|  | <p>vicinity of King’s School Rochester. While I recognise and support the broader intention of improving safety and air quality for pupils, I believe the current proposal is not well suited to the unique context of the school and its surrounding area.</p> <p>A key issue lies in the nature of the school’s intake. King’s draws pupils from a wide geographic area, meaning that many families travel considerable distances each day. For a significant proportion of younger pupils in particular, the journey to school exceeds the statutory walking distance. As a result, walking is not a realistic option for many families, and any scheme that assumes otherwise risks placing undue strain on parents while failing to achieve its intended behavioural change.</p> <p>I am also concerned about the likely redistribution of traffic. The proposed restrictions would inevitably divert vehicles onto surrounding roads, most notably Vines Lane. This is a narrow, historic route that already experiences congestion at peak times. It is frequently used by pupils crossing to and from school, and increased traffic flow here would heighten, rather than reduce, risk. In particular, the nearby junction with Maidstone Road, Crow Lane and Lockington Grove is already difficult to navigate, with limited visibility and a complex layout. Additional traffic pressure in this area could create a significant safety hazard.</p> <p>There are also environmental considerations that appear to have been overlooked. Diverting traffic away from the immediate school frontage does not eliminate emissions; it simply relocates them. In this case, it would concentrate pollution along Vines Lane, which borders The Vines—an important public green space that contributes meaningfully to local air quality and community wellbeing. It is difficult to reconcile this outcome with the stated environmental objectives of the scheme.</p> <p>In addition, there are aspects of the proposal that lack sufficient clarity. It is not clear whether all surrounding roads, such as Crow Lane, are included within the scheme’s boundary, nor how the restrictions would operate outside of term time or across differing school calendars. Furthermore, the way consultation information has been presented locally has made it unnecessarily difficult for residents to engage fully, which raises concerns about the transparency and accessibility of the process.</p> <p>I would urge the Council to consider alternative measures that improve safety without displacing traffic into less suitable areas. A reduced speed limit across the wider local road network, for example, would provide a more balanced approach—enhancing safety for pedestrians while maintaining reasonable access for families who have no viable alternative to car travel.</p> <p>Thank you for taking the time to consider these points. I hope they will be taken into account as part of a thorough and constructive review of the proposal.</p> <p>Yours faithfully,<br/>[REDACTED]</p> | <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council’s website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester’s historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils’ ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|  | <p>Date 18th March 2026</p> <p>Dear planning committee for school streets</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME Rochester Kings</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|  | <p>DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> | <p>safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|  | <p>Date 18th March 2026</p> <p>Dear planning committee for school streets</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME Rochester Kings</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious</p> | <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely, [REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|  | <p>Hello,</p> <p>I object to the whole of this badly planned School Street Proposal.</p> <p>It is not backed up by any data about fatalities / injuries, or about traffic flows.</p> <p>It would be a disaster for the area, creating additional risk to children rather than solving issues. For example, it will push parking by school parents over to the east of Maidstone Road, endangering children by making them cross this busy road. It would make Watts' Avenue even busier at the relevant times, where there is also a school. It would create a massive traffic jam in Vines Lane.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to</p> |

|  | <p>It would adversely affect Roebuck Road by making it a one-way street rather than the pleasant two-way street it now is. It would unnecessarily restrict taxis, deliveries, &amp; visitors.</p> <p>King's School is against the plan, which surely clearly shows that it is a bad one.</p> <p>I have lived on Roebuck Road for 30 years &amp; don't believe that any School Street plan is needed. However, if traffic calming is necessary, I propose the following:-<br/>A 20 mph speed limit zone starting from the High Street &amp; extending through Boley Hill &amp; Minor Canon Row. To encompass the entirety of St. Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road &amp; Mitre Road.</p> <p>Best wishes,</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                            | <p>both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Council,</p> <p>I am emailing regarding concerns I have about the changes to streets you are planning, especially the below:</p> <p>The King's Pre-Preparatory School and Nursery, Rochester<br/>Street: Lockington Grove, King Edwards Road, and St Margaret's Street<br/>Operational times: 8am to 9am and 3.45pm to 4.45pm<br/>This modification to the current street plans is not acceptable or suitable for all parents who drop off their children at Kings School, especially the children who attend primary school classes. My daughter is in Reception and is 5 years old, she needs access to Lockington Grove so we may park the car for her and escort her to the school gates. If this road is being made into a restricted access in the school drop off and pick up hours where do you expect I drop my daughter off? Crow Lane is double yellow lines so we cannot use that. King Edward s Road is also for residential cars and the spaces there are always full. Lockington Grove is the only suitable place to park and you are changing access to this.</p> <p>This is highly unacceptable and I strongly oppose this change. Several parents agree with this</p> | <p>Feedback noted.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|  | <p>and would strongly request these changes are not implemented.</p> <p>Many thanks and regards,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|  | <p>Dear Sir/Madam,</p> <p>I have reviewed the proposed School Streets Scheme for St Margaret's Street, King Edward Road, and Lockington Grove. I am writing to formally state that I consider the scheme, in its current form, to be unacceptable.</p> <p>The proposal fails to provide comprehensive 24/7 safety for the community and does little to deter speeding motorists. Consequently, it will have a negligible impact on air quality. Furthermore, it will likely displace traffic congestion onto neighbouring roads that are already operating at maximum capacity.</p> <p>However, I believe the 'Safe Streets Rochester' alternative is far more viable. Specifically:</p> <p>Comprehensive 20 MPH Zone: A comprehensive 20 MPH speed limit starting from the High Street and extending through Boley Hill and Minor Canon Row. This zone will encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road, and Mitre Road.</p> <p>King Edward Road Realignment: To streamline flow, King Edward Road will become a one-way system, with vehicle access permitted only via St Margaret's Street.</p> <p>Install Speed bumps/traffic calming</p> <p>This alternative provides 24/7 safety, actively reduces speeding, improves air quality, and prevents the congestion displacement inherent in the proposed scheme.</p> <p>I look forward to receiving an acknowledgment of this response.</p> <p>Further more stopping vehicles going up st Margaret's Street will cause so much extra traffic in Watts' Avenue it will become gridlocked. The air pollution around the area will get worse not better.</p> <p>Yours faithfully,</p> <p>[REDACTED]</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>This is a formal submission rejecting the 20mph proposal.</p> <p>At peak times that are of concern traffic is so slow reaching 5mph is a gift from god!!!<br/>Why waste money and cause distribution to the local area for an issue that does not exist!<br/>The roads around Roebuck, St Margaret's are always heavy with traffic at school pick up drop of times, speed bumps will not aid any benefit in safety or emissions.</p> <p>This is a waste of money to tick box an exercise for the privileged few, at tax payers expense, with no benefit! Just disruption!</p> <p>Spend the money the council has been given by hard working families in a better more equal way!!! Like potholes, addressing antisocial behaviour!</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <p>Feedback noted.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|  | <p>Hi,</p> <p>As per your information on line &amp; that received at our property please supplyelectronic copies of all relevant documents relating to the proposed TRO.</p> <p>Please advise if the Council has consulted with local services i.e Police &amp; Emergency Services in the making of this proposal &amp; if so also supply full details of their reports/opinions regarding the proposal.</p> <p>I did contact you at the time of the original proposal made by the Council in 2024 to seek the outcome of the Consultation with the public but no reply was forthcoming.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <p>Query noted.</p> <p>The police and other emergency stakeholders were contacted for comment. Feedback noted in this report.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|  | <p>I therefore request copy of the detailed rationale for not moving forward on that proposal and yet now introducing a more comprehensive scheme.</p> <p>I look forward to receiving your reply.<br/>Thank you, [REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|  | <p>Dear Parking Design Team,</p> <p>I am writing to share my views on the proposed "Pedestrian and Cycle Zone" (School Street) and other traffic measures on St Margaret's Street, King Edward Road, and Roebuck Road. While I support measures to improve safety, I do not believe the School Street restriction is necessary here. The timed vehicle closures (8–9am and 3:45–4:45 pm) would cause significant disruption for residents and school drop-offs at King's School and St. Andrew's School, without clear evidence that full restrictions are the only solution.</p> <p>I do support the proposed one-way systems:<br/>Extending the south-westbound one-way on St Margaret's Street<br/>Introducing a north-westbound one-way on Roebuck Road<br/>I hope the Council will reconsider the School Street restriction while moving forward with the one-way system improvements.</p> <p>Thank you for acknowledging this representation.<br/>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>Your suggestion regarding the one-way proposals have been noted for consideration.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|  | <p>Dear Sirs</p> <p>As a resident of Watts' Avenue, I am writing to express my deepest objection to the traffic restrictions as detailed on the medway.gov.uk website involving the streets around the Kings School Rochester.</p> <p>I have seen two previous consultations on this proposal, and cannot find any details as to why these were rejected and what the changes are in the current consultation to address any previous concerns raised.</p> <p>I understand your reasoning for proposing these changes is to improve safety, but can find no detail as to what safety records there currently are and which specific issues are to be addressed. As a resident of Watts' Avenue, and someone who is often working from home, I am aware of the already dangerous situation on Watts' Avenue during school drop off and pick up times. I regularly hear and see verbal altercations as people are frustrated about the number of cars in Watts' Avenue which has cars parked on both sides, with very few gaps to allow cars to pass. There is also a lot of pollution created by stationary cars stuck in jams on a daily basis at these times which impacts the parents and students at St Andrews school as well as the residents. With your proposed implementation to block most of the roads around the area during these times, I can only see Watts' Avenue getting considerably more congested, and the danger and pollution to the St Andrews students increasing. I would very much like to understand why St Andrews wasn't included in your proposal when it has more students than Kings School Prep and Preprep schools and Watts' Avenue has more residents than Lockington Grove and King Edwards Road combined.</p> <p>I am also concerned about the number of extra cars that will be channeled along the Vines. The Vines has two major crossing points for children, both at the Kings School Prep gate and at the intersection with Maidstone Road. Increasing the flow of traffic will definitely increase the danger for these children having to cross these roads. The Vines is also a significant green space in Rochester enjoyed by many residents and visitors. The air quality of The Vines is</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |

|   | <p>going to diminish considerably with the amount of cars being stuck in traffic jams each day when the nearby roads are closed, as well as the classrooms and playing fields at Kings.</p> <p>I understand the concept of the School Streets scheme generally is to encourage people to walk or cycle to school. Whilst this concept is sound for local state schools which are generally allocated based on catchment areas, this does not apply to Kings School. Data from Kings indicates an average commute for families of 8.9 miles which is certainly not within the statutory maximum walking or cycling distance for schools.</p> <p>I attended the public meeting on 12 March and was very disappointed to see no council representatives there able to answer our questions. One lady admitted late into the meeting that she was from the Council, but was only there to gather information for the Council, but was not able to comment or answer questions.</p> <p>The overwhelming consensus of the meeting was that a far better approach to this issue would be to implement a 20mph zone on all the streets identified, and I would suggest it would also be a good idea to implement it around the cathedral, the castle and Watts' Avenue. I believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>It would appear there is near-universal opposition from the Cathedral, the Diocese, Kings School and local state schools who will be impacted, local businesses and the residents of Rochester, so I cannot see how this can go ahead.</p> <p>Please rethink this ill-conceived scheme and start having meaningful conversations with us on a 20mph speed limit, as well as potentially looking into making the likes of King Edwards Road, Roebuck Road and Watts' Avenue one way so as to reduce existing bottle necks, make the roads safer for the children, and improve air quality for us all. Please do not, by implementing this scheme, make all those things worse rather than better for those of us that have to live here and the children that go to school here.</p> <p>Yours sincerely [REDACTED]</p> | <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                                                                                                                                                                                                                                                                                                                           |
| Y | <p>Dear Sirs</p> <p>Please find attached my letter with my comments on the proposed school streets scheme covering King's School, St Margaret's Street, King Edward Road and Lockington Grove, and other changes to the roads.</p> <p>Kind regards</p> <p>Sarah Anderson</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>Feedback noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|   | <p>Dear Sir/Madam,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>I am writing to complain about the proposals around King's School Rochester for a 3rd time. The complete lack of care for the thoughts of residents and the other two affected schools</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|  | <p>concerns me greatly.</p> <p>This scheme potentially greatly restricts access to my own property in[REDACTED] by the proposal for Watts' Avenue. It also makes walking my son to school more hazardous due to the increased traffic around Vines Lane. I have chosen to send my son to a school where we walk. This scheme rewards parents who drive and endangers my son going to St Margaret's Troy Town who crosses an already busy road with no sensible crossing in the proposed affected area. Once again, I would like to raise my concerns about the lack of crossing from the alms houses to the High Street. Medway Council are choosing to prioritise drivers over pedestrians.</p> <p>If the council are determined to go ahead then I support the Rochester Residents Alternative Plan. This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>I would hope that given the overwhelming opposition from residents and businesses that this scheme is dropped and the 20mph scheme is adopted. This will make the area far safer for everyone.</p> <p>[REDACTED]</p> | <p>gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions.It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Reference Information sent to residents by [REDACTED]</p> <p>Objection raised by [REDACTED]<br/>In essence we agree with the FORMAL OBJECTION PROPOSED SCHOOL SCHEME by the attendees at a meeting 12/03/26.<br/>It was noted that no member of the Council was formally in attendance although invited.</p> <p>1. We have previously contacted the Council in March 26 requesting further details of the finance/cost involved in the Council's current proposal &amp; the history of the funding but did not receive a reply</p> <p>2. Failure of Procedural Non -Disclosure of Prior Consultation Results.<br/>We contacted you in 2025 asking for an update on the outcome of the original consultation on your original proposals &amp; similarly received no reply. We believe this information has been unfairly withheld &amp; the Community has a right to be treated fairly in order to understand the original reasons for rejection that has caused this further more comprehensive proposal.</p> <p>3.Absence of evidence base(Road Safety &amp; Emissions)<br/>The COUNCIL apparently does not hold any specific information to consider before implementing restrictive measures.<br/>(As per info obtained via FOI).</p> <p>4.Demographic Misalignment and Statutory Distances<br/>Data from King's School indicates an average commute for families of 8.9 miles. 73 % of pupils</p>                                                                                                                                                                                                                                                                                                                                                           | <p>Feedback noted.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. Heritage &amp; Conservation Impact (DM10)<br/>The whole area is a Conservation area.How does all the signage/camera'etc fit into Conservation/Heritage area where stricter building controls etc are applied?</p> <p>6. Environmental Impact : THE VINES &amp; SCHOOL AIR QUALITY<br/>We refer you to the agreed objection by the Meeting.</p> <p>7. SEVERE SAFETY RISK<br/>VINES LANE ....in addition to the full reasons given in the Meeting's assessment we consider that at the very least the speed limit should be 20mph and a more distinctive crossing area for students/children from King's main building across to the Vines Park should be in place.<br/>Particularly in view of the unwise planned increase of traffic through the area.</p> <p>As already stated we support the Rochester Residents ALTERNATIVE PLAN along with a few comments of our own.<br/>We did state at the Meeting -and many were in agreement- that there is URGENT attention needed to repair the MANY pot holes in the whole of Medway(not just the second time in the last few years of repairing Chatham Hill) &amp; particularly the length of Rochester Maidstone Road &amp; all roads leading off .This to make roads more safe for any children walking or cycling or indeed being driven to school. Not forgetting the Safety of ALL road users.</p> <p>Kind regards [REDACTED]</p>                                                                                               | <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions.It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|  | <p>To Whom it May Concern</p> <p>I would like to strongly oppose the plans for the proposed changes.</p> <p>1. My main reason is that it has not been sufficiently researched. There is already a backlog of cars on Watts' Avenue land Roebuck Road trying to get onto the Rochester Maidstone Road during school drop-off and collection. Funnelling all traffic for King's and St Andrews onto Roebuck and Watts will cause gridlock and simply Will not work. Aside from making it an absolute misery for residents in those two roads. Has anyone actually calculated the number of vehicles likely to be making this journey?</p> <p>2. There is not a problem on Lockwood Road. Kings have a well-established system to help parents drop their children off efficiently. There is one resident in the street who is not at all concerned with the traffic flow. It is a safe system.</p> <p>3. Where are the outcomes from the first consultation? Surely there are rules about openness in reporting these. I would like to know whose voices have been listened to as there is widespread opposition to these plans.</p> <p>4. The only safety issues.I have observed would be resolved if the road markings were properly painted as they aren't and if wardens were patrolling to ensure adherence. We used to regularly see them in the street but now I have seen. 1 in about the last 6 months. I support the proposed 20 mph speed limit idea from residents as this would do far more to improve safety than any of the council proposals.</p> <p>If carried out the council would be wasting so much money, approximately £200,000 I</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph</p> |

|  | <p>understand and it would have to be reversed as it is unworkable.</p> <p>You're sincerely<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street (no driving zone) during drop-off and pick-up times at King's School Rochester.</p> <p>I do not believe it has fully considered the practical realities of the school community or the wider local impact. King's School serves a broad catchment area, and many families travel considerable distances each day. For a large proportion of pupils, walking is simply not a realistic option, particularly for younger children. As a result, restricting vehicle access risks creating unnecessary disruption rather than offering a workable solution.</p> <p>In practice, the scheme is likely to displace traffic rather than reduce it. Vehicles will be diverted onto surrounding roads, most notably Vines Lane, which is narrow, historic, and already under pressure during peak times. This road is also heavily used by pupils crossing at both ends, and increasing traffic flow there raises clear safety concerns. The nearby junction with Maidstone Road, Crow Lane, and Lockington Grove is already difficult to navigate, with limited visibility and complex traffic movement, and additional congestion will only make this worse.</p> <p>There is also a contradiction in the environmental objective of the proposal. Redirecting traffic towards Vines Lane will concentrate emissions alongside The Vines, an important green space for Rochester that serves both the community and the school. Rather than improving air quality, this risks shifting the problem to an area where children learn, play, and spend time outdoors.</p> <p>I am also concerned about the lack of clarity and accessibility in the consultation process. Key details about the scheme remain unclear, including its exact boundaries and how it would operate during school holidays. In addition, the way information has been presented locally has made it difficult for residents to fully understand the proposal or respond effectively. This undermines confidence that the process has been as transparent and inclusive as it should be.</p> <p>Given these concerns, I would urge the Council to reconsider the scheme in its current form and to engage more closely with the school community to develop a solution that genuinely improves safety without creating additional risks or unintended consequences.</p> <p>Regards,<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation.</p> |
|  | <p>To: Parking Design Team, Medway Council</p> <p>Dear Parking Design Team,</p> <p>I am writing to formally submit my representation regarding the proposed "Pedestrian and Cycle Zone" (School Street) and additional traffic measures for St Margaret's Street, King Edward Road, and Roebuck Road.</p> <p>While I recognise the Council's intent to improve safety, I wish to register my objection to the fundamental need for a School Street restriction in this specific location.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                            |

|   | <p>However, I do wish to express my support for the proposed one-way systems, provided they are accompanied by more robust visual reinforcements.</p> <p>1. Objection to the "School Street" Restriction<br/>I fundamentally disagree with the necessity of a timed motor vehicle prohibition (8:00 am–9:00 am and 3:45 pm–4:45 pm) for this area. The proposed restrictions create significant inconvenience for residents and local through-traffic without sufficient evidence that a total restriction is the only viable solution for this particular neighborhood. The existing road layout and traffic patterns do not, in my view, warrant such a restrictive "Pedestrian and Cycle Zone." It will also greatly disrupt school drop-offs to two of the most outstanding schools in the vicinity - King's School &amp; St. Andrew's School.</p> <p>2. Support for One-Way System Proposals<br/>I do agree with the introduction of the following measures, as I believe they will effectively ease the traffic flow and congestion issues currently being experienced in the area:</p> <p>The extension of the south-westbound one-way restriction on St Margaret's Street.</p> <p>The introduction of the north-westbound one-way restriction on Roebuck Road.</p> <p>These structural changes to the flow of traffic are a more proportionate response to local congestion than the proposed timed closures.</p> <p>3. Suggested Modifications for Safety and Clarity<br/>To ensure the effectiveness of the one-way system and to prevent accidental contraventions, I suggest the following enhancement to the proposal:</p> <p>Enhanced Road Markings: In addition to the proposed "No Entry" signage, the Council should include a painted "No Entry" road marking at the specific point where Watts' Avenue and Roebuck Road split.<br/>Clearer "on-the-ground" visual cues are essential to guide drivers who may be unfamiliar with the new restrictions, thereby reducing the risk of head-on incidents or illegal maneuvers.</p> <p>I request that the Council reconsider the implementation of the timed School Street restriction while proceeding with the one-way system improvements, bolstered by the additional road markings suggested above.</p> <p>Please kindly acknowledge receipt of this representation.</p> <p>Yours sincerely,<br/>[REDACTED]</p> | <p>both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>Your suggestion regarding a one-way and signage modifications have been noted.</p> |
| Y | <p>Dear Parking Design Team</p> <p>Please see attached our formal objection to the Council's Kings School area School Street proposal.</p> <p>yours sincerely<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Feedback noted.                                                                                                                                                                                                                                                                                                                                                                                                            |
|   | <p>To whom it may concern,</p> <p>I am a long term resident and homeowner on King Edward Road, and also work at King's</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Feedback noted.                                                                                                                                                                                                                                                                                                                                                                                                            |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|  | <p>School, Rochester.</p> <p>I am writing to formally submit my objection to the proposed School Street Scheme currently under consultation for the area adjacent to King’s School Rochester. While I am fully supportive of efforts to enhance child safety and reduce local emissions (and have children who live in the area of the proposed scheme), the current proposal fails to account for the unique geographical and historical realities of this specific site.</p> <p>My objections are based on the following grounds:</p> <p><b>Incompatibility with Regional Catchment Realities</b><br/>The proposal incorrectly assumes that pupils and their families are local residents for whom walking or cycling is a viable alternative. Data indicates that the average commute for King’s School families is nearly nine miles. Specifically, over 70% of the pupil population lives well beyond the statutory walking distances of two or three miles. By effectively closing access, the Council is not shifting transport modes but rather penalizing a regional community for whom vehicle use is a logistical necessity.</p> <p><b>Dangerous Traffic Displacement and Pedestrian Risk</b><br/>The scheme does not remove traffic; it merely redirects it onto Vines Lane, a narrow, historic thoroughfare that is fundamentally unsuitable for increased volume. This creates a severe safety hazard at the complex intersection of Vines Lane, Maidstone Road, Crow Lane, and Lockington Grove. This junction already suffers from restricted sightlines, and forcing more traffic through this bottleneck—where pupils frequently cross between school buildings—is a counter-intuitive move that increases the risk of accidents.</p> <p><b>Environmental Degradation of "The Vines"</b><br/>The proposal appears to contradict Policy DM10 regarding the protection of heritage assets and green infrastructure. Displacing idling traffic and emissions onto the perimeter of The Vines—Rochester’s "urban lung"—is a regressive step. This would concentrate pollutants directly alongside active playing fields and public parkland, undermining the very air quality improvements the scheme claims to champion.</p> <p><b>Procedural Failures and Lack of Transparency</b><br/>The consultation process to date has been marked by significant ambiguity:</p> <p><b>Geographic Uncertainty:</b> It remains unclear if Crow Lane is included within the restricted zone.</p> <p><b>Operational Clarity:</b> There is no confirmation on whether restrictions apply during school holidays, nor which specific academic calendar will be utilized.</p> <p><b>Accessibility:</b> Public notices (Draft RTA orders) have been posted in a manner that obscures the contact information required for submissions, representing a failure in fair and transparent public engagement.</p> <p><b>Support for the Rochester Residents Alternative Plan</b><br/>I wish to register my firm support for the Rochester Residents Alternative Plan as a more holistic and effective solution. Implementing a 20mph limit across the wider residential network—including St Margaret’s Street, Vines Lane, and the surrounding avenues—would achieve a universal increase in safety for all pedestrians. This approach manages speed throughout the entire neighborhood without creating the artificial and hazardous traffic concentrations inherent in the Council’s current "School Street" model.</p> <p>I trust that these concerns will be given serious consideration and that the Council will opt for</p> | <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council’s website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester’s historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils’ ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |

|  | <p>the more balanced 20mph alternative which serves both the school and the wider Rochester community.</p> <p>My final concern is that your proposed changes, after so many recent difficulties in our sector, will be the final straw that makes our school unviable and causes it to close. King's is woven into the fabric of Rochester: Our closure would make Rochester a poorer place, culturally and economically. While I understand your desire to improve our air quality in this area, I do not believe that your proposed scheme will achieve that: It is also your duty as a council to protect the cultural and economic well-being of our area.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|  | <p>To the Strategic Planning and Highways Department,</p> <p>I am writing to formally lodge my objection to the proposed School Street Scheme affecting the roads adjacent to King's School Rochester. As both a member of the school staff and a regular commuter to this area, I have significant concerns regarding the scheme's logistical feasibility, its environmental impact, and the personal professional burden it places on those who sustain the city's educational infrastructure.</p> <p>1. Personal Impact: Workplace Accessibility and Staff Logistics<br/>As a staff member who frequently relies on parking on King Edward Road, this proposal directly threatens my ability to perform my professional duties.</p> <p>Commute Reality: Staff commute averages of 8.9 miles, which makes walking or cycling entirely unviable. The proposed restrictions coincide precisely with my required arrival and departure times, effectively stripping away workplace access without providing a functional alternative.</p> <p>Artificial Displacement: By removing access to King Edward Road, St Margaret's Street, and Lockington Grove, the Council is not reducing car usage; it is simply forcing staff to search for parking in further-out residential zones. This creates unnecessary friction with local residents and shifts the parking burden rather than solving it.</p> <p>Safety and Materials: My role often requires transporting teaching materials and equipment. Forcing staff to park significantly further away and navigate narrow, increasingly congested corridors like Vines Lane on foot, particularly in winter months, is a move that ignores the Council's duty of care toward local employees.</p> <p>2. Failure to Address Regional Catchment Dynamics<br/>The Council's one-size-fits-all approach to School Streets is fundamentally mismatched with King's School.</p> <p>Statutory Distance Discrepancies: With over 70% of our pupils living beyond the two-mile (under eights) and three-mile (over eights) statutory walking distances, this is a regional hub, not a neighbourhood primary. A scheme designed to encourage walking is mathematically destined to fail when the vast majority of the community lives well beyond a walkable radius.</p> <p>3. Environmental Paradox and Heritage Risk<br/>The proposal risks damaging Rochester's 'urban lung' through the concentration of traffic onto Vines Lane.</p> <p>Conflict with Policy DM10: By diverting all school-related traffic through a narrow, historic artery that borders The Vines, the Council is concentrating pollution directly alongside</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the</p> |

