-Risk Traffic Bottlenecks<br/>The scheme does not remove traffic; it merely shunts it onto Vines Lane, a narrow, historic thoroughfare that is entirely unsuitable for increased volume. This diversion creates a major safety risk at the intersection of Vines Lane, Maidstone Road, Crow Lane, and Lockington Grove—a junction already notorious for its restricted sightlines. Funnelling more vehicles through a primary pupil crossing point is a regressive step for child safety.</li> <li>3. Environmental Degradation of "The Vines"</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. |--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>It is contradictory to claim an environmental benefit while diverting idling traffic and emissions directly alongside The Vines. As a vital "urban lung" and heritage asset, this green space should be protected under Policy DM10. Concentrating pollution next to classrooms and public parkland, rather than dispersing it, is an unacceptable outcome that undermines the Council's own air quality objectives.</p> <p>4. Procedural Failures and Lack of Clarity</p> <p>The consultation process has been marred by a lack of transparency. Key details—such as whether Crow Lane is included and which specific academic calendar dictates the "term time" restrictions—remain undefined. Furthermore, the physical placement of Draft RTA orders on local lampposts has, in many instances, obscured the contact details required for public feedback, effectively disenfranchising the local community from the democratic process.</p> <p>A Viable Alternative: The Rochester Residents Alternative Plan</p> <p>I strongly urge the Council to instead adopt the 20mph limit proposal put forward by local residents. This would cover the broader area from the High Street through to the residential streets including St Margaret's Street, Vines Lane, and Watts' Avenue. A blanket speed reduction would enhance pedestrian safety across the entire historic quarter without the dangerous displacement of traffic and the logistical confusion inherent in the current School Street proposal.</p> <p>I trust that these concerns will be given serious weight and that a more balanced, workable solution will be sought.</p> <p>Yours sincerely,<br/>[REDACTED]</p> | <p>Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Sir/Madam</p> <p>Medway Council Statutory Consultation School Street Scheme</p> <p>As Rochester residents living close to Kings School and having a granddaughter who needs to travel 6 miles to get to there, we would like to voice our strongest possible objections to the school street scheme currently proposed by the council.</p> <p>The council is proposing to close King Edward Road, Lockington Grove and St Margaret's Street, as well as making Roebuck Road one way, for the hours in the morning and afternoon when children arrive and leave school.</p> <p>This will cause traffic chaos and serious traffic jams. The vast majority of Kings pupils do not come from within the statutory 2 mile walking distance and so the council's plan cannot result in any noticeable number switching to walking to school.</p> <p>All the closures will achieve is pushing traffic out into neighbouring roads, ie Roebuck Road, Watts' Avenue etc. With three roads closed this will mean terrible log jams of traffic in the whole surrounding area. That in turn will inevitably lead to far worse safety for pedestrians,</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|  | <p>specifically the children. The children will have to walk far further from wherever they are dropped off and in the inevitable traffic chaos their safety will be seriously jeopardised. Remarkably the council says one of the main goals of the school street scheme is reduced pollution. Anyone with any common sense would realise that the opposite is going to be true. The council's plans will cause far worse traffic jams than have ever existed before and that can only increase pollution.</p> <p>We note that in the local media the Council had the gall to claim other school street schemes a success based on a survey, which had a miserly 6.5% response with just 156 people responding. The truth they don't mention is that they have received enormously more objections and complaints about the current schemes. In the case of Horsted School alone they got well over 100 objections. The way they have presented this data as a 'success' story is completely disingenuous. If the Kings Scheme should go ahead as currently proposed just wait and see the uproar from residents around the area, not to mention all the drivers who won't be able to get through Rochester on their way to work because of it. I personally need to drive through the Vines on my way to work in Rochester and I dread to think of how badly it is going to be blocked thanks to this proposal making it an inevitable traffic pinch point. This is an ill-conceived scheme that needs to be replaced with something more sensible. Following the recent public meeting on March 12 an alternative plan was put forward for a 20mph zone on roads around the school, which would be a far better approach to the problem. Whatever is decided certainly the Council's existing plan needs to be dropped as it would be a road traffic disaster for the area.</p> <p>Yours Faithfully</p> <p>[REDACTED]</p> | <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street Scheme in the vicinity of King's School Rochester.</p> <p>As a parent of two young children aged 8 and 3, I currently travel daily from Gravesend to Rochester in order to get them to school. This already requires waking them at approximately 6:30am to allow sufficient time to arrive early enough to secure parking on nearby residential streets. This is not a matter of convenience, but necessity, as the available car parks are both prohibitively expensive for daily use and consistently lack available spaces.