|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>classrooms, playing fields, and a protected public park.</p> <p>Pedestrian Safety Bottleneck: Vines Lane is already a high-traffic crossing point for students and staff. Funneling a higher volume of vehicles into the notorious junction at Maidstone Road and Crow Lane creates a safety trap "far more dangerous than the current dispersed traffic patterns.</p> <p>4. Procedural Failings and Lack of Transparency<br/>I must also highlight the significant barriers to public engagement during this consultation:</p> <p>Geographic and Calendar Ambiguity: There is no clarity on whether Crow Lane is included, nor which specific school calendar will dictate the holiday exemptions.</p> <p>Obscured Communication: Many RTA orders were affixed to lampposts in a way that physically covered the contact email address, making it nearly impossible for the average resident or staff member to submit a timely response.</p> <p>5. Support for a Pragmatic Alternative<br/>I strongly advocate for the 'Rochester Residents Alternative Plan'. A comprehensive 20mph limit, stretching from the High Street through to the residential boundaries of Ridley Road and Mitre Road, would provide a holistic safety solution. This measure would protect pedestrians and residents across the entire school estate without creating the dangerous, artificial traffic spikes on Vines Lane that the current proposal would inevitably trigger.</p> <p>I trust the Council will reconsider this scheme in favor of a plan that balances child safety with the practical needs of the staff and families who are essential to Rochester's community.</p> <p>Yours sincerely,<br/>[REDACTED]</p> | <p>original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|  | <p>Thursday 26th March 2026</p> <p>Dear Council,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p>                                                                                                                                                                                                                                                                                                                                                                               | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King’s School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme’s stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King’s School Rochester and borders The Vines, one of our city’s most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King’s School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm"</p> | <p>received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester’s historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils’ ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|  | <p>Dear Sir/Madam,</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders (although no councillors involved with this ludicrous proposal could be bothered to attend!), it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results<br/>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)<br/>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances<br/>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)<br/>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and Watts' Avenue and School Air Quality<br/>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines. The alterations to Watts' Avenue in the proposal and there being no access to St Margaret's Street from Watts' Avenue will have a similar impact on air quality with the increased amount of traffic needing to do multiple point turns in a busy road directly outside of the school to be able to exit Watts' Avenue as one option or, as a second option, increase traffic looping through Gordon Terrace onto The Close and back out onto Watts' Avenue, therefore impacting the air quality of those residents.</p> <p>6. Severe Safety Risks: The Vines Lane, Watts' Avenue and Gordon Terrace Bottleneck<br/>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic, and Gordon Terrace and Watts' Avenue are of similar ilk, particularly Gordon Terrace. Vines Lane serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites. By forcing additional traffic into this bottleneck, the Council is creating a</p> | <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>We must also highlight the severe safety implications for the residents of Watts' Avenue and Gordon Terrace. By sealing off Roebuck Road, the Council is not "removing" traffic; it is merely displacing it onto these narrow, residential residential streets that are physically incapable of absorbing the overflow.</p> <p>Gordon Terrace will be transformed from a quiet residential enclave into a high-pressure turnaround point and a magnet for "displacement parking." As frustrated drivers and delivery couriers realise they have entered a dead-end restricted zone, we foresee a surge in hazardous three-point turns and reversing manoeuvres in close proximity to residents' front doors. To funnel the "school run" chaos into a confined residential cul-de-sac is to invite a collision, especially on the tight corners where access is already inhibited during school drop off peaks as parents all park on the double yellow lines on the blind corners of the terrace.</p> <p>While the scheme ostensibly aims to protect King's School pupils, it creates a secondary—and arguably more acute—danger for the pupils, parents, and staff of St Andrew's School.</p> <p>Located on Watts' Avenue, St Andrew's sits directly in the "firing line" of the diverted traffic flow. The proposal will force a concentrated stream of vehicles - many driven by parents hurried by the restriction's ticking clock - down the very road where St Andrew's children are being dropped off and picked up. This creates a terrifying irony: in an attempt to clear one school gate, the Council is intentionally congesting another.</p> <p>The narrow nature of Watts' Avenue driveable road space due to the level of parking on either side of the residential road means the road is already ill-equipped for the morning rush; adding a redirected "through-flow" of vehicles creates a high-risk environment for young children navigating the trek from their cars to the school entrance. We view this as a fundamental failure in the Council's duty of care - effectively prioritising the safety of one group of pupils by knowingly increasing the physical risk to those at St Andrew's.</p> <p>The junction of Watts' Avenue and Roebuck Road will become a flashpoint for accidents. Drivers unfamiliar with the new ANPR restrictions will likely perform last-minute, erratic manoeuvres to avoid the cameras, often without sightlines of pedestrians or cyclists. This "panic driving" at the threshold of Gordon Terrace and Watts' Avenue represents a clear and present danger to the residents who live there and the staff who work there.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane, Watts' Avenue, Gordon Terrace and Maidstone Road that your current scheme would inevitably cause.</p> |  |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect. Sadly, it is also shamefully a project driven by the council's desire to increase revenue (evidently obvious by the proposed scheme operating 365 days per year rather than only during school term time) rather than being a project driven by care and concern for the school pupils.</p> <p>The near-universal opposition from the schools, Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,</p> <p>Local resident</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
|  | <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>I attended the public meeting on 12th March 2026 alongside more than 100 local residents and stakeholders. The level of opposition expressed at that meeting was clear and consistent. I am therefore writing to formally object to the proposed School Street scheme and to set out the principal grounds for that objection.</p> <p>1. Lack of Procedural Transparency and Failure to Publish Earlier Consultation Outcomes<br/>I am concerned that the Council has initiated a further statutory consultation without first publishing the outcomes and rationale arising from earlier consultation exercises. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a statutory consultation in early 2025. However, the detailed results of those processes including feedback provided by residents who attended a meeting in April 2025 to express their opposition have not been made publicly available. Proceeding with a further consultation in the absence of this information undermines transparency and, in my view, falls short of the standards of procedural fairness expected in public decision-making.</p> <p>2. Absence of Supporting Evidence for Safety and Air Quality Claims<br/>Information released under the Freedom of Information Act confirms that the Council holds no specific road safety data for the streets affected by the proposal. A separate request for emissions data has yet to receive a response. Given that road safety and air quality are presented as the primary drivers for the scheme, it is difficult to see how such a significant intervention can be justified without baseline data to demonstrate either an existing problem or the likelihood of measurable improvement.</p> <p>3. Mismatch Between the Scheme and the School's Demographic Reality<br/>There appears to have been no meaningful assessment of whether a School Street scheme is appropriate for this particular school community. Data published by King's School Rochester</p> |  |

|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>indicates an average family journey length of 8.9 miles.<br/>More significantly, 73% of pupils under the age of eight live beyond the statutory two-mile walking distance, while 70% of pupils over eight live beyond the three-mile threshold. Given the school's regional catchment, walking to school is not a realistic option for most families. The proposal therefore does not reflect how this school operates and risks imposing constraints that are disconnected from reality.</p> <p>4. Harm to the Rochester Conservation Area (Policy DM10)<br/>The proposal would introduce approximately 20 new signs together with multiple ANPR cameras into the Rochester Conservation Area. This level of modern street infrastructure would cause clear visual harm within a highly sensitive historic environment.<br/>Policy DM10 places a duty on the Council to ensure that development conserves or enhances the character and appearance of heritage assets. It specifically requires respect for historic street patterns, townscape and setting. The cumulative impact of extensive signage and surveillance equipment would detract from the character of the Precinct and adversely affect the setting of Rochester Cathedral.</p> <p>5. Environmental Consequences for The Vines and the School Environment<br/>The stated aim of improving air quality is undermined by the likely displacement of traffic onto Vines Lane. This historic route runs immediately alongside King's School Rochester and borders The Vines, one of the city's most important green spaces.<br/>Rather than reducing exposure to pollutants, the proposal risks concentrating vehicle emissions adjacent to classrooms, playing fields and a public park. This outcome conflicts with the Council's obligations to protect both heritage assets and public health and raises serious concerns regarding environmental and biodiversity impact.</p> <p>6. Increased Safety Risk at Vines Lane<br/>Vines Lane is a narrow historic route that was not designed to accommodate increased volumes of through-traffic. It already serves as a key pedestrian corridor for large numbers of pupils moving between the Junior and Senior School sites at peak times.<br/>Diverting additional traffic along this route would significantly increase risk, particularly at the constrained and poorly sighted junction with Maidstone Road, Crow Lane and Lockington Grove. Intentionally directing traffic through this junction at times when children are crossing creates an avoidable and foreseeable safety hazard.</p> <p>7. Traffic Displacement and Residential Impact<br/>The proposed changes are likely to displace traffic into surrounding residential streets, directly affecting access for residents of The Close, Langdon Road, Watts' Avenue, Gordon Terrace and neighbouring roads.<br/>Many of these streets are narrow and poorly suited to increased traffic volumes. The resulting congestion, access issues and potential impact on emergency services appear not to have been adequately assessed and further illustrate that the scheme risks exporting problems rather than addressing them.</p> <p>8. A Proportionate and Supported Alternative: Area-Wide 20 mph Limit<br/>At the public meeting on 12 March, there was strong support for a more proportionate alternative: the introduction of a permanent 20 mph speed limit across the wider area surrounding the Precinct and the three schools.<br/>This would include the High Street, Boley Hill, Minor Canon Row, St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road.<br/>Such an approach would improve safety for all road users without creating the traffic displacement and risk concentration inherent in the current proposal.<br/>For the reasons set out above, I strongly urge the Council to reconsider progressing a scheme</p> |  |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

|  | <p>that residents, schools and local stakeholders have clearly indicated will increase risk rather than reduce it. It is particularly concerning that a proposal promoted on grounds of safety and air quality is being advanced despite credible evidence that it may worsen both.</p> <p>I therefore formally request that the proposed School Street scheme be withdrawn and that the Council instead engages constructively with the community on a more appropriate and widely supported alternative that improves safety while respecting Rochester's historic environment.</p> <p>Yours Faithfully<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|  | <p>Dear Sir/Madam,</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders (although no councillors involved with this ludicrous proposal could be bothered to attend!), it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results<br/>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)<br/>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances<br/>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)<br/>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>5. Environmental Impact: The Vines and Watts' Avenue and School Air Quality<br/>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines. The alterations to Watts' Avenue in the proposal and there being no access to St Margaret's Street from Watts' Avenue will have a similar impact on air quality with the increased amount of traffic needing to do multiple point turns in a busy road directly outside of the school to be able to exit Watts' Avenue as one option or, as a second option, increase traffic looping through Gordon Terrace onto The Close and back out onto Watts' Avenue, therefore impacting the air quality of those residents.</p> <p>6. Severe Safety Risks: The Vines Lane, Watts' Avenue and Gordon Terrace Bottleneck<br/>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic, and Gordon Terrace and Watts' Avenue are of similar ilk, particularly Gordon Terrace. Vines Lane serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites. By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.<br/>We must also highlight the severe safety implications for the residents of Watts' Avenue and Gordon Terrace. By sealing off Roebuck Road, the Council is not "removing" traffic; it is merely displacing it onto these narrow, residential streets that are physically incapable of absorbing the overflow.</p> <p>Gordon Terrace will be transformed from a quiet residential enclave into a high-pressure turnaround point and a magnet for "displacement parking." As frustrated drivers and delivery couriers realise they have entered a dead-end restricted zone, we foresee a surge in hazardous three-point turns and reversing manoeuvres in close proximity to residents' front doors. To funnel the "school run" chaos into a confined residential cul-de-sac is to invite a collision, especially on the tight corners where access is already inhibited during school drop off peaks as parents all park on the double yellow lines on the blind corners of the terrace.</p> <p>While the scheme ostensibly aims to protect King's School pupils, it creates a secondary—and arguably more acute—danger for the pupils, parents, and staff of St Andrew's School.</p> <p>Located on Watts' Avenue, St Andrew's sits directly in the "firing line" of the diverted traffic flow. The proposal will force a concentrated stream of vehicles - many driven by parents hurried by the restriction's ticking clock - down the very road where St Andrew's children are being dropped off and picked up. This creates a terrifying irony: in an attempt to clear one school gate, the Council is intentionally congesting another.</p> | <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safely walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider area and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                          |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>The narrow nature of Watts' Avenue driveable road space due to the level of parking on either side of the residential road means the road is already ill-equipped for the morning rush; adding a redirected "through-flow" of vehicles creates a high-risk environment for young children navigating the trek from their cars to the school entrance. We view this as a fundamental failure in the Council's duty of care - effectively prioritising the safety of one group of pupils by knowingly increasing the physical risk to those at St Andrew's.</p> <p>The junction of Watts' Avenue and Roebuck Road will become a flashpoint for accidents. Drivers unfamiliar with the new ANPR restrictions will likely perform last-minute, erratic manoeuvres to avoid the cameras, often without sightlines of pedestrians or cyclists. This "panic driving" at the threshold of Gordon Terrace and Watts' Avenue represents a clear and present danger to the residents who live there and the staff who work there.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane, Watts' Avenue, Gordon Terrace and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect. Sadly, it is also shamefully a project driven by the council's desire to increase revenue (evidently obvious by the proposed scheme operating 365 days per year rather than only during school term time) rather than being a project driven by care and concern for the school pupils.</p> <p>The near-universal opposition from the schools, Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                                                                                                                                                                                                                          |
|  | <p>Dear [Name of Officer/Director],</p> <p><b>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term.</p> |

                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p><b>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</b></p> <p>We are deeply concerned by the Council’s decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p><b>2. Absence of Evidence Base (Road Safety and Emissions)</b></p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p><b>3. Demographic Misalignment and Statutory Distances</b></p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King’s School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p><b>4. Heritage and Conservation Impact (Policy DM10)</b></p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings</p> | <p>However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council’s website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester’s historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils’ ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                  |
|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> | <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|  | <p>27 March 2026</p> <p>Dear Director,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p>                                     | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was</p> |

|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King’s School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme’s stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King’s School Rochester and borders The Vines, one of our city’s most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King’s School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment</p> | <p>actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester’s historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils’ ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                             |
|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                             |
|  | <p>Dear Sir/Madam,</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders (although no councillors involved with this ludicrous proposal could be bothered to attend!), it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|  | <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)<br/>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances<br/>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)<br/>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and Watts' Avenue and School Air Quality<br/>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines. The alterations to Watts' Avenue in the proposal and there being no access to St Margaret's Street from Watts' Avenue will have a similar impact on air quality with the increased amount of traffic needing to do multiple point turns in a busy road directly outside of the school to be able to exit Watts' Avenue as one option or, as a second option, increase traffic looping through Gordon Terrace onto The Close and back out onto Watts' Avenue, therefore impacting the air quality of those residents.</p> | <p>vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p><b>6. Severe Safety Risks: The Vines Lane, Watts' Avenue and Gordon Terrace Bottleneck</b></p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic, and Gordon Terrace and Watts' Avenue are of similar ilk, particularly Gordon Terrace. Vines Lane serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites. By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>We must also highlight the severe safety implications for the residents of Watts' Avenue and Gordon Terrace. By sealing off Roebuck Road, the Council is not "removing" traffic; it is merely displacing it onto these narrow, residential residential streets that are physically incapable of absorbing the overflow.</p> <p>Gordon Terrace will be transformed from a quiet residential enclave into a high-pressure turnaround point and a magnet for "displacement parking." As frustrated drivers and delivery couriers realise they have entered a dead-end restricted zone, we foresee a surge in hazardous three-point turns and reversing manoeuvres in close proximity to residents' front doors. To funnel the "school run" chaos into a confined residential cul-de-sac is to invite a collision, especially on the tight corners where access is already inhibited during school drop off peaks as parents all park on the double yellow lines on the blind corners of the terrace.</p> <p>While the scheme ostensibly aims to protect King's School pupils, it creates a secondary—and arguably more acute—danger for the pupils, parents, and staff of St Andrew's School.</p> <p>Located on Watts' Avenue, St Andrew's sits directly in the "firing line" of the diverted traffic flow. The proposal will force a concentrated stream of vehicles - many driven by parents hurried by the restriction's ticking clock - down the very road where St Andrew's children are being dropped off and picked up. This creates a terrifying irony: in an attempt to clear one school gate, the Council is intentionally congesting another.</p> <p>The narrow nature of Watts' Avenue driveable road space due to the level of parking on either side of the residential road means the road is already ill-equipped for the morning rush; adding a redirected "through-flow" of vehicles creates a high-risk environment for young children navigating the trek from their cars to the school entrance. We view this as a fundamental failure in the Council's duty of care - effectively prioritising the safety of one group of pupils by knowingly increasing the physical risk to those at St Andrew's.</p> <p>The junction of Watts' Avenue and Roebuck Road will become a flashpoint for accidents. Drivers unfamiliar with the new ANPR restrictions will likely perform last-minute, erratic manoeuvres to avoid the cameras, often without sightlines of pedestrians or cyclists. This "panic driving" at the threshold of Gordon Terrace and Watts' Avenue represents a clear and present danger to the residents who live there and the staff who work there.</p> <p><b>7. The Rochester Residents Alternative Plan</b></p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would</p> |  |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane, Watts' Avenue, Gordon Terrace and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect. Sadly, it is also shamefully a project driven by the council's desire to increase revenue (evidently obvious by the proposed scheme operating 365 days per year rather than only during school term time) rather than being a project driven by care and concern for the school pupils.</p> <p>The near-universal opposition from the schools, Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,</p> <p>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|  | <p>Good afternoon,</p> <p>As a resident of Roebuck Road I am writing to outline our household's objections to the proposed school street scheme in our local area, following the public meeting held on 12 March 2026.</p> <p>We agree to the following grounds for objection, along with our neighbours and local stakeholders:</p> <ol style="list-style-type: none"> <li>1. Failure of procedural fairness and non-disclosure of prior consultation results</li> <li>2. Absence of evidence and lack of road safety and emissions considerations</li> <li>3. Heritage and conservation impact</li> <li>4. Environmental impact</li> <li>5. Safety risks</li> </ol> <p>We are in support of the Rochester Residents Alternative Plan outlined in the 12 March meeting - with an enforced 20mph zone.</p> <p>We urge the council to reconsider proceeding with a scheme that residents, school members and local businesses are stating will make for a more dangerous environment for children and locals.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>Feedback noted.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the</p> |

|  | <p>Kind regards,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>schools has improved following the introduction of the school street programme.</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|  | <p>27:03/2026</p> <p>To whom it may concern,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> |

|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>this scheme for our specific community. Data from King’s School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme’s stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King’s School Rochester and borders The Vines, one of our city’s most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King’s School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be</p> | <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester’s historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils’ ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                  |
|---|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
|   | <p>enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                  |
| Y | <p>For the attention of the Parking Design Team</p> <p>I am emailing to register my objection to the proposed school street scheme in the area around King's School in Rochester.</p> <p>I do not believe due consideration has been given to the effect this will have on the roads onto which the traffic will be diverted, or to the extra dangers this would place on children attending the two schools which are not included in the scheme.</p> <p>I also object to all the proposals for making any additional roads one way because this will lead to routes being used as rat runs. Even with King Edward Road being two way we often have cars speeding between St Margaret's Street and Maidstone Road.</p> <p>I am fully in favour of a policed twenty mile an hour zone encompassing all the roads from the High Street up to Gun Tower Mews and Ethelbert Road, including King Street running past St Margaret's at Troy Town school.</p> <p>I would also appreciate a much more muscular approach by the Council for stopping the idling of parked vehicles, which is, of course, illegal. I believe that the unnecessary idling of car engines to be a far greater risk to the health of children than inconsiderate parking. My polite requests to drivers to turn off car engines when parked have generally been met with disdain</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Objection noted. |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|  | <p>Dear Mr Bryan,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. I write to outline the following fundamental grounds for my objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|  | <p>policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily</p> | <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safely walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|  | <p>Dear whomever it concerns,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a</p> | <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safely walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely, [REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                         |
|  | <p><b>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME, KINGS SCHOOL ROCHESTER</b></p> <p>I attended the public meeting on 12th March 2026 alongside more than 100 local residents and stakeholders. The level of opposition expressed at that meeting was clear and consistent. I am therefore writing to formally object to the proposed School Street scheme around the Kings School, Rochester and to set out the principal grounds for that objection.</p> <p><b>1. Lack of Procedural Transparency and Failure to Publish Earlier Consultation Outcomes</b></p> <p>I am concerned that the Council has initiated a further statutory consultation without first publishing the outcomes and rationale arising from earlier consultation exercises. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a statutory consultation in early 2025.</p> <p>However, the detailed results of those processes including feedback provided by residents who attended a meeting in April 2025 to express their opposition have not been made publicly available. Proceeding with a further consultation in the absence of this information undermines transparency and, in my view, falls short of the standards of procedural fairness expected in public decision making.</p> <p><b>2. Absence of Supporting Evidence for Safety and Air Quality Claims</b></p> <p>Information released under the Freedom of Information Act confirms that the Council holds no specific road safety data for the streets affected by the proposal. A separate request for emissions data has yet to receive a response.</p> <p>Given that road safety and air quality are presented as the primary drivers for the scheme, it is difficult to see how such a significant intervention can be justified without baseline data to demonstrate either an existing problem or the likelihood of measurable improvement.</p> <p><b>3. Mismatch Between the Scheme and the School's Demographic Reality</b></p> <p>There appears to have been no meaningful assessment of whether a School Street scheme is appropriate for this particular school community. Data published by King's School Rochester indicates an average family journey length of 8.9 miles.</p> <p>More significantly, 73% of pupils under the age of eight live beyond the statutory two mile walking distance, while 70% of pupils over eight live beyond the three mile threshold. Given the school's regional catchment, walking to school is not a realistic option for most families. The proposal therefore does not reflect how this school operates and risks imposing constraints that are disconnected from reality.</p> <p><b>4. Harm to the Rochester Conservation Area (Policy DM10)</b></p> <p>The proposal would introduce approximately 20 new signs together with multiple ANPR cameras into the Rochester Conservation Area. This level of modern street infrastructure would cause clear visual harm within a highly sensitive historic environment.</p> <p>Policy DM10 places a duty on the Council to ensure that development conserves or enhances the character and appearance of heritage assets. It specifically requires respect for historic</p> | <p>Objection noted.</p> |

|  | <p>street patterns, townscape and setting. The cumulative impact of extensive signage and surveillance equipment would detract from the character of the Precinct and adversely affect the setting of Rochester Cathedral.</p> <p>5. Environmental Consequences for The Vines and the School Environment<br/>The stated aim of improving air quality is undermined by the likely displacement of traffic onto Vines Lane. This historic route runs immediately alongside King’s School Rochester and borders The Vines, one of the city’s most important green spaces.<br/>Rather than reducing exposure to pollutants, the proposal risks concentrating vehicle emissions adjacent to classrooms, playing fields and a public park. This outcome conflicts with the Council’s obligations to protect both heritage assets and public health and raises serious concerns regarding environmental and biodiversity impact.</p> <p>6. Increased Safety Risk at Vines Lane<br/>Vines Lane is a narrow historic route that was not designed to accommodate increased volumes of through traffic. It already serves as a key pedestrian corridor for large numbers of pupils moving between the Junior and Senior School sites at peak times.<br/>Diverting additional traffic along this route would significantly increase risk, particularly at the constrained and poorly sighted junction with Maidstone Road, Crow Lane and Lockington Grove. Intentionally directing traffic through this junction at times when children are crossing creates an avoidable and foreseeable safety hazard.</p> <p>7. Traffic Displacement and Residential Impact<br/>The proposed changes are likely to displace traffic into surrounding residential streets, directly affecting access for residents of Roebuck Road, Watts' Avenue, The Close, Gordon Terrace and neighbouring roads.<br/>Many of these streets are narrow, poorly suited to increased traffic volumes and already have to accommodate traffic from St Andrew's school. The resulting congestion, access issues, road safety threats, increased air pollution and potential impact on emergency services appear not to have been adequately assessed and further illustrate that the scheme risks exporting problems rather than addressing them.</p> <p>8. A Proportionate and Supported Alternative: Area Wide 20 mph Limit<br/>At the public meeting on 12 March, there was strong support for a more proportionate alternative: the introduction of a permanent 20 mph speed limit across the wider area surrounding the Precinct and the three schools.<br/>This would include the High Street, Boley Hill, Minor Canon Row, St Margaret’s Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road.<br/>Such an approach would improve safety for all road users without creating the traffic displacement and risk concentration inherent in the current proposal.<br/>For the reasons set out above, I strongly urge the Council to reconsider progressing a scheme that residents, schools and local stakeholders have clearly indicated will increase risk rather than reduce it. It is particularly concerning that a proposal promoted on grounds of safety and air quality is being advanced despite credible evidence that it may worsen both.<br/>I therefore formally request that the proposed School Street scheme be withdrawn and that the Council instead engages constructively with the community on a more appropriate and widely supported alternative that improves safety while respecting Rochester’s historic environment.<br/>Yours Faithfully<br/>[REDACTED]</p> |                                                                                                                                                                                                                                 |
|  | <p>Dear [REDACTED]</p> <p>I appreciate that you may receive many objections to the planned School Street Scheme around King’s School, Rochester. There are many legal and other reasons why you should re-consider your decisions which will be set out in the other letters (and are set out as an</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Feedback noted.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils’ ability to safety walk to school. Although a 20 mph speed limit would help</p> |

|  | <p>appendix to the attachment to this email which repeats my thoughts, so you can have all in one place!), but, to summarise, my view is that you should definitely consider the proposed alternative 20 mph scheme for the surrounding area rather than input a scheme which does little for the safety of children and parents in surrounding schools.</p> <p>Indeed, as an avid cyclist, I would also recommend a similar speed restriction going through Borstal and also implement a speed recording system along the Esplanade where speeding seems to be “de rigeur” for some motorists (30 mph is fine as long as it is observed). Reducing speed may also do something to preserve the road surface too – the potholes are also very distressing, not only for the motorists but quite scary for cyclists. Having recently cycled to Southfleet from Rochester along the wonderful cycle route beside the A2, it was such a pleasure not to have to avoid potholes and made me even more aware than ever of their normal hazard to road users.</p> <p>Speed restriction is the way forward I am sure</p> <p>Yours sincerely<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|  | <p>27th March 2026</p> <p>[REDACTED]</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>It is very frustrating that I find myself having to write to you in order to object to the proposal you have made to change the road system in the heart of Rochester. However, thank you for providing the opportunity to give my point of view through this democratic process and consultation.</p> <p>If you truly believe that safety should be at the heart of this and you listen to and care about Medway residents then I cannot see how this proposal has even got to this point.</p> <p>I attended the public meeting on 12 March 2026, along with over 100 local residents and stakeholders, including the Headteachers and Principals of local schools. It was clear that there is a universal rejection of these proposals. I write to outline the following fundamental grounds and add my voice to the objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council’s decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council’s website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical</p> | <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>safety of children navigating a dangerous, historic junction.</p> <p>7. Roebuck Road and Watts' Avenue - One Way System</p> <p>The current issues within this area include parking on double yellow lines and across driveways. Parking is limited for residents due to the number of 'business' parking permits issued and therefore there are very few spaces available for parents when picking up. Consequently, they arrive early and often sit with their cars running. There is a self imposed one way system in St Margaret's Street between Roebuck Road and Watts' Avenue during drop off and pick up times but during the rest of the day there is the freedom to travel in either direction, it works. The proposed changes will force all traffic from Maidstone Road, including the 70+ cars that currently drop off in Lockington Grove, to funnel along Roebuck Road, traffic flow is likely to be vastly increased as the path linking Roebuck Road and King Edward Road will be the only place for parents to drop children who attend King's school. There will be cars stopping and parking which will make the safety of the children far worse than it already is. Please can you supply me with the data and research that you have in respect of the benefits of the proposals in these roads. Traffic enforcement officers have not been in evidence at these peak times for several months, their attendance would certainly help with enforcement and will be even more important if you follow through with these proposals. I really think you could be making the lives of residents in these roads miserable at these peak times.</p> <p>8. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> |  |

Please see my email below</p> <p>Sent from my iPhone</p> <p>Begin forwarded message:</p> <p>From: [REDACTED]<br/>Date: 27 March 2026 at 10:49:08 GMT<br/>To: TROconsult@medway.gov.org<br/>Subject: School Street Plan for Rochester</p> <p>Dear Team</p> <p>First of all I would like to thank you for putting children's safety front and foremost.</p> <p>While supporting the very important principles of keeping school children safe as they go to and from school, of seeking to reduce reliance on cars for school drop off to improve air quality, and relieving residents in surrounding streets from traffic congestion, I have serious concerns that the current proposals will not achieve those aims and will in fact achieve the opposite.</p> <p>While I support implementing a 20mph speed limit on a number of roads, I oppose the restrictions (time / one ways / no entry signs) proposed by the council.</p> <p>Many residents, including myself, oppose the scheme because:</p> <ul style="list-style-type: none"> <li>- it does not appear to be based on any evidence that we are aware of that it will in fact achieve the stated aims. No such information has been presented to us that I'm aware of. And my understanding is that there have been FOI requests for that information.</li> <li>- we do not believe it would increase safety and we are very concerned it may potentially be detrimental to safety by creating bottle necks of cars dropping off children outside the restricted zones which will put children at greater risk, not protect them.</li> <li>- it would cause great disruption to residents to institute denial of road access to our homes, even outside of term time.</li> <li>- along with carer and visitor access, there will be significant access challenges for the elderly and disabled within our community</li> <li>- a majority of pupils attending the two schools concerned, St Andrews and the Kings School, do not live within short walkable/cyclable distances from school, so car usage will not be reduced. Therefore the very premise of these proposals is flawed. Cars will still be used regardless of these proposals. But residents will have to live with the disruption caused by these proposals even though they will not achieve the stated aims.</li> <li>- lack of community engagement to develop proposals.</li> </ul> <p>I do not have children at either of the two schools concerned, but my understanding is that both have tried to institute effective drop-off schemes to try to ensure safe (and swift) drop-off for children with the minimum possible disruption to local traffic and residents.</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>I would ask the council to please work with those schools and local residents to improve these schemes and find further functional proposals that will work on the ground, rather than disrupting local routes whole-scale which will not achieve the council's aims as currently conceived.</p> <p>I have no doubt that local residents and the schools would be willing to work with the council to develop strategies to manage safety and pollution.</p> <p>Kind regards<br/>[REDACTED]</p> <p>Sent from my iPhone</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|  | <p>Hello,</p> <p>I hope this email finds you well.</p> <p>I would like to raise concerns regarding the school street proposal.</p> <p>I am sincerely concerned at how little thought and consideration had been given to the other schools and nurseries surrounds this proposal.</p> <p>This proposal would cause a lot of traffic displacement and quite frankly cause more traffic on roads that are already busy.</p> <p>Please think about the surrounding schools and how this impacts the children who would be consistently late and how this impacts their education. Furthermore this would also have a knock on effect on many families and employers too as many parents would not be able to drop off and pick up their child on time nor be present at work on time. This could cause anxiety to many at fear of being penalised for it by employers, if at all as the traffic would be horrendous!</p> <p>Please reconsider the ramification of this proposal.</p> <p>Kind regards,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                            | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p>                                                                                                                                                                         |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to object to the proposed school street around the King's School Rochester. I am the Chair of Governors at St Margaret's at Troy Town school and am objecting on the grounds that this plan will have a negative effect on the safety of the children at the school. For transparency, I am also a local resident, and will be objecting separately in a personal capacity.</p> <p>Most of the children at our school reside within walking distance of the school, and we have very few children who are driven. This is evidenced as we regularly place in the top schools in Medway for competitions such as the 'Walking and Wheeling' challenge. We are already experiencing issues with unsafe parking and driving around our school, particularly in the mornings. The Union Street car park is full, and there is parking on double yellow lines in the area, often by parents of children attending King's school.</p> <p>The school streets proposal will make this situation worse - more King's school parents will inevitably start parking around our school, and on the routes that the children walk along, particularly Maidstone Road, as these will be the nearest accessible roads to the school. There will be parking on pavements and double yellow lines around the area, which will decrease</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal.</p> |

|   | <p>safety of our children.</p> <p>Further, the current system of drop offs at the King's school infant's site works well, keeps traffic moving, keeps King's school children safe, and prevents traffic backing up along Maidstone road. Under the proposal, this system will no longer be available and all parents will need to find parking in the local area. There is no parking facility available within reasonable walking distance, that is not already full at these times - this will inevitably lead to parents parking poorly in the wider area, and this will affect the safety of others.</p> <p>I urge you to think again about this proposal and to consider the negative impact on other local residents.</p> <p>There are other measures that the council could enact that may help alleviate some of the problems around King's school, such as requiring the school to have a 'park and ride' facility for children who don't live in walking distance, or 20mph speed restrictions in the area. I would encourage the council to try to work with other local stakeholders to address the issue in a different way, that would prevent negative consequences to others.</p> <p>I look forward to receiving your response to our concerns.</p> <p>Kind regards<br/>[REDACTED]</p> | <p>The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
| Y | <p>Please find attached my representation ref the above scheme. I'm a resident on King Edward Road, Rochester.</p> <p>Kind regards, [REDACTED]</p> <p>Please could you reply confirm confirming receipt.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Feedback noted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Y | <p>Good Afternoon,</p> <p>Please find attached a letter formally objecting to the School Street Proposal which will directly affect us.</p> <p>Yours sincerely,</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Feedback noted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|   | <p>Dear Sirs</p> <p>I am writing to formally object to the proposed School Streets scheme around the Kings School Rochester.</p> <p>As a [REDACTED] on the High Street, I am extremely concerned about the unintended consequences this proposal will have on local trade and the already fragile economic state of our town centre. Restricting vehicle access around the school is likely to displace traffic into surrounding roads, particularly the High Street. This will not only increase congestion but also place additional pressure on already limited parking spaces.</p> <p>Parking availability is a critical factor for customers choosing to visit the High Street. If school-</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>Feedback noted.</p> <p>Your concerns regarding the impact on businesses and trade have been noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasises that the intention of a school street is to reduce the immediate risk of vehicle collision with more vulnerable road users, like pedestrians, outside of the school</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|   | <p>related traffic occupies these spaces during peak times, it will deter shoppers and diners from coming into the area. Local businesses rely heavily on convenient access, and any reduction in parking availability risks driving customers elsewhere.</p> <p>The High Street is already facing significant challenges, including rising business rates and reduced footfall. Introducing a scheme that may further discourage visitors could have serious consequences, potentially forcing more businesses to close.</p> <p>While I understand the perceived aim of trying to improving safety for children, this proposal appears to shift the problem rather than solve it, placing an unfair burden on nearby businesses. I urge the council to reconsider or adapt the scheme in a way that does not negatively impact the High Street and its businesses.</p> <p>I would suggest a preliminary approach of a 20MPH zone around all the proposed streets, enforced by ANPR cameras that could also monitor any parking infringements that may occur. Many of us feel that this is a far more practical and realistic solution for the whole town. Ensuring the safety of the children, to still enable them to be dropped at the school gates, rather than having to walk up from the limited parking along some of the busiest roads in the area, it will also maintain the flow of traffic therefore reducing pollution by the inevitable idling of traffic that will now be forced to use and sit on Crow Lane, Vines Road and Maidstone Road as children as young as 3 have to navigate these dangerous roads. This 20MPH zone will then maintaining the access to the High Street for the success of the businesses within it.</p> <p>I implore you to reconsider this unnecessary scheme<br/>Yours faithfully,<br/>[REDACTED]</p> | <p>gate. By doing this, we can improve safety outcomes for our children. Further to this, the area will be subject to a monitoring period after implementation.</p> <p>The scheme also aims to encourage use of more sustainable forms of travel like walking and cycling, to school to reduce levels of traffic in and around the school gate.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p>                                                                                               |

|   | <p>To whom it may concern,</p> <p>I am writing to you in regards to your suggested School Street Scheme regarding Kings School Rochester.</p> <p>Having reviewed your suggested plan, I would like to place on record my rejection of this plan for numerous reasons, please see below:</p> <p>Traffic Displacement - the proposed scheme will cause significant increases of traffic at both Vines Lane and Maidstone Road, which will bring the area to a standstill. I do not think this proposed scheme is solving any problem but rather pushing the problems to the surrounding</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to</p> |

|  | <p>roads and overall will lead to more delays/issues, specifically on Maidstone Road and Watts' Avenue, where there is another school - the proposed plan does not achieve your goal of 'reducing congestion' but rather adding to it</p> <p>Safety of pupils - With the increased traffic on Maidstone Road, the safety of pupils will be significantly reduced as this road is one of the main crossings for the school, so increased cars coupled with the lack of visibility by Maidstone Road/East Row will make this a danger zone for children. Also, with the suggested one way system for Roebuck Road and St Margaret's Street, children from St Andrews School will also be placed in danger due to increased levels of cars - the proposed plan does not achieve your objective of 'making the roads outside schools safer', it does the opposite</p> <p>Environmental Impact - the aim of this scheme is to improve air quality, but you will push/concentrate traffic onto Vines Road and therefore increase emissions and reduce the air quality. Please note there are also classrooms adjacent to Vines Lane, so children will be impacted by the increased pollution</p> <p>Commute - We travel from Hempstead, circa 9 miles from the school - it is unrealistic for us to walk to the school and therefore the proposal is not viable for us</p> <p>Having reviewed the Rochester Residents Alternative Plan, I am in favour of this and ask you to consider this as the school street scheme. It is a sensible alternative and achieves your goals of reduced congestion and making the roads around the school safer during pick up and drop of time.</p> <p>Yours sincerely,<br/>[REDACTED]</p> | <p>both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions. Consideration to the decision of the school street is given to the suitability of walking routes and the concerns related to crossing Maidstone Road are noted.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>I write to offer my strong support for the proposed School Streets initiative at Kings School.</p> <p>I do this on the grounds of child and community safety which is routinely compromised by the flagrant disregard of current regulations and signage by a minority of Kings School parents.</p> <p>The so-called Rochester residents alternative proposal has been cooked up by the School and a local politician/parent and does not enjoy the support of local people- particularly those on King Edward Road and St Margaret's Street. The alternative proposal simply does not address the issue of parking on 1) yellow lines; 2) across the front of the School; 3) on kerbs/pavements 4) across the drives of local residents and 5) in front of cones. At the junction of King Edwards's Road and St Margaret's Street there is an accident waiting to happen because of this in addition to the inconvenience/chaos and annoyance this causes.</p> <p>Only a scheme that "drives" behaviour change will mitigate this risk; reduce pollution(caused by cars leaving their engines running for long periods) and create better traffic flows.</p> <p>To this end enforcement and education/information is needed to ensure adherence. Cameras need to be carefully positioned to catch people who often behave as though they are entitled to ignore rules and regulations.</p> <p>Information also needs to be provided on alternative car parking options within walking distance including the Esplanade and alternative park and ride provision that the School could/should provide(from the Sports Centre for example).</p> <p>As amendments to the proposal:</p>                                 | <p>Support noted.</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings.</p> <p>Your suggestions regarding timing have been noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                  |

|   | <p>1) the idea to introduce a 20mph speed limit at all times with some speed bumps along St Margaret's Street would be beneficial.</p> <p>2) a review of signage in place (and ignored for the most part) could be appropriate.</p> <p>3) extension of the afternoon hours covered to 5.15 instead of 4.45 as currently proposed.</p> <p>I am appalled that the School is organising opposition to the proposal(including spreading misinformation)instead of working with the Council and local residents to develop workable solutions to the problems caused almost exclusively by their customers. It demonstrates their own sense of privilege and entitlement so in my view radical change is needed. On this basis I am fully supportive of the proposal put forward by the Council and look forward to its speedy introduction supported in the meantime by visible enforcement and information for parents using the School on their options.</p> <p>[REDACTED]</p> |                  |
| Y | <p>Dear Sirs</p> <p>Please find attached:</p> <p>My formal letter of response to the consultation.</p> <p>Picture file of the flawed 'Tile 9' for reference.</p> <p>Yours faithfully</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Feedback noted.  |
|   | <p>Hi</p> <p>I disagree with this proposal as the parent of a child that schools at St Andrews School Rochester. This proposal does not consider that we need to get our children to school on time and safely. If this is introduced. It will almost be impossible to get the children to school with this proposed plan.</p> <p>I'd be grateful if we rethink this proposal with St Andrews in mind.</p> <p>Thanks</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Objection noted. |
|   | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street scheme currently under consultation.</p> <p>While I understand and support the intention to improve safety and air quality outside individual schools, I am concerned that this proposal does not adequately consider the wider road network and the cumulative impact on the surrounding area.</p> <p>Within a relatively small and already constrained network, there are multiple schools operating in close proximity, including St Andrew's, St Margaret's Troy Town, Rochester Independent College, Rochester Grammar School, and Rochester Maths School, alongside nurseries, public spaces such as The Vines, and a significant number of residential streets. The proposal appears to focus on a single location without sufficient assessment of how traffic patterns will be affected across this broader area.</p> <p>My key concerns are as follows:</p>                | Objection noted. |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                  |

|  | <p><b>Traffic</b><br/>Restricting access to one street is likely to displace traffic onto surrounding roads rather than reduce overall vehicle numbers. Roads such as Maidstone Road and those around The Vines are already heavily used during peak school times and also serve other nearby schools. Additional pressure on these routes could worsen congestion and reduce safety. Increased circulation and rerouted traffic may place additional strain on key junctions, including Corporation Street, Northgate, and Victoria Street, which already experience congestion during peak periods. Without clear modelling, it is difficult to see how these impacts have been accounted for.</p> <p><b>Impact on other schools and pedestrian routes</b><br/>Many pupils travel through this area to access a range of schools. Displacing drop-off and pick-up activity to nearby streets may increase pedestrian risk in locations that are not designed for higher volumes of traffic and footfall.</p> <p><b>Day-to-day network pressures</b><br/>The local road network already faces regular disruption from bin collections, roadworks, bus movements, school transport, and occasional breakdowns. Introducing further restrictions may reduce the flexibility needed to manage these everyday situations effectively.</p> <p>In light of the above, I would urge the Council to reconsider the proposal and undertake a more comprehensive assessment of its wider impacts, including traffic modelling across the full network and consideration of all affected schools and road users.</p> <p>Thank you for the opportunity to comment on this consultation.</p> <p>Yours faithfully,<br/>[REDACTED]</p> |                  |
|  | <p>I reside at [REDACTED]</p> <p>I wish to object to the above proposal on the following grounds:</p> <p>Please do not include Roebuck in the restricted hours. It would be very difficult for family visitor, Taxi's &amp; hospital appointments &amp; workmen.</p> <p>Please do not make Roebuck one way.<br/>I am in favour of a 20mph limit for the immediate area and the 'Residents Alternative' proposal.</p> <p>This is a lovely area and as a resident I accept there will be parents dropping their children off at certain times.</p> <p>Where are they supposed to go?</p> <p>With regards</p> <p>[REDACTED]<br/>With regards<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Objection noted. |
|  | <p>Dear council members</p> <p>As a regular visitor of Rochester to see family, I'm writing to express my objection to the proposed school street scheme.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Objection noted. |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                         |

|  | <p>I believe the council's scheme raises several concerns, including traffic congestion, commuter restrictions, and environmental impacts.</p> <p>I strongly encourage you to consider consulting with the Rochester Residents Alternative Plan, which I believe is a more practical and effective solution. This plan aims to enhance safety for children and promote environmental friendliness.</p> <p>Thank you for your time.</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                         |
|  | <p>Dear Sir/Madam,</p> <p>Please accept my apologies that this objection is being submitted two days after the consultation deadline. I appreciate that the stated deadline has passed, but I would be very grateful if my representation could still be taken into consideration given the importance of the issue to local families.</p> <p>I am writing to formally object to the proposed pedestrian and cycle zone and associated traffic restrictions in the vicinity of King's School, including St Margaret's Street, King Edward Road and Lockington Grove.</p> <p>While I understand and support the aim of improving road safety around schools, I do not believe this proposal fully takes into account the needs of families who use these roads but are not necessarily part of King's School. In particular, many parents from neighbouring schools, including St Andrew's School, rely on this route during the restricted hours in order to safely and efficiently drop off younger children before travelling directly to work.</p> <p>For many working parents, the school run is not a simple matter of choosing to walk. Many of us have younger children who cannot reasonably be expected to walk independently, children attending different schools, and work commitments that require us to complete drop-off and leave immediately. Restricting access during peak drop-off times would create significant practical difficulties for families and may unfairly disadvantage working parents and carers.</p> <p>I am also concerned that the proposal may unintentionally create new safety issues rather than resolve them. Preventing vehicle access may force parents to park further away and require young children to walk longer distances through surrounding streets and routes that may not be suitable or safe, particularly during busy morning periods. This could simply displace congestion and risk into neighbouring roads rather than eliminate it.</p> <p>A further safeguarding concern is that there have recently been reports of two sexual assaults on Crow Lane, near the Vines, over two consecutive days in March, reportedly between 7.30am and 8.30am. In light of this, I do not believe it is appropriate to assume that children, mothers, carers, and other pedestrians can simply be expected to walk through or around this area without concern. At a minimum, this raises serious questions about whether the surrounding environment is currently safe enough to support a policy that would require more families to travel on foot.</p> <p>The current proposal also appears to provide exemptions mainly for residents, staff,</p> | <p>Objection noted.</p> |

|   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                          |

|   | <p>Dear Ms Musson</p> <p>Thank you so much for confirming and forwarding confirmation.</p> <p>I did check my spam folder and there was no receipt.</p> <p>Kind regards<br/> [REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Objection noted.                                                                                                                                                                                                         |
|   | <p>Good morning</p> <p>Could you please confirm receipt of this representation, sent on 25th March As i have not had confirmation.</p> <p>Thank you.<br/> [REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Objection noted.                                                                                                                                                                                                         |
|   | <p>Dear Sir/Madam</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|  | <p>outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome</p> | <p>However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |

|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King’s School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret’s Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> | <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

| Y | <p>Dear Parking Design Team</p> <p>Please find attached my letter with my comments on the proposed school streets scheme covering King's School, St Margaret's Street, King Edward Road and Lockington Grove, and other changes to the roads.</p> <p>Kind regards<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Objection noted. |
|   | <p>Good evening</p> <p>I am writing to raise my objection to the Rochester ( Kings school) street scheme on the following grounds:</p> <ol style="list-style-type: none"> <li>1. I live on Roebuck road and making this a one way street heading towards St Margaret's Street will make the road a drop off zone for both Kings &amp; St Andrews schools which will lead to idling traffic along Roebuck road which will in turn raise pollution levels &amp; reduce air quality. We have a daughter who suffers from asthma so this is of concern to our family.</li> <li>2. Borstal Rd between Watts' Avenue and Priestfields will become majorly congested at school times as this will be the only way for anyone to exit Roebuck, since Watts' Avenue has no entry signs at either end. Borstal Rd does not have the width for 2 way traffic which will cause chaos in the mornings especially. Many will try to park on Borstal road and Bishops square for the drop off and collection at school times.</li> <li>3. This scheme does not appear to account for the other schools in the area and the children travelling to those will be at greater risk due to the increased traffic.</li> <li>4. Will be difficult to exit our driveway due to queuing traffic at school drop off and pick up times and with the congestion I estimate 40 mins more to daily commute as will not be able to turn left from our driveway towards the Maidstone Road and will need to go all the way to Priestfields to turn back towards Rochester / Chatham.</li> <li>5. All of the above will lead to Diminished enjoyment of our property, a loss of amenity for all living in Roebuck road and surrounds and an environmental nuisance.</li> </ol> <p>Please can you consider an alternative to this school street proposal and I suggest a 20 mile per hour speed limit being introduced in the area. This would lead to a safer environment for all schools and would also be at a lesser expense to the council to introduce.</p> <p>Please can you also publish or communicate via return email, the reasoning as to why Kings school, a private school, has been chosen for this scheme? It is the case that the majority of these children live beyond walking distance of the school.</p> <p>Your faithfully<br/>[REDACTED]</p> | Objection noted. |
|   | <p>Good afternoon</p> <p>I received a generic email from google to state that the below objection email was rejected by your rever at 23.30 on the 27/03/26. As you will see I submitted the original email on 25/03/26. Please can you confirm receipt of my email and that it is being considered.</p> <p>Regards<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Objection noted. |
|   | To Whom It May Concern                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Objection noted. |

|  | <p>Dear Sir/Madam,</p> <p>I am a resident at [REDACTED]. ME1 1UE and a former parent of Kings School Rochester. I object to the proposed school street scheme because I do not see this as a solution but will make the lives of residents and drivers even worse than it is now.</p> <p>Kings school is only open about 35 weeks a year. Why punish everyone all year round? Kings also has a very effective system of managing their drop offs. Please attend to witness this in operation. Use that as a pilot for other schools. We do not need a school street scheme.</p> <p>I struggle to get into my own drive on a normal school day morning or afternoon at school times but it will be multiple times worse if this proposal goes ahead.</p> <p>I would not choose to live on a street with this system if I was to buy a house now... this was not here when I moved here 14 years ago... why should I have to be forced to make a decision to move now?</p> <p>Fines are unfair and unnecessary as many drivers may be forced to drive on restricted roads through no fault of their own and or do by mistake.</p> <p>Please do not go ahead with this proposal.</p> <p>With regards<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                         |
|  | <p>To Whom It May Concern</p> <p>Firstly; I hope you are well.</p> <p>I am writing to object to the 'School Street' Scheme that is currently being consulted on.</p> <p>My nephew attends the King's School in Rochester; one of the very few private schools in Medway and so this school along with the others are some distance from where they live in Hempstead. Living far from the school is the same for many other families whose children attend this school due to this limitation.</p> <p>Given that my nephew is [REDACTED] he is not able to travel unaccompanied and given the distance the quickest mode of transport for them is by car. Currently it takes them 30-40 minutes to travel to and from the school both off course being during peak times. The proposal of the 'School Street' scheme is not only going to make theirs and other families journey time longer it is also going to cause so much more traffic in other areas which will then impact on both the local residents and others trying to move in and around the area; of which it is noted is on the path to getting to one of the motorways. There will lead to there being no gap between school pick-up time and people driving home from work.</p> <p>By making the area a no driving zone is going to increase even more traffic around the other streets that will be available to drive in and there is a concern for road and pedestrian safety in particularly with the proposals of Vines Lane.</p> <p>The proposal information provided; specifically the statutory and draft Road Traffic Account (RTA) is not fully detailed and so does not allow for a fair consultation to be had as it leaves unanswered questions.</p> <p>I would like to kindly request that you take serious consideration of the 'Rochester Residents Alternative Plan' of which I fully support.</p> | <p>Objection noted.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|  | <p>Dear Officers of the Parking Design Team and Elected Members</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, that I attended along with a substantial number of locals, residents and stakeholders, it was clear that there is a universal rejection of these proposals. I'm writing support the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help</p> |

|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> | <p>to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|  | <p>Dear Medway Council,</p> <p><b>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</b></p> <p>I am a resident of Crow Lane, Rochester, and strongly object to the proposed school street scheme around Kings School Rochester. Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results<br/>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)<br/>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances<br/>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p><b>4. Heritage and Conservation Impact (Policy DM10)</b><br/> The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p><b>5. Environmental Impact: The Vines and School Air Quality</b><br/> The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p><b>6. Severe Safety Risks: The Vines Lane Bottleneck</b><br/> We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p><b>7. The Rochester Residents Alternative Plan</b><br/> At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders</p> | <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[Redacted]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                         |
|  | <p>Dear Medway Council</p> <p>I am writing to register my firm opposition to the proposed School Street scheme for King's School Rochester. The scheme is being presented as a safety measure, yet it disregards the realities of the area, the needs of residents, and the predictable consequences of displacing traffic into neighbouring streets.</p> <p>Residents have repeatedly raised clear, evidence-based objections, but these concerns appear to have been sidelined. The proposed restrictions would significantly obstruct access to homes, create daily disruption for those with caring responsibilities or mobility needs, and intensify congestion on streets that are already under pressure. This is not a minor inconvenience; it is a fundamental change to how residents are able to live and move within their own neighbourhood.</p> <p>A particularly serious oversight is the impact on St. Andrew's School. By diverting vehicles away from King's School, the scheme will funnel displaced traffic directly into the vicinity of St. Andrew's—an area with younger pupils, narrow approaches, and no capacity to absorb additional vehicle flow. Far from improving safety, the proposal risks creating a new danger zone at another school's doorstep. It is unacceptable to solve one school's traffic issues by transferring the hazard to another.</p> <p>Local businesses have also voiced strong objections. Restricted access during peak hours will deter customers, disrupt deliveries, and undermine the viability of independent traders who rely on predictable footfall and vehicle access. The scheme effectively prioritises the convenience of a private institution over the livelihoods of those who contribute to the economic and social fabric of Rochester.</p> <p>It is also worth noting that King's School already has extensive private grounds and controlled access points. There are numerous alternative safety measures—crossing patrols, staggered timings, on-site traffic management—that could be implemented without imposing sweeping restrictions on public roads. The fact that these options have not been meaningfully explored raises serious questions about the proportionality and fairness of the current proposal.</p> <p>The level of opposition from residents is substantial, consistent, and justified. This is not</p> | <p>Objection noted.</p> |

|  | <p>resistance to change; it is a demand for a balanced, responsible approach that protects children without creating new risks or imposing unreasonable burdens on the wider community. The current scheme fails that test.</p> <p>I urge the council to withdraw or fundamentally reconsider this proposal and to engage with residents in a transparent, good-faith manner to develop solutions that genuinely enhance safety rather than simply shifting problems elsewhere.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|  | <p>27th March 2026</p> <p>Dear Street scheme officer,</p> <p>As residents of Roebuck Road and parents of 2 school age children we are writing to formally outline our objection to the proposed street school scheme that impacts Roebuck Road and the surrounding streets.</p> <p>We've lived on Roebuck Road for 5 years and both our children attend St Andrews School so have personally observed and experienced the school drop off rush hour. After reviewing the proposed school plans we firmly believe that the scheme will actually create more issues by concentrating the traffic volumes of both Kings School and St Andrews school into 2 roads - Roebuck and Watts.</p> <p>Both schools currently operate drop off systems that alleviate and organise the traffic during drop off and pick up times which in our opinion are sufficient to manage these busy times of the day.</p> <p>The public meeting that was held on 12 March 2026 was attended by over 100 local residents and stakeholders, which makes it very it clear that there is a universal rejection of these proposals.</p> <p>Please see below our grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot</p> | <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safely walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|   | <p>support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[Redacted]</p> |                  |

|   | <p>Hi,</p> <p>Name: [Redacted]<br/>Address: [Redacted]<br/>Opposition of proposal</p> <p>I oppose the school street proposal outside King's School Rochester. In closing three roads around the school, it will make my children's journey to and from school less safe and more polluted.</p> <p>Traffic going along St Margaret's Road from the High Street towards Roebuck Road, which is</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Objection noted. |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>not traffic for the school, will now have to travel along Vines Road, up the Maidstone Road, on to Watts' Avenue, and then along Roebuck Road. This turns a 260yd journey in to over 700yds, creating traffic congestion at the busy junction of Vines Road and the Maidstone Road and causing more pollution due to sitting traffic next to the King's School nursery classroom.</p> <p>The Vines Road is narrow at the end that meets St Margaret's Street, with only a narrow pathway along one side. Increasing the traffic travelling along this road would make it more dangerous for children who walk to school from the direction of the High Street.</p> <p>Car parks such as Union Street are full in the morning due to the proximity of other local schools also using them, and car parks further away, such as Blue Boar have no safe route to walk to the school - Crow Lane only has a narrow pathway on one side of it that goes to less than 60cms in width at points, forcing people to step in to the road to go past each other.</p> <p>To make the roads surrounding the school safer and less polluted, I would recommend:</p> <ul style="list-style-type: none"> <li>- making King Edward Road one way towards Maidstone Road (to reduce congestion);</li> <li>- introducing 20 mile an hour speed limits around the school (to reduce pollution);</li> <li>- adding speed bumps to King Edward Road and St Margaret's Street (to make the roads safer).</li> </ul> <p>I hope these points are considered, as the current proposal will increase congestion, increase pollution, and make the roads surrounding our school less safe.</p> <p>Best,<br/>[Redacted]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|  | <p>26th March 2025<br/>To Whom it may concern,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals,</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane,</p> | <p>with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[Redacted]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|  | <p>[Redacted]</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>We would like to add our names to the objections listed below regarding the proposed school street scheme. We feel that this would be a costly and unnecessary use of public funds. In addition, the erection of unsightly signage and cameras within an historic part of Rochester would be offensive both to residents and visitors. We believe a simple reduction in speed limits in the area, alongside speed bumps on Roebuck Road would be sufficient to increase safety. Having lived at the above address for approaching 30 years, neither of us can recall any</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

|  | <p>accident involving pupils from Kings School (or the neighbouring St Andrews School) due to traffic. In addition, the increase in traffic on adjacent roads, which are not built for such volume, would be intolerable and, in itself, a safety concern.</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> | <p>formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed</p> |  |

|  | <p>scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                         |
|  | <p>Dear Medway Council</p> <p>Please see below my comments in relation to your proposal with respect to The King's Pre-Preparatory School and Nursery, Rochester - Lockington Grove, King Edwards Road and St Margaret's Street:</p> <p>The Council's proposal overlooks the geographical reality of our school community, where the average commute is 8.9 miles. With 73% of pupils under eight and 70% of those over eight living well beyond the statutory walking distances (two and three miles respectively), a School Street scheme is impractical. Walking is simply not an option for a regional catchment of this scale.</p> <p>The goal of enhancing air quality is compromised by rerouting traffic onto Vines Lane . As this road borders The Vines—a vital "urban lung" and one of Rochester's premier green spaces—the shift contradicts Policy DM10, which mandates the Council to protect such heritage assets. It is contradictory that a project intended to lower emissions would instead concentrate pollutants next to schools, playing fields, and public parkland.</p> <p>The proposal is undermined by procedural errors and unclear details. There are mistakes in the statutory paperwork and draft Road Traffic Account (RTA) orders, leaving it uncertain whether Crow Lane is included. Additionally, it is unclear if the restrictions apply during school holidays, or which specific school's calendar would be followed. Furthermore, draft orders were posted on lampposts in a way that covered the email address for feedback, preventing the community from participating in a fair consultation.</p> <p>The plan forces all vehicles onto Vines Lane—a narrow, historic road that cannot handle extra volume. This is a primary crossing for our pupils during school runs. We are especially worried about the junction at Maidstone Road, Crow Lane, and Lockington Grove, which is already known for its dangerous sightlines and confusing layout.</p> <p>The 'Rochester Residents Alternative Plan' presents a counter-proposal to the Council's current scheme. We suggest implementing a 20mph zone starting from the High Street and continuing through Boley Hill and Minor Canon Row, covering the full length of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road, and Mitre Road. We believe this approach would improve safety for pedestrians and residents while avoiding the dangerous traffic congestion on Vines Lane and Maidstone Road that the Council's plan would trigger.</p> <p>Regards</p> <p>[REDACTED]</p> | <p>Objection noted.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|  | <p>Dear Sir/Madam,</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders (although no councillors involved with this ludicrous proposal could be bothered to attend!), it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results<br/>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)<br/>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances<br/>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)<br/>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and Watts' Avenue and School Air Quality<br/>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                         |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines. The alterations to Watts' Avenue in the proposal and there being no access to St Margaret's Street from Watts' Avenue will have a similar impact on air quality with the increased amount of traffic needing to do multiple point turns in a busy road directly outside of the school to be able to exit Watts' Avenue as one option or, as a second option, increase traffic looping through Gordon Terrace onto The Close and back out onto Watts' Avenue, therefore impacting the air quality of those residents.</p> <p>6. Severe Safety Risks: The Vines Lane, Watts' Avenue and Gordon Terrace Bottleneck<br/>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic, and Gordon Terrace and Watts' Avenue are of similar ilk, particularly Gordon Terrace. Vines Lane serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites. By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.<br/>We must also highlight the severe safety implications for the residents of Watts' Avenue and Gordon Terrace. By sealing off Roebuck Road, the Council is not "removing" traffic; it is merely displacing it onto these narrow, residential residential streets that are physically incapable of absorbing the overflow.</p> <p>Gordon Terrace will be transformed from a quiet residential enclave into a high-pressure turnaround point and a magnet for "displacement parking." As frustrated drivers and delivery couriers realise they have entered a dead-end restricted zone, we foresee a surge in hazardous three-point turns and reversing manoeuvres in close proximity to residents' front doors. To funnel the "school run" chaos into a confined residential cul-de-sac is to invite a collision, especially on the tight corners where access is already inhibited during school drop off peaks as parents all park on the double yellow lines on the blind corners of the terrace.</p> <p>While the scheme ostensibly aims to protect King's School pupils, it creates a secondary—and arguably more acute—danger for the pupils, parents, and staff of St Andrew's School.</p> <p>Located on Watts' Avenue, St Andrew's sits directly in the "firing line" of the diverted traffic flow. The proposal will force a concentrated stream of vehicles - many driven by parents hurried by the restriction's ticking clock - down the very road where St Andrew's children are being dropped off and picked up. This creates a terrifying irony: in an attempt to clear one school gate, the Council is intentionally congesting another.</p> <p>The narrow nature of Watts' Avenue driveable road space due to the level of parking on either side of the residential road means the road is already ill-equipped for the morning rush; adding a redirected "through-flow" of vehicles creates a high-risk environment for young children navigating the trek from their cars to the school entrance. We view this as a fundamental failure in the Council's duty of care - effectively prioritising the safety of one group of pupils by knowingly increasing the physical risk to those at St Andrew's.</p> | <p>in the wider area and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>The junction of Watts' Avenue and Roebuck Road will become a flashpoint for accidents. Drivers unfamiliar with the new ANPR restrictions will likely perform last-minute, erratic manoeuvres to avoid the cameras, often without sightlines of pedestrians or cyclists. This "panic driving" at the threshold of Gordon Terrace and Watts' Avenue represents a clear and present danger to the residents who live there and the staff who work there.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane, Watts' Avenue, Gordon Terrace and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect. Sadly, it is also shamefully a project driven by the council's desire to increase revenue (evidently obvious by the proposed scheme operating 365 days per year rather than only during school term time) rather than being a project driven by care and concern for the school pupils.</p> <p>The near-universal opposition from the schools, Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,</p> <p>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|  | <p>Dear [REDACTED] / Relevant Officer/Director,</p> <p>FORMAL OBJECTION: PROPOSED PEDESTRIAN &amp; CYCLE ZONE (SCHOOL STREET) AND ADDITIONAL MEASURES SCHEME (KING'S SCHOOL ROCHESTER)</p> <p>I am writing to formally object to the proposed School Street scheme affecting the area around King's School Rochester (ME4 4TR). I attended the public meeting on 12 March 2026, which was attended by over 100 local residents and stakeholders, and it was clear that there is widespread opposition to the proposals.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>I set out below my principal grounds for objection, together with a constructive alternative that has strong local support.</p> <p><b>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</b><br/>I am concerned that the Council is progressing a further statutory consultation without first publishing the results, analysis and rationale arising from the earlier informal and statutory engagement in 2024/25. As a resident, it is not possible to respond meaningfully when prior feedback and the Council's response to it have not been disclosed. This approach risks falling short of the basic principles of fair, transparent and lawful consultation.</p> <p><b>2. Absence of an Adequate Evidence Base (Road Safety, Emissions and Necessity)</b><br/>The proposal is presented as a safety and air-quality intervention, yet it remains unclear what baseline evidence has been used to justify restrictions of this scale. In particular, the scheme introduces a "pedestrian and cycle zone" covering St Margaret's Street (between Vines Lane and Roebuck Road), King Edward Road and Lockington Grove, operating Monday to Friday between 8.00–9.00am and 3.45–4.45pm, with permit and exemption arrangements.</p> <p>These restrictions appear to apply throughout the year on weekdays, rather than being limited to school term-time. This is disproportionate to the stated objectives and makes it essential that the Council publishes the supporting road safety and air quality data, together with a clear explanation of why less intrusive alternatives were rejected.</p> <p><b>3. Demographic Misalignment and Statutory Distances</b><br/>A School Street model is not automatically suitable for a school and community with a wide catchment. Where a significant proportion of pupils travel from beyond statutory walking distances, restrictions will not reduce vehicle journeys overall; they will simply displace and concentrate them onto surrounding routes. That displacement effect is the central risk in this location, and in my view it has not been adequately assessed or mitigated.</p> <p><b>4. Heritage and Conservation Impact (Policy DM10)</b><br/>The proposed scheme introduces a significant amount of modern street furniture and enforcement infrastructure into an exceptionally sensitive historic setting. The Rochester Conservation Area demands a careful, minimal and proportionate approach. The cumulative impact of additional signs, ANPR cameras and associated infrastructure risks harming the character and appearance of the Precinct and its setting, contrary to the Council's duty to conserve or enhance the area.</p> <p><b>5. Environmental Impact: The Vines and School Air Quality</b><br/>The stated aim of improving air quality is undermined if traffic is displaced onto Vines Lane and other adjacent routes running directly alongside school buildings and green space. Constraining access on one corridor without reducing overall demand predictably relocates pollution rather than removing it. In these circumstances, the scheme risks increasing localised emissions precisely where children and pedestrians are most exposed.</p> <p><b>6. Severe Safety Risks: The Vines Lane Bottleneck</b><br/>I am gravely concerned that the proposal will force additional vehicle movements into known pinch-points and complex junctions, increasing conflict between vehicles and pupils at peak movement times. Vines Lane is a narrow historic route used heavily by pupils moving between school sites, and the surrounding junctions already present poor sightlines and congestion. A scheme promoted as a safety measure should not create new, foreseeable risks elsewhere.</p> <p><b>7. A Community-Backed Alternative</b></p> | <p>both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>At the public meeting I attended, there was strong and consistent support for a simpler, community-backed alternative: a permanent and properly enforced 20mph zone across the road network surrounding the Precinct and nearby schools, supported by targeted parking enforcement and limited, site-specific physical calming where genuinely necessary. This approach would enhance safety for all road users without creating an artificial and dangerous concentration of traffic on surrounding streets.</p> <p>It is also important to note that the current proposal goes well beyond a simple School Street restriction. It includes additional one-way systems, prohibitions on vehicle entry at certain junctions and the introduction of road humps. Taken together, these measures materially increase the risk of traffic displacement and should be assessed holistically, with full modelling and transparent publication of expected impacts.</p> <p>In light of the above, I respectfully request that the proposed scheme be withdrawn and re-developed in genuine collaboration with residents, schools and local stakeholders, supported by a published evidence base and a proportionate package of measures focused on real, demonstrable safety outcomes.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|  | <p>Dear Sirs,</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

-------------------------------------------------------------------------------------------------------|
|  | <p>average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would</p> | <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|  | <p>Dear Sirs,</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the</p>                                                                                                                                                                                                                                                                                                                                                                                                              | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition,</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot</p> | <p>information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                        |
|  | <p>Dear Sir or Madam,</p> <p>I am writing in response to the consultation on the proposed School Street around King's School. While I support measures that improve safety for children, I am concerned that the current proposal will unintentionally create significant safety and congestion issues for pupils at St Margaret's at Troy Town, located on the adjoining King Street.</p> <p>After reviewing the information provided — including the council's map of the proposed changes, which details new no-entry signs, one-way systems, traffic-enforcement cameras, and road closures around King's School — it is clear that these restrictions will displace vehicle traffic onto the surrounding streets. These streets include the roads that directly serve St Margaret's at Troy Town.</p> <p>By limiting access around Kings, the proposal will inevitably push drivers to seek alternative routes and drop-off points on nearby unrestricted roads such as King Street itself, on which St Margaret's at Troy town sits, and other surrounding roads used by families travelling to St</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>Objected noted.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                         |
|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
|  | <p>Margaret at Troy Town. The likely outcome is:</p> <ul style="list-style-type: none"> <li>- Increased traffic volume outside St Margaret at Troy Town</li> <li>- More unsafe turning and parking manoeuvres during the morning and afternoon school run</li> <li>- Greater risk to children who walk, cycle, or scooter to school</li> <li>- Higher levels of air pollution at the school gates</li> <li>- Displacement of congestion from one school to another, rather than a net reduction</li> </ul> <p>This is particularly concerning because no mitigation measures are proposed for the streets around St Margaret at Troy Town, despite them forming the natural diversion routes indicated by the council's maps.</p> <p>I respectfully request that the council reconsider the scheme in its current form. If the School Street is to proceed, it is essential that the council carries out a full traffic-displacement assessment and introduces protective measures for the roads surrounding St Margaret at Troy Town. These could include targeted traffic restrictions, timed access controls, improved crossings, or parallel School Street protections to ensure that safety gains at one school do not result in safety losses at another.</p> <p>Thank you for considering this feedback. I hope the council will ensure that any final scheme improves safety for all local children, not just those attending Kings.</p> <p>Kind regards,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                         |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to submit a formal objection regarding the proposed School Street and traffic management changes affecting Roebuck Road, St Margaret's Street, and King Edward Road.</p> <p>As a resident of [REDACTED], I will be directly impacted by these proposals and wish to register my strong opposition.</p> <p>Grounds for Objection:</p> <ul style="list-style-type: none"> <li>- Lack of Evidentiary Basis: There is a significant concern among residents that these proposals are not based on verifiable evidence. Despite multiple Freedom of Information (FOI) requests, no data has been provided to justify these specific interventions on Roebuck Road.</li> <li>- Safety Concerns: While the stated goal is to improve safety, the proposed restrictions—including the one-way street on Roebuck Road and the no-entry restriction at King Edward Road—may be detrimental to safety by displacing traffic to less suitable areas.</li> <li>- Disruption to Residents: The operational times (8:00am–9:00am and 3:45pm–4:45pm) and the introduction of new one-way systems represent an unnecessary and disproportionate disruption to the daily lives of those living within the restricted zones.</li> <li>- Perception of Revenue Generation: The lack of transparent community engagement in developing these specific proposals has led to a widespread perception that the scheme is a revenue-generating exercise rather than a safety-led initiative.</li> </ul> <p>Alternative Strategies:</p> <p>I urge the Council to dismiss the current proposal in favor of an approach developed in collaboration with the community. We suggest the following alternatives:</p> <ul style="list-style-type: none"> <li>- Speed Reduction: Implementing a 20mph speed limit across the area to improve safety without restricting access.</li> <li>- Targeted Enforcement: Using yellow or red line changes combined with increased</li> </ul> | <p>Objection noted.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | |  | <p>enforcement via officers to manage specific parking and safety issues during peak times.</p> <p>- Rejection of One-Way Systems: Withdrawing the proposal for new one-way road markings and no-entry signs at Watts' Avenue and King Edward Road.</p> <p>I request that these objections be formally recorded as part of the statutory consultation ending on 27 March 2026.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|  | <p>Dear [REDACTED],</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Please find below a letter from the residents of the neighbourhood to which the Council's proposals apply, which I fully endorse.</p> <p>In addition, I would like to reiterate, as others have done, that the proposal does not consider the impact on St. Andrew's school and St. Margaret's at Troy Town school. Indeed the proposal would be very likely to have a negative impact on the students at these schools due to traffic displacement. The vast majority of King's school parents are unable to walk their children to school and, therefore, will inevitably try to park in neighbouring streets or park illegally.</p> <p>All these points have been made in response to the previous consultations and the Council clearly has not taken these considerations into account and, therefore, draws questions over the validity of how the consultations have been carried out. I am sure you do not need reminding of recent cases where Council actions have been challenged successfully in Court, including a very recent case in Croydon, on the basis that the consultations were not carried out in a proper fashion and that the primary motivation for the traffic restrictions appeared to be a money raising exercise. Indeed the fact that the Council has removed the chains preventing traffic from crossing Rochester High Street on Saturday afternoons and fining drivers who cross the street at these times suggests that the Council does appear to be interested in raising money through these kinds of traffic management. I understand from an FOI submitted by someone else that considerable money has been collected since this change was introduced. Without adequate signage, this is unacceptable. Another FOI on 13th May 2025 confirmed that £407,704 had been raised from the first tranche of School Streets up to that date. I urge you to think very carefully and seek more legal advice before implementing this proposal.</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safely walk to school. The council recognised a wider need for</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> | <p>supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                         |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
|  | <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                         |
|  | <p>Dear Sir/ Madam,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>I have been aware of the proposed plans to change the road system in Rochester for some time and I am mailing, as a Roebuck Road resident, to voice my concerns over this proposal and the chaotic situation that it might create within an area of historic significance.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p>Objection noted.</p> |

|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>I attended a public meeting on 12 March 2026 and saw the breadth of resident representation and their objections to the scheme.</p> <p>I have the following points to make to lodge my objection to this proposal and I trust they will be considered carefully by the Council moving forward.</p> <ul style="list-style-type: none"><li>- Lack of data and information shared by the Council with the community after the consultation with residents in 2024/2025.</li><li>- Clear and equal consideration given to all school pupils in the area that has three schools. Only King's School is in the School Street area whereas Troy Town School and St Andrew's School are not and are left to cope with the extra traffic that will be directed in their vicinity.</li><li>- To impose this scheme will result in huge installation of signage and cameras that bears no consideration or support to maintaining the area of historic significance and the Council themselves expect residents to inform and seek permission for all, however minor, changes to properties within this area.</li><li>- Currently a self imposed school drop off system appears to be working well for the schools and the line of school traffic can disperse quickly at the beginning and end of each day. School holiday periods are a welcoming calm for visitors coming to Rochester and bringing the tourist income that we are dependent on. The proposed plan will create several roads of standing and queueing traffic bringing new dangers to air quality and children walking between slow and stationary traffic in a bid to get to school.</li><li>- The Vines will become a bottleneck and it is a totally unsuitable road to bear this extra traffic. It has many pedestrians walking through and alongside it as they get to work and school and is also a cut through for King's School pupils as they move around the campus.</li><li>- When trying to find a common way forward it was suggested at the meeting on 12th March that introducing a 20 mph zone around the whole area would be beneficial and I support this proposal.</li><li>- As I live in Roebuck Road I am uncertain of the value of making it a one way street and therefore directing all traffic along it that enters Watts' Avenue from Maidstone Road. The corner with St Margaret's Street is a tight turn with a road surface that is frequently needing repair and pothole filling with the current volume of traffic that use it. Taking away the option of non school traffic to be able to turn and drive out of Roebuck Road, keeping away from St Andrew's and King's traffic seems puzzling and now every vehicle, delivery truck, dust cart ... will all become involved and clog up already busy roads.</li></ul> <p>I write this with hope that my concerns are heard, alongside the many others of my community where there is widespread opposition. Because of all the points made and taking into account the community concerns I am requesting that the proposed School Street plan be withdrawn and any future plans are made with involvement and discussion with the residents and businesses within the area. A representation and response from the council at further meetings should be seen as a priority. I would be grateful for a response to say my objection has been received.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |  |

|  | <p>Dear Sir/Madam</p> <p>We live at [REDACTED] and would like to have our say about the street plans for this area. We personally are against a School Road system because it would impact on deliveries, builders, etc.</p> <p>We would like to see a one way system, with road bumps and a 20mph zone speed limit because the traffic speeds through our road far too fast. Making this a school street, would just shift the problem further out into other roads because parents would still drive their children to school.</p> <p>The three schools in the area are also against a School Road system for safety reasons.</p> <p>Kind wishes,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Objection noted. |
|  | <p>Dear Sir/Madam,</p> <p>I write with reference to the school streets proposal planned for Rochester.</p> <p>I am a resident of Roebuck Road and am extremely concerned about the impact that this will have on not just my road, but the wider area.</p> <p>Firstly, the proposal would make Roebuck Road a one way street, which is unbelievably inconvenient. Can you please advise what we are meant to do regarding access for tradespeople and deliveries for example? We frequently have tradespeople working on our house, given it is a period property and requires a lot of maintenance. It will increase the level of traffic in a huge way, all traffic in the area will be diverted via our road. This makes no sense to me - this creates added danger to children and also residents of the road. This will also degrade the road surface, which is already damaged with pot holes. It also means that we will have no option but to join the school traffic, adding a lot of extra time to our journeys and make it nigh on impossible to park. This will adversely impact the valuation of our property and I will expect to be compensated accordingly should the scheme go through.</p> <p>I do not see why we should be penalised for the school scheme, especially when there has been no evidence given that this will improve safety in any way.</p> <p>Our road is already busy, and this seems to only make things worse with no other routes open.</p> <p>Furthermore, whilst I understand the aim is to encourage children to walk to school, this will not apply here as the schools in question are private schools, with the pupils not being from the local catchment area. Therefore, walking is not an option. How has this not been taken into account?</p> <p>The proposal is giving me and my partner extreme anxiety as it will hugely impact our daily lives. If it would help improve safety then I could understand more, but it will do the opposite and it makes no logical sense whatsoever. It appears more to be a money making scheme which is unfair on everyone.</p> <p>I would urge you to consider the rights of the residents and the fact that this is a conservation area and adding cameras will also adversely affect the locality.</p> <p>Regards<br/>[REDACTED]</p> |                  |

|   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                         |

|   | <p>Dear TRO team</p> <p>My wife [REDACTED] and I are emailing to express our objections to the proposed School Streets Scheme impacting Roebuck Road (where we live), Watts' Avenue (where my mother lives), Kings Edward Road, and St Margaret's Street.</p> <p>We feel the Scheme is not well thought out for the following reasons:</p> <ol style="list-style-type: none"> <li>1. Roebuck Road will become the primary 'drop off' location for parents of children at King's School, despite being fully parked on both sides of the road the majority of the time with no or very few parking spaces available. A queue of cars will quickly build up every day as parents drop children off and help them with their belongings, blocking passage along the road and resulting in a significant increase in air pollution as cars idle, waiting for their turn. This will be compounded by a further queue round into St Margaret's Street and Watts' Avenue, which in the worst cases could result in gridlock- preventing access for emergency vehicles.</li> <li>2. The proposal will not result in a significant increase in walking, wheeling or cycling given data showing most parents with children at these schools travel further than the 2 mile statutory maximum.</li> <li>3. The proposal will make children at St. Andrews less safe as a higher volume of traffic is pushed to Watts' Avenue. This undermines the safety basis of the scheme.</li> <li>4. The proposed additional signage and enforcement cameras is inappropriate in a conservation area.</li> <li>5. The one way system proposal will create a major pinch point between Maidstone Road, Watts' Avenue and Roebuck Road as two queues of cars must 'cross over' one another to enter the system.</li> <li>6. We are due to have a child this year and are highly concerned about the impact of the additional traffic and air pollution. We will be needing to take them to nursery in the mornings, exposing them to the increased danger posed by the scheme.</li> <li>7. Access for tradespeople will be compromised during school drop off and pick up times, which in other areas has led to 'blacklisting' due to the risk of delays and/or fines. Many houses in the conservation area require a high level of maintenance to preserve their structure and appearance, and so this cannot be risked if the conservation area is to be maintained.</li> <li>8. Residents in King Edward Road and St. Margaret's Street were aware when purchasing their homes of longstanding schools and associated traffic levels.</li> </ol> <p>We support the alternative proposal put forward by the residents, which is a more sensible and measured approach to the issue.</p> <p>Kind regards</p> <p>[REDACTED]</p> | <p>Objection noted.</p> |
| Y | <p>Dear Council member in charge of administration for this scheme</p> <p>Please find attached my letter of opposition to the proposal for the closure of streets around</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>Objectio noted.</p>  |

|  | <p>King's School Rochester.</p> <p>Thank you for your attention to this matter</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                         |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street scheme in the vicinity of King's School Rochester. While I fully support initiatives that aim to improve road safety and environmental quality, I do not believe this proposal achieves those objectives in a practical or proportionate manner for this particular location.</p> <p>A key concern is the mismatch between the scheme's underlying assumptions and the realities of the school's pupil demographic.</p> <p>King's School Rochester serves a wide geographical area, with families travelling considerable distances each day. The majority of pupils live well beyond reasonable walking or cycling range, meaning that car travel is not a discretionary choice but a necessity. As such, restricting vehicular access does not reduce demand—it simply displaces it.</p> <p>This displacement effect is particularly troubling given the likely rerouting of traffic onto Vines Lane and surrounding roads. These are constrained, historic routes that are already under pressure at peak times. Increasing traffic flow along these corridors risks creating new safety hazards, especially at key crossing points used by pupils and families. The junction linking Vines Lane with Maidstone Road, Crow Lane and Lockington Grove is already complex and suffers from limited visibility; further congestion here would heighten the risk of accidents rather than mitigate it.</p> <p>There is also a broader environmental contradiction at play. Rather than reducing emissions, the scheme is likely to concentrate idling vehicles along alternative routes, including those adjacent to The Vines and nearby school facilities. This outcome appears inconsistent with the Council's own environmental and heritage protection objectives, particularly in relation to safeguarding valued green spaces and community assets.</p> <p>In addition, the consultation process raises concerns. There appears to be insufficient clarity regarding the operational scope of the scheme, including which roads are definitively included and how the restrictions would apply outside of term time. The practical details matter greatly for residents and stakeholders, yet they remain unclear. Furthermore, the visibility and accessibility of consultation materials have been inadequate, limiting the ability of the community to engage meaningfully in the process.</p> <p>Importantly, there is a credible and more balanced alternative available. I support the Rochester Residents' proposal to introduce a 20mph speed limit across the wider area, encompassing key residential and school routes. This approach would enhance safety for pedestrians and road users alike, without forcing traffic into</p> | <p>Objection noted.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|  | <p>unsuitable bottlenecks or creating unintended consequences elsewhere in the network. It represents a measured, inclusive solution that aligns more closely with the character and constraints of the local area.</p> <p>In summary, I believe the proposed School Street scheme is not appropriate for this location and risks undermining the very outcomes it seeks to deliver. I urge the Council to reconsider its approach and to engage more fully with practical, community-supported alternatives.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|  | <p>Dear Medway Council,</p> <p>Please be advised that this School Street Scheme is not viable.</p> <p>Pupils at King's school have to travel by car because of the catchment area and distances travelled by many. If the proposal goes ahead the roads will be completely blocked because the traffic will be squeezed into the remaining roads causing more roadblocks. This will adversely impact the health of the children not improve it. It will also make the roads more dangerous. Crossing the Maidstone road with small children is already very dangerous given the traffic volume, speed and the raised footpath. The Council also have increased traffic flows by building more and more flats but not providing the infrastructure required to support the population density or the traffic flows. The cost of car parking has increased by over 100% in 3 years. The car parks are often full in the afternoons. No additional car parking facilities have been provided. No bus routes have been implemented to provide alternative modes of transport to school. The scheme is ill-conceived and lacks any validation in terms of research or analysis.</p> <p>The scheme increases pollution; makes the whole area less safe for school children; and is not supported by the local schools, the residents or the parents. The council have provided no data or information, despite FOI requests being made, to support the proposal.</p> <p>The schools, residents and parents have consulted and discussed the matter in a constructive forum and the best way forward agreed by all would be to reduce the speed limit in all the surrounding roads to 20 miles per hour. This would achieve the aims that the Council have postulated that they are trying to achieve. Less pollution as traffic is keep moving and safety for children crossing as traffic is reduced to 20 miles per hour.</p> <p>I hope the Council will not waste any further taxpayers money and will take on board the feedback from the schools, residents and parents who they are supposed to serve.</p> <p>Kind Regards<br/>[REDACTED]</p> | <p>Feedback noted.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |
|  | <p>Dear Sir / Madam,</p> <p>I am writing to raise an objection to the proposed School Street Scheme around King' School Rochester on the following grounds:</p> <p>Primarily, I am concerned about the inevitable displacement of traffic from the proposed School Streets onto Vines Lane at key times at the start and end of the school day. This is a narrow road with bottleneck points, and would be significantly impacted by an increase in</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Objection noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                         |
|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
|  | <p>traffic. It is a road which pupils from King's School, as well as members of the public, regularly cross; an increase in traffic would compromise their safety. This is particularly the case at the Lockington Grove end of Vines Lane, where there is a complex road junction with difficult sightlines for pedestrians. Furthermore, it would negatively impact air quality in an area next to an important park in central Rochester (The Vines) which is regularly used and enjoyed by the public, including children and families, as well as next to school grounds, thus affecting both health and the environment.</p> <p>Secondly, I am concerned that the council has not taken into account the wide catchment area of King's School: a significant proportion of our families live more than 3 miles away from the school (73% of those under 8 and 70% of those over 8) and walking is not a practical option for them. The average commute is 8.9 miles. Therefore access to the roads around the school is of key importance for dropping off and collecting children, particularly young children, at the start and end of the school day. Furthermore, many staff members live outside walking distance and, without extensive parking on site, rely on the roads around the school for parking.</p> <p>In light of these concerns, I am in support of the 'Rochester Residents Alternative Plan' to introduce a 20mph limit encompassing St Margaret's Street, Love Lane, Vines Lane, Crow Lane, Lockington Grove, King Edward Road, Roebuck Road, etc. This measure would increase safety for pedestrians and residents without closing roads at key times and diverting traffic onto Vines Lane, with the safety and health ramifications outlined above.</p> <p>Yours,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                         |
|  | <p>To the members of Medway Council,</p> <p>We are writing to voice our formal objection to the newly proposed changes to the School Streets scheme for King's Pre-Preparatory School and Nursery, especially the proposed one-way system between Roebuck Road and Watts' Avenue. As long-term residents of this street who use these streets most mornings and afternoons at the enforceable times, we can with confidence state that this will make the lives of residents extremely difficult and we don't believe that the council has shown enough evidence of historical accident data or air quality surveys to justify their proposals for this specific school street in this area. Having previously outlined our concerns as a family, and having spoken with many of our neighbours who have also voiced their concerns and opposition to the proposed school street for this location, we had hoped that the council would have taken on board the majority of responses that outline the already difficult traffic issues we face as residents here each day. This change will not help us or other local drivers, as Watts' Avenue is only going to become more congested and difficult to drive along when we cannot access the only alternative road to leave our homes each morning and afternoon, especially if the one-way system is enforced and the School Streets proposal goes ahead with Roebuck Road included as planned. The inclusion of St Margaret's Street and Roebuck Road, and the change to the section of St Margaret's Street, which is proposed to become a one-way system instead of the current two-way street, will only make things so much worse during school times.</p> <p>We wish to formally voice our opposition to both the proposed school street proposal as it stands, and the change of the two-way street to a one-way street on St. Margaret's Street between Roebuck Road and Watts' Avenue. As residents who live right on the corner of Backfields where this proposed enforceable School Street section will end, we are extremely concerned that we will not be able to drive up Roebuck Road to access our property anymore, as this is often our only alternative when Watts' Avenue is at a standstill with school traffic each morning and afternoon. We encounter buses and large vehicles accessing St Andrew's</p> | <p>Objection noted.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |

|  | <p>School at school times when the children are going on school trips, large trucks doing deliveries to the school, and parents mounting kerbs, parking all over the road without consideration for other drivers or pedestrians, even dropping their children in the middle of the road and blocking our only way through to Maidstone Road. Add to this the bin trucks which block Watts' Avenue right on school run times every Thursday morning and there is traffic mayhem already, before this scheme will only make it so much worse. If you make it impossible for us to access Roebuck Road, the traffic will only be displaced onto the first accessible, non-enforceable sections of road outside of the School Street zone, which is outside our properties on St. Margaret's Street, and on our driveways down Backfields. We fear, having already experienced similar situations already, even without the added pressures which will only grow due to displacing the traffic from Roebuck Road and The Vines, that we will literally be stuck in our driveways for much of these times each morning and afternoon, unable to get to work or go to appointments or on our own school runs to other areas of Medway, as the parents who drive their children to Kings and St. Andrew's schools are extremely unlikely to stop driving their children and start walking them to school or access public transport, as the catchment area for these schools is widespread and many families live too far away to walk their children to school. We therefore believe that this proposed School Street is extremely unlikely to act as the deterrent to driving that Medway council has proposed it to be. We strongly believe that this is not the answer for the safety of residents and all of the families who need to get safely to St. Andrews and King's School.</p> <p>We already encounter horrendous traffic each morning and afternoon during term times when trying to drive up and down Watts' Avenue during school run hours and trying to turn right onto Maidstone Road. We often end up in completely backed up traffic on Watts' Avenue due to school parents driving up Watts' Avenue and not having spaces to pull in for cars to go past, with no way to reverse if more cars have continued behind them. We have encountered truly horrendous traffic jams, with two just this week where we were stuck for almost 15 minutes on two mornings and completely unable to get through, with oncoming traffic not letting up and allowing us to come through so we had to back up and move forward over and over again while dozens of cars just kept coming and coming. It greatly affects our mental health to already encounter such difficulties on an almost daily basis, and to know that it is only going to get worse if no alternative is available at all. Discourteous driving and difficulty seeing traffic over the rise on Watts' Avenue when coming home to Backfields is even worse and these issues are very much a problem already, due to the nature of the parking on both sides of the road, and not nearly enough areas where cars can pass each other along Watts' Avenue. Giving parents of school children even less choice of options to drive and drop their children off safely will only further exacerbate this and create an even worse bottleneck of vehicles trying to go along Watts' Avenue to turn onto Maidstone Road. Unless traffic lights are installed on the intersection of Watts' Avenue that allow safer turning onto Maidstone Road and allow the phasing of traffic from all directions to keep the flow moving, we are going to be stuck in extremely long, stressful traffic queues and at a standstill for unacceptable amounts of time each day, thus increasing idling time of our engines and worsening the air quality surrounding the schools in question for all families, local residents and neighbours.</p> <p>If we already have major problems with parents from St Andrews and King's School parking all over the place on Backfields and the section of St Margaret's Street outside our properties on Churchfields Terrace, and we already get blocked in by rude, arrogant drivers coming down our driveway and turning around, parking on our private drive, blocking the entrances to the three driveways to drop their children off, blocking the line of sight to safely turn out of our driveway onto St Margaret's Street by parking on the corners and on the double yellow lines, imagine how much worse it will be once Roebuck Road and the other sections of St Margaret's Street are no longer accessible. Our section of St Margaret's Street will be the first intersection outside of the proposed School Streets enforceable area before the location of the traffic</p> |  |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>cameras. Parents already disregard our safety, the safety of our children and elderly neighbours, and our right to our private parking and driveways. Having lived with this for the 12 years we have lived here, we can guarantee you that most, if not all of the St Andrews school parents and King's parents who drive and park around our house on St Margaret's Street, Roebuck Road and Backfields each day with their children, will continue to drive their children to school, they will continue to idle their engines as they already do, and they will just move a block further up and cause major traffic jams on Watts' Avenue which are already horrendous and will only be made even worse. We are very concerned that this simply will not work and is not well planned or well thought through.</p> <p>If any of the current Medway councillors lived here, we can safely say that you would never choose to propose this scheme as it is going to make this section of our roads impossible to drive up or down every day between 8am and 9am and 3pm and 4pm. You are not going to change the attitudes of these parents by doing this. We have spoken to a few of the worst repeat offenders about their inconsiderate parking on the double yellows on our corner of Backfields and repeatedly mounting the pavements around our streets, parking behind our homes, outside our private garages, blocking us in, littering from their cars on our driveway, pulling out without looking, driving erratically without any warning or indicators, parking wherever they like on our private land because it is convenient to them, with no regard or consideration for residents. We have had to ask parents to turn off their engines on many occasions and they have ignored us, so this is not going to be a miraculous answer to air quality or safety. If anything, the traffic being at a standstill on Watts' Avenue will only add to the poor air quality for longer times each day, and no access to Roebuck due to the changed one way system would mean the only way in or out of most residents' driveways and homes onto Maidstone Road will be Watts' Avenue, with the only alternative being Borstal Road onto Priestfields, which is already extremely busy and dangerous and will have even more traffic due to the school streets proposal for Canon Close.</p> <p>Unless traffic lights are also installed at the intersection of Priestfields to help with the traffic build up from cars trying to turn right onto Maidstone Road, the same issues will cause us to be stuck either way we try to drive as an alternate route each day. Turning onto Priestfields also involves a terribly sharp left turn which is frightening in peak hour traffic and will only be made worse by more traffic flow and congestion from displaced traffic, and with even less alternatives to keep traffic flowing. The changes the council has proposed will only lead to more impatient and irritated drivers taking more risks and not driving as carefully or safely because they have been delayed from more traffic hold ups and having to try to rush to make up lost time. The current drivers on St Margaret's Street and Roebuck Road are not going to miraculously change their ways and walk to school, they are just going to move their vehicles further up the road and park all over the place as usual, as many have no regard for the road rules already and just want to drop their kids off as quickly as possible with the least inconvenience to themselves.</p> <p>Please take note that we do understand the need for some parents to drive, as many work and need to get to their place of work so they can't walk their young children from their homes and have time to walk back before they need to be elsewhere. We are a family in this situation, and as much as we have been told to leave earlier and get up earlier, not every school run can be undertaken at 7:00 or 7:30am and we have children with SEND needs that sometimes prevents us from being able to predict our mornings and leave before 8am.</p> <p>We ask you to consider this also: if you and your fellow councillors lived here or visited regularly during school hours and had to deal with the rude and disrespectful parents and the daily abuse towards the local residents who simply want to access our homes and drive on safe roads, would you really allow this current proposal to go ahead in its new form? We</p> |  |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>believe that you would see that this new scheme will not work here and the inclusion of the one-way system on St Margaret's Street is not a sensible solution. Roebuck Road needs to be accessible, as it is the only alternative for many residents to be able to access Maidstone Road when Watts' Avenue is at a standstill. Please take our local experience and knowledge on board when we tell you what we go through on a daily basis, as this proposed plan is not going to improve safety or air quality for the residents or the school children you are aiming to help.</p> <p>We also want to say again during this time of consultation, as we have stated in previous communications regarding previous iterations of the proposed School Streets scheme for Kings School, that we were not against the original proposal of a school street scheme on King Edward Road and Lockington Grove directly outside of King's School that were originally presented as the planned pedestrian and cycle area. We are however, vehemently against the inclusion of St. Margarets Street from The Vines towards Watts' Avenue and Roebuck Road, especially as St Margaret's Street and The Vines are also a main through way from Rochester that many people coming from Rochester need to access, including us, and many visitors to our town will be directed to drive along St Margaret's Street by satellite navigation systems, including visitors who come to see us at our home. We do not believe this is fair to residents who will need to warn all visitors, delivery drivers, taxi drivers, tradespeople and more, to have to tell them to avoid coming to see us at these times etc. We, as residents, will be extremely inconvenienced to have to remind all workers and visitors of the risk of fines if they come to see us at the wrong time of day and we fear that they will refuse to come and do work around our streets or deliver to us, if they receive fines for entering the main road that leads to many of our properties from Rochester and Strood. We believe the wrong people are being targeted by this current proposal. It is not the actual people who drive and park inconsiderately or illegally, or the drivers who idle their engines every day, that will be caught and fined. Instead, it is the innocent, unsuspecting visitors to our lovely city who end up being directed up St. Margarets Street and don't see the signs, which are not large or obvious to look for if you aren't aware. Many will not be aware or realise the school streets are there, and they are the ones who will be penalised when they are not the ones who should be targeted.</p> <p>We also ask that you consider the exemption criteria for permits if you do still go ahead with a school street ending at Backfields, even though we believe it shouldn't go ahead for St Margaret's Street and Roebuck Road at all, but if you choose to disregard our concerns and if this was to still go ahead, please do take on board the very real safety concerns and massive inconvenience that you will be inflicting on the residents who live on not just Watts' Avenue and Roebuck Road, but also all of us along St Margaret's Street and down Backfields, as we will be greatly affected and inconvenienced but will be deemed to be outside of the enforceable area and permit access area by a few metres. It will be massively stressful and inconvenient not to be able to access Roebuck Road as an alternative to Watts' Avenue, as Roebuck Road gives us some hope of an alternative on the really bad days where traffic is stood still for far too long. Please do extend the right to access a permit to those of us in Churchfields Terrace and the residences which are only accessible via Backfields, due to the mayhem that will be caused to us by yet more traffic turning in our driveways, and the traffic jams that are bound to get even worse on Watts' Avenue. We beg you to hear our very real fears and concerns and to acknowledge the huge amount of stress which the inclusion of our streets in this proposal has already caused and will continue to cause if this goes ahead. We ask you sincerely to rethink the plan, please!</p> <p>We believe that better investment in traffic wardens attending every school much more regularly and fining the actual culprits who park illegally, idle their engines and commit traffic infringements would be a much better use of council funds and would lead to safer school runs and air quality for all of us. We understand and agree with the need for safety, but this</p> |  |

|   | <p>current proposed scheme is not going to help improve the air quality or safety around our streets. We hope that you will see that this proposal is still not appropriate for the one way system to be changed on St Margaret's Street and that the inclusion of Roebuck Road and St Margaret's Street should be removed from the proposed School Streets for King's Pre-Preparatory School and Nursery, along with the proposed change to the one way system for St Margaret's Street, for the many valid reasons and concerns which we have outlined above.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|   | <p>Dear Mr Constantinides</p> <p>I appreciate that you may receive many objections to the planned School Street Scheme around King's School, Rochester. There are many legal and other reasons why you should re-consider your decisions which will be set out in the other letters (and are set out as an appendix to the attachment to this email which repeats my thoughts, so you can have all in one place!), but, to summarise, my view is that you should definitely consider the proposed alternative 20 mph scheme for the surrounding area rather than input a scheme which does little for the safety of children and parents in surrounding schools.</p> <p>Indeed, as an avid cyclist, I would also recommend a similar speed restriction going through Borstal and also implement a speed recording system along the Esplanade where speeding seems to be "de rigeur" for some motorists (30 mph is fine as long as it is observed). Reducing speed may also do something to preserve the road surface too – the potholes are also very distressing, not only for the motorists but quite scary for cyclists. Having recently cycled to Southfleet from Rochester along the wonderful cycle route beside the A2, it was such a pleasure not to have to avoid potholes and made me even more aware than ever of their normal hazard to road users.</p> <p>Speed restriction is the way forward I am sure</p> <p>Yours sincerely<br/>Liz McVeigh, Resident Watts' Avenue, Rochester<br/>CC: Local Councillors: Linda Bowen, Paula Hamilton and Alex Petterson</p> | <p>Feedback noted.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safely walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p>                                                                                                                                                                                                                                              |
| Y | <p>Please find attached objections to the School Street Scheme for consideration.</p> <p>Kind regards,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <p>Feedback noted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|   | <p>Dear Councillor Paterson</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|  | <p>consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicate an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> | <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King’s School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sighting. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret’s Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In fact, the council ought to consider extending the 20 mph zone from the Vines to Rochester Grammar School on Maidstone Road.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely<br/>[REDACTED]</p> |  |

|  | <p>Hi,</p> <p>As a resident of St Margaret Street, Rochester, I wanted to comment on the proposed school street at King's School.</p> <p>My son attends St Margarets at Troy Town (SMATT) and we either have to drive or walk to school depending on the time of morning. On some mornings he attends breakfast club which starts earlier (8 am) than most other schools so we can safely walk to SMATT. There are no issues with either SMATT, Kings or St Andrews school traffic at that time. However, on those mornings where my son doesn't attend breakfast club and we do a drop off for 840 the safest option is to drive. This is because the current traffic for the St Andrews school is heavy and on some occasions exhibits very poor driving making walking on the pavements dangerous especially with a young child. The St Andrews school has also coopted the surrounding roads to create its own one way system despite the roads being two way and this causes trouble for all of us who aren't part of their school's drop off.</p> <p>At the normal school drop off, 830 to 850, there are no issues at all with the Kings School traffic. They generally exhibit courteous and polite driving and understand how their school's drop off process works and their traffic is tightly confined to the streets around their school.</p> <p>The proposal is either going to push all of the Kings School traffic up to St Margaret's Street or the Union Street car park. St Margaret's Street already has school traffic for St Andrews prep school and a second site, St Andrews infants, further up towards Borstal Road. This proposal will cause a build up of traffic for three separate school sites on a single road. This can't be considered safe or fair for anyone especially when it is already dicey with traffic for two school sites, St Andrews prep and St Andrews infants.</p> <p>This will also make it difficult for those people who live down St Margaret's Street who do not have anything to do with the schools and are looking to commute to work or have appointments etc. Again, this doesn't seem like a fair outcome. This will push traffic out via Borstal Road towards Priestfields which has school foot and vehicle traffic for Pilgrim school in Borstal and those schools along Maidstone Road. Again, this can't be a desirable outcome.</p> <p>The Kings School parents will then have the option of using the Union Street car park. This car park is right outside my son's school, SMATT. This is already heavily utilised by the SMATT parents because there are no safe drop off areas. Parents park on the double yellow lines (obviously wrongly) to drop their kids off as the car park isn't big enough and the surrounding streets are full of parked cars. Again, this proposal pushes more traffic into areas already heavily used by school traffic along with a lot of small children running about before school. This does not appear to be a safer outcome.</p> <p>Neither of the these outcomes is desirable. I urge you to reconsider this proposal. I understand the need for the school streets but the current status quo is the least worst option as it keeps the school traffic to defined areas relevant to each school. The proposal pushes the Kings school traffic onto other surrounding school areas which doesn't seem fair as the other schools then have to deal with the additional traffic as well as increasing traffic around lots of small children.</p> <p>Kind regards<br/>[REDACTED]</p> | <p>Objected noted.</p> |

| Y | <p>Hello</p> <p>I can't believe we're here again - I thought this ridiculous scheme had been quietly binned off last year, but it appears not. Please find attached my objection letter.</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Objection noted. |
|   | <p>To the members of Medway Council,</p> <p>I am writing to voice my formal objection to the newly proposed changes to the School Streets scheme for King's Pre-Preparatory School and Nursery, especially the proposed one way system between Roebuck Road and Watts' Avenue. As a long term resident of this street who uses these streets most mornings and afternoons at the enforceable times, I can with confidence state that this will make the lives of residents extremely difficult and I don't believe that the council has considered the already difficult traffic issues we face as residents here each day. This change will not help us or other local drivers, as Watts' Avenue is only going to become more congested and difficult to drive along when we cannot access the only alternative road to leave our homes each morning and afternoon, especially if the one way system is enforced and the School Streets proposal goes ahead with Roebuck Road included as planned. The inclusion of St Margaret's Street and Roebuck Road, and the change to the section of St Margaret's Street, which is proposed to become a one way system instead of the current two way street, will only make things so much worse during school times. As a resident who lives right on the corner of Backfields where this proposed enforceable School Street section will end, we are extremely concerned that we will not be able to drive up Roebuck Road to access our property anymore, as this is often our only alternative when Watts' Avenue is at a standstill with school traffic each morning and afternoon. We encounter buses and large vehicles accessing St Andrew's School at school times when the children are going on school trips, large trucks doing deliveries to the school, and parents mounting kerbs, parking all over the road without consideration for other drivers or pedestrians, even dropping their children in the middles of the road and blocking our only way through to Maidstone Road. Add to this the bin trucks which block Watts' Avenue right on school run times every Thursday morning and there is traffic mayhem already, before this scheme will only make it so much worse. If you make it impossible for us to access Roebuck Road, we will literally be stuck in our driveways as the parents who drive their children to Kings and St. Andrew's schools are not going to stop driving their children to school. This is not the answer for the safety of our children and all of the families who need to get safely to St Andrews and King's School. We already encounter horrendous traffic each morning and afternoon during term times when trying to drive up and down Watts' Avenue during school run hours and trying to turn right onto Maidstone Road. We often end up in completely backed up traffic on Watts' Avenue due to school parents driving up Watts' Avenue and not having spaces to pull in for cars to go past, with no way to reverse if more cars have continued behind them. I have encountered two such traffic snarls just this week and was stuck for almost 15 minutes both mornings and completely unable to get through, with oncoming traffic not letting up and allowing me to come through so I had to back up and move forward over and over again while dozens of cars just kept coming and coming. It greatly affects my mental health to already encounter such difficulties on an almost daily basis, and it is only going to get worse if no alternative is available at all. Discourteous driving and difficulty seeing traffic over the rise are very much an issue already due to the nature of the parking on both sides of the road on Watts' Avenue, and there are not nearly enough areas where cars can pass each other along Watts' Avenue. Giving parents even less choice of options to drive and drop off safely will only further exacerbate this terrible section of road and create an even worse bottleneck of vehicles trying to turn onto Maidstone Road. Unless traffic lights are installed on the intersection of Watts' Avenue that allows safer turning into Maidstone Road and allows the phasing of traffic from all directions to keep the flow moving, we are going to be stuck in extremely long, stressful traffic queues and at a standstill</p> | Objection noted. |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |

|  | <p>for unacceptable amounts of time each day, thus increasing idling time of our engines and worsening the air quality surrounding the schools in question for all families, local residents and neighbours.</p> <p>If we already have major problems with parents from St Andrews and King's School parking all over the place on Backfields and the section of St Margaret's Street outside our properties on Churchfields Terrace, and we already get blocked in by rude, arrogant drivers coming down our driveway and turning around, parking on our private drive, blocking the entrances to the three driveways to drop their children off, blocking the line of sight to safely turn out of our driveway onto St Margaret's Street by parking on the corners and on the double yellow lines, imagine how much worse it will be once Roebuck Road and the other sections of St Margaret's Street are no longer accessible. Our section of St Margaret's Street will be the first intersection outside of the proposed School Streets enforceable area before the location of the traffic cameras. Parents already disregard our safety, the safety of our children and elderly neighbours, and our right to our private parking and driveways. Having lived with this for the 12 years we have lived here, we can guarantee you that most, if not all of the St Andrews school parents and King's parents who drive and park around our house on St Margaret's Street, Roebuck Road and Backfields each day with their children, will continue to drive their children to school, they will continue to idle their engines as they already do, and they will just move a block further up and cause major traffic jams on Watts' Avenue which are already horrendous and will only be made even worse. We are very concerned that this simply will not work and is not well planned or well thought through.</p> <p>If any of the current Medway councillors lived here, we can safely say that you would never choose to propose this scheme as it is going to make this section of our roads impossible to drive up or down every day between 8am and 9am and 3pm and 4pm. You are not going to change the attitudes of these parents by doing this. We have spoken to a few of the worst repeat offenders about their inconsiderate parking on the double yellows on our corner of Backfields and repeatedly mounting the pavements around our streets, parking behind our homes, outside our private garages, blocking us in, littering from their cars on our driveway, pulling out without looking, driving erratically without any warning or indicators, parking wherever they like on our private land because it is convenient to them, with no regard or consideration for residents. We have had to ask parents to turn off their engines and they have ignored us, so this is not going to be a miraculous answer to air quality or safety. If anything, the traffic being at a standstill on Watts' Avenue will only add to the poor air quality for longer times each day, and no access to Roebuck due to the changed one way system would mean the only way in or out of most residents' driveways and homes onto Maidstone Road will be Watts' Avenue, with the only alternative being Borstal Road onto Priestfields, which is already extremely busy and dangerous and will have even more traffic due to the school streets proposal for Canon Close.</p> <p>Unless traffic lights are also installed at the intersection of Priestfields to help with the traffic build up from cars trying to turn right onto Maidstone Road, the same issues will cause us to be stuck either way we try to drive as an alternate route each day. Turning onto Priestfields also involves a terribly sharp left turn which is frightening in peak hour traffic and will only be made worse by more traffic flow and congestion from displaced traffic, and with even less alternatives to keep traffic flowing. The changes the council has proposed will only lead to more impatient and irritated drivers taking more risks and not driving as carefully or safely because they have been delayed from more traffic hold ups and having to try to rush to make up lost time. The current drivers on St Margaret's Street and Roebuck Road are not going to miraculously change their ways and walk to school, they are just going to move their vehicles further up the road and park all over the place as usual, as many have no regard for the road rules already and just want to drop their kids off as quickly as possible with the least</p> |  |

|  | <p>inconvenience to themselves.</p> <p>Please take note that we do understand the need for some parents to drive, as many work and need to get to their place of work so they can't walk their young children from their homes and have time to walk back before they need to be elsewhere. We are a family in this situation, and as much as we have been told to leave earlier and get up earlier, not every school run can be undertaken at 7:00 or 7:30am and we have children with SEND needs that sometimes prevents us from being able to predict our mornings and leave before 8am.</p> <p>We ask you to consider this also: if you and your fellow councillors lived here or visited regularly during school hours and had to deal with the rude and disrespectful parents and the daily abuse towards the local residents who simply want to access our homes and drive on safe roads, would you really allow this current proposal to go ahead in its new form? We believe that you would see that this new scheme will not work here and the inclusion of the one way system on St Margaret's Street is not a sensible solution. Roebuck Road needs to be accessible, as it is the only alternative for many residents to be able to access Maidstone Road when Watts' Avenue is at a standstill. Please take our local experience and knowledge on board when we tell you what we go through on a daily basis, as this proposed plan is not going to improve safety or air quality for the residents or the school children you are aiming to help.</p> <p>We also want to say again during this time of consultation, as we have stated in previous communications regarding previous iterations of the proposed School Streets scheme for Kings School, that we were not against the original proposal of a school street scheme on King Edward Road and Lockington Grove directly outside of King's School that were originally presented as the planned pedestrian and cycle area. We are however, vehemently against the inclusion of St. Margarets Street from The Vines towards Watts' Avenue and Roebuck Road, especially as St Margaret's Street and The Vines are also a main through way from Rochester that many people coming from Rochester need to access, including us, and many visitors to our town will be directed to drive along St Margaret's Street by satellite navigation systems, including visitors who come to see us at our home. We do not believe this is fair to residents who will need to warn all visitors, delivery drivers, taxi drivers, tradespeople and more, to have to tell them to avoid coming to see us at these times etc. We, as residents, will be extremely inconvenienced to have to remind all workers and visitors of the risk of fines if they come to see us at the wrong time of day and we fear that they will refuse to come and do work around our streets or deliver to us, if they receive fines for entering the main road that leads to many of our properties from Rochester and Strood. We believe the wrong people are being targeted by this current proposal. It is not the actual people who drive and park inconsiderately or illegally, or the drivers who idle their engines every day, that will be caught and fined. Instead it is the innocent, unsuspecting visitors to our lovely city who end up being directed up St. Margarets Street and don't see the signs, which are not large or obvious to look for if you aren't aware. Many will not be aware or realise the school streets are there, and they are the ones who will be penalised when they are not the ones who should be targeted.</p> <p>We also ask that you consider the exemption criteria for permits if you do still go ahead with a school street ending at Backfields, even though we believe it shouldn't go ahead for St Margaret's Street and Roebuck Road at all, but if you choose to disregard our concerns and if this was to still go ahead, against the majority of the local residents' and school users' wishes, please do take on board the very real safety concerns and massive inconvenience that you will be inflicting on the residents who live on not just Watts' Avenue and Roebuck Road, but also all of us along St Margaret's Street and down Backfields, as we will be greatly affected and inconvenienced but will be deemed to be outside of the enforceable area and permit access area by a few metres. It will be massively stressful and inconvenient not to be able to access</p> |  |