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|  | <p>The introduction of the School Street Scheme will significantly worsen an already strained situation. By restricting access, it will inevitably displace vehicles into surrounding residential roads, which are already heavily relied upon by parents like myself. These roads will become overrun, increasing congestion and making it even more difficult and stressful to park safely. More importantly, this displacement will create serious safety concerns. I will likely be forced to park further away and cross increasingly busy and unsuitable roads with two young children. This raises real risks, particularly given the age of my children, and is not something I can reasonably accept. If implemented, this scheme may leave me with no viable option but to remove my children from the school.</p> <p>In addition, the proposal appears to overlook the issue of traffic displacement. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove meet. This junction is already well known for its poor sightlines and complexity. Increasing traffic flow through this area will significantly heighten the risk to both pedestrians and drivers, especially during peak drop-off and pick-up times when children are present.</p> <p>In summary, while I understand and support the intention to improve safety and reduce congestion, this scheme does not appear to be appropriate for the specific circumstances of King's School Rochester. It risks increasing congestion in surrounding areas, creating new safety hazards, and placing an unreasonable burden on families who have no viable alternative to driving.</p> <p>I respectfully urge the Council to reconsider this proposal and to engage further with affected families to develop a more practical and proportionate solution.</p> <p>Kind regards<br/>[REDACTED]</p> | <p>vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|  | <p>Good morning,</p> <p>I am writing to express a view on the above proposal as someone who walks around the area every day. The proposal is naive and will as a result create a concentration of traffic along Vines Lane, which will only make matters worse for both school pupils, other pedestrians and road users alike. Commuters drive quite fast along that road and the crossing points for pedestrians at both ends are treacherous. Also there is a gate into Kings half way along and the safety of these school children is paramount.</p> <p>I have been told about the Rochester Residents Alternative Scheme and this appears much more sensible. What is needed in the area is speed restrictions, not a one way system or road closures at certain times of day.</p> <p>There is also a practical reality that parents need to drive their children to school these days and generally do not live within walking distance. However, my experience is that the fast drivers are quite often delivery drivers for example and they need to be made to slow down in the area.</p> <p>Thank you<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Feedback noted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|  | <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> | <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |

|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily</p> | <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|  | <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the</p> |

|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it</p> | <p>original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|  | <p>Dear Sir,</p> <p>I am writing in my capacity as a Governor of King's School Rochester to object to the proposed School Street Scheme.</p> <p>First of all, the proposed scheme will result in traffic being funnelled through Vines Lane, a narrow road with very limited capacity to accommodate an increase in traffic volume. Congestion will surely be a big problem as a result. Furthermore, the road is a major crossing point for King's pupils during peak times. There is far more potential for accidents including in particular at the junction with Maidstone Road and Crow Lane, where the sightlines are poor.</p> <p>Displacing traffic onto Vines Lane will also have a material negative environmental impact as the route borders the Vines, an important urban lung for Rochester. Under policy DM10, the Council is tasked with protecting heritage assets such as the Vines and the proposed scheme would do the very opposite.</p> <p>It should be noted that no account has been made for the travel distances for King's pupils. The average commute length is almost nine miles and a School Street Scheme is fundamentally unsuitable for pupils drawn from a wide catchment area and for whom walking is not a viable option for the vast majority.</p> <p>I strongly recommend that serious consideration is given to the 'Rochester Residents Alternative Plan', which proposes a 20mph speed limit encompassing the area around the School beginning at the High Street. This proposal would greatly improve safety for all pedestrians and residents without funnelling traffic onto Vines Lane and Maidstone Road which the current proposal would inevitably cause.</p> <p>Yours faithfully,<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> <p>Consideration to the decision of the school street is given to the suitability of walking routes and the concerns related to crossing Maidstone Road are noted.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safely walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |

|  | <p>Good afternoon,</p> <p>RE: School Street Proposal: King's Pre-Preparatory School &amp; Nursery, Rochester</p> <p>I am a long-term resident of Roebuck Road and I am writing to state my strong objection to the School Street Proposal for this area of Rochester.</p> <p>The proposal would not solve any issues, just create additional problems and push the traffic issue to other parts of Rochester. Rather than making the area safer for children, it is likely to bring more risk to their safety. Many parents would need to park to the east of Maidstone Road, increasing parking issues here - especially as parents from St Margaret's at Troy Town will also be looking for parking spaces. Students from King's would then need to cross the very busy Maidstone Road to go to and from school.</p> <p>The proposal would also lead to massive traffic congestion along Vines Lane and put additional pressure on Watts' Avenue, the location of yet another school, St Andrew's.</p> <p>In addition, the scheme would have a negative impact on Roebuck Road and it's residents in terms of access for visitors, tradespeople, taxis, carers, delivery vehicles, etc during the morning and afternoon. Making Roebuck Road a one way street is likely to lead to heavier traffic and the potential for more accidents.</p> <p>There is no evidence that the proposal is backed up by data about fatalities / injuries, or about traffic flows.</p> <p>When the proposal was first raised, we were told that it came about due to concerns from the local schools. Following two public meetings, it has become clear that none of the local schools - King's, St Andrew's and St Margaret's at Troy Town, are in favour of it, all agree that the scheme is dangerous and will cause more problems.</p> <p>As a local resident, I don't believe that any School Street plan is needed. However, if traffic calming is necessary, I propose the following:-<br/>A 20 mph speed limit zone starting from the High Street &amp; extending through Boley Hill &amp; Minor Canon Row. To encompass the entirety of St. Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road &amp; Mitre Road.</p> <p>Kind Regards,,</p> <p>[REDACTED]</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures..</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Counsellor Alex Paterson and colleagues of the School Streets Scheme,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, that I attended with over 100 other local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome</p> | <p>children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King’s School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret’s Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, affected schools, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This</p> |  |

|   | <p>represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|   | <p>To whom it may concern,</p> <p>We all share the same goal: a safer, greener environment for our children. While we appreciate the Council's efforts to improve our streets, I believe a 20-mph speed restriction offers a much more balanced, effective solution than a one-way system.</p> <p>Here's how we can work together to make this work for everyone:</p> <p>Bridging the Distance: We'd love to see more walking, but with an average commute of almost 9 miles, the reality for 70% of the pupils is that driving is a necessity. A 20-mph limit keeps the school accessible while making it significantly safer for those who can walk.</p> <p>Protecting Our Students: I'm worried that a one-way system would unintentionally push traffic onto Vines Lane. As a narrow, historic route where many children cross, keeping traffic light there is vital for student safety.</p> <p>Preserving "The Vines": We all want to protect Rochester's "urban lung." By avoiding traffic displacement, we can ensure that The Vines and our playing fields remain the clean, green spaces our children deserve, rather than becoming a corridor for idling cars.</p> <p>Improving Communication: There's currently some confusion regarding the scheme's scope and holiday schedules. It's unclear which roads are included or how it works during holidays. Unfortunately, the notices on the lampposts literally cover up the email address for feedback. I'm sure that's unintentional but it does make it difficult to express our points of view. Clarification of these details will help the broader community understand and support a co-created transparent plan.</p> <p>Let's find a path forward that keeps our children safe without creating new bottlenecks. A 20-mph zone feels like the perfect "win-win" for the school and the neighbourhood alike.</p> <p>Best Regards,</p> <p>[REDACTED]</p> | <p>Feedback noted.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safely walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider area and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
| Y | <p>To whom it may concern,</p> <p>PFA my letter opposing the current proposal for a school street scheme.</p> <p>Kind regards,</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>Feedback noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|   | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street Scheme planned for the roads adjacent to King's School Rochester, specifically concerning its impact on access, traffic displacement, and the local community.</p> <p>While I appreciate the intention behind enhancing child safety and air quality, the current proposal appears to be fundamentally flawed in its execution regarding this specific location. The unique geography and historical nature of the surrounding area, coupled with the existing traffic patterns, mean the scheme will likely exacerbate problems rather than solve them.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to</p>                                                                  |

|  | <p>Specific Grounds for Objection</p> <p>1. Traffic Displacement and Congestion<br/>The proposed closure times will not eliminate school-related traffic but merely displace it onto immediately adjacent, already heavily congested, and often narrow residential streets. This includes streets such as The Vines, surrounding residential lanes, which lack the capacity to handle increased volume. This displacement will shift the perceived safety risk from the immediate school entrance to other vulnerable areas, including other routes used by pedestrians and residents, and increase rat-running through unsuitable residential areas.</p> <p>2. Access and Emergency Vehicle Impairment<br/>The scheme, as proposed, severely restricts necessary access for residents, local businesses, and essential services during peak hours. Of paramount concern is the potential impact on emergency services. The proposed diversion routes are often complex and during peak congestion periods, the scheme may impede timely access for police, ambulance, and fire services to the surrounding historic residential properties and the school itself. Clear, guaranteed, and rapid access routes must be maintained at all times.</p> <p>3. Impact on Local Residents and Businesses<br/>The restriction of vehicle access during crucial times imposes an undue burden on residents, many of whom rely on these routes for commuting, appointments, or simply carrying out daily life. Delivery services, carers, and trade vehicles will be significantly inconvenienced, impacting the viability of local commerce and the quality of life for those needing assisted access or regular deliveries. The scheme does not adequately account for the specific needs of residents with limited mobility or those requiring frequent vehicle access to their properties.</p> <p>4. Lack of Suitable Alternative Infrastructure<br/>The proposal relies on the assumption that alternative parking and drop-off points are readily available, safe, and easily accessible. Given the density and historical layout of Rochester, the suggested alternative drop-off locations are often a significant distance away, requiring young children to cross multiple major roads, thus negating the intended safety benefits of the scheme.</p> <p>I urge the council to reconsider this proposal in its current form. A comprehensive, site-specific traffic study is required to understand the true displacement effect and its consequences for the wider community before proceeding. I support measures to improve child safety and air quality, but these must be workable, equitable, and not simply transfer the problem elsewhere.</p> <p>I request that my objection is duly noted and considered as part of the consultation process.<br/>Yours faithfully,<br/>--<br/>[REDACTED]</p> | <p>both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>19.3.26</p> <p>Dear Sir/Madam,</p> <p>I am writing to formally register my opposition to the proposed School Street Scheme affecting the area surrounding King's School Rochester. While I fully support the overarching goals of child safety and improved air quality, the current proposal is a geographically and logistically mismatched solution for this specific historic context.</p> <p>My objections are based on the following key points:</p> <p>1. Incompatibility with Regional Catchment Realities</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a</p>                                                                                                                         |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

|  | <p>The proposal incorrectly assumes a localized, "walkable" catchment area. Statistics for King's School indicate an average pupil commute of nearly 9 miles. Specifically, over 70% of the student body, both those under and over the age of eight, reside well beyond the statutory walking distances of two and three miles, respectively. By ignoring the regional nature of this school's population, the Council is imposing a "one-size-fits-all" urban solution on a community for whom active travel is not a viable daily reality.</p> <p>2. Strategic Displacement and Pedestrian Risk</p> <p>The scheme does not eliminate traffic; it merely compresses it into unsuitable arteries. My primary concern lies with Vines Lane. As a narrow, historic thoroughfare, it is fundamentally incapable of absorbing the displaced volume. Furthermore, the junction where Vines Lane meets Maidstone Road, Crow Lane, and Lockington Grove is already a high-risk area with compromised sightlines. Forcing more vehicles through this intersection, which serves as a primary crossing point for pupils, creates a heightened safety risk that counteracts the scheme's intent.</p> <p>3. Preservation of Rochester's "Urban Lung"</p> <p>Under Policy DM10, the Council is obligated to protect heritage assets and green spaces. The current plan threatens The Vines, a vital green space and historic site. By rerouting idling traffic and heavy congestion directly alongside this parkland, the school's playing fields, and several classrooms, the Council is effectively concentrating pollution in the very areas where children exercise and study. This "perverse outcome" undermines the environmental justification for the scheme.