|   | <p>Roebuck Road as an alternative to Watts' Avenue, as Roebuck Road gives us some hope of an alternative on the really bad days where traffic is stood still for far too long. Please do extend the right to access a permit to those of us in Churchfields Terrace and the residences which are only accessible via Backfields, due to the mayhem that will be caused to us by yet more traffic turning in our driveways, and the traffic jams that are bound to get even worse on Watts' Avenue. We beg you to hear our very real fears and concerns and to acknowledge the huge amount of stress which the inclusion of our streets in this proposal has already caused and will continue to cause if this goes ahead. We ask you sincerely to rethink the plan, please!</p> <p>We believe that better investment in traffic wardens attending every school much more regularly and fining the actual culprits who park illegally, idle their engines and commit traffic infringements would be a much better use of council funds and would lead to safer school runs and air quality for all of us. We understand and agree with the need for safety, but this current proposed scheme is not going to help improve the air quality or safety around our streets. We hope that you will see that this proposal is still not appropriate for the one way system to be changed on St Margaret's Street and that the inclusion of Roebuck Road and St Margaret's Street should be removed from the proposed School Streets for King's Pre-Preparatory School and Nursery, along with the proposed change to the one way system for St Margaret's Street, for the many valid reasons and concerns which we have outlined above.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                  |
|   | <p>Hello</p> <p>I have received a leaflet regarding the proposed school street in respect of King's School. The leaflet says that I can inspect the Council's statement of reasons for making the orders on your website but I can only see a draft order and a map.</p> <p>Can you please send me a copy of the statement of reasons as soon as possible and confirm that it is available on your website.</p> <p>Thank you<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Objection noted. |
| Y | <p>Please see attached our representations in respect of the proposed Kings School, School Street.</p> <p>Yours sincerely<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                  |
|   | <p>I am writing to formally respond to the statutory consultation regarding the proposed "School Street" scheme in Rochester.</p> <p>Having carefully considered the proposal, I would like to raise my concerns and express my support for the "Rochester Residents Alternative Plan," which I believe offers a more balanced and practical solution for improving safety in the area.</p> <p>As someone who regularly drops off and collects my nephew from King's School Rochester, I have direct experience of the daily travel arrangements required. I am concerned that the current proposal does not adequately reflect these realities. I know many pupils who travel significant distances and as such, a School Street scheme appears unsuitable for a school community with a wide regional catchment where walking is not a viable option for most</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Objection noted. |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                         |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
|  | <p>families.</p> <p>Secondly, the proposed scheme risks displacing traffic onto Vines Lane, a narrow and historic road that is already challenging to navigate. This route is heavily used by pupils crossing at both ends during peak times, and increased traffic flow would raise serious safety concerns. In particular, the junction connecting Vines Lane, Maidstone Road, Crow Lane, and Lockington Grove is already complex and hazardous, and additional congestion would likely worsen the situation.</p> <p>I am also concerned about the environmental implications of the proposal. Redirecting traffic onto Vines Lane would concentrate vehicle emissions alongside The Vines, an important green space and valued community asset. This outcome appears contrary to the intended aim of improving air quality and protecting the local environment.</p> <p>Furthermore, there appear to be procedural issues within the consultation process. There is a lack of clarity regarding the precise scope of the scheme, including whether certain roads such as Crow Lane are included. It is also unclear how the scheme would operate during school holidays and which school calendar would apply. Additionally, the way consultation details have been displayed locally has made it difficult for residents to access key information and respond effectively.</p> <p>For these reasons, I believe the Rochester Residents Alternative Plan — introducing a 20mph limit across the wider area — would be a more appropriate and effective approach. This would improve safety for pedestrians and residents without creating the unintended consequences associated with the current proposal.</p> <p>I respectfully ask that my objections be fully considered as part of the consultation process.</p> <p>Regards<br/>[REDACTED]</p> |                         |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to express serious concerns regarding the proposed School Street Scheme and the effect on King's School, Rochester.</p> <p>The Council has failed to properly consider that a large majority of our families commute to school and live beyond the two mile walking limit. Therefore, walking is not a viable option for the majority of families. As such, a School Street Scheme would be unsuitable for a school such as King's.</p> <p>Secondly, the proposed scheme would redirect traffic through Vines Lane, a very narrow road. This road is crossed many times a day by our pupils. The junction of Vines Lane, Maidstone Road, Crow Lane, and Lockington Grove is already notoriously difficult to cross and increased traffic in this area would significantly raise safety risks for everyone.</p> <p>It is also very tricky to find parking in the surrounding roads - limiting access to certain areas will make this even more difficult and stressful.</p> <p>I am in total support of the local residents' plan to introduce a 20mph speed limit in the surrounding area, a compromise that will ensure increased safety for all concerned.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>Objection noted.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                  |

|  | Yours faithfully<br>[REDACTED]                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                  |
|  | <p>To whom it may concern,</p> <p>I am writing as a local resident to object to the proposed School Street scheme.</p> <p>My main concern is the impact this will have on surrounding roads, particularly Vines Lane and the adjoining junctions. These routes are already constrained, and it is clear that diverting additional traffic through them will increase congestion and reduce safety for both pedestrians and drivers.</p> <p>I strongly feel the proposal creates more problems than it solves. Moving traffic away from one area only to concentrate it elsewhere especially Vines Lane and surrounding residential streets is quite frankly nonsensical.</p> <p>It is also not clear which roads will be affected or how the scheme would operate in practice. This makes it difficult for residents to fully understand the implications.</p> <p>I would instead support the Rochester Residents Alternative Plan, including a 20mph limit across the wider area. This would improve safety in a more proportionate way without displacing traffic or creating additional pressure on already busy roads.</p> <p>I urge the Council to reconsider the current proposal and take into account the wider impact on local residents.</p> <p>Regards,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Objection noted. |
|  | <p>Dear Medway Council, please be advised that this School Street Scheme is not viable. Pupils at King's have to travel by car because of the catchment area and distances travelled by many. The Council has not undertaken or provided any traffic analysis or statistics. If the proposal goes ahead the roads will be completely blocked because the traffic will be squeezed into the remaining roads causing more roadblocks. This will adversely impact the health of the children not improve it. It will also make the roads more dangerous. Crossing the Maidstone road with small children is already very dangerous given the traffic volume, speed and the raised footpath. The Council also have increased traffic flows by building more and more flats but not providing the infrastructure required to support the population density or the traffic flows. The cost of car parking has increased by over 100% in 3 years. The car parks are often full in the afternoons. No additional car parking facilities have been provided. No free rail travel has been provided. No bus routes have been implemented to provide alternative modes of transport to school. The scheme is ill-conceived and lacks any validation in terms of research or analysis.</p> <p>The scheme increases pollution; makes the whole area less safe for school children; and is not supported by the local schools, the residents or the parents. The council have provided no data or information, despite FOIA requests being made, to support the proposal. The council have instead wasted taxpayers money on three sets of consultants, which they then sacked, presumably because the scheme was not justifiable? The council has been particularly underhand and devious as to how they have handled the matter. For example they try to have consultations at times that are inconvenient; the scheme itself is unclear; and notices have deliberately obscured information to prevent responses against the scheme.</p> <p>The schools, residents and parents have consulted and discussed the matter in a constructive</p> | Objection noted. |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                         |

|  | <p>forum and the best way forward agreed by all would be to reduce the speed limit in all the surrounding roads to 20 miles per hour. This would achieve the aims that the Council have postulated that they are trying to achieve. Less pollution as traffic is keep moving and safety for children crossing as traffic is reduced to 20 miles per hour.</p> <p>I hope the Council will not waste any further taxpayers money and will take on board the feedback from the schools, residents and parents.</p> <p>Kind Regards<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                         |
|  | <p>Dear Sir or Madam,</p> <p>I am writing to formally object to the proposed School Street scheme in the vicinity of King's School, Rochester. While I appreciate the intention to improve safety and reduce congestion, I do not believe the current proposal reflects the realities of the school's community or the surrounding road network.</p> <p>A key issue is the nature of the school's intake. King's draws pupils from a wide geographical area, and many families travel considerable distances each day. A substantial proportion of younger pupils live well beyond the statutory walking distance, and the same is true for older year groups. In practice, this means that walking is not a realistic option for most families. Any scheme that assumes otherwise risks placing unnecessary strain on surrounding routes without achieving its intended behavioural change.</p> <p>I am also concerned about the inevitable redistribution of traffic. The proposal appears to divert vehicles toward Vines Lane, which is neither designed nor suitable for increased volumes. It is a constrained, historic route already used by pupils crossing at busy times. The nearby junction connecting Vines Lane with Maidstone Road, Crow Lane and Lockington Grove is particularly problematic, with limited visibility and an already complex flow of vehicles. Increasing pressure on this point would introduce further risk rather than alleviate it.</p> <p>There are also environmental implications that seem to have been overlooked. Redirecting traffic toward Vines Lane would concentrate emissions along the edge of The Vines, an important open space within Rochester that contributes to local air quality and community wellbeing. It is difficult to reconcile the stated environmental objectives of the scheme with a likely outcome that shifts pollution closer to both recreational areas and school facilities.</p> <p>In addition, aspects of the consultation process lack clarity. It is not evident whether all affected roads, including Crow Lane, fall within the scheme's boundary. Nor is it clear how the scheme would operate outside of term time, or which school calendar would apply if restrictions remain in place during holidays. Even the practicalities of responding to the consultation have been hindered, as key contact details on public notices have been obscured. These issues make it challenging for residents to participate fully and confidently in the process.</p> <p>Given these concerns, I would urge the Council to reconsider its approach. A more balanced alternative would be the introduction of a 20mph limit across the wider local area, covering the network of residential roads surrounding the school. This would promote safer driving conditions for pedestrians and residents alike, without forcing traffic into unsuitable routes or creating new hazards.</p> <p>I respectfully ask that these points be taken into account before any decision is finalised and I</p> | <p>Objection noted.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                         |

|  | <p>look forward to hearing from you on this matter.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                         |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally register my opposition to the proposed School Street Scheme adjacent to King's School Rochester. While I fully support the principle of enhancing child safety and air quality, the current proposal is geographically and logistically ill-suited to the unique context of this historic area and its regional student population.</p> <p>My objections are based on the following key points</p> <p>1. Misalignment with Catchment Reality<br/>The proposal appears to be based on the assumption of a localized, walking catchment. However, King's School functions as a regional hub with an average pupil commute of nearly nine miles. Specifically, over 70% of the student body—both those under and over the statutory age thresholds—reside well beyond the two and three-mile walking limits. By restricting access, the Council is not "encouraging" walking; it is penalizing families for whom vehicle transit is a geographic necessity, not a lifestyle choice.</p> <p>2. Hazardous Traffic Displacement<br/>Redirecting traffic away from the proposed restricted zones will inevitably funnel a high volume of vehicles into Vines Lane. This is a narrow, historic thoroughfare that is fundamentally incapable of absorbing increased capacity. Of particular concern is the intersection of Vines Lane, Maidstone Road, Crow Lane, and Lockington Grove. This junction is already a known "black spot" for poor sightlines. Forcing more traffic through this complex bottleneck—where students frequently cross—creates a significantly higher safety risk than the one the scheme intends to solve.</p> <p>3. Degradation of "Urban Lungs" and Heritage Assets<br/>The environmental logic of this scheme is contradictory. Under Policy DM10, the Council is committed to protecting Rochester's heritage and green spaces. By displacing traffic onto the perimeter of The Vines, the scheme will concentrate emissions directly alongside one of our most vital public parks and school playing fields. Relocating pollution from one street to a sensitive "urban lung" and classroom-adjacent road is a perverse environmental outcome.</p> <p>4. Procedural Failures and Ambiguity<br/>The consultation process thus far has been characterized by a lack of transparency:<br/> * Geographic Uncertainty: It remains unclear whether Crow Lane is included in the restrictions.<br/> * Operational Clarity: There is no confirmation on whether the scheme remains active during school holidays, nor which specific academic calendar will be utilized as the benchmark.<br/> * Access Barriers: Physical notices (RTA orders) have been posted on local infrastructure in a manner that obscures the contact details for submissions, effectively disenfranchising residents from the democratic process.</p> <p>5. A Viable Alternative: The Rochester Residents Alternative Plan<br/>I wish to record my strong support for the 20mph Limit Alternative. Extending a 20mph zone from the High Street through to the wider residential network (including St Margaret's Street, Vines Lane, and Watts' Avenue) would provide a comprehensive safety solution. This approach protects pedestrians across the entire neighborhood without creating the artificial and dangerous traffic "pressure cookers" inherent in the current School Street proposal.</p> | <p>Objection noted.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                         |

|  | <p>I urge the Council to withdraw the current proposal and engage in a more nuanced consultation that accounts for the regional nature of the school and the preservation of Rochester's historic infrastructure.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                         |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally lodge my objection to the proposed School Street Scheme currently under consultation for the area adjacent to King's School Rochester. While I fully support the overarching goal of enhancing pedestrian safety and improving air quality, I believe the current proposal is fundamentally flawed, geographically impractical, and likely to create more hazards than it solves.</p> <p>My objections are based on the following key points:</p> <p>1. Incompatibility with Regional Catchment Realities<br/>The Council's proposal appears to rely on the assumption that pupils live within a local, walkable radius. However, King's School functions as a regional educational hub. Data indicates that the average commute for families is nearly 9 miles. More importantly, 73% of pupils under the age of eight and 70% of those over eight live well beyond the statutory walking distances of two and three miles respectively. For the vast majority of our community, walking or cycling is not a viable option; this scheme penalizes families for whom vehicular transport is a necessity rather than a choice.</p> <p>2. Hazardous Traffic Displacement<br/>By closing primary access routes, the scheme will inevitably force a high volume of traffic onto Vines Lane. This is a narrow, historic thoroughfare that is entirely unsuitable for increased capacity.</p> <p>Safety Risks: Vines Lane serves as a critical crossing point for pupils moving between school buildings and playing fields.</p> <p>Intersection Complexity: The junction where Vines Lane meets Maidstone Road, Crow Lane, and Lockington Grove is already notorious for poor sightlines. Funneling displaced traffic into this specific "bottleneck" creates a significant risk of accidents.</p> <p>3. Environmental and Heritage Impact<br/>The proposal claims to improve air quality, yet it merely shifts emissions from one street to another. Displacing traffic onto Vines Lane places a heavy pollution burden directly alongside The Vines, a vital "urban lung" and heritage asset for Rochester. Concentrating idling traffic and low-gear maneuvers next to public parkland and school classrooms is a direct contradiction of Policy DM10, which mandates the protection of such green spaces.</p> <p>4. Procedural Failings and Lack of Clarity<br/>The consultation process has been marred by a lack of transparency:</p> <p>Geographic Ambiguity: It remains unclear whether Crow Lane is included in the restricted zone.</p> <p>Operational Uncertainty: There is no clarity on whether the restrictions apply during school holidays, nor which specific school calendar would be used as the benchmark.</p> | <p>Objection noted.</p> |

|   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                  |
|---|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
|   | <p>Accessibility: The physical posting of the Draft RTA orders on local lampposts was handled poorly, with the contact email address for submissions frequently obscured, hindering the community's right to a fair and transparent response process.</p> <p>A Constructive Alternative: The 'Rochester Residents Alternative Plan'</p> <p>I wish to register my strong support for the Rochester Residents Alternative Plan. Rather than a restrictive "School Street" closure, I advocate for the implementation of a comprehensive 20mph zone.</p> <p>This limit should begin at the High Street and extend through Boley Hill and Minor Canon Row, covering the full extent of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, and the surrounding residential roads including Watts' Avenue and Ridley Road.</p> <p>A 20mph limit provides a holistic safety solution for all residents and pedestrians without the "artificial" traffic spikes and dangerous displacement caused by the Council's current proposal.</p> <p>I trust that these concerns will be given serious consideration during the deliberation process.</p> <p>Yours faithfully,<br/>Louise Garlinge LEG</p> |                  |
| Y | <p>Dear Sirs</p> <p>Please see the attached letter in respect of the Schools Streets Scheme adjacent to King's School, Rochester on behalf of The Church Commissioners for England.</p> <p>Yours faithfully<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Objection noted. |
|   | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street scheme in Rochester.</p> <p>The proposal does not reflect the reality that many families travel significant distances to school, making walking impractical. As such, the scheme is unsuitable for a large proportion of users.</p> <p>I am particularly concerned that the plan will displace traffic onto Vines Lane, a narrow road already under pressure and frequently used by pupils. Increased congestion at the junction with Maidstone Road, Crow Lane and Lockington Grove raises serious safety concerns.</p> <p>The environmental benefits are also questionable, as the scheme risks concentrating traffic and pollution along Vines Lane, adjacent to The Vines green space.</p> <p>In addition, there is a lack of clarity in the consultation documents, including uncertainties around the scheme's scope and operation.</p> <p>I urge the Council to reconsider this proposal and instead consider the Rochester Residents Alternative Plan, which offers a more practical and balanced approach.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                          | Objection noted. |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                  |

|  | <p>Good evening,</p> <p>I am writing to formally object to the proposed School Street Scheme in the vicinity of King's School, Rochester. While I appreciate the intention to improve safety and air quality, I believe the current proposal is fundamentally flawed in both its assumptions and its likely real-world consequences.</p> <p>A central issue lies in the nature of the school's intake. King's draws pupils from a wide geographical area, meaning that a large proportion of families rely on car travel out of necessity rather than convenience. For many, the distance involved makes walking impractical, particularly for younger children. Any scheme that restricts vehicle access without accommodating this reality risks placing an undue burden on families while failing to reduce overall traffic volume.</p> <p>The proposal also appears to overlook the inevitable redistribution of vehicles onto surrounding roads. In particular, Vines Lane—already constrained by its historic layout—is likely to bear the brunt of displaced traffic. This is especially concerning given that it serves as a key pedestrian crossing route for pupils during peak times. Increasing congestion in such a location introduces additional safety risks, particularly at nearby junctions that are already challenging due to limited visibility and complex traffic movements.</p> <p>From an environmental standpoint, the scheme may prove counterproductive. Redirecting traffic into narrower residential and green-adjacent areas risks concentrating emissions rather than reducing them. This is of particular concern where routes run alongside important open spaces and areas used regularly by children and the wider community. The net effect could be a deterioration in local air quality in precisely the places where protection should be prioritised.</p> <p>There are also notable uncertainties surrounding how the scheme would operate in practice. Key details—such as the exact boundaries, the inclusion or exclusion of specific roads, and how restrictions would apply outside of term time—remain unclear. This lack of clarity makes it difficult for residents to properly assess the full impact of the proposal. Furthermore, the consultation process itself does not appear to have been as accessible or transparent as it should be, limiting meaningful public engagement.</p> <p>In light of these concerns, I would urge the Council to reconsider its approach and explore alternative measures that improve safety without displacing risk elsewhere. A more balanced strategy—such as area-wide traffic calming, including a reduced speed limit across the surrounding roads—would enhance pedestrian safety while avoiding the concentration of traffic in unsuitable locations.</p> <p>I respectfully request that these points be taken into account before any decision is finalised.</p> <p>Yours faithfully,<br/>[REDACTED]</p> | Objection noted. |
|  | <p>Dear Sir,</p> <p>I am writing to you to raise my objection to the proposed School Street Scheme which will impact on King's School Rochester where I teach. I understand that, on average, our pupils travel about 8-9 miles to school. Nearly three quarters of our very young pupils live over two miles away and could not be expected to walk in. I see that all traffic would use Vines Lane, one of the roads used as a crossing point (Vines Lane/Maidstone Road/Lockington Grove and Vines to the Paddock). An increase of traffic in Vines Lane could lead to accidents and injury. I</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Objection noted  |

|  | <p>can't help feeling that a speed limit of 20 mph starting at the High Street, through Boley Hill and Minor Canon Row (and, of course, this would include Vines Lane and other roads in the vicinity) would be a better approach to improving air quality.</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                         |
|  | <p>Dear Sir or Madam,</p> <p>I am writing to formally object to the proposed School Street Scheme in the vicinity of King's School Rochester. While I recognise and support the intention to improve safety and environmental conditions for pupils, I believe the current proposal is fundamentally unsuited to the realities of this school community and risks creating unintended and potentially hazardous consequences.</p> <p>A key issue lies in the nature of the school's intake. King's draws pupils from a wide geographical area, with families travelling considerable distances each day. A substantial proportion of younger pupils live well beyond the statutory walking distance of two miles, and similarly, many older pupils reside beyond the three-mile threshold. In practical terms, this means that walking is not a realistic option for the majority of families. Implementing a scheme that restricts vehicle access without viable alternatives fails to reflect this reality and risks placing an unreasonable burden on parents and carers.</p> <p>Equally concerning is the likely redistribution of traffic. By restricting access on roads closest to the school, vehicles will inevitably be diverted onto surrounding routes, most notably Vines Lane. This is a narrow, historic road already under pressure during peak times and frequently used by pupils crossing at either end. Increasing traffic flow here would heighten risk rather than reduce it, particularly at the already complex junction with Maidstone Road, Crow Lane and Lockington Grove, where visibility is limited and navigation is challenging.</p> <p>The environmental justification for the scheme also warrants closer scrutiny. While the intention to reduce emissions near the school is commendable, the displacement of traffic onto adjacent roads undermines this objective. Vines Lane borders The Vines, a valued green space that plays an important role in local air quality and community wellbeing. Concentrating traffic and associated emissions in this area risks damaging an important environmental and heritage asset, rather than protecting it.</p> <p>There are also notable concerns regarding the clarity and transparency of the proposal. The exact boundaries of the scheme remain unclear, particularly in relation to roads such as Crow Lane. In addition, there is insufficient information about how the scheme would operate outside of term time, including which school calendar would apply. Practical issues with the consultation process itself—such as poorly displayed information that makes it difficult for residents to respond—further undermine confidence that this has been conducted in a fully accessible and transparent manner.</p> <p>In contrast, I would encourage the Council to give serious consideration to alternative measures that improve safety without displacing traffic in a way that creates new risks. A reduced speed limit across the wider local area, for example, would provide a more balanced and effective approach, enhancing safety for pedestrians while maintaining reasonable access for those who must travel by car.</p> <p>As both a resident and someone who works on St Margaret's Street, this will affect the daily</p> | <p>Objection noted.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                         |

|  | <p>operations of my colleagues and myself.</p> <p>For these reasons, I urge the Council to reconsider the current proposal and to engage more closely with the community to develop a solution that reflects the specific characteristics of this school and its surrounding area.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                         |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street scheme affecting the area surrounding King’s School Rochester. While I understand the intention to improve safety and air quality, I do not believe the current proposal adequately reflects the realities of the school community or the constraints of the local road network.</p> <p>A key concern is the nature of the school’s catchment. King’s School Rochester serves families across a wide geographical area, and many pupils travel significant distances each day. For a large proportion—particularly younger children—walking is not a viable option, with journeys often exceeding statutory walking thresholds. In this context, restricting vehicle access close to the school risks creating practical difficulties without offering a realistic alternative.</p> <p>The proposal also raises serious concerns regarding traffic displacement. Diverting vehicles onto Vines Lane would place additional pressure on a narrow, historic route that is already heavily used by pupils crossing at peak times. The junction with Maidstone Road, Crow Lane and Lockington Grove is particularly challenging, with poor sightlines and complex traffic movements. Increasing traffic flow through this area is likely to heighten, rather than reduce, risk for children and pedestrians.</p> <p>Environmental considerations further complicate the proposal. By shifting congestion onto Vines Lane, traffic—and therefore emissions—would be concentrated alongside The Vines and nearby school spaces. This outcome appears counterproductive, given the importance of protecting green space and maintaining air quality in areas where children learn and play.</p> <p>A more effective approach would be to focus on targeted, practical measures that address congestion and safety without displacing traffic into unsuitable areas. For example, introducing a one-way system along King Edward Road could significantly improve traffic flow and reduce bottlenecks at peak times. In addition, consistent enforcement - through the presence of wardens and the use of cameras - would help tackle illegal parking, which is a major contributor to congestion and safety concerns in the area.</p> <p>In its current form, the proposed scheme risks introducing new hazards while failing to resolve existing issues. I would strongly encourage the Council to reconsider and instead prioritise solutions that are both workable and sensitive to the specific needs of the school and wider community.</p> <p>Yours faithfully,<br/>[REDACTED]</p> | <p>Objection noted.</p> |

|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street scheme in the vicinity of King's School Rochester. As both a teacher at the school and a parent of 2 pupils in attendance I am impacted daily by the situation and, while I understand the intention behind the proposal, I do not believe it reflects the practical realities of the area or the needs of the families it will affect.</p> <p>King's School serves a wide regional catchment, and for many families, travelling by car is not a matter of convenience but necessity. The majority of pupils live beyond a reasonable walking distance, meaning that restricting access does not reduce demand for travel — it simply displaces it.</p> <p>In practice, this displacement is likely to intensify existing problems. There is already extremely limited parking in the surrounding roads, and any restriction within the proposed zone will inevitably push vehicles further out into neighbouring streets. This is particularly concerning given the presence of other local schools in the immediate area, which already place significant pressure on nearby roads at peak times. Increasing congestion in these locations risks making conditions more hazardous, not safer.</p> <p>Vines Lane is also not a suitable alternative route for increased traffic. It is narrow, constrained, and heavily used by pupils crossing at both ends. The nearby junction with Maidstone Road, Crow Lane and Lockington Grove is already complex and difficult to navigate, and further traffic flow here would only heighten safety risks.</p> <p>I am also concerned that the scheme overlooks existing safety shortcomings. There is currently no safe or convenient crossing point on Maidstone Road close to King's School near either Lockington Grove/Crow Lane or King Edward Road, which already places families in a vulnerable position. Introducing a scheme that encourages additional movement across this road, without first addressing this issue, seems fundamentally flawed.</p> <p>There are also clear opportunities to improve traffic management in a more targeted and effective way. For example, reviewing and adjusting local parking restrictions or charging times could enable parents to park safely in appropriate nearby locations, reducing unsafe stopping and unnecessary circulation of vehicles.</p> <p>In addition, a review of traffic flow around the area could deliver meaningful safety improvements. Introducing a one-way system on King Edward Road — for example, from St Margaret's Street through to Maidstone Road, even if only during school drop-off and pick-up times — would significantly ease congestion. At present, vehicles are frequently forced to mount pavements to allow two-way traffic to pass, creating an unacceptable risk to pedestrians, particularly families with young children.</p> <p>Finally, I would urge consideration of alternative approaches that improve safety without displacing traffic into already stressed residential roads. A wider 20mph zone across the surrounding area would offer a more balanced and effective solution, benefiting all road users without creating new pressure points.</p> <p>I hope these concerns will be taken seriously as part of the consultation process.</p> <p>Yours faithfully,<br/>[REDACTED]</p> | <p>Objection noted.</p> |

|   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                  |
|---|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
|   | <p>To the Consultation Team,</p> <p>I am writing to formally register my opposition to the proposed timed road closures around local schools.</p> <p>While I support the principle of student safety, I believe the current proposal is flawed for several reasons:</p> <ul style="list-style-type: none"> <li>• Traffic Displacement &amp; Congestion: Closing specific roads does not remove traffic; it simply redirects it. I am concerned this will cause severe congestion on surrounding residential streets, potentially creating a more hazardous environment for pedestrians and residents in those areas.</li> <li>• Misaligned Objectives: The proposal feels less like a targeted safety initiative and more like a revenue-generating scheme for the council through enforcement fines.</li> <li>• Alternative Safety Priorities: If the council's true priority is road safety, I suggest redirecting resources toward known "black spots" that currently lack basic infrastructure; specifically:</li> <li>• Maidstone Road: An additional crossing near The Vines is urgently needed.</li> <li>• Borstal Street / Cookham Hill Junction: This is a dangerous blind junction on a bend. With several elderly care homes nearby, pedestrians are currently forced to risk their lives crossing a busy intersection with no safe crossing points.</li> </ul> <p>I urge the council to reconsider these closures and instead focus on the high-risk areas mentioned above to provide a comprehensive safety solution for all residents.</p> <p>Kind regards,<br/>[REDACTED]</p> | Objection noted. |
| Y | <p>Dear Sir / Madam</p> <p>I am writing to formally object to the proposed School Street scheme in the vicinity of King's School, Rochester. While I recognise and support the broader objective of improving safety and air quality around schools, I do not believe the current proposal achieves those aims in a practical or equitable way for this particular community. I am not only a member of staff at King's School Rochester, I am also a local resident.</p> <p>Please see the letter attached for my formal objection.</p> <p>Kind regards<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Objection noted. |
|   | <p>The Council has not accounted for the significant travel distances of King's School families - the average commute is 8.9 miles. Crucially, 73% of our pupils under the age of eight live beyond the two-mile statutory maximum walking distance, and 70% of those over eight live beyond the three-mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment where walking is not a viable option for them.</p> <p>The scheme will route all traffic through Vines Lane, a narrow and historic road ill-suited to any increase in traffic volume. This road is a major crossing point for our pupils at both ends during peak times.</p> <p>There is a significant lack of clarity regarding the geographic scope of the scheme, specifically whether Crow Lane is to be encompassed. Furthermore, it is unclear if the scheme operates during school holidays and, if it does, which specific school's holiday calendar is being used as the benchmark.</p> <p>I am in support of the 'Rochester Residents Alternative Plan' to introduce a 20mph limit</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Objection noted. |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                         |