</p> <p>4. Procedural Failings and Lack of Clarity</p> <p>The consultation process has been marred by significant ambiguity:</p> <p>Undefined Scope: It remains unclear if Crow Lane is included in the restrictions.<br/>Operational Uncertainty: There is no confirmation on whether the scheme persists during school holidays, nor which specific academic calendar will be utilized to trigger enforcement.<br/>Transparency Issues: The physical placement of the Draft RTA orders on local lampposts has obscured the contact information required for public feedback, hindering a fair and transparent democratic process.</p> <p>5. A More Effective Alternative</p> <p>I wish to record my strong support for the 'Rochester Residents Alternative Plan'. A comprehensive 20mph limit, extending from the High Street through to the residential grid including Watts' Avenue, Ridley Road, and the surrounding streets, would provide a holistic safety benefit. This approach protects all residents and pedestrians without the artificial and dangerous concentration of traffic on Vines Lane.</p> <p>I urge the Council to reconsider the current School Street proposal in favour of the more balanced, area-wide safety measures proposed by the community.</p> <p>Yours faithfully,<br/>[REDACTED]</p> | <p>formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Sir/Madam,</p> <p>I am writing in my capacity as a member of staff at King's School Rochester to register my objection to the proposed School Street scheme affecting the area around the school.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <p>Feedback noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|  | <p>From a practical and operational standpoint, the proposal does not appear to reflect the realities of how our school community functions on a daily basis. King's serves a wide regional catchment, and a large proportion of our pupils travel considerable distances each day. For many families - particularly those with younger children - walking is simply not a viable option. As staff, we see first-hand the logistical challenges families already manage, and restricting vehicular access in this way risks placing them under further strain, with knock-on effects for punctuality, attendance and the smooth running of the school day.</p> <p>There are also serious safeguarding and supervision concerns linked to the likely displacement of traffic. The proposal would divert vehicles onto Vines Lane, a route that is already heavily used by pupils crossing before and after school. At peak times, staff are actively involved in monitoring and supporting safe movement in this area. Any increase in traffic volume would significantly heighten risk, particularly given the constraints of the road and the complexity of the nearby junction with Maidstone Road, Crow Lane and Lockington Grove. From a duty-of-care perspective, this is a deeply concerning outcome.</p> <p>In addition, the proposal would inevitably disrupt established routines for both staff and pupils. Timely arrival is essential not only for safeguarding but also for maintaining the structure and continuity of the school day. Introducing restrictions that complicate access risks creating delays, congestion in surrounding areas, and confusion for families, all of which would have a direct impact on teaching, learning and pastoral care.</p> <p>The environmental rationale for the scheme also warrants closer scrutiny. While the intention to improve air quality is positive, concentrating traffic along alternative routes risks increasing emissions in areas where pupils spend significant time, including outdoor spaces used for recreation and learning. From a staff perspective, this raises questions about whether the proposal would genuinely deliver a net benefit to pupil wellbeing.</p> <p>I am also concerned by the lack of clarity surrounding key aspects of the scheme. Uncertainty regarding its exact boundaries, the inclusion of specific roads, and how it would operate during school holidays makes it difficult for staff and families to plan effectively. Clear communication is essential for any measure of this nature, and the current level of ambiguity does not support confident implementation.</p> <p>More broadly, the proposal appears likely to replace one set of challenges with several more complex ones - introducing additional safety risks, operational disruption, and unintended consequences for the wider community.</p> <p>A more constructive approach would be to focus on measures that enhance safety without restricting access, such as implementing a consistent 20mph speed limit across the surrounding area. This would support safer conditions for pupils, staff and residents alike, while avoiding the displacement of traffic onto already sensitive routes.</p> <p>For these reasons, I would urge the Council to reconsider the current proposal and to engage further with the school community to develop a solution that is both practical and effective.</p> <p>Yours faithfully,</p> <p>[REDACTED]</p> | <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|  | <p>Dear Sir or Madam,</p> <p>I am writing to formally object to the proposed School Street scheme in the vicinity of King's School Rochester. While I appreciate the intention to improve safety and air quality, I believe the current proposal is fundamentally flawed and risks creating new hazards and unintended consequences for pupils, residents, and the wider community.