|  | <p>beginning at the High Street and extending through Boley Hill and Minor Canon Row. This would encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road.</p> <p>Yours faithfully<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                         |
|  | <p>Dear Sirs,<br/>Subject: Objection to Proposed School Street Measures near King's School Rochester<br/>I am writing to formally object to the introduction of the proposed School Street scheme near King's School Rochester. While I recognise the intention to improve safety and air quality, I believe the current proposal is unsuitable for this location and raises several serious concerns.</p> <p>A key issue for us is the nature of the school's intake. King's draws pupils from a wide geographical area, meaning that travel to and from school is not comparable to that of a typical local catchment school. A substantial proportion of our families live well beyond reasonable walking distance, particularly younger pupils who cannot travel independently. For many, travelling by car is not a matter of convenience but necessity. A restriction of this kind fails to reflect the realities of how the school community operates.</p> <p>The proposal also risks creating unintended safety problems by diverting traffic into surrounding routes that are not designed to accommodate additional volume. Vines Lane, in particular, is narrow and is already heavily used during peak school times. It is frequently crossed by pupils and families, and increasing traffic along this route would heighten risk rather than reduce it. The nearby junction with Maidstone Road, Crow Lane and Lockington Grove is already challenging to navigate, with limited visibility and complex traffic movements. Adding further pressure here could significantly compromise road safety. I have worked at the school for over ten years and commute more than twenty miles to do so; channelling all vehicles along Vines Lane would be intolerable. Furthermore, we have to consider the safety of our pupils, who regularly have to cross Vines Lane to access different areas of our site and an increase in traffic here at key times would increase risk to them.</p> <p>There are also environmental considerations that appear to have been overlooked. Redirecting traffic away from the immediate school frontage does not remove emissions—it simply relocates them. Concentrating vehicles along Vines Lane, adjacent to The Vines and close to school facilities, risks undermining the stated objective of improving air quality. This area is not only a valued green space but also an important setting for both residents and pupils, and it should be protected accordingly.</p> <p>In addition, the consultation process itself lacks clarity. Important details about the scope and operation of the scheme remain uncertain, including whether certain roads are included and how restrictions would apply during school holidays. Furthermore, the way in which consultation information has been presented locally makes it unnecessarily difficult for residents to respond properly. A process of this significance should be transparent and accessible to all affected parties.</p> <p>Rather than proceeding with the current proposal, I would encourage consideration of a more balanced approach that improves safety without displacing traffic into unsuitable areas. The alternative plan put forward by local residents, particularly the introduction of a 20mph speed limit across the wider road network surrounding the school, offers a more proportionate and effective solution. This would enhance safety for pedestrians and road users alike while avoiding the concentration of traffic in already sensitive locations.</p> | <p>Objection noted.</p> |

|  | <p>For these reasons, I urge the Council to reconsider the proposed scheme and engage more closely with the local community to develop a safer and more practical alternative.</p> <p>Yours faithfully,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                         |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to express my concerns regarding the proposed School Street scheme in the vicinity of King's School, Rochester.</p> <p>A central issue with the proposal is the nature of the school's catchment. King's draws pupils from a wide geographical area, meaning that many families are not local residents and cannot reasonably walk to school. A significant proportion of younger pupils live well beyond the statutory walking distance, and this remains true for older students. Any policy built on the assumption of localised, walkable access does not reflect the reality of how this school community functions, and risks placing an undue burden on families who have no practical alternative to car travel.</p> <p>In addition, the likely redistribution of traffic raises serious safety concerns. Restricting access in one area will inevitably push vehicles onto surrounding roads, particularly Vines Lane. This route is narrow, constrained, and already heavily used by pupils crossing at key points during the school day. Increased congestion here would heighten risk, especially at the already difficult junction connecting Vines Lane with Maidstone Road, Crow Lane and Lockington Grove, where visibility and traffic flow are problematic.</p> <p>There are also environmental implications that seem to run counter to the stated aims of the scheme. Redirecting vehicles along Vines Lane would concentrate emissions alongside The Vines, an important green space within Rochester that contributes to both local air quality and the character of the area. Rather than reducing pollution exposure, the proposal risks relocating it to a setting used by pupils, residents, and the wider community.</p> <p>I am also concerned by the lack of clarity in the consultation and planning process. It remains uncertain which roads are definitively included within the scheme, and how operational details—such as timings and applicability during school holidays—would be managed. Furthermore, the way information has been displayed locally has made it unnecessarily difficult for residents to engage fully with the consultation, which undermines confidence in the process.</p> <p>For these reasons, I do not believe the current proposal represents the most effective or balanced approach. I would instead support a broader, area-based solution focused on reducing vehicle speeds. A 20mph limit implemented across the surrounding roads would improve safety for pedestrians and cyclists while avoiding the unintended consequences of traffic displacement. Such an approach would be more proportionate, inclusive, and better suited to the realities of the area.</p> <p>Thank you for considering my views.</p> <p>Yours faithfully,<br/>[REDACTED]</p> | <p>Objection noted.</p> |

|  | <p>To whom it may concern</p> <p>I am writing to formally register my objection to the proposed School Street Scheme near King's School Rochester. While I appreciate the intention to improve safety and air quality, I believe the proposal is fundamentally flawed in its assumptions and likely consequences.</p> <p>A key concern is the nature of the school's intake. King's School serves a wide geographic area, with many families travelling considerable distances each day. A large proportion of pupils live well beyond reasonable walking distance, particularly younger children. For these families, car travel is not a matter of convenience but necessity. Any scheme that restricts vehicular access without viable alternatives risks placing an undue burden on a significant majority of the school community.</p> <p>Equally troubling is the likely redistribution of traffic. The current proposal appears to divert vehicles դնալի Vines Lane, a route that is neither designed nor suitable for increased traffic flow. This road is already heavily used by pedestrians, including schoolchildren, and functions as a key crossing point during peak hours. The nearby junction with Maidstone Road and surrounding streets is already difficult to navigate safely, and additional congestion will only heighten the risk of accidents.</p> <p>There is also an environmental contradiction at the heart of the scheme. Rather than reducing emissions overall, it seems likely that traffic will simply be displaced and concentrated along alternative routes. Of particular concern is the impact on The Vines, an important local green space that contributes to the area's environmental quality. Increasing traffic along its perimeter risks undermining the very air quality improvements the scheme seeks to achieve, while also affecting nearby educational and recreational spaces.</p> <p>I would also highlight the lack of clarity surrounding key aspects of the proposal. It remains uncertain which roads are definitively included, how the scheme will operate outside of term time, and which school calendar will apply. Additionally, the way consultation materials have been presented locally has made it unnecessarily difficult for residents to access essential information and respond effectively. This raises concerns about the transparency and accessibility of the consultation process.</p> <p>In contrast, I support a more balanced approach that prioritises safety without displacing traffic in a harmful way. A reduced speed limit across the surrounding residential area would offer a practical and proportionate solution, improving safety for pedestrians and residents alike while avoiding the unintended consequences associated with road closures and diversions.</p> <p>For these reasons, I urge the Council to reconsider the current proposal and to engage more fully with the realities faced by local families and residents.</p> <p>Yours faithfully,<br/>[REDACTED]</p> | <p>Objection noted.</p>                                                                                                                                                                                                                                                                                                                                        |
|  | <p>As a resident of Rochester for nearly 40 years living with the school drop off time for ALL the schools in the area I believe that the only solution is to put in place a traffic calming scheme that slows traffic down as outlined in point 7.</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

|  | <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly</p> | <p>to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> |

|  | <p>increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,</p> | <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street Scheme in the vicinity of King's School Rochester. While I appreciate the intention to improve safety and air quality, I believe the current proposal is fundamentally flawed in both its assumptions and its likely real-world impact.</p> <p>A central issue lies in the nature of the school's intake. King's School serves a wide regional area, with many families travelling considerable distances each day. For a large proportion of pupils, particularly younger children, walking is not a practical or safe alternative due to the length of their journeys. Any scheme that assumes a meaningful shift toward walking or cycling fails to reflect the reality of how this school community operates. As a result, the proposal risks creating inconvenience without delivering the intended behavioural change.</p> <p>There are also serious concerns regarding the redistribution of traffic. Restricting access in one location does not eliminate vehicles; it simply redirects them. In this case, the burden would fall heavily on nearby routes such as Vines Lane, which is neither designed nor suitable for increased congestion. This road is already heavily used by pupils and families, and additional traffic would heighten the risk at key crossing points. The nearby junctions are already challenging to navigate, and any further pressure could significantly compromise safety.</p> <p>The environmental justification for the scheme is equally questionable. Concentrating traffic along alternative routes may lead to higher levels of idling and emissions in those areas, particularly adjacent to green spaces and residential zones. Rather than reducing pollution overall, the scheme risks shifting it into more sensitive locations, undermining its stated objectives.</p> <p>I am also concerned by the lack of clarity surrounding how the scheme would be implemented. Key details appear unresolved, including the precise boundaries, operational times, and how variations such as school holidays would be handled. Clear and accessible communication is essential for meaningful public engagement, and at present this appears insufficient.</p> <p>In contrast, I support a more balanced approach that prioritises safety without displacing traffic in a harmful way. A reduced speed limit across the wider area, alongside targeted traffic calming measures, would provide a more proportionate and effective solution. Such an approach would benefit all road users while avoiding the unintended consequences associated with the current proposal.</p> <p>For these reasons, I urge the Council to reconsider the scheme in its present form and to engage more fully with the community to develop a safer, more practical alternative.</p> <p>Yours faithfully,<br/>[REDACTED]</p> | Objection noted. |
|  | <p>Dear Sir or Madam,</p> <p>I writing to object to the proposed School Street and traffic changes in ME1. The intention is to make the area safer, but I do not believe this proposal will achieve this. It will simply push the congestion and problems up hill, into neighbouring streets. These roads are already busy at school drop-off and pick-up times and these unconsidered proposals will make matters worse</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Objection noted. |

|  | <p>for everyone who uses these key routes regularly, particularly for our children.</p> <p>The proposal to channel traffic along the Vines makes the Kings School less safe for their pupils. It increases pollution between this beautiful public park and the Kings School playground. It heightens the risk to children as they use the crossing point to the Paddock from the Vines</p> <p>Using Watts' Avenue more just compromises St Andrews School with increased traffic and pollution. Making this little stretch of St Margaret's Street one way increases careless speedy driving where there is limited visibility and more children crossing .It heightens the risk to these children as they cross these roads to get to their school. This road gets congested at points where only one car can pass, and at these busy times having both Gordon Terrace and Roebuck Road eases and spreads the burden. If access is blocked in the streets closest to the school, cars will simply queue, idle and park illegally in nearby roads instead. This will increase congestion and pollution and poor driver behaviour in those areas without reducing the overall amount of traffic.</p> <p>If Roebuck Road becomes one way it will reduce the easement it offers now, additionally it will cause drives to drive faster and also it pushes traffic all the way uphill to Priestfields when Watts' Avenue is busy.</p> <p>These ill considered proposals also push the traffic out on to the Maidstone Road and into Union Street, increasing poor parking and idling cars close to Troytown School.</p> <p>Parents in the two private schools will continue to drive their children to school. The average distance pupils these pupils travel to study here is over eight miles, and most of them are under eleven years of age.</p> <p>I am also concerned about negative impact on the quality of our lives in this area. Our everyday journeys longer and more difficult , not just for residents on these roads but for all residents who live nearby, making it harder for the network of industries that service this neighbourhood to function. Supermarket and on line deliveries, postal deliveries, home health care, builders, gardeners, childminders , as well as friends and family will be restricted and inconvenienced by these ill-considered, un- researched proposals. All will struggle to function normally – and not just on the roads in the proposal but the roads further up St Margaret's Street.</p> <p>Introduce a general 20 mph speed limit in the area. This would calm traffic while still allowing residents children parents and visitors to move normally through the local road network. No solution is perfect, but this would be a welcome improvement for all of us.</p> <p>Use more traffic wardens to control poor road use.</p> <p>Yours faithfully,<br/>[REDACTED]</p> |                         |
|  | <p>To whom it may concern,</p> <p>I am writing to formally object to the proposed School Street Scheme in the vicinity of King's School, Rochester. While I recognise the intention to improve safety and air quality, I believe the current proposal is fundamentally flawed in both its assumptions and its likely real-world consequences.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <p>Objection noted.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                  |
|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
|  | <p>A central issue is the nature of the school's intake. King's School serves a wide geographical area, and the majority of families travel considerable distances each day. For many pupils, particularly younger children, walking is simply not a practical option due to the length and complexity of their journeys. Any policy that relies on a significant shift toward walking fails to reflect the lived reality of these families and risks creating additional stress and disruption without delivering meaningful benefits.</p> <p>In any case, by school drop-off time, car parks in Rochester are usually already filled by commuters. This leaves no reliable source of safe parking for children and their parents for whom public transport is not viable due to the distances involved and young ages of many of our children.</p> <p>The proposal also appears to overlook the knock-on effects on surrounding roads. By restricting access in one location, traffic will inevitably be diverted elsewhere—most notably onto Vines Lane. This route is narrow, constrained, and already heavily used at peak times. It is also a key crossing point for pupils, making any increase in traffic volume particularly concerning. The nearby junction with Maidstone Road and adjoining streets is already difficult to navigate safely, and further congestion or rerouting will only heighten the risk to both pedestrians and drivers.</p> <p>There are also environmental implications that seem to contradict the stated aims of the scheme. Redirecting vehicles rather than reducing them will concentrate emissions along alternative routes, including areas adjacent to green space and school facilities. Rather than improving air quality overall, the proposal risks shifting pollution to locations where it may have a more direct impact on children and the wider community.</p> <p>In addition, there is a lack of clarity around key aspects of how the scheme would operate. Important details—such as the precise boundaries, whether certain roads are included, and how restrictions would apply during school holidays—remain uncertain. The consultation process itself has also been difficult to engage with, as practical barriers have limited residents' ability to fully understand and respond to the proposal. This undermines confidence in the process and raises concerns about whether all viewpoints are being fairly considered.</p> <p>Given these issues, I do not believe the current scheme represents a balanced or effective solution. A more proportionate approach—such as implementing a reduced speed limit across the wider area—would improve safety without forcing traffic into unsuitable routes or placing undue burden on families who rely on vehicles for essential journeys.</p> <p>I urge the Council to reconsider the proposal in its current form and to engage more fully with residents and stakeholders in developing an alternative that genuinely enhances safety, accessibility, and environmental outcomes for everyone.</p> <p>Yours faithfully,<br/>[REDACTED]</p> |                  |
|  | <p>Dear Sir/Madam,</p> <p>I would like to comment on the proposed school street scheme on behave of myself and my wife.</p> <p>We live in [REDACTED] and are directly and negatively affected by the changes proposed. We have been living here for 30 years and are planning to stay into our retirement and elder years.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Objection noted. |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                         |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
|  | <p>When we moved into the area, we were aware that there are several school in the area and we are between King School and St Andrews: both these schools create an issue with traffic during the morning drop off and afternoon pick up times. This is a minor inconvenience for living in such a nice area of Rochester.</p> <p>In general visiting parents are polite, park responsibly and on the occasional times when they are a nuisance the issue is sorted quickly. Most of our neighbours on St Margaret's Street and Roebuck Road feel like us and we enjoy living here.</p> <p>The proposed scheme is designed to solve a "safety problem". There is no evidence this exists. The plans will not make the streets safer for children and will simply push the problem of school drop off and collection elsewhere. Roebuck, Watts' Avenue and The Vines will become more congested and increase emissions on these roads.</p> <p>We will be hugely inconvenienced for no benefit to residents or the school population. Our friends, family and visitors will face fines which are unfair when they come visit. Our carers and delivery drivers will face the same restrictions and have to endlessly appeal against fines. We have evidence of "revenue generation" from the way the council manages the Saturday car restriction on Rochester High Street. Many friends and family have had fines because this scheme is poorly managed. The same will happen with the proposed scheme.</p> <p>It will cost us money in permits fees - a tax for living beside schools. We already pay a significant council tax rate for living on St Margaret's Street.</p> <p>We agree with the objections raised at the public meeting on the 12th March 2026.</p> <ol style="list-style-type: none"> <li>1. No evidence the scheme will reduce emissions</li> <li>2. Unfair process without clear response to previous scheme proposal</li> <li>3. Changing a heritage environment with new cameras and signs</li> <li>4. Unnecessarily restricting movement</li> <li>5. Create new bottlenecks</li> </ol> <p>There is general agreement that a 20 mph speed limit would be a better scheme to achieve a safer environment.</p> <p>Yours faithfully,<br/>[REDACTED]</p> |                         |
|  | <p>Dear Sirs</p> <p>Further to my submission, it needs to be put on record that a 20mph scheme around a school has already been implemented in the area, doubtless as a safety/speed-suppressing measure. Speed bumps are additionally in place on King Street.</p> <p>This is for the benefit of St. Margaret's at Troy Town on King Street and John Street (Man of Kent PH). This begs the question: if it is deemed a positive measure for other schools then why not for King's and St. Andrew's?</p> <p>This reinforces "The Rochester Residents' Alternative Plan" as put forward with an expanded central Rochester 20mph zone.</p> <p>As an aid I am attaching photographs of the signage surrounding the Troy Town Scheme.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>Objection noted.</p> |

|   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                  |

|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>(d) any other matters appearing to the strategic highways company or the local authority to be relevant.”</p> <p>The current proposals appear to be in direct conflict with this duty by –</p> <p>A. creating a serious highway safety risk (failure to secure the expeditious, convenient and safe movement of vehicular and other traffic);</p> <p>B. impacting upon the amenity of local residents and parents of the local private school which rely on this reasonable means of access; and</p> <p>C. creating increased traffic journeys and congestion/idling, which will lead to an increase in emissions.</p> <p>First, it is worth noting the very important but distinctive context relating to this specific school street proposal. The two schools in this immediate location are private independent schools (King’s School and St Andrew’s Primary). This proposed TRO fails to take account of the fundamental difference between independent schools and local authority schools in terms of how families travel. Independent schools do not operate localised catchment areas, meaning pupils typically travel from a much wider geographic area and the majority of parents necessarily rely on driving for daily drop-off and pick-up. The TRO appears to be designed around the assumptions of a small, walkable local catchment, which simply does not reflect how both of these school communities function. By restricting vehicle access without accommodating the broader travel needs of families, the proposal risks creating significant practical difficulties and potentially unsafe conditions as parents attempt to navigate alternative arrangements on surrounding roads. Any school street scheme must reflect the actual travel patterns of the school population, and in this case the larger catchment and higher proportion of car-dependent journeys have not been adequately considered.</p> <p>The particular concerns as a parent of St Andrew’s pupils are:</p> <p>1. Parents living on the far side of Rochester Bridge (covering areas such as Strood, Gravesend, Cliffe, Hoo, Ebbsfleet, and Dartford) all rely on travelling up St Margaret’s Street to join Watts’ Avenue. This route currently works efficiently, avoids crossing against oncoming traffic, and prevents congestion from building on surrounding roads. The proposed TRO would instead divert all of these vehicles along The Vines towards the four-way junction at Crow Lane, The Vines, Maidstone Road and East Row. This junction already requires difficult right-hand turns across two lanes of traffic, and drivers would simultaneously have to navigate a lollipop crossing and a priority flow of oncoming vehicles at the narrow end of The Vines. This dramatically increases the likelihood of congestion and tailbacks spreading from the junction onto Maidstone Road and all the way down The Vines. Because The Vines is not a free-flowing two-way street, even moderate queues would risk blocking the entire road due to its priority-flow pinch points. Furthermore, parents would then still have to turn into Watts’ Avenue from Maidstone Road, again requiring a right turn across busy traffic. This will worsen congestion on Maidstone Road (already a heavily used route serving multiple secondary schools) and lead to increased idling and air pollution. In short, the proposed diversion creates significantly more traffic conflict, complexity, and environmental impact than the current arrangement. I consider this aspect of the proposal would heighten, not reduce, highway safety issues and congestion.</p> |  |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>2. Linked to the point above, it should be noted that King's School pupils cross The Vines Lane in large capacities (i.e. 20-50 pupils at a time) from the school field gate, across The Vines Lane and through The Vines towards the other area of the school or for morning services in The Cathedral. The increase of traffic at exactly the same time as that crossing takes place along Vines Lane increases the chance of pedestrian / vehicle conflict and also further constraints on flow of traffic which will exacerbate the potential harms set out in point 1 above.</p> <p>3. In addition, there is a risk that by creating only one route, all reliance is then placed on this route. This would cause massive issues if there were an accident, broken down vehicle, large vehicles blocking The Vines. In this situation, a complete gridlock would form with no alternative route and therefore this would lead to disproportionate impacts and could mean large numbers of pupils being late to school which is clearly far from desirable. Likewise, it would prove very problematic for emergency services to access areas if those routes have become gridlocked without a secondary route which could be used.</p> <p>4. Furthermore, I struggle to see the justification for including St Margaret's Street within the School Street proposal. There is no school entrance on this road, and all access points for King's School are located towards Crow Lane junction. Directing more traffic along The Vines; therefore bringing vehicles closer to the primary entrance for the lower school seems counter-intuitive from a safety and traffic-management perspective and increase the road safety audit likelihood for vehicle/pedestrian and/or vehicle/vehicle conflict. St Margaret's Street itself has very limited parking capacity, with the road being narrow in places and restricted to resident bays or no on-street parking. These physical and legal constraints already prevent parents from attempting to use it for school drop-off or pick-up, and in doing the school run I have never seen parents park there. As such, removing St Margaret's Street from the TRO would have little to no negative impact, but would create a significant positive benefit for families needing safe, direct access to St Andrew's Primary School. It would also avoid diverting unnecessary traffic into areas where it creates greater congestion and increased safety risks for pupils.</p> <p>5. For this proposal to be adequately tested and within the scope of the law, a full modelling exercise must be done of the wider highway network taking all these points into account so users can feel confident and reassured in any decisions made. Tweaking the proposal without consideration of the downstream effects is likely to create, rather than solve, problems.</p> <p>6. The TRO (necessitated by the proposed amended development) causes rerouting, congestion, or longer journeys, these impacts can adversely affect the likely significant environmental effects, including air quality and climate change.</p> <p>Finally, the information on <a href="https://www.medway.gov.uk/info/200137/schools_and_learning/1791/school_streets_scheme/4">https://www.medway.gov.uk/info/200137/schools_and_learning/1791/school_streets_scheme/4</a> relating to this consultation does not provide any relevant background information, surveys undertaken, scope of wider highway modelling, technical reports in support of proposals and therefore the proposed consultation is insufficient as we are being asked to comment on something without underlying supporting information or to properly analyse the justifications for this. It is not right in law to proceed with a TRO where consultation is done in such a vague way. The onus is on the highway authority to demonstrate how this TRO has been properly prepared and considered and meets the objectives set out by the authority and in legislation. It has the potential for huge implications to daily lives and amenities in Rochester and therefore cannot be a decision taken lightly. The comments provided in this letter are therefore done on a without prejudice basis and any right of reply to such additional evidence</p> |  |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                  |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
|  | <p>The elements of the proposed TRO which I do SUPPORT, in principle, are:</p> <ol style="list-style-type: none"> <li>1. Inclusion of King Edward Road in the school street zone.</li> <li>2. Roebuck Road being one-way.</li> <li>3. Part of St Margarets being one-way as proposed.</li> <li>4. Watts' Avenue being one-way.</li> </ol> <p>In July 2025 The Council advised that it will be implementing new School Streets to help</p> <ol style="list-style-type: none"> <li>1. reduce congestion</li> <li>2. make the roads outside schools safer at pick-up and drop-off times</li> <li>3. encourage families to walk, wheel or cycle to school.</li> </ol> <p>For the reasons set out above, it is certainly the case that 1 and 3 will not be achieved for this particular proposal and the Council need to accept and recognise that independent schools operate very differently in terms of pupil catchment areas to state schools and therefore with the best will in the world, the vast majority of parents will not be able to walk or cycle to school as may be the case for local state school catchment-based families.</p> <p>Regards,<br/>[REDACTED]</p> |                  |
|  | <p>Dear Sir / Madam<br/>Att. Parking design team.<br/>I am resident and householder at [REDACTED] and have been for 24 years. One may add that during that time I have paid full council tax.</p> <p>I wish to register my objection to council proposals as in your document of the 5 March 2026. I also wish to support the King's school proposal for a 20 mph including each of the three named roads plus Roebuck Road and Watts av, holding in mind there is busy school in Watts' Avenue. This should reduce pollution and increase safety through a simple cost effective measure. I note such a measure is outside Troy Town school which is close by, so not introducing any radical new measure.</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                            | Objection noted. |
|  | <p>Dear Medway Council</p> <p>I am writing to register my firm opposition to the proposed School Street scheme for King's School Rochester. The scheme is being presented as a safety measure, yet it disregards the realities of the area, the needs of residents, and the predictable consequences of displacing traffic into neighbouring streets.</p> <p>Residents have repeatedly raised clear, evidence-based objections, but these concerns appear to have been sidelined. The proposed restrictions would significantly obstruct access to homes, create daily disruption for those with caring responsibilities or mobility needs, and intensify congestion on streets that are already under pressure. This is not a minor</p>                                                                                                                                                                                                                                                                                                                                                                                                                                     | Objection noted. |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>inconvenience; it is a fundamental change to how residents are able to live and move within their own neighbourhood.</p> <p>A particularly serious oversight is the impact on St. Andrew's School. By diverting vehicles away from King's School, the scheme will funnel displaced traffic directly into the vicinity of St. Andrew's—an area with younger pupils, narrow approaches, and no capacity to absorb additional vehicle flow. Far from improving safety, the proposal risks creating a new danger zone at another school's doorstep. It is unacceptable to solve one school's traffic issues by transferring the hazard to another.</p> <p>Local businesses have also voiced strong objections. Restricted access during peak hours will deter customers, disrupt deliveries, and undermine the viability of independent traders who rely on predictable footfall and vehicle access. The scheme effectively prioritises the convenience of a private institution over the livelihoods of those who contribute to the economic and social fabric of Rochester.</p> <p>It is also worth noting that King's School already has extensive private grounds and controlled access points. There are numerous alternative safety measures—crossing patrols, staggered timings, on-site traffic management—that could be implemented without imposing sweeping restrictions on public roads. The fact that these options have not been meaningfully explored raises serious questions about the proportionality and fairness of the current proposal.</p> <p>The level of opposition from residents is substantial, consistent, and justified. This is not resistance to change; it is a demand for a balanced, responsible approach that protects children without creating new risks or imposing unreasonable burdens on the wider community. The current scheme fails that test.</p> <p>I urge the council to withdraw or fundamentally reconsider this proposal and to engage with residents in a transparent, good-faith manner to develop solutions that genuinely enhance safety rather than simply shifting problems elsewhere.</p> <p>Yours sincerely,</p> <p>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|  | <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment</p> | <p>The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                             |
|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p> |                                                                                                                                                                                                                                                                                                                                                                                                                             |
|  | <p>Dear Mr Bryan,</p> <p>FORMAL OBJECTION: PROPOSED SCHOOL STREET SCHEME</p> <p>Please find below a letter from the residents of the neighbourhood to which the council's proposals apply, which I full endorse.</p> <p>In addition, I would like to highlight that although this scheme has been labelled a 'School</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|  | <p>Street Scheme', the King's School is only one of 3 schools within the designated area, and any changes to the road users for King's will have an immediate and negative impact on both St Andrew's School and St Margaret's at Troy Town School with regard to traffic displacement and poor air quality. Therefore, this scheme can hardly be held up as a scheme to improve the lives of children, when it is, in fact, likely to cause greater danger to all children and residents in our neighbourhood. Respondees of the previous consultation highlighted this, but it appears that the Council has chosen to ignore the feedback and carry on regardless.</p> <p>You continue to try to push this scheme through, without any discussion with the Head Teachers of the other 2 schools. This reflects extremely badly on the council. So does the fact that the council has deliberately neglected to engage with residents, has withheld the results of the previous statutory consultation, and has gone ahead - speedily - with a scrappy additional consultation which lacks clarity and encompasses a far wider area than what could reasonably be labelled a School Street. This behaviour is not what I expected from a labour council, and I'm beyond disappointed.</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>We are deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> <p>3. Demographic Misalignment and Statutory Distances</p> <p>The Council does not hold the demographic data necessary to judge the appropriateness of this scheme for our specific community. Data from King's School Rochester indicates an average commute for families of 8.9 miles. Critically, 73% of pupils under the age of eight live beyond the two mile statutory maximum walking distance and 70% of those over eight live beyond the three mile statutory maximum. A School Street scheme is fundamentally unsuitable for a regional catchment area where walking to school is not a viable option for the vast majority.</p> <p>4. Heritage and Conservation Impact (Policy DM10)</p> | <p>vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                         |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>5. Environmental Impact: The Vines and School Air Quality</p> <p>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils and the biodiversity of The Vines.</p> <p>6. Severe Safety Risks: The Vines Lane Bottleneck</p> <p>We must express our gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. We cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>7. The Rochester Residents Alternative Plan</p> <p>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> | <p>in the wider area and over a longer period than the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  | <p>In light of the evidence presented, we urge the Council to reconsider the wisdom of proceeding with a scheme that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>We therefore formally request that these proposals be withdrawn immediately. We invite you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people.</p> <p>Yours sincerely,<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
|  | <p>Hello</p> <p>I am writing in response to the proposed school street scheme for King's School Rochester, as a resident of King Edward Road.</p> <p>I am overall IN FAVOUR of the proposal and would support it being implemented.</p> <p>As a resident on King Edward Road I witness on a daily basis hundreds of cars ignoring the current signage and no stop zones outside the school pedestrian gate, stopping in the middle of the road to drop off their children. Parents dropping off and collecting children consistently ignore double yellow lines at both ends of King Edward Road, creating safety issues for pedestrians. In addition, residents' driveways are regularly blocked, often for over 45 minutes, by parents whilst waiting to collect their children. The impact of this is that there are reduced opportunities for cars to safely pass by each other when approaching each other, and cars therefore have to mount the kerb. This creates a very real risk to pedestrians using the pavements.</p> <p>These issues have been reported (to the school) in the past but no measures put in place have managed to solve them. I therefore believe that the school street scheme is the only way to make the roads around the school safer.</p> <p>I would also challenge the formal objection being put in by those associated with the King's School. In their objection they state that 'following a meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals.' This is false, as there is not a 'universal rejection'. We met as a residents group last week, for those who live on or have access to their properties from King Edward Road, to properly discuss the proposal and our views on it. The outcome from this was that we all supported the introduction of the school street scheme in general.</p> <p>Regards</p> |  |