</p> <p>A key concern is the nature of the school's catchment area. King's School Rochester serves a broad geographic region, and many families travel considerable distances each day. A significant proportion of pupils live well beyond reasonable walking distance, particularly younger children. This reality makes reliance on walking impractical for most families and means that vehicular access is not a matter of convenience but necessity. Implementing restrictions that assume a predominantly local intake does not reflect the actual demographics of the school community.</p> <p>Additionally, the proposed traffic management measures would divert vehicles onto Vines Lane, a route that is neither designed nor suitable for increased traffic flow. Its narrow layout, combined with its role as a key pedestrian crossing point for students, raises serious safety concerns. The nearby junction linking Vines Lane with Maidstone Road, Crow Lane, and Lockington Grove is already challenging due to limited visibility and complex traffic movements. Increasing congestion in this area would heighten the risk for both drivers and pedestrians, particularly during peak school hours.</p> <p>From an environmental standpoint, the scheme appears counterproductive. Redirecting traffic toward Vines Lane would concentrate vehicle emissions alongside The Vines, an important green space that contributes to local air quality and community wellbeing. Rather than reducing pollution exposure, the proposal risks relocating it to an area heavily used by children and families, undermining its stated environmental objectives.</p> <p>There are also notable gaps in the clarity and administration of the proposal. It remains uncertain whether certain surrounding roads, such as Crow Lane, fall within the scheme's scope. Likewise, there is insufficient information regarding operational periods, particularly during school holidays, and how these will be determined. Furthermore, the consultation process itself has been difficult to navigate, with key contact details not clearly visible on posted notices. This lack of transparency limits meaningful public participation and raises concerns about the robustness of the process.</p> <p>On a personal level, I am also concerned about the impact this scheme will have on residents' ability to park. I already experience difficulty finding suitable parking in the area, despite paying for a resident's permit. The introduction of additional restrictions and displaced traffic will inevitably intensify competition for limited spaces, making day-to-day life more challenging for those of us who live here.</p> <p>In contrast, I support the alternative proposal put forward by local residents to introduce a 20mph speed limit across a wider network of surrounding roads. This approach would promote safer driving conditions without forcing traffic into unsuitable routes or concentrating risk in a single location. It represents a more balanced and practical solution that takes into account the needs of residents, pupils, and the existing road infrastructure.</p> <p>In conclusion, I urge the Council to reconsider the current School Street proposal and to</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>While the potential for parking displacement is acknowledged, it is pertinent to emphasises that the intention of a school street is to reduce the immediate risk of vehicle collision with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety</p> |

|  | <p>Dear Sirs,</p> <p>Objection to Proposed School Street Scheme</p> <p>I am writing to formally object to the proposed School Street Scheme and I am concerned that the proposal fails to account for the unique regional catchment of King’s School Rochester.</p> <p>With an average pupil commute of 8.9 miles, the vast majority of our families live well beyond statutory walking distances. A scheme predicated on walking is fundamentally unsuitable for our community. Furthermore, the displacement of traffic onto Vines Lane—a narrow, historic route and a primary crossing point for pupils—poses a significant safety risk. Concentrating emissions alongside The Vines also appears to contradict Council Policy DM10 regarding the protection of heritage green spaces.</p> <p>On a personal level, I am concerned about the impact on my colleagues. The proposed restrictions will significantly affect my own journey to work, resulting in lengthy delays and restricted access to essential parking. These logistical challenges will be mirrored across our staff body, hindering the daily operations of the school.</p> <p>I also find the consultation process lacks clarity, particularly regarding the inclusion of Crow Lane and the operational calendar during school holidays. The obscured contact details on local RTA orders have further hampered transparent engagement.</p> <p>I wish to express my support for the 'Rochester Residents Alternative Plan'. A 20mph limit extending from the High Street through to the surrounding residential roads would enhance safety for all without creating the dangerous traffic bottlenecks inherent in the current proposal.</p> <p>I hope that these observations will assist the Council in developing a more viable and safer alternative for the Rochester community.</p> <p>Yours faithfully,</p> <p>[REDACTED]</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council’s website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The design of any scheme would take into consideration Rochester’s historic environment and the character of the conservation area including for signage and road markings</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions.vlt is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to express my concerns regarding the proposed School Street scheme in the</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Feedback noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