The outcome from this was that we all supported the introduction of the school street scheme in general.</p> <p>Regards<br/>[REDACTED]</p> | Support noted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|  | <p>Dear Sirs,</p> <p>I write to comment, as a resident of St Margaret's Street, Rochester, on the changes relating to the proposed school street at King's School.</p> <p>I do not believe the proposed changes will in anyway achieve the stated objectives of reducing congestion; making the roads outside schools safer at pick-up and drop-off times and encouraging families to walk, wheel or cycle to school. On the contrary, I believe the confusion that the proposed changes will induce will make the streets less safe and will also cause unnecessary inconvenience and issues for local residents, both in the streets specifically addressed and the surrounding area.</p> <p>The only two problems that need to be addressed, for the benefit of school attendees and local residents, are the speed of vehicles on the roads in question (and their surrounds) and the lack of enforcement of existing parking regulations.</p> <p>Regarding reducing congestion, all the proposed changes will achieve is to offload the existing congestion onto surrounding roads, particularly Vines Lane. Given the existing difficulty in</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>Feedback noted.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation.</p> <p>The council is committed to monitoring the school streets schemes and any wider impacts they may have.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars</p> |

|  | <p>entering / exiting Vines Lane onto Maidstone Road (a 5-way junction), Vines Lane in particular will become gridlocked.</p> <p>Regarding safety, in the 15 years we have lived in St Margaret's Street I have never known there to be an accident involving school children. There have been numerous accidents involving local residents entering and exiting their properties, mainly due to inconsiderate / illegal parking and excessive traffic speed. In addition, the proposals focus on King's School but seem to make no reference to improving safety for St Andrew's School (in particular St Andrew's Pre-School in St Margaret's Street, that exits directly onto the road with no path in front) and King's School Playing Fields off The Alps.</p> <p>Regarding encouraging families to walk or cycle to school, I understand the catchment area for both King's and St Andrew's schools are vast, well beyond the distance that a child can be expected to walk or cycle safely. I believe the measures proposed will not reduce the school-related traffic to any meaningful degree.</p> <p>For local residents, all the proposed restrictions will do is impose unnecessary inconveniences to everyday living. For example, it will restrict access to their properties if they lie immediately outside the permit zones (as do I), they will prevent access for on-line deliveries (leading to a possible embargo of delivering to the area?) and for tradespeople (who generally start / end work at the proposed restrictions times) and will prevent access by taxis. My wife is registered sight-impaired and disabled, and restrictions on timing of taxis and pick-ups / drop-offs by family and friends will cause significant complication in scheduling doctor / hospital visits and other essential activities.</p> <p>Instead of the proposed changes, I believe the true issues faced can be addressed by imposing a 20mph (or less) speed limit on key roads, and enforcing the existing parking regulations to enable free flow of traffic. I believe the 20mph limit should apply to all the roads identified in the existing proposal, and should be extended for St Margaret's Street / Borstal Road all the way up to The Alps to give protection to people walking to the King's School playing fields and the Territorial Army Centre. For illegal parking, a traffic warden patrolling the area on a random basis a few times a month would reduce the problem, most of which is due to parents dropping-off and picking-up children. There are ample (legal) on-road parking and car parks available a short distance from the affected schools, so there is no need to park on double yellow lines, in restricted loading areas or in resident-only bays.</p> <p>The one part of the proposal that I thoroughly agree with is the extension of the one-way part of St Margaret's Street from Roebuck Road to Watts' Avenue. As there are no pull-in places on this stretch, people are obliged to drive on the pavement to pass on-coming traffic. This is not safe at any time, let alone at school entry / exit times. This part of St Margaret's Street should be made one-way, as an extension of the stretch from Vine's Lane as proposed. This additional stretch of one-way would also create an automatic circulation from King Edward Road and Roebuck Road down Watts' Avenue for parents of children attending St Andrew's School.</p> <p>Finally, there is no indication in the proposed changes that the restrictions will be relaxed out of term time. Residents will have to suffer the inconveniences outlined above 365 days a year.</p> <p>Yours,<br/>[REDACTED]</p> | <p>outside of school gates, we reduce the likelihood of collisions.</p> <p>Consideration to the decision of the school street is given to the suitability of walking routes and the concerns related to crossing Maidstone Road are noted.</p> |
|  | <p>I'm writing to submit my comments about the Proposed School Street Scheme, which would impact Kings School Rochester staff, residents, pupils and parents.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Feedback noted.</p>                                                                                                                                                                                                                         |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

|  | <p>I do not deem the school to be within suitable walking distance for my daughter and I make provisions for her to take the transport provided by the school. I am also aware that most other children in her class are not within walking distance of the school.</p> <p>On the occasions that I do have to drop her off, I always ensure that I am courteous and contentious with my parking. Also, as there was a recent incident on Crow Lane involving a male assaulting females, I am also hesitant to have my young daughter walk to the school.</p> <p>Schools near me have recently been enrolled in these school street schemes and lack adequate signage to make drivers aware, especially those out of the area, making it seem more like a way to impose fines and catch out people unfamiliar with the scheme, than actually considering the wellbeing and safety of the pupils getting to and from the sites.</p> <p>Times for restrictions also vary depending on the schools, lacking consistency and also catching drivers out. Will the scheme only operate in term times or also outside?</p> <p>I do appreciate that current traffic rates impact on the local residents but I'm fairly certain that the school has been established longer than some of those properties. As a parent of a student at Kings School, I am very much in support of "Rochester Residents Alternative Plan".</p> <p>Kind regards</p> <p>[REDACTED]</p> | <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> <p>School streets only operate in term time.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|  | <p>&gt; To, Parking Design Team,<br/>&gt; Medway council.<br/>&gt;<br/>&gt; I am writing from my home address 20 Roebuck Road, Rochester and find myself in the<br/>&gt; Middle of the proposed scheme which will, potentially, have an adverse impact not only on me,<br/>&gt; But the wider community.<br/>&gt;<br/>&gt; I would ask you to consider the following points before making a final decision:<br/>&gt;<br/>&gt; Has the Council acted fairly throughout the "Consultation" period &amp; taken note of the residents<br/>&gt; Concerns, and those of the school. As no Council Official deigns to attend the public meetings<br/>&gt; One has to wonder?<br/>&gt;<br/>&gt; Whilst children walking to school sounds commendable it is highly unlikely to happen bearing<br/>&gt; In mind that the data from King's School shows a high percentage of pupils under the age of 8 live<br/>&gt; Beyond the three mile statutory maximum walking distance.<br/>&gt;<br/>&gt; I also raise the question of installing road signs, ANPR cameras, speed bumps etc in a Conservation<br/>&gt; Area when in theory there is a Policy/ duty to ensure development (including street furniture) is in keeping<br/>&gt; &amp; not detrimental to the overall ethos of the area we are lucky enough to live in.<br/>&gt;</p>                                                                                                                              | <p>Feedback noted.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal.</p> <p>The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> |

|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>&gt; I am very doubtful that any of the proposals will improve air quality, just create bottlenecks in already</p> <p>&gt; hazardous junctions - Vines Lane, Maidstone Road, Crow Lane &amp; Lockington Grove for example. Or</p> <p>&gt; divert traffic into Roebuck Road, over &amp; above the existing steady flow at school times, with</p> <p>&gt; Parents jostling to park in order for their children to walk down the Public Footpath RRX13 (which forms</p> <p>&gt; Part of the boundary of my home) to King Edward Road. They will then have to follow the one-way system</p> <p>&gt; Into Watts' Avenue &amp; exacerbate the traffic problems for St Andrew's School!!!!</p> <p>&gt;</p> <p>&gt; In the light of this I think serious consideration should be given to The Rochester Residents Alternative Plan</p> <p>&gt; For a 20 mph zone to be enforced across the roads surrounding The Precinct &amp; the three schools thus avoiding</p> <p>&gt; Dangerous concentrations of traffic that your current scheme would inevitably cause.</p> <p>&gt;</p> <p>&gt; I urge the Council to think again, and seriously reconsider their proposal which has met with well founded</p> <p>&gt; Criticism from Schools, residents, local businesses, the Cathedral &amp; Diocese. I look forward to hearing that this will be the case.</p> <p>&gt; Yours sincerely</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                      | <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term.</p> <p>However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>Further to this, across the school streets programme, schemes are subject to a monitoring period after implementation.</p> <p>The scheme also aims to encourage use of more sustainable forms of travel, like walking and cycling, to school to reduce levels of traffic in and around the school gate.</p> <p>Regarding St Andrews School, the scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p>                                                                                                        |
|  | <p>Dear Sirs</p> <p>Following a public meeting on 12 March 2026, attended by over 100 local residents and stakeholders, it was clear that there is a universal rejection of these proposals. We write to outline the following fundamental grounds for objection:</p> <p>1. Failure of Procedural Fairness and Non-Disclosure of Prior Consultation Results</p> <p>I am deeply concerned by the Council's decision to embark upon a new statutory consultation while the results and full rationale of the 2024/25 informal and statutory processes remain unpublished. Correspondence from the Strategic Head of Public Realm confirms that an informal consultation took place between September and October 2024, followed by a subsequent statutory period in early 2025. To date, the substantive feedback from those exercises, including the nearly 70 residents who attended a meeting in April 2025 to voice their opposition, has not been shared with the community. It is procedurally irregular and arguably a breach of the principles of fair consultation to invite further representations when the outcomes of previous stages remain obscured.</p> <p>2. Absence of Evidence Base (Road Safety and Emissions)</p> <p>Information obtained via the Freedom of Information Act reveals that Medway Council holds no specific road safety data for the affected streets. A request for data held on emissions remains unanswered. Given that these factors are cited as the primary justification for the scheme, it is procedurally unsound to implement restrictive measures without a baseline against which to measure impact or prove necessity.</p> | <p>Feedback noted.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term. However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children. The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>In line with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal. The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees and relevant stakeholders. In addition, information was published on the Council's website and feedback</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>3. Heritage and Conservation Impact (Policy DM10)<br/>The proposed installation of approximately 20 signs and multiple ANPR cameras represents a significant and detrimental visual impact on the Rochester Conservation Area. Under Policy DM10: Conservation, the Council has a duty to ensure that development (including street furniture) conserves or enhances the character and appearance of the area. The policy specifically states that "proposals should be sensitive to the historic street pattern, topography and landscape" and must not harm the "significance" of the heritage asset. The clutter of modern signage and surveillance equipment in our historic Precinct directly contradicts this policy. It degrades the aesthetic integrity of the cathedral and school surroundings which we are collectively tasked to protect.</p> <p>4. Environmental Impact: The Vines and School Air Quality<br/>The scheme's stated aim to improve air quality is entirely undermined by the planned displacement of traffic onto Vines Lane. This historic route sits immediately adjacent to King's School Rochester and borders The Vines, one of our city's most significant and sensitive green spaces. Under Policy DM10, the Council is tasked with protecting the landscape and "significance" of such heritage assets; yet, this proposal will funnel a concentrated stream of nitrogen dioxide and particulate matter directly into this urban lung. It is a perverse outcome that a scheme designed to reduce emissions at a school gate will, in this case, significantly increase them alongside classrooms, playing fields and a public park. This is an unacceptable threat to the health of pupils, local residents, tourists and the biodiversity of The Vines.</p> <p>5. Severe Safety Risks: The Vines Lane Bottleneck<br/>I must express my gravest concern regarding the physical danger this scheme poses to school pupils. Vines Lane is a narrow, historic corridor that was never designed for high volumes of through-traffic. It serves as the primary artery for King's School Rochester, with hundreds of pupils crossing at two distinct points throughout the day, including at the times the School Street scheme will operate, as they move between the Junior and Senior sites. The Vines / Crow Lane area is also a major route for older pupils at the Rochester Grammar and St Joseph Williamsonian Maths School to walk between their School and the Railway station.</p> <p>By forcing additional traffic into this bottleneck, the Council is creating a high-risk environment and a significant accident liability. Of particular concern is the junction where Vines Lane, Maidstone Road, Crow Lane and Lockington Grove intersect. This junction is already notorious for its complexity and poor sightlines. To intentionally route a diverted flow of traffic through this hazardous intersection is, in our view, an act of negligence. It will create a "perfect storm" of congestion and risk at the exact moment our children are most vulnerable. I cannot support a plan that prioritises a theoretical traffic "scheme" over the demonstrated physical safety of children navigating a dangerous, historic junction.</p> <p>6. The Rochester Residents Alternative Plan<br/>At the public meeting on 12 March, there was near universal support for the "Rochester Residents Alternative Plan". This proposal advocates for a permanent 20 mph zone to be enforced across the roads surrounding The Precinct and the three schools. This limit would begin at the High Street, extending through Boley Hill and Minor Canon Row, and encompass the entirety of St Margaret's Street, Love Lane, Vines Lane, Crow Lane, King Edward Road, Lockington Grove, Roebuck Road, Watts' Avenue, Gordon Terrace, The Close, Ridley Road, Langdon Road, Horsley Road and Mitre Road. We collectively believe this measure would enhance safety for all pedestrians and residents without creating the dangerous and artificial concentration of traffic on Vines Lane and Maidstone Road that your current scheme would inevitably cause.</p> <p>In light of the evidence presented, I urge the Council to reconsider proceeding with a scheme</p> | <p>received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage.</p> <p>The scheme has been developed in consideration to both schools and it the reason for a change of design with a formal one- way street being proposed and additional traffic calming measures.</p> <p>The scheme aims to reduce the level of vehicle trips to the school gate and aims to improve air quality in the area. It should be noted from Tranche 1 that air quality around the majority of the schools has improved following the introduction of the school street programme.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate, improving pupils ability to safety walk to school. The council recognised a wider need for supporting measures and have change the scheme form the original proposal based on the feedback provide in the first consultation</p> <p>The design of any scheme would take into consideration Rochester's historic environment and the character of the conservation area including for signage and road markings</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safety walk to school. Although a 20 mph speed limit would help to reduce the severity of collisions, create an environment with reduced vehicle number would go further in prevent collisions. It is noted that a 20 mph speed limit would help to improve safety in the wider are and over a longer period that the school street restrictions.</p> <p>Furthermore, if implementation was to go ahead it will be subject to a monitoring review to ensure the scheme does not have a detrimental impact overall.</p> |

|---|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
|   | <p>that the affected schools, local businesses and other stakeholders are stating, unequivocally, will make the environment more dangerous for children. It is a matter of profound concern that a project marketed under the guise of safety and air quality is being forced through despite clear warnings that it will achieve the exact opposite for those it claims to protect.</p> <p>The near-universal opposition from the Cathedral, the Diocese, local businesses and the residents of Rochester cannot be ignored. We are not merely stakeholders; we are the daily stewards of this historic landscape and the guardians of the children who move through it. To dismiss our collective expertise in favour of an unsubstantiated and procedurally flawed scheme is an unacceptable position for the Council to take.</p> <p>I therefore formally request that these proposals be withdrawn immediately. I suggest you instead to engage meaningfully with us on the community-backed 20 mph alternative. This represents a far more sympathetic, balanced and, above all, safe solution that respects both the heritage of Rochester and the physical well-being of its young people, on a 24 hours a day, 365 days a year, rather than the current 10 hours a day 36 weeks a year.</p> <p>Yours sincerely,</p> <p>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                  |
| Y | <p>[REDACTED]</p> <p>Dear TROconsult</p> <p>Thank you for your e-mail re the "School Street Scheme". At the end of the Rochester City Centre Forum meeting on 3rd February when [REDACTED] I had reported on the Council's latest proposal he accepted my suggestion that I should e-mail my views to him. There was no other addressee intended at that time but I am pleased to attach a copy of that e-mail.</p> <p>Since I sent it I have received Council information of the latest proposals but this has not altered my opinion. However, it brought to my attention what would now be a potentially dangerous interaction between vehicles entering Roebuck Road and those in a one-way Watts' Avenue, where the risk of head-on collisions cannot be ignored. This relatively wide intersection is presently safe, and often used, for U-turns by cars and taxis as well at times by large or articulated vehicles, sometimes perhaps when they realise further progress in side-roads may be difficult or even impossible. Refuse collection vehicles can at present safely reverse into and along The Close from Watts' Avenue; this will no longer be possible.</p> <p>Others have pointed out that the signage involved will damage the environment in this well-established residential and conservation area. St Andrew' school seems to get little mention and your afternoon time for the scheme (3.45pm to 4.45pm) does not coincide with the heaviest time for congestion in Watts' Avenue which is 3.15pm to 3.45pm; probably most of this is from St Andrew's and within literally 1 or 2 minutes of 3.45pm the road is clear. I have lived here since 1982 so this is not a one-off observation and I am overlooking the area as I type.</p> <p>I am a believer in evidence based practice and the Council's proposed one-way street plan presents no evidence it is needed either on child (or adult) safety or on</p> | Objection noted. |

|  | <p>pollution grounds. It will disadvantage school drivers twice daily. It will disadvantage local residents 24 hours per day, especially those living in Watts' Avenue, Roebuck Road and King Edward Road who, on average, will accrue more mileage each time they use their cars than they do now, but also others in adjacent areas as a result of altered vehicle routes. One-way streets tend to encourage faster driving, with potential increased injury risk to pedestrians as well as increased exhaust gas pollution.</p> <p>From the attached e-mail you will see that I have suggested a speed limit based arrangement would be far better.</p> <p>Yours faithfully<br/>[REDACTED]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|  | <p>Dear Sir/Madam,</p> <p>I am writing to formally object to the proposed School Street Scheme for the area surrounding King's School Rochester. While I support child safety, this specific plan is impractical and will create new hazards for the following reasons.</p> <p>King's School serves a regional catchment. With an average commute of nearly 9 miles, walking or cycling is not a viable option for the 70% of students who live well beyond the statutory walking distances. This scheme penalizes families for whom driving is a logistical necessity, not a choice.</p> <p>The proposal will funnel heavy traffic onto Vines Lane, a narrow, historic road entirely unsuitable for increased volume. This creates a high-risk environment at the junction of Maidstone Road and Crow Lane—an area already known for poor sightlines—and places pupils crossing between school buildings in direct path of displaced vehicles. Displacing traffic onto the perimeter of The Vines contradicts Policy DM10. Rather than reducing pollution, this plan concentrates emissions directly alongside classrooms, playing fields and protected parkland.</p> <p>The consultation process has been deeply flawed:</p> <p>It is unclear if Crow Lane is included in the restrictions.</p> <p>There is no confirmation on whether the scheme operates during school holidays or which school's calendar is the benchmark.</p> <p>Physical notices were posted in a way that obscured the contact email, hindering a fair public response.</p> <p>I strongly support the 'Rochester Residents Alternative Plan'. A comprehensive 20mph limit across the entire area—including St Margaret's Street, Vines Lane and the surrounding residential roads—would improve safety for everyone without the artificial and dangerous traffic concentrations created by the Council's current proposal.</p> <p>On a personal level, the resulting congestion and parking restrictions will significantly disrupt my daily routine and local access. I urge the Council to reconsider this scheme in favor of a wider, more balanced 20mph zone.</p> | <p>Feedback noted.</p> <p>The aim of the school street is to create a safer, more pleasant environment outside the school gate improving pupils' ability to safely walk to school.</p> <p>While we appreciate initially this may mean a change of routine for some families, by reducing the number of cars outside of school gates, we reduce the likelihood of collisions.</p> <p>With any changes to the highway, it is important to recognise that introduction of new schemes will always involve some element of traffic displacement, especially within the short term.</p> <p>However, while this potential for displacement is acknowledged, it is pertinent to emphasise that the intention of a school street is to reduce the immediate risk of vehicle collisions with more vulnerable road users, like pedestrians, outside of the school gate. By doing this, we can improve safety outcomes for our children.</p> <p>Further to this, across the school streets programme, schemes are subject to a monitoring period after implementation.</p> <p>The scheme also aims to encourage use of more sustainable forms of travel, like walking and cycling, to school to reduce levels of traffic in and around the school gate.</p> <p>e with best practice and council policy, an open and accessible engagement process was conducted to build understanding and seek feedback on the proposal.</p> <p>The scheme was subject to multiple stages of engagement, including an initial public consultation, an extended statutory Traffic Regulation Order consultation period, publication of the Notice of Proposals in the Medway Messenger, site notices installed in the vicinity of the school, and direct notification to statutory consultees</p> |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                 |

|  | Yours sincerely,<br>[REDACTED]                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | and relevant stakeholders. In addition, information was published on the Council's website and feedback received at each stage was considered and, where appropriate, informed design amendments. Furthermore, the school was actively engaged throughout the development of the proposals, with discussions and design iterations informed by feedback received at each stage. |
|  | Hi,<br><br>Could you acknowledge receipt of this, please?<br>Also, I would like to add a further point to the objection:<br><br>All of us who live on the suspended-pavement side of Maidstone Road have nowhere to park outside the property. We are entirely reliant on the surrounding roads, primarily King Edward Road and Roebuck Road, for parking. We cannot have the proposed changes impact on our ability to park on King Edward Road and Roebuck Road.<br><br>Please acknowledge receipt of this objection.<br>Many thanks,<br>[REDACTED]                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Objection noted.                                                                                                                                                                                                                                                                                                                                                                |
|  | *who live on the suspended-pavement side of Maidstone Road...                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Objection noted.                                                                                                                                                                                                                                                                                                                                                                |
|  | Thank you for confirming receipt and forwarding our inputs to the relevant parties.<br><br>It's very important that this new deal and setup works for everybody impacted by the changes.<br><br>Best regards,<br>[REDACTED]                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Objection noted.                                                                                                                                                                                                                                                                                                                                                                |
|  | Objection to Proposed School Street Scheme near King's School Rochester<br><br>Dear Sir,<br><br>I am writing to formally object to the proposed School Street scheme in the vicinity of King's School Rochester. While I appreciate the intention to improve safety and air quality, the current proposal does not adequately reflect the realities of the school's community or the local road network.<br><br>A key issue is the nature of the school's catchment area. Unlike a typical neighbourhood school, King's draws pupils from a wide geographical region. Many families travel considerable distances each day, with average journey lengths approaching nine miles. A substantial proportion of pupils live well beyond reasonable walking distance, particularly younger children. As a result, the reliance on car travel is not a matter of convenience but necessity. Introducing restrictions designed for schools with predominantly local intake fails to account for this fundamental difference.<br><br>There are also serious concerns about how traffic will be redistributed. The proposal appears to divert vehicles onto Vines Lane, which is neither designed nor suitable for increased traffic | Objection noted.                                                                                                                                                                                                                                                                                                                                                                |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |        |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
|  | <p>flow. This is especially troubling given that it is already used by pupils as a key crossing route during busy periods. The nearby junction connecting Vines Lane with Maidstone Road, Crow Lane and Lockington Grove is already difficult to navigate and suffers from limited visibility. Increasing traffic pressure in this area risks making an already challenging location more hazardous.</p> <p>From an environmental perspective, the anticipated benefits are questionable. Shifting congestion rather than reducing it is likely to concentrate emissions along Vines Lane, directly adjacent to The Vines and close to areas used by both pupils and the wider community. This outcome appears counterproductive, particularly given the importance of preserving green spaces and maintaining air quality in places intended for recreation and wellbeing.</p> <p>I am also concerned by the lack of clarity surrounding how the scheme will operate in practice. Important details—such as the precise boundaries of the restriction, whether roads like Crow Lane are included, and how the scheme will function during school holiday periods—have not been clearly communicated. Additionally, the way consultation materials have been presented locally has made it unnecessarily difficult for residents to access key information and respond effectively. A proposal of this significance should be supported by a transparent and accessible process.</p> <p>In contrast, I would support a more balanced approach that improves safety without displacing traffic into unsuitable areas. Measures such as extending a 20mph limit across the surrounding road network would provide a more consistent and less disruptive solution, benefiting pedestrians and residents alike while avoiding the unintended consequences of the current plan.</p> <p>For these reasons, I urge the Council to reconsider the proposed scheme and explore alternatives that better reflect the needs of the school community and the character of the local area.</p> <p>Yours faithfully</p> <p>[REDACTED]</p> |        |
|  | <p>Good morning [REDACTED]</p> <p>Kent Police have no specific observations to make regarding the waiting restriction proposals, however in general terms we would expect the following:</p> <ul style="list-style-type: none"> <li>• The application meets the necessary criteria</li> <li>• The introduction or removal of Parking restrictions complies in all respect with the Traffic Signs Regulations and General Directions 2016</li> <li>• The introduction of such measures will not leave the Police with the task of carrying out constant enforcement issues</li> <li>• The safety of other road users is not compromised by the introduction of these measures</li> </ul> <p>Civil Parking Enforcement will require Local Authority to ensure resources are available to enforce these proposals.</p> <p>Our reference for your proposals is 072/26</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Noted